Sired by MCKINNEY; dam MOUNTAIN MAID (dam of Tom Carneal 2:08¹/₄) by Cresco 4908 (sire of Allie Cresco 2:13, etc.); next dam by Cloud.

Will make the Season of 1906 at

PLEASANTON, CAL.

KENNETH C. was one of the fastest of an exceptionally good lot of three-year-olds that raced in California in 1905. He is a splendid individual, has size, style and quality, and the grandsons and granddaughters of McKinney through Kenneth C. will be equal to any in the land.

Terms { \$30 for the Season.
\$15 for Single Service.

Address

S. K. TREFRY, Pleasanton.

MONTEREY 2:09 1-4

Reg. No.
31706(Sire of IRISH 2:08¹/₄, Fastest Four-Year-Old Pacer of 1904).By SIDNEY (grandsire of Lou Dillon 1:58¹/₄); dam, HATTIE (also dam of Montana 2:16) by Commodore Belmont 440. MONTEREY 2:09¹/₄ stands 15.3 hands, weighs 1200 lbs. and is one of the finest individuals on this Coast. FEE, \$50 for the Season.YOSEMITE By MONTEREY 2:09¹/₄ Dam, LEAP YEAR 2:26 (full sister to Iago 2:11) by Tempest 1881, son of Almont 33

YOSEMITE is a very high-class young trotter, and as he will be trained this year he will be allowed to serve only six choice bred mares. FEE, \$25 for the Season.

Will make the Season at SAN LORENZO and ALAMEDA.

I have leased a fine, roomy barn with 14 large box stalls on Sherman street, four blocks from the race track, Alameda, and am prepared to do public training. Would like to get two good trotters and a promising three-year-old to prepare for the races this season.

The following Stallions, owned by W. A. Clark Jr., will make a public season:

Bon Voyage

Champion 2 y.o. Stallion of 1904
Champion 3 y.o. Stallion of 1905

Two-year-old Record.....2:15
Three-year-old Record.....2:12½
Timed in a Race.....2:10½

WINNER OF HARTFORD FUTURITY (\$8500) FOR 1905.

BON VOYAGE (3) 2:12½ is by Expedition 2:15½ by Electioneer 125; dam Bon Mot by Erin 2:24½; second dam Farce 2:29½ by Princeps 538; third dam Roma by Goldust 150. For breeding, individuality and racing qualities he is unsurpassed. He is a rich bay in color with black points, stands 15.3 hands and when matured will weigh 1400 pounds.

Season of 1906 at PLEASANTON RACE TRACK, where he will be limited to twenty outside mares.

\$50 for the Season. USUAL RETURN PRIVILEGES, or money refunded should mare not prove in foal. A rare chance to breed good mares to an exceptionally high-class and highly bred young stallion.

Highland

TRIAL 2:12

(at Four Years Old)

Bred at Highland Stock Farm, Dubuque, Iowa

By EXPRESSO 29199 (half brother to Expressive (3) 2:12½) by Advertiser 2:15½, son of Electioneer 125; dam ALHA 2:23½ (dam of Aegon 2:18½, sire of Aegon Star 2:11½, etc.) by Alcantara by George Wilkes 2:22; second dam Jessie Pepper (dam of 2 in list and 3 producing sons and 7 producing daughters) by Mambrino Chief 11, etc.

Terms for the Season.....\$25

HIGHLAND is a grand looking young stallion, seven years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed, and has trotted a quarter in 31 seconds over the Pleasanton race track.

HIGHLAND is a coal black horse with one white hind ankle, stands 16.1 hands high and weighs close to 1200 pounds.

TED HAYES, Manager, Pleasanton, Cal.

ZOMBRO 2:11

GREATEST SON
OF
McKINNEY 2:11½

Will make the Season of 1906

At LOS ANGELES, CAL.

Fee, \$50 for the Season.

With usual return privilege provided I still own the horse and mare does not change ownership. Money due at time of service, or all bills paid before mare is taken away.

ZOMBRO is the sire of eleven standard performers as follows: Zephyr 2:07½, timed separately in a race in 2:05½; Charley T. 2:13½, trial 2:10½; Italia 2:14½, over half-mile track, trial 2:08½; Bellemont three years old, record 2:15½, trial 2:11½; Zombowette 2:16½, trial 2:14½; Zenobia 2:19, trial half in 1:05½; Tee Des Cee 2:19½, trial 2:13½; Lady Zombro 2:24, trial 2:10; Lord Kitchener 2:24½, trial 2:19½; Zealous 2:26½, trial 2:20; Nina Bonita 2:27.

ZOMBRO has won more first prizes in the show ring than any California stallion, and his get have sold for more money during the past three years. He is the only horse living or dead that ever won forty heats in standard time as a three-year-old. His get are all large, beautifully formed and endowed with great natural speed. The choicest pasture for mares. Address

GEORGE T. BECKERS, 3949 Figueroa St., Los Angeles, Cal.

THE STANDARD TROTting STALLION

Murray M. 2:14

(WINNER OF THE BREEDERS FUTURITY, \$6000, IN 1904)

Will make the Season of 1906 at the

Race Track, University Station,
LOS ANGELES, CAL.

Terms, \$40 for the Season, with usual return privileges.

MURRAY M. 2:14 is by Hambletonian Wilkes 1679 (sire of Phoebe Wilkes 2:08½, Phoebe W. 2:08½, Robert I. 2:08½ and Maud Murray 2:12, MURRAY M. 2:14 and La Belle (2) 2:16) by Dawn, sire of 5 in 2:30 list and dams of 8

MURRAY M. 2:14 is a handsome five-year-old bay stallion with small star and black points. In his three-year-old form he stood 16 hands and weighed 1125 lbs., and is a natural, square-gaited trotter. He is a horse of grand finish, plenty of substance, excellent disposition. He has a stout back, strong loins and stifles good feet and legs. His breeding is excellent, and with his individuality he presents a popular and speed-producing combination of the kind that gets money on the race course and prizes in the show ring.

Excellent pasturage at reasonable rates. For further particulars address

PROF. H. B. FREEMAN, University Station, Los Angeles, Cal.

KINNEY WILKES

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED

NUTWOOD WILKES 2:16½ { Sire GUY WILKES 2:15¼
Dam LIDA W 2:18¼
by NUTWOOD 2:18¼

NUTWOOD WILKES 22116 is the only stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12½ respectively. Who is it? 2:12, ex-champion three-year-old gelding of the world, reduced his record to 2:10¼. John A. McKerron 2:04¼ (2:12¼ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES is the sire of John A. McKerron 2:04¼ (sire 3 two-year-olds in 2:30 list), Tidal Wave 2:09, Miss Idaho 2:09¼, Who Is It 2:10¼, Stanton Wilkes 2:10¼, Cresco Wilkes (4) 2:10¼, George B. 2:12¼, Claudius (4) 2:13¼, North Star (3) 2:13¼, Bob Ingersoll (4) 2:14¼, and 32 in 2:30 list.

His sons Nearest and Stanton Wilkes have sired Alone (4) 2:09¼ and Cavaliero 2:09¼. His daughters produced Miss Georgie 2:10¼, Mona Wilkes (3) 2:11¼, Lady Mowry (4) 2:12¼, Caroline L. 2:14¼, Iolito 2:15, and Miss Wian 2:15¼.

NUTWOOD WILKES will make the Season of 1906 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee \$50 FOR THE SEASON, with the usual return privileges if horse remains my property. Good pasturage at \$3 per month. Bills payable before removal of mare. Stock well cared for, but no responsibility assumed for accidents or escapes.

Young Stock by NUTWOOD WILKES for sale.

IRAN ALTO

24586
Rec. 2:12¼

Sire, PALO ALTO 2:08 3-4
Dam, ELAINE (4) 2:20

IRAN ALTO'S sire and dam have both held champion trotting records and his dam and grandam both produced a colt that was a world's record breaker, and his grandsire has sired several trotters that broke world's records. No other horse with a record as fast as IRAN ALTO'S can claim this. At nine years he had sired ten colts, four of them with records as follows: Dr. Frasse 2:13¼, Thomas R. 2:15, Vendome 2:17, Dr. Frasse's Sister 2:25—all at four years old. Who can name a horse whose first ten colts can beat that?

Will Make the Season of 1906 at WOODLAND, CAL.

SEE \$40

\$30 due when mare is bred and
\$30 payable when mare is known to be in foal.

ITHACA GUNS

THIS illustration shows the double thick nitro breech and narrow skeleton rib of an ITHACA No. 7 \$300 list gun. This feature, together with the reinforced frame, reinforced stock and double bolt, makes the ITHACA the strongest and safest gun for Nitro powder. We build everything from a featherweight 5½-pound 20-gauge gun to a 10½-pound 10-gauge duck, fox and goose gun. Send for Art Catalogue describing 17 grades 10, 12, 16 and 20 gauge guns ranging in price from \$17.75 to \$300.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Quinn's Ointment

Will Make A Horse Over;

will put sound legs under him and will save him from the cheap hawker and trader. It is the standard cure for Sprains, Curls, Splints, Windpuffs and all the various lumps and bunches of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughpin and did it for good. My horse's leg is as smooth as ever."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars, testimonials, etc.

Occident Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Occident Stake of 1906, foals of 1903—Starting payment of \$50 due 30 days before the race.

THE GRAND CIRCUIT FOR 1906.

Detroit, Mich., July 23-Aug. 4.
Buffalo, N. Y., Aug. 6-11.
Poughkeepsie, N. Y., Aug. 13-18.
Readville, Mass., Aug. 20-25.
Providence, R. I., Aug. 27-Sept. 1.
Syracuse, N. Y., Sept. 10-15.
Columbus, O., Sept. 17-22.
Cincinnati, O., Sept. 24-29.

SEVERAL unavoidable circumstances have kept the date of sale of Mr. A. B. Spreckels' Aptos Ranch horses from being announced. In our next issue the date of the sale will be given and some interesting facts as to the individuality of the horses, their breeding, etc. The writer saw them last Saturday, and while the rain prevented us seeing them at work, we can truthfully say that they average very high in looks, and should excite some very lively bidding when they are offered. Sandy Smith is working them every day, driving on the roads, getting them accustomed to steam and electric cars, automobiles and every other sort of vehicle that a road horse is likely to meet. The roads around Aptos are much frequented by owners of the benzine buggies, and thus affords a splendid opportunity for the horses to get accustomed to them. The catalogues will be ready next week and will be the most complete issued for a sale in this city for many a day. The only trouble that can be found with the Aptos horses is that there are only 25 of them—hardly enough to go around.

A THREE THOUSAND DOLLAR STAKE is offered the 2:24 class trotters by the Denver Association, whose meeting will begin June 16th and close July 7th. This is the richest, but not the only stake offered the harness horses by the association whose meetings at Overland Park have been so successful in recent years. There is a \$2000 stake for trotters of the 2:20 class, one of \$1000 for trotters of the 2:30 class, and a \$500 stake for three-year-old trotters. For the 2:20 class pacers \$2000 is hung up, and for the 2:13 class \$1500. The three-year-old pacers are given \$500. Besides these rich stakes there will be a long list of purses advertised to close later on. The stakes close Saturday, April 7th. It looks as if Denver would have one of the big meetings of the year, and a green horse that can win those three big stakes will have \$3000 to his credit at this one meeting. Write to G. A. Wahlgreen, Secretary, Denver Colorado, for full program of class races and further information.

A TEN DOLLAR PAYMENT on all three-year-olds that will start this year in the Breeders' \$6000 Futurity will be due and must be paid on the first of next month if owners desire to keep their foals eligible. Remember the races take place this year. There is \$2000 for the trotting foals to compete for and \$1000 for the pacers. Here is a good money worth training a colt for, but unless this \$10 payment is made the colt cannot be start. Don't be April fooled into forgetting about it. The date when payment must be made is Monday, April 1st, which is just two weeks from next Monday.

THE HARTFORD MEETING at famous Charter Oak Park announces several of its early closing stakes in this issue of the Breeder and Sportsman. Some of the conditions are new and novel and we advise every horseman who intends to race over east this year to read the advertisement carefully. The meeting at Hartford is always one of the best conducted and most popular on the Grand Circuit.

CONCORD RACE TRACK is having about \$4000 expended on it in the way of new box stalls, new water supply, etc., and will be for lease. Concord climate is the equal of any place on earth, and the track is a regulation mile. A good live man can make money with this property. See advertisement.

ANSWERS TO CORRESPONDENTS.

J. A. Cody, Ventura: The French, German and English coach breeds were evolved in much the same manner. The coach type was desired, and breeders mingled the blood of the thoroughbred horse with the coarse heavy breeds, hoping to establish a happy medium between the two that would fill the bill. Their idea was that the thoroughbred blood would give finish to the other breeds' size and trotting action. The great trouble in all these breeds is that neither type nor size has been fixed in them, and they come in all sizes from small ponies to big seventeen-hand horses. They have neither the speed nor the endurance of the American trotting-bred horse, and the proportion of horses of the show type is as great among the trotting stallions as among those of the foreign breeds.

William McDonald, Livermore: Jim Lick was by Homer, a son of Hambletonian 10. The dam of Jim Lick was the Springer mare by Harker's Buster, son of imported Buster.

Wm. G. L., Bakersfield:—Flora D. was by Director out of a gray mare brought from Missouri and said to be of Copperbottom stock. We have no record of the other mare you mention.

WILL NOT LEAVE SAN JOSE.

San Jose, Cal., March 14, 1906.

Mr. F. W. Kelley, San Francisco, Cal.:

Dear Sir—Since it has been reported that the San Jose track is to be closed, I have had many inquiries as to whether Kinney Lou would be taken away from there or not. I wish to state through the medium of the Breeder and Sportsman that Kinney Lou will make the entire season of 1906, as advertised, at Agricultural Park, San Jose.

BUDD DOBLE.

VALUABLE TO AUTO DRIVERS.

The Supreme Court of Indiana has just decided a case that is of value to both horsemen and auto drivers to know about. Probably the Supreme Courts of all States will hold this interpretation of the law of the road. The Indiana court held that the care which the driver of an auto must give to his machine and the road he is traveling does not excuse him from the duty of observing horses that he meets and noticing whether or not they are frightened, and if frightened he must stop his machine. The case involved in this decision went up from the lower courts. Sarah Orner sued William McIntyre of Auburn, Ind., and was awarded \$2500 damages for injuries caused in a runaway started by McIntyre and his automobile. He ran the machine within a few feet of the horses, although they were plunging wildly. Mrs. Orner was thrown out and seriously injured.—American Sportsman.

RED BLUFF RACE TRACK.

Red Bluff, March 15.—At a meeting of the old directors of the Tehama County Fair Association this afternoon, it was decided to reorganize the race-track association. The association was formed about twelve years ago, and an elegant piece of property for the track was purchased from the Cone Ranch Company. The land was never paid for, and the ranch company now holds a mortgage on it. It has given an option on the property to run until April 20th, and it is for the purpose of forming a stock company to purchase it that today's meeting was held. The stock will be put on the market at \$10 per share.

HOPES TO MEET HER.

Tulare, Cal., March 13, 1906.

Editor Breeder and Sportsman: I took the "Breeder" of last week down to the box stall of the eleven-months-old Lady Stoneway. She adjusted her goggles, read the account of Ted Hayes' little speed marvel at Pleasanton, and looked up, saying: "Send the little Highland lassie my compliments; tell her that I hope to make her acquaintance in the Breeders' Stake, and that I paced an e'gth in 20 seconds."

JAKE BROLIAR.

Mr. M. L. Lusk of Sacramento, who has leased the stallion Almaden 2:22½ for two years, writes as follows: "The untired mare May Belle by Don Marvin 2:22½ is being bred to the colt trotter Almaden 2:22½. May Belle is a snappy and finely gaited gray, bred and owned by Mr. Fred Davis of Omo ranch, El Dorado county. She is out of the noted Belle Blanche by The Moor, second dam Belle View Maid by Peck's Idol (son of Mambrino Chief), third dam by Pilot Jr., fourth dam Kate Tabor by Mambrino Messenger. Belle Blanche is the second dam of two two-year-olds to beat 2:20, one being Wiggins 2:19½, the great sire of two-year-olds, having got Katherine A. 2:14 and Helgar 2:15½, and several other two-year-olds in the 2:30 list. May Belle is bred very much like Walter Mastin's good colt Marvin Wilkes (3) 2:18 by Don Marvin, dam by Sable Wilkes, who was out of Sable by The Moor. Marvin Wilkes was second to Almaden in the Breeders' two-year-old stake of 1903 and in the Occident of 1904, and was winner of the Stanford stake of 1904. As Wiggins is by Aberdeen, a Star-Hambletonian, and Almaden is by Direct 2:05½, an inbred Star-Hambletonian, it is to be hoped that May Belle will be the opening wedge in making Almaden 2:22½ the Wiggins of the West.

No more successful breeding farm has been established in California than Baywood Stud at San Mateo. The Hackney stallion Green's Rufus has been the premier at this place, and the number of handsome carriage and park horses by him that have been sold from the farm in the last few years are evidence of his success as a sire.

MORGAN, CHARLES alias Jack Henderson, plasterer, late of Sydney, Australia, please write Frank Taverna, 28 Elizabeth Street, Sydney, Australia.

NOTES AND NEWS.

There will be an excellent program of races today at the Pleasanton track, and among the horses to be exhibited will be the stallions Star Pointer 1:59½, Bonnie Direct 2:05½, Zolock 2:05½, Bon Voyage 2:12½, Greco 2:30, Kenneth C. 2:17, Bonnie McK, Highland, and several others.

The manager of an eastern trotting track says if Ed Sanders or George Spear ever appear on his track during a meeting they will get the grand bounce in short order.

A Cleveland man recently tried to buy Glenwood M. 2:07½, and was told that nothing short of \$25,000 would induce his owner to part with him.

The accompanying cut is of the colt Mercury, a son of Zombro 2:11, dam Ella T. (own sister to the gray pacing ghost Waldo J. 2:08) by Bob Mason. The picture was taken last December when Mercury was ten months of age, at which time he weighed 720 pounds, and brought over a dollar a pound, as Mr. James Coffin of this city purchased him at that time for \$750. Mercury was bred and raised by Mr. Ed. Sewell of Santa Paula, who has sent Ella T., his dam, to Zombro again this year. There are few handsomer colts than this youngster and like all

MERCURY

the Zombros he is perfectly gaited. Ezra Tilden, the young Oregon trainer, has eleven Zombros in training at Los Angeles and there is not a poor one in the bunch. Gerald G., a three-year-old by Zombro, trotted a quarter in 32½ seconds at Los Angeles last week and he looks like the goods for the three-year-old stakes this year in which his owner, Mr. Todhunter of Sacramento, has him entered. Ezra Tilden owns a Zombro filly out of the dam of Betty Gentry 2:16 that will not be two years old until July, and has had about seven weeks work, yet she paced a half in 1:12½ the other day and the last eighth in 16½ seconds.

Stanley Dillon 2:07½ will be raced on the Montana circuit this year by Robert Conway of Helena, who purchased him recently at a Chicago sale.

Mr. S. B. Wright of Santa Rosa sold last week to Mrs. L. J. H. Hastings of Los Angeles the great brood mare Eveline, by Nutwood 600. Eveline is the dam of Ole 2:10½, Roblet 2:12, Tietam 2:19, Maud Fowler 2:21½, and the grandam of Bonalet (3) 2:09½. Robin Stanley 2:29½, etc., and is one of the greatest brood mares in California. She is now 23 years of age but does not look to be over half that old, and is safely in foal to Lynwood W. Mrs. Hastings already owns the three-year-old Judge Dillon, by Sidney Dillon, and out of Eveline. We understand that it is Mrs. Hastings' intention to breed Eveline this year to W. G. Durfee's magnificent stallion Coronado 2:12½ by McKinney 2:11½, and the cross should be an ideal one.

Two-Minute Stock Farm has recently sold at good prices several high class youngsters by Star Pointer 1:59½. There is a big demand for the get of this horse and those who secure colts by him while he is in California will find them good investments. Star Pointer will be here for two years and perhaps longer. We expect to see him get some two-minute pacers out of the mares with Steinway, Director or Wilkes blood.

S. T. Harbison & Co. of Kentucky held their first sale of saddle horses for the year in the American Horse Exchange in New York two weeks ago. The highest price paid was \$1,020 for the brown gelding Peter Pan, and Man and Superman were taken together at \$1,700 by the same purchaser. Twenty head were sold for an average of \$483.

A dispatch from Reno, Nevada, says that M. L. Yori, a Glendale rancher, has been granted a permit by the County Commissioners to kill wild horses in the vicinity of Pyramid Lake, thirty miles from Reno. The wild animals are becoming so numerous, he claims, that they are ruining his ranges and luring away his domestic animals. There are thousands of wild horses about the lake, the number having increased rapidly during the last few years.

Menlo Boy \$7,401, son of Prince Airlie, will make the season at Salinas in charge of John Harvey.

David Blanchard of Boston, who gave the \$10,000 purse for stallions in 1874, which was won by Smugler 2:15½, and known for years as the "Blanchard stallion race," is hale and hearty at 75 years of age. He is looking for a free-for-all trotter to come down the line with this summer.

Joe Cuicello has a ten-months old colt in his string that gave him a little surprise the other day. The youngster carries the distinguished name of Sergius Witte, and was bred by Mr. James Coffin of this city, who also owns his sire Cassian 2:29½ by Mendocino, and his dam Lilith 2:22½ by Secretary. The colt has not been broken a month yet, but he is learning to trot and stepped a quarter at Pleasanton last week in 53 seconds, which is evidence that he has much more speed than the average colt of his age. Mr. Coffin is particularly interested in this youngster, as he broke and drove his dam, using her on the road a great deal as she was one of his favorite roadsters.

Ed Dyer is wintering his pacer, Sherlock Holmes 2:15½, by Zolock, and his trotter Gyr Falcon, by Zombro, at Spokane.

On the front page of the Breeder and Sportsman this week is a picture of Sophia McKinney, a very handsome mare owned by Mr. J. W. Kelly of Maple Glen Farm, Duncan, British Columbia. This mare is by McKinney out of Bessie Wilkes, dam of Trilby Direct 2:08½, by Sable Wilkes, second dam the thoroughbred mare Bessie Sedgwick by Joe Daniels. Bessie Sedgwick is also the second dam of Bayswater Wilkes 2:25, sire of Kelly Briggs 2:09½ and Friskarina 2:13½. Mr. Kelley owns a very handsome yearling colt by Nutwood Wilkes out of Sophia McKinney, that is entered in Breeders' Futurity for foals of 1905. On his breeding and his looks he should be a rare good one.

From all points come reports of Searchlight foals that are most promising. Louis Werner of 810 Bryant street has one that is now twenty months old. This is a handsome brown colt out of Princess Muffit by Gossiper 2:14½, second dam Princess 2:19½ by Woolsey, own brother to Sunol 2:08½, third dam Oakland Maid 2:22 by Speculation, fourth dam Lucy Vernon 2:29½. Princess Muffit, the dam of this colt has no record, but worked miles in 2:20 with little work. The colt is fourteen hands high and weighs 800 pounds. He is one of the squarest and most perfectly gaited trotters in the country and if he meets with no accident should be a worthy son of an illustrious sire. He is being broke and handled by Harry Werner, who is a very careful man with the youngsters.

John A. Wharton, a farmer of Madison county, Tennessee, thinks he has discovered just how to breed carriage horses. He owns two mares that were sired by a Percheron horse and out of a trotting mare by Telegraph, sire of the pacer Cyclone 2:11½. Mr. Wharton bred these mares (they weigh 1500 pounds) to the saddle stallion Goodman, son of Forrest Denmark, and has two yearlings that he claims are "just what the Doctor ordered." Perhaps Mr. Wharton has hit it, but one can tell better when his colts are grown to maturity.

Frank E. Smith, a well known horseman of Walla Walla, who recently shipped several valuable horses from Los Angeles to his home, had the ill luck to have two of the injured in a railway accident at Portland, Oregon. A freight engine ran into the car carrying the horses and which was standing on the track at the Portland station.

On Wednesday evening of last week, sixteen enthusiastic horsemen of Healdsburg, Sonoma county, met and formed an association to be known as the Healdsburg Amateur Driving Club. It is the object of the new club to fit up a race track near Healdsburg upon which they may be able to train their horses and in course of time will be able to hold matinee races. The following officers were selected to care for the welfare of the new club: President, Eli Bush; trustees, Frank Hazen and Dr. H. Hewitt; secretary and treasurer, Clarence Evans. Work has already been begun on the track.

The San Francisco Chronicle states that Murray Howe had Ed Sanders with him while on his trip to California. He took Ed Malloy former caretaker of Lou Dillon back with him when he returned.

T. P. Schwartz of Woodland has taken his two-year-old colt Judge Nusbaumer to his ranch at Williams, where he will breed him to two or three mares during the next six weeks, and then send him back to Det Bigelow to be trained on the Woodland track. This colt is by Falrose out of Lucy B. 2:17 by Alex Button and is a grand looking young horse.

Frank Turner, proprietor of the Santa Rosa Stock Farm, paid a visit to Pleasanton this week and while there saw Millard Sanders drive Carrie Dillon, the three-year-old filly by Sidney Dillon, out of Biscari by Director. It was the seventh mile this filly had ever been driven on the trot. She reeled it off in 2:28, last half in 1:11, last quarter in 34 seconds, and did it so easily and cheerfully that Sanders says he knows he can drive her a mile in 2:20. Mr. Turner says Carrie Dillon looks more and acts more like Lou Dillon than any of the many he has raised on the Santa Rosa Stock Farm.

A gentleman who visited Pleasanton two weeks ago and saw Millard Sanders working the young Sidney Dillons owned by Sterling R. Holt of Indianapolis, says that he wouldn't spend any time looking up the pedigree of Lou Dillon's dam, as from what he saw he believes Lou got the most of her championship abilities from her sire, Sidney Dillon. Nearly every one of the twenty-five Sanders is training have that racy, high-class look that Lou Dillon has, and carry the marks of a little white on the face and a hind ankle or two white, as well as the color of their sire. In this gentleman's opinion Lou got her speed from her daddy.

Mr. W. H. Graham of Fresno has shipped his trotter Allesandro 2:23½ to Pleasanton, where he will be trained by Chas. DeRyder. Allesandro is now a five-year-old and has developed into a very handsome horse, judging from a photograph that Mr. Graham recently sent us, and he says the horse is even better than the photo. Allesandro took his record in the third heat of a race at Sacramento when he was a three-year-old. He is a son of Athaneer.

George Fox, of Clements, Cal., who sent his mare Bessie Pancoast by Pancoast to be bred to Cresceus three years ago, has her back home with two fine fillies by the champion and the mare is due to foal again soon. These fillies should be worth a lot of money. The mares of the McGregor family are proving great brood mares, and these are especially well bred. Bessie Pancoast is out of Bessie Bowne by Dictator, second dam Lady Lightfoot by Mambrino Time, third dam by Paddy Burns and fourth dam by Mosely's Copperhead.

W. G. Durfee has a young stallion in his string at Los Angeles that is headed for 2:10 honors and progressing very fast. This is Carloklin, owned by C. L. Jones of Modesto. As a three-year-old in 1904, Carloklin started in three races. His first start was in the three-year-old division of the Breeders Futurity at San Jose, when he won third money, the race going to Murry M. in 2:19½, 2:20½ 2:20. His next start was in the Occident Stake which proved to be a seven heat affair that year and was finally won by Almaden. Carloklin won the second and third heats in 2:21½ and 2:22½ and divided second and third money with Marion Wilkes. A week later he started in the Stanford Stake, winning a heat in 2:20½ and getting third money. In every race he showed that he was both fast and game, although he was far from being a well colt, having been very seriously ill a week before the Breeders meeting, so that his owner had almost given up hopes of starting him. Will Durfee has been working Carloklin some this winter, and last week Mr. Jones went to Los Angeles and had the pleasure of seeing him trot a mile in 2:24 with a strong wing blowing at the time. Carloklin is royally bred, being by McKinney 2:11½, by Carlotta Wilkes, dam of Volita 2:15½, by Charley Wilkes, second dam Aspasia, dam of Faustina 2:19½ by Alcantara. He was bred at the Santa Rosa Stock Farm and was purchased by Mr. Jones when a yearling. He gives every promise of securing a record of 2:10 this year.

The photo-engraving printed herewith is from a recent photograph of the registered two-year-old pacing stallion Albert Direda 0883, by Robert Direct, dam the great brood mare Ida May, dam of Homeward 2:13½ and Homeway 2:14½, by Grosvenor. Albert Direda is a candidate for the two-year-old pacing division of the Breeders Futurity this year and is thought to have a good chance to earn part

ALBERT DIREDA

of the money. He is now stepping quarters in 40 seconds very easily at Hanford for his trainer, C. G. Owens, and is improving right along and acting like a genuine race horse. This colt is owned by Mr. L. Y. Dollenmayer of Hanford.

Ed. Geers has a five-year-old pacing mare in his string that is expected to be one of the sensational performers of 1906. She is by The Earl (son of Mambrino King and Princess Royal by Chimes) out of Bessie Hal, dam of Direct Hal 2:04½.

J. B. Iverson has placed his trotter Prince Gift 2:12 with Charles Whitehead, at the Salinas race track, to be prepared for the State circuit. If the veteran stands the "prep," he is liable to be "somewhat bothersome" to the younger horses in his class.

ZOMBRO AS A SIRE.

The great success of Zombro 2:11 as a sire of trotters is a matter of satisfaction to every horseman who remembers the wonderful campaign he made as a three-year-old in 1895, when he trotted forty winning heats in standard time, something no three-year-old ever did before or has since. That year he proved himself a game, consistent trotter and as he was a horse of very handsome proportions, he was very popular with everyone who saw him in his races. The other day the editor of this paper asked Geo. T. Beckers, the breeder and owner of Zombro, for an account of how he came to breed him, and Mr. Beckers gave the following story:

"When I was living in Phoenix, Arizona, in 1884, I went to Kentucky and bought from Gen. W. T. Withers of Lexington four standard bred mares, one of them being Whisper by Almont Lightning. I also purchased from the General at the same time the standard bred stallion Forrest Clay 1934, that afterwards obtained a record of 2:40½ at Phoenix. I bred Whisper to Forrest Clay and got a brown colt that I named Governor Zulick. He was a natural born trotter and could show lots of speed at the trot when a yearling. I concluded that a mare which could produce such a promising trotter by a horse that had no more speed than Forrest Clay ought to raise a great trotter from a great race horse. In 1890 I moved from Phoenix to San Bernardino and saw McKinney race there that year as a three-year-old, showing himself to be a very promising race horse, and right then and there I made up my mind to breed Whisper to him. In 1891 I shipped her and my filly Queen B. by Forrest Clay to Los Angeles and both were mated with Mr. Durfee's stallion. The next year both mares foaled, Whisper having a colt that is now known to fame as Zombro 2:11 and Queen B. dropping a filly that I named Rose McKinney that is now the dam of Almaden 2:22½, winner of the two-year-old division of the first Breeders' Futurity.

I weaned Zombro at nine months of age, and gave him all the grain he could eat in the meantime. He grew nicely and always looked strong and well. In the fall of 1893, when he was about eighteen months old I showed him in the standard classes at the Los Angeles and Santa Ana fairs with colts of his age and he won at both places over strong fields. Whisper, his dam, also won in her class at both places, with a filly foal at her side by McKinney. This filly got into a barb wire fence in the spring of 1894, and afterwards died from blood poisoning. In the spring of that year I moved back to Phoenix and drove all my horses, about eleven head, overland. In the summer of July, 1894, when Zombro was two years old I started in to break him to drive. He was very easy to break, and I jogged him about two miles every day for two months, driving him mostly to an open buggy. I then traded for an old attachment sulky and began to speed him a little. He seemed to know nothing but trot and that fall I started him in a two-year-old trotting race at Phoenix and won pretty easily in 2:42½ and could have trotted a mile in 2:30, although I had never trained a trotter or put a pair of boots on a horse in my life before. In fact Zombro taught me about all I know about driving a trotter.

The fall and winter of that year he showed me a half in 1:10 and a quarter in 34 seconds, and I then let up on him for three months on accounts of sickness in my family. I could not spare the time to devote to the colt as I was attending the sick night and day for over ninety days.

In the spring of 1895, Mr. C. A. Durfee, owner of McKinney wrote me in regard to leasing Zombro. He said that parties from Phoenix had told him "Beckers owned a McKinney colt that was a great trotter." You see that interested Durfee and he wanted Zombro to race to advertise his horse. I finally concluded to ship Zombro to Los Angeles to Durfee. About that time there were a number of purses and stakes closing, and I wrote to Mr. Durfee to enter the colt in everything he was eligible to, so before he had seen him that spring he had named him in \$8000 worth of purses, there being eight of them at \$1000 each. I shipped Zombro to Los Angeles about April 1st, and by May 1st he showed Durfee a mile in 2:24 and on May 6th one in 2:22½, a week later an easy mile in 2:20½, and by the middle of June he could have stepped a mile in 2:15 had Durfee wanted to let him.

In the latter part of June we started for Portland, Ore., for the summer races, and soon after arriving there Zombro had a very bad attack of distemper, and when the day of the first race arrived he had a big running sore under his jaw. He won his two races up there, however, the time of his six winning heats being from 2:20¼ to 2:23. This was during the first week in July, and Zombro took sick again on his way down to Sacramento where the breeders gave a meeting that year, opening July 20th. He lost his first race there but won second money, and you know the rest of his history."

As Zombro is the only horse that ever won forty heats in standard time as a three-year-old, an account of his other races that year will be interesting. In the first race at the breeders' meeting which Mr. Beckers refers to, there were twelve starters. The race was for horses of the 2:40 class and the starters were nearly all aged horses. The three heats were all in 2:21, Zombro being 2, 2, 3 in the summary. Prince Ira was the winner. Four days later he started in the three-year-old trot against Stam B. Dr. Puff, Auditor, Sidney Howard, Jasper Ayers, Lottie, Patti Rosa, Silver Ring and Carrie C., as high class a bunch of three-year-olds as ever started in California. Zombro had not recovered from his sickness, but he won the second heat in 2:19, the race going to Stam B.

The circuit horses then went to Vallejo, where

Zombro was entered in two races—the 2:20 class and the 2:24 class. In the first race he was outside the money, the race going to Boodle 2:12¼ in straight heats, best time 2:17. Three days later Zombro won the 2:24 class in straight heats, best time 2:17¼, beating such trotters as Ethel Downs, Lady O., Miss Jessie and others.

At Napa the following week he again met the three-year-olds of that year, and one of the greatest races ever trotted resulted. The first two heats went to Stam B. in 2:19½ and 2:16. Zombro won the next three in 2:16¼, 2:15¼, 2:15¼, with Stam B. second every time. Behind them were Stamboulette, Silver Ring, Dr. Puff, Lottie, Sidney Howard, Stella, Carrie C., Auditor and Our Seth.

The next meeting was at Woodland, where Zombro had two engagements, both of which he won. In the 2:27 trot he beat Letter B. McZeus, Columbus S and Silver Bee in three straight heats in 2:16¼, 2:16¼ and 2:14¼. Two days later he won the three-year-old trot in straight heats in 2:13, 2:14¼, 2:17, those behind him being Stam B., Jasper Ayers and Lottie.

At Sacramento September 9th Zombro was a starter in the 2:14 class and took second money, being beaten but a neck in 2:11, the first heat by the aged horse Iago.

From Sacramento the horses went to Stockton and there, September 20th, Zombro won another \$1000 purse in straight heats, time 2:16¼, 2:15¼, 2:17. From there on he won every race in which he was started that fall, one at Ventura, two at Santa Ana, and three at Los Angeles. At the last named place he beat Stam B., Jasper Ayers and Dr. Puff three straight heats in 2:13, 2:13¼, and 2:14¼. These were the four best three-year-olds out that year and the race was the fastest they trotted during the season.

DEATH OF SEYMOUR WILKES 2:08½.

Every horseman in California will sympathize with Mr. J. W. Gregory of this city in the loss of his grand stallion Seymour Wilkes, which occurred at Lakeville, Sonoma county, last Saturday. Several days previous Thos. Roche, who has had charge of this stallion for several years, was driving him on the road for exercise as was his daily custom. A man driving a fractious colt came along and for some reason the colt bolted and came in contact with the stallion, the shaft of the colt's sulky penetrating the stallion's side. Everything possible was done to save him but he died Saturday as above stated.

Seymour Wilkes was foaled in 1890, and was by Guy Wilkes 2:15¼, out of Early Bird by Playmail. He was bred by the late S. H. Seymour of this city and was a seal brown horse of very handsome proportions, standing 16 hands and weighing 1200 pounds.

He made his record in 1895 when he was five years old, and gained fame by defeating the Santa Ana stallion, Silkwood 2:07, at that time considered invincible by the horsemen of Southern California.

He started first that year at the Breeders' meeting at Sacramento in July and in the 2:16 class pace met and defeated in straight heats such horses as Loupe 2:09¼, Harvey Mac 2:14¼, Our Boy 2:12¼, and others.

At the State Fair in September he met Waldo J. 2:08, Pathmont 2:09¼, and W. Wood 2:07, and was heavily played to beat that fast field, but a break in the first heat placed him behind the flag.

At Ventura in October he was second to Waldo Jr. in the \$1000 free for all, and at Santa Ana the next week he failed to start in that class, letting W. Wood and Silkwood fight it out for first money, the former winning and pacing a mile in 2:09 the second heat. When they reached Los Angeles the 2:07 class had three starters, Seymour Wilkes, W. Wood and Silkwood, and about all the spare change in Santa Ana was carted over to Los Angeles to back the pride of Southern California. The well known driver Ed Lafferty, one of the best reinsmen that ever drove in this State, was behind Seymour Wilkes, and Mr. F. H. Burke was attending to backing him. The pools sold \$30 for Silkwood, the Santa Ana money making him the favorite. W. Wood tickets brought \$20, the wise money going in on him. Seymour Wilkes brought \$5 in the pools and they were purchased in a quiet and sort of reluctant way that made the public think they were only purchased for sentiment and not because the stallion had a chance. Seymour Wilkes won in straight heats and the boys who won carried Ed Lafferty from the sulky to the scales and made Rome howl, while a sulky decorated with pumpkins and alfalfa, the food Silkwood was supposed to be trained on, was hauled around the track. It was one of the greatest "coups" ever pulled off in California, and the few backers of Seymour Wilkes won several thousand dollars. The stallion took his record of 2:08½ in this race.

In the stud Seymour Wilkes has not had a very great opportunity, but he has sired a good trotter in Monroe 2:10½ and there are many of his get that will yet take low records. No horse in California has sired a more uniform lot of foals from all classes of mares, they being like him—large, well formed and with topky, fine appearance. The death of Seymour Wilkes is a loss to the breeding interests of California, and every person who has seen the horse and his produce will sympathize with Mr. Gregory in his loss.

The Denver association offers a \$3000 stake for 2:24 class trotters, the meeting to be held from June 16th to July 7th. The Pacific Coast Trotting Horse Breeders' Association renews its California stake of \$2000 for the same class, and the Oregon State Fair has hung up \$2000 for 2:17 class trotters. A horse that can win these three stakes will earn \$3500 for his owner. There were only sixteen trotters of all those that raced on the Grand Circuit last year that won so much money in their trip around the big ring.

NEWS FROM THE NORTH.

(Portland Rural Spirit.)

Dictatress 2:08¼ is safe in foal to Hal B. 2:04¼.

Roy Benton, the green trotter, that Henry Helman sold two years ago for \$2000, is being driven on the streets of Spokane in a private rig.

John Sawyer says he has the finest pair of Zombro fillies on the coast in his training stable at Irvington track. They are both trotters, look alike, act alike and trot like about \$2000 worth of horses.

Joe Huber, of Bozeman, Mont., is jogging eighteen head of trotters and pacers this winter from which he will select a racing string. Those most promising in his stable are Rita Huber and Lady Spokane.

L. C. McCormick is wintering his stallion, Harry McC at Irvington track and will most likely race him this fall. He is a clean gaited pacer and should go very fast.

Ira Slenker says he has the greatest two-year-old trotter in Oregon by Oro Guy, out of Alta Norte 2:16¼, bred and owned by J. A. Jones of Springbrook, Ore.

Howell W. Peel, of Spokane, owns one of the best and fastest McKinney stallions in the Northwest in Merry Monarch, whose dam is Deta, a full sister to Chehalis 2:04¼, Del Norte 2:08, Altacora 2:13, Touchet 2:15, Tenino 2:19½, Claymont 2:20½, Lyla 2:27, Coquta 2:30.

Altacora 2:13 pacing, a full sister to Chehalis 2:04¼, Del Norte 2:08, will be trained and raced this year on the North Pacific Circuit. It is expected she will easily enter the 2:10 list and will next year be bred to the champion pacer, Dan Patch. She has a two-year-old now sired by Joe Patchen, that is a very promising filly.

W. Gordon, of Heppner, Ore., owns a very promising filly by Special Telegram, out of a Morgan mare, that he thinks a great deal of. Special Telegram is one of the best bred stallions in Oregon and should be a great brood mare sire. Mr. Gordon also owns the stallion Delwood by Nortwood, by Del Norte 2:08, that will be in the stud this year.

The mile track at the Washington State Fair grounds, North Yakima, was never in better condition and there is a nice colony of trainers already congregated there. With plenty of shade and plenty of grass it makes an ideal place for training. Mickey Dillon, the old California trainer, says the Yakima country equals California as a training place. There has not been a day this year when the track could not be used to good advantage.

F. E. Smith, of Walla Walla, Wash., has shipped his stable of trotters from Los Angeles to his home in Walla Walla, where they will be kept in training for the coming campaign. He has Darktown, a five-year-old mare by Antrim, dam by Glenelg. She has worked miles in 2:30 and is good gaited; Pumpkin, a gelding, by Caution, out of a mare by Mohegan, has worked quarters in 32 seconds; Etta Pointer, yearling, by Sky Pointer Jr., dam by Guy Wilkes, a line trotter and very promising filly. In the car bringing Mr. Smith's horses is N. K. West's stallion, The Commonwealth 2:13¼, and Doc Clowes' stallion, Monarch, by Caution. He has his Kentucky saddle stallion in the shipment.

The handsome young stallion, Nocturno, will be in the stud this year at the Albany Fair Grounds and Independence. Nocturno is one of the choicest bred young stallions in the state, being sired by Alfonso, a son of the great Baron Wilkes and Alma Mater. His dam is by Feldmont, full brother to Hamlin's Almont, that did so much in the stud for Village Farm. His second dam is by the Morgan stallion Herod, a grandson of Sherman's Black Hawk. Third dam by Edwin Forrest 49, the sire of the dam of Mambrino King, the handsomest horse in the world and a great sire at Village Farm. With this breeding Nocturno could not help but sire prize winning colts such as were seen by him in the show ring at the great Lewis and Clark Stock Show wearing blue ribbons.

Probably the largest shipment of standard bred trotters that ever left Oregon for Canada, were shipped last week by W. W. Smith, of Lafayette, Ore., to G. S. Haight and W. J. Cowan, of Killarney, Manitoba, Canada. In the shipment was The Zoo, a four-year-old stallion by Zombro, out of Beulah, by Altamont, purchased from J. P. Reeves, of Cornelius; Malbrino, a thirteen-year-old stallion by Malheur, son of Altamont, out of Kitty R. by Hambletonian Mambrino, bought from W. W. Smith; Alta Dell 2:16 and a yearling filly by Diablo 2:09; Alta Hamlin, by Fred Hambleton, dam Dwina dam of Alta Del 2:16, Oregon Maid 2:08, by Altamont; Pearl Helen by Hambletonian Mambrino, out of Deta, full sister to Chehalis 2:04¼, Del Norte 2:08, etc., bought from W. E. Allison, representing Honeyman Bros.; Lovoso, by Lovelace, out of Timoso, dam of Dwina; and the thoroughbred stallion Henry Clay Rye, bought from Clay Bryan. Alta Dell 2:16 is by Holmdell 2:18¼, out of Dwina, by Altamont, and is in foal to Zombro 2:11. Lovoso is in foal to Hal B. 2:04¼. Alta Hamlin and Pearl Helen in foal to Nehalem, a son of McKinney. Malbrino is one of the best individuals in this state and a splendid sire of useful horses. The Zoo is a young horse full of promise as a sire and race horse.

SOMETHING DOING IN BUTTE.

Butte, Mont., March 10.—Everything is looking very favorable for our race meeting this year in Montana. The horse owners, breeders and fair and racing managements are all working harmoniously and everything points to the best racing season in the history of the state.

A company of Butte citizens has purchased the old Daly track for \$125,000 and will conduct hereafter annual races and fall fairs. This is one of the finest plants in the country and needs no introduction to horsemen, as Montana has established itself with its race meetings in the past. The great trouble with the last few meetings was that they were almost exclusively running meetings. This year it will be different, the harness classes and running classes getting an even break. With the forming of Montana circuit and arranging the dates so that no two towns conflict, thereby making the shipments as short as possible, it gives ten weeks of racing with only about two days between each place. The circuit is offering \$125,000 in purses and stakes. Of this Butte offers over \$25,000.

The Butte track will be in shape for horsemen May 1st, as a number of trainers have signified their intention of training in this high altitude, which they think is of great benefit to the lungs of the horses. Besides this, the matinee club uses this track from the first of May for their matinee races and we have a number of trainers who will keep their horses at the track. There are accommodations for over seven hundred horses, all good box stalls, so that people bringing horses here will get the best of accommodations.

Among the new horses purchased within the last few weeks are Allerton Boy 2:22½, by Allerton, whom George Opp, his trainer, thinks should take a mark this year better than 2:10. He was bought by Louis Dreifelbis in Chicago. Mr. J. V. Collins, who owns

CASSIAN BY MENDOCINO

A Young Stallion Whose First Crop of Colts Are Attracting Attention

Ritchie Baron, a 2:16 trotter, bought Adsell, a two-year-old by Advertiser. These two, with Pilot Sphinx are at Mr. Opp's stable.

Stanley Willon 2:07½, winner of M. & M. two years ago, and Judge Cullen 2:10½, were purchased by Robert Conway of Helena at the Splan sales. These will be raced on the Montana Circuit and trained at the Butte track. Mr. Will Morris of Pony, owner of Modicum 2:13, and Moy 2:20½, a promising filly now four years old that was doing miles around 2:14 last fall, has just gone East expecting to pick up a good green trotter.

Mr. W. A. Clark Jr. is now in California and will bring up some of his horses wintering there. Among those he expects to have race in Montana will be Electric Maiden, Miss Georgie 2:10½, Tertius by McKinney, dam the great race mare Tuna, and Buck by the same sire, dam She. These will be in the three-year-old class and are now stepping quarters in 38 seconds at Placanton. Montana breeders are hoping that Mr. Clark will also bring Bon Voyage up here after his stud season in California, as a great many of them would pay fancy prices to raise a colt from this great young trotter.

Over in Bozeman, Senator Hoffman is preparing Lady Spokane 2:12, and Rita Huber 2:13, and some very promising two and three-year-olds. The Senator has a bunch of fine young horses and the ones he has raced have proven themselves good race horses. Dr. T. B. Moore is working Nancy Colbert and Ariadne, two colts by Colbert Medium, and they are now doing quarters in 45 seconds.

Thirty-five head of standard and thoroughbred colts will be brought up from the Daly ranch to be sold in Butte, April 9th. Last year they sold about twenty head and all turned out well and they claim this year's lot is better than those they sold last year.

Thanking you for the opportunity of keeping the Montana Circuit before the public and promising you a little horse news every couple of weeks, I am,

Respectfully,

A. D. GALBRAITH,
Secretary-Treasurer.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

WOODLAND ECHOES.

The race track at the Woodland Stock Farm is a very busy place nowadays any time the sun is shining, and the boys have found it a pretty good winter track since Superintendent Charley Spencer drained and otherwise improved it.

Al Charvo stepped a green pacer a mile to cart there the other day in 2:24½, the last quarter in 30½ seconds; another green pacer a mile in 2:24, last quarter in 33 seconds, and a three-year-old pacer by Diablo a mile in 2:40 with the last quarter in 35 in a jog. This fellow is entered in stakes for this year. Charvo has a good green trotter that worked a mile in 2:19 with the last quarter in 32 seconds.

William Hashagen's Kinney Rose is working like the real dope, and will be entered in all the big purses. His Nutwood Wilkes three-year-old is also a good one.

C. R. Harrington has four in his string. Two are very promising pacers by Falrose, both green, but barring accidents will do things to the Oregonians.

Det Bigelow, when riding behind his promising Diablo trotter out of his old favorite Lucy B. 2:17, has a satisfied smile. Det also has Money Mac that is quite a trotter and improving steadily, and a two-year-old by Diablo that looks good.

H. Hogaboom as usual has several quite promising candidates for turf honors. A four-year-old by Stam B. in particular looks to be worth keeping an eye on. He has trotted a mile in 2:28 with very little training. Red Hot, a green trotter, has been a mile in 2:24, with a quarter in 32½ seconds; and a bay mare, green trotter, a mile in 2:29½. Palo King is stepping along like a McKinney.

Woodland Stock Farm is training a few, and has two very promising two-year-olds. One by Prince Ansel can step a 2:30 clip and is one of the best prospects on the place. Another by Nushagak is just as good. The Prince Ansel colt is entered in \$60,000 worth of stakes. A three-year-old by McKinney is

stepping along and one the same age by Nushagak is also doing well. Both are in stakes.

The track is in fine shape. The Woodland people are arranging for a horse parade and flower show for May 1st. There will be many handsomely decorated turnouts, and the show of horses should be high class.

THE AUSTRIAN WAY.

It appears as if they have more than one way of meting out punishment to men doing crooked things over the trotting tracks of Europe, particularly those of Austria.

Eddie Mitchell was expelled for pulling Wig Wag in the big Austrian trotting Derby by the Trotting Association of Vienna, perhaps never again to race on any track. According to American trotting rules this would have ended the matter, with the exception that the Board of Review might have imposed a fine and reinstated him. Not so in Austria, however, where the Government has something to say in the matter of improving the breeding of high-class horses, as well as giving the racing sport a national support. One of the conditions of the big stake was that the winner should be bred to twenty mares free of charge, to be selected by Government officials, and in order to fill up this contract Wig Wag has been confiscated by the authorities, but whether he will be released after the required service or the confiscation made permanent is not known. Over there they do not punish a dumb animal for the crookedness of its owner or driver, but get the best out of it in more honest hands.—Kentucky Stock Farm.

Unimak 40936. Captain C. H. Williams' grand McKinney stallion, has been bred to several mares already, and his prospects are good for a very fair season. Unimak has the blood of three great champions—McKinney, Director and Nutwood.

Alameda county breeders should not fail to visit the Alameda track and look over George Algeo's fine stallion T. C. 2:30 by Nutwood Wilkes. T. C.'s colts are not only very handsome but they are very speedy. Mr. Algeo is only asking \$30 for the services of this horse.

TRACK AND ROAD.

The supporters of the proposition to establish a race track and agricultural park on the Grant tract south of San Luis Obispo are working enthusiastically for the success of that enterprise. Thirty stockholders are at present on the list, each pledged to place one hundred dollars in the investment. These men are the original promoters of the scheme and no efforts have as yet been made to increase the number of the stockholders to one hundred, which figure was named as the limit. The promoters will soon hold a meeting and elect a committee, whose duty it shall be to place the proposition before those interested in the welfare and progress of this section, for the purpose of securing the required number of stockholders. As soon as sixty persons have agreed to invest in the enterprise, the site for the track and park will be purchased. The new company which has acted under the name of the Grant Club, holds options on several choice locations in the Grant tract which is being placed upon the market. When sixty persons have agreed to become stockholders, the success of the enterprise will be practically assured as the improvements will then immediately start. Horsemen throughout the country are much interested in the project and there is no reason why San Luis Obispo should not support a track, when even a smaller place like Santa Maria may boast of maintaining one with ease.

The Concord Transcript says: The work on the stalls at the Concord race track is progressing nicely this week. There has been some delay owing to the rain and material not arriving on time. It is thought the stalls will be completed in two weeks. When completed there will be forty-four new stalls and twenty-two of the old stalls in good condition, making sixty-four in all. There are twenty-two under each roof. These stalls are twelve feet square. At each end there will be a 12x12 room for sulkies, another the same size for bunks and a smaller one for grain. Between the rows of stalls there is an opening sixty feet wide. From the second row to the old ones there is sufficient space left to allow another row of stalls to be built, with a driveway of sixty feet on each side. The buildings are east of the track and all face to the north, so that the south wind can not blow in on the horses. A gasoline pumping plant will be installed at the present well to fill the three tanks, which will be stationed around the track. When everything is finished and the track put in good condition, we may expect some fine bred horses brought here to be trained, and later the public may witness interesting races.

Heretofore it has been the custom to charge 5 per cent on the amount of the purse for each nominator, an additional 5 per cent being taken from all the money winners. Andy Welch has made the Charter Oak this year for 2:09 trotters, and he proposes to have the entrance fee a graduated one, being fixed high or low according to the present record of the horses. For instance, horses having a mark of 2:10 to 2:09½ will be charged the usual 5 per cent. Then there is a sliding scale, running down so that a horse eligible to the 2:30 class when the Charter Oak entries close will be asked to pay only one per cent of the purse for the privilege of starting. Also an owner may start as many horses as he likes, as each heat is to be a race, or in other words, a dash.

According to a press dispatch from Lexington, Ky., L. V. Harkness has withdrawn all his trotters from training and will hereafter sell the surplus of his Walnut Hall stud at auction annually. A few of the get of Moko and Mobel and Walnut Hall, the stallions in service at the Hall, were in Benyon's training stable, but these have been sent home.

The nine members of the Great Western Circuit will this year distribute not far from \$150,000 among the trotters and pacers. At three of the strongest places in the circuit, the state fairs of Minnesota, Wisconsin and Illinois, there is absolutely no speculation, but this does not appear to deter any of the prominent stables from racing at these points. In fact, the big purses offered by the State fair associations are one of the big drawing cards of the circuit. Just how far this non-speculative feature can be carried is an open subject for debate.

W. G. Durfee's handsome stallion Coronado 2:12½ by McKinney won the blue ribbon and a beautiful prize cup at the Pasadena Horse Show for the best stallion, mare or gelding shown to a road wagon. Mollie McKinney, owned by Fred Maier of Los Angeles, was awarded the red ribbon on this class, and Capt. J. C. Newton's stallion Direcho the yellow. There were nine high class entries.

Five trotters and four pacers are now recorded in the official Year Book with accepted records made by the wind or dirt-shield. The trotters are Lou Dillon 1:58½, Major Delmar 1:59½, John A. McKerron 2:04½, Onward Silver 2:05½, and Crescent Route 2:08½, and the pacers are Dan Patch 1:55½, Prince Alert 1:59½, Dariel 2:00, and Credette 2:06½.

The fastest son of Electioneer in California, and the second fastest one living is Alta Vela 2:11½ that is now in the stud at Hans Frelson's place on Twenty-fourth avenue and Fulton street. No purer or better gaited trotter was ever bred on the Palo Alto farm. His colts are very handsome youngsters, with speed.

Sober up on Jackson's Napa Soda.

THOROUGHBRED DEPARTMENT.

By RALPH H. TOZER.

Barney Schreiber has purchased of Zeke Abrams the black mare Melodious, four years old, by Sir Dixon-Kentucky Belle II. Sir Dixon has had the honor of being premier sire of America and was well up last season, while Kentucky Belle II, the dam of Melodious, is an own sister to the dead turf and stud king, Hanover, being by Hindoo from Bourbon Belle, by Imp. Bonnie Scotland. Melodious' full brother, Sir Gallant, was recently purchased for \$4,500, if memory serves, and is to be used at the stud. Mr. Schreiber secured this mare, which is a good winner in the Middle West and a fine individual, over 16 hands high, for the ridiculous sum of \$500. Doubtless he would not take \$5,000 for her right now, and no wonder, for she is exceptionally well bred.

Dick Williams secured Strife for a small sum and took her to his Oklahoma home to breed her to Reservation. Strife is a brown mare, five years old, by St. Carlo out of Tumult by imp. Aerolite, second dam Turmoil (dam of Grenade, etc.), by imp. Rayon d'Or; third dam Lily R. (a stake-winner and dam of Chaos, Rubicon and Reine d'Or), by imp. Glenelg; fourth dam Florence (dam of Hindoo, Mollie Walton, Kanawah and Florida, latter dam of Firenze), by Lexington, etc. Strife beat good horses during her short turf career, is a big, good-looking mare, and is almost certain to prove a great producer, bred, as she is, on such wonderful producing lines.

The once high-class stake horse, Rio Shannon, by El Rio Rey-Bessie Shannon, will probably be sent to Japan to do stud duty and improve the breed of racers in the land of the Mikado. He is a grand-looking big bay horse, over sixteen hands high, and during his turf career won sixteen good races, including the Christmas Handicap, the Thornton Stakes at four miles, the Daly Memorial Cup and a race at a mile and a quarter over hurdles that equalled the world's record, 2:16. Japan buys most of her thoroughbreds in Australia; but America seems the natural market, and the few horses sent over from this country have done remarkably well, including imp. Mistral II and imp. Prospector. Mistral was supposed to be a hopeless cripple and was sent over to go to the stud, but he trained on and won the three races he contested, one being at two and a half miles. I believe. If anyone had said that Mistral would ever race again after viewing his legs he would have been considered a fit subject for the insane asylum. For Prospector an increase of \$5000 over the price paid was offered by J. B. Haggin's representative, I am informed, after all four of his colts had come out and shown stake form. All of which shows that change of climate works wonders with race horses as well as with human beings.

Miss Turtle, winner of the first race last Monday, is by the excellent old campaigner, Cromwell, from the fast Piccolo mare, Picklow, and is trained by S. J. Lank, who also handles the great thriller, Utica, which came within a hair's breadth of winning recently at odds of 200 to 1. For a new hand at training racers Mr. Lank certainly is phenomenally successful. He has owned trotters and pacers for years, but it is his first dip into the gallopers' surf.

Jere Dunn, one of the most popular turfmen in the country, is lying dangerously ill at a local sanitarium of a throat affection, and his many friends are much alarmed over his condition. For years Mr. Dunn has been a famous all-around sporting man, and during the past twenty years has owned racers of great renown, the best probably being the mare Sunny Slope. It is earnestly hoped the veteran will soon recover his wonted health and good spirits.

There was some very suspicious looking racing at Emeryville last Monday. In the second race The Lady Rohesia opened at 6 to 5 and went back to 11 to 5, two of the pencilers laying 11 to 10 place and 7 to 10 to show. She ran "according to the chalk," and the jockey, W. Smith, was promptly suspended for his ride. In the third race Shady Lad receded from 6 to 5 to 9 to 5 and ran accordingly, being nosed out of place by Golden Buck through being taken into the heavy going all the way down the homestretch. Clyde's "goodness" came very suddenly, too. In the last race that afternoon Elevation, which in his previous essay here (two days before) had run seventh in a nine-horse race, won handily after being played from 20 to 1 down to 10, while El Donero, the red-hot favorite, wound up a fair second. Surely such racing as this merits swift action by the stewards. It's about as bad as it can be.

There will be over forty foals at the Napa Stock Farm of A. B. Spreckels this season, the majority being by the English horses Solitaire and Marlus II. There should be fully this number at Santa Anita, while W. O'B. Macdonough and Charles Kerr will probably have over thirty additions each to their list of thoroughbreds. John Mackey and Walter Jennings will have over twenty foals at their Yolo County Farm, while John A. Cole, Gaston Ashe and Joseph & Molera are breeders of perhaps a dozen each every season. Charles Boots of Milpitas probably breeds twenty-five on an average every year, while O. Bianchi, J. J. Moore, Lee Blasingame, the estates of Caesar Young and Bart. Kavanaugh, Tom Fox, W. L. Pritchard, R. E. de B. Lopez and T. P. Schwartz breed quite a number of thoroughbreds. Say that 300 are

reared by the above breeders, and that Rancho del Paso is a thing of the past, it is quite apparent that the horse market is going to be gilt-edged in California very shortly, for more than 300 horses will be needed to supply the annual demand in the Golden State by the Californians alone, and many of the above-mentioned gentlemen breed and race their own and never sell. Thus the disestablishment of Rancho del Paso will turn out to be a blessing to the breeders of this State, and I predict that next season we will see a doubling of values in thoroughbred horseflesh. With Rancho del Paso running there was a surplus of horses and consequent cheapening; with its breaking up there will be a shortage and big prices for the yearlings offered in the local market.

Concord, N. H., March 13.—That the making of books and pool-selling at the new race course of the New England Breeders' Club at Salem, N. H., would be a violation of the law and punishable by criminal as well as civil action, is the decision of the Supreme Judicial Court returned today, in reply to inquiries submitted to it by Governor John McLane and council in reference to possible gambling at horse races.

It was the general opinion here tonight that races will be held without pool-selling or bookmaking. The decision of the New Hampshire Supreme Court on the sections of the act incorporating the club, which were copied from the New York race-track law, is opposed to the opinion of the New York Supreme Court, which passed upon these actions some years ago.

The president and manager of the club is Andrew Miller of New York. The race track is said to have cost more than \$1,000,000.

Woodford Clay of Paris, Ky., one of the most prominent breeders of Kentucky, as well as being the owner of a very excellent racing stable, is at the St. Francis, and attended the races at Emeryville a few days this week.

Jacob Schas of the Jordan Valley stock farm (in northeastern Oregon) is a visitor. He may purchase a few thoroughbreds for breeding purposes before his return.

STORIES OF FRANK HERDIC.

(R. L. McClem in the Cleveland Plaindealer.)

Frank L. Herdic, the veteran trotting turfman and pool seller of national fame, who died last week at Williamsport, Pa., holds the world's record in the total amount of pools sold at a single meeting. At a fall meeting of the Kentucky Trotting Horse Breeders' Association during the '90s, in ten days his sales footed up the enormous total of \$538,000.

Herdic began life as a circus tumbler, with one of the shows controlled by P. T. Barnum. During a vacation, from his circus work, one day he attended a trotting meeting in a small Pennsylvania town. When the time came for pool selling to begin, the track managers discovered their auctioneer had gone off on a spree. Herdic volunteered to act, more as a joke. His rough original wit made a hit with the horsemen and he never went back to the circus ring. That was the beginning of a career of thirty-five years as a pool seller on the trotting turf, and even Dr. Underwood, Robert Cathcart and "Silver Bill" Riley must be classed in the second grade in this profession along side of the ex-circus tumbler.

In and out of the pool box Herdic in his career bet every cent of \$20,000,000 on trotting horses. He made big betting by his own patronage on many races, and there were numerous cases when he held tickets on every horse in a race. No man has even lived that held bills of sale on so many great trotting horses. Owners would go broke in the pool box and then turn their horses over to Herdic. As soon as he could make enough to square the fellow with his pooling associates, Herdic would turn the horse back to the owner and take chances on getting his part of the money advanced in the future. Sometimes the owner would pay the open-hearted pool seller, but if Herdic's heirs had a part even of what was owing him in this way his estate would have been that of a millionaire.

Much of his wonderful success in his profession was due to his ability to always be able to put his audience in a good humor. He would hit a gloomy looking crowd, and instead of trying to sell pools at the start, would begin to tell a lot of funny stories. One night while selling here during the local trotting meeting he hit such a crowd that the prospects were very bad for a good night's sale. He told several stories, but the best he got from the gang was a sickly smile. Finally he told of an experience he had at a winter meeting in upper Canada. He said it was so cold that if a man opened his mouth to bid icicles would form there, so everybody had to remain mum and do their bidding and designate the horses they wanted to buy by signs. There was a horse in the race named Mark Time, and one old fellow kept his feet going like following music, so whenever I reached Mark Time on the board I knocked him down to this man. After selling was over the man was charged with some twenty tickets on the horse and denied buying them, explaining that his feet had been frost bitten and whenever he sat down he had to keep them going. Herdic had to take all the tickets himself, and he got the pool box as well, as Mark Time won the race.

The story fitted his crowd so aptly that night that everybody appreciated its sarcasm, and when he opened up for business he had one of his big nights, selling \$81,000 worth of pools. In the days when Thomas W. Lawson and several of his like patronized the poolstand at the trotting meetings it was an ordinary occurrence for Herdic to sell \$100,000 worth of tickets on a race.

For years his income was enormous, but he was

such a spender that he never laid by a dollar. He would go into a resort, treat everybody in the house and walk out and never see any of the crowd again. No matinee idol ever had more admirers among the fair sex, but he was always deferential to the ladies, and would force his associates to show such company the utmost respect. Frank Herdic's estate comes principally from a judgment of \$40,000 which he collected from the Baltimore Street Railroad Company. While endeavoring to alight from a car in the Monumental City, a conductor, in a hurry to get his car through on schedule time, gave him a push. Another car coming in an opposite direction wedged in Herdic, and he was badly injured. After months of suffering he partially recovered, sued the company and secured the judgment above noted. Many of his friends never believed he really ever recovered completely from the accident and that it in a measure hastened his death.

Once Herdic was stopped in the street by a Salvation Army lassie and asked for a contribution to a good cause. He handed out a dollar. The next day she met him again and he contributed \$2. The third day she was at the gate of the race track and he passed her three silver dollars. His partner, Bill Riley, was with him on each occasion, and he finally asked him why he had each day increased his donation.

"Well, you see," said Herdic, "the first time I met her she said she was on her way to heaven. That was three days ago, and if in that time she has got no closer to heaven than this race track, she must need the money."

John Kernell took this incident and in a new dress made it a popular stage story.

Herdic once bet on a great horse that was going against time. The horse made a bad break and lost out by several seconds. He had another trial and some one suggested to Herdic he could easily get even.

"The next time I bet on that horse, said Herdic, "it will be on weeks, not seconds."

"BISHOPING" THE HORSE'S MOUTH.

In these days of scarcity in the horse supply various artifices are resorted to in order to make the animal appear either younger or older than he really is. Of course, reputable dealers do not invoke the aid of any such deceptive practices, but we know that when the incentive is strong enough, as it is just now in the keen demand and high prices of both horses and mules, there are always at least a few men who are willing to take chances to get by deception a little more money out of anything they may have to sell. The process of "bishoping," or as it is more generally called, "fixing," a horse's mouth is comparatively simple, but the job must be extra well done to deceive an experienced horseman.

In the effort to make a colt appear older than he is the familiar instance of extracting the two small milk teeth which appear in four-year-olds as the last pair of the incisors above and below may be cited. These are naturally shed and replaced by permanent teeth at five, but if they are pulled out no man can tell that the horse is not rising five years of age and has shed the last milk teeth before the permanent incisors have begun to show themselves and push the others out of place. A three-year-old may also be made to appear as though a year older by the extraction of the second pair of milk teeth. This part of it sounds simple enough, and it is.

On the other hand, the "fixing" of an old horse's teeth to make him appear young is a much more difficult proposition. As the horse advances in age his teeth grow longer and the grinding surfaces assume a different character to those of the age of eight or less. The method chiefly employed is to saw the teeth off with a fine steel saw to the proper length, and then by means of boring apparatus to dig out the necessary indentations and to stain the grinding surfaces by means of chemicals into the semblance of the colored marks prevailing in younger horses. These chemically produced marks, however, soon wear off in the process of eating, and the man who has bought a horse with a "fixed" mouth will surely be confronted with the teeth of his horse showing the proper length, but without the dark marks which proclaim the age up to eight years.

There is, however, little cause to be taken in with a horse that has had his teeth tampered with in this way. Any man who has had any experience with horses knows that the general appearance of the teeth changes as the animal grows older, utterly irrespective of the grinding surfaces. There is a change in color and direction which can hardly be mistaken, and the best thing to do is to let suspicion end all thoughts of making a purchase of the animal engendering it. Let the sale be made to some one else.—Exchange.

HINTS TO HORSE OWNERS.

The change of season especially from winter to spring is the most trying period of the year for horses and colts. Just as it is for the human family, changed conditions make a change in the horse's system. To counteract these conditions, it is necessary at this time of the year to give the horse proper attention. A simple cold or cough neglected will often terminate in pneumonia, distemper, bronchitis, or some form of catarrhal trouble, and any of these repeated may mean chronic asthma or heaves. So horses having any trouble affecting the breathing organs should be attended to at once.

We do not advocate dousing a horse every time he has a little cold or slight cough, but it is far better to treat simple ailments forthwith, and then it is just possible that something more serious may be prevented. Taking the simplest form of breathing apparatus troubles, as well as the more complicated and dangerous forms, such as pneumonia, distemper, etc., the best and safest thing is to use a standard remedy such as Craft's Distemper Cure, made by the Wells Medicine Co., Lafayette, Ind., and advertised elsewhere in our columns, and with reasonable care and precaution the chances are your horses will escape the dangers of the changing seasons.

INFLUENCE OF DEVELOPMENT.

(S. W. Parlin in American Horse Breeder.)

To what extent, if any, the development of the speed of a stallion or mare adds to the ability of that developed animal to transmit speed, or whether the development to its utmost limit of the speed of an animal, enables him or her to transmit speed of a higher order or with greater uniformity than the same animal would have transmitted under similar conditions had development not occurred, is a question upon which opinions of turf writers differ very decidedly and very widely.

This question has been discussed periodically for at least 25 or 30 years by practical breeders and theoretical writers on the trotting breeding problem. The theoretical writers have been the most ardent advocates of development. The ideas that they have advanced would lead one to believe that the full development of a stallion or mare not only increases his or her power to transmit speed ability with greater uniformity, but also of a higher order, that is, the more thorough the development, the larger will be the proportion of the offspring to make fast records, and the faster will be their records.

This looks plausible, but the question must be decided upon the evidence as shown by turf history, extending from the time that trotting races were first inaugurated in this country to the present. We can go beyond that, even to the time that the racing of thoroughbreds was first inaugurated in England.

It has been generally understood that the English thoroughbred race-horse has been brought to his present state of perfection and great speed by the practice of breeding the best mares to stallions that have distinguished themselves as winners of important races. Stallions that were not race-winners have probably been but little favored with a good class of mares during the last half of a century, either in England or America. A century or more ago, however, it was different. It is interesting to refer back to that remote period and see whether the best of that early day were bred.

The first really wonderful race-horse produced in England of which we have an authentic account was Flying Childers, foaled in 1715, whose sire was Darley Arabian. Flying Childers' speed was fully developed and was so much greater than that of any other animal of his day, or that had previously been produced, that he was regarded as nothing less than a wonder. He was raced considerably but was never beaten. He was retired from the turf in 1823, when he was eight years old and was used for stock purposes the remaining eighteen years of his life. His great speed and his success as a race winner must have brought to his harem what were considered the best mares in England.

Bartlett's Childers was a full brother of Flying Childers, but he was never trained for racing, as he bled at the nose when he was speeded. He was used for stock purposes, however, and though he undoubtedly received a poorer class of mares than his noted and fully developed brother, Flying Childers, he proved more successful as a sire and perpetuator of speed than the latter. One of the get of Bartlett's Childers was the stallion Squirt. He was campaigned some and won in all six races, but he was considered of so little account that his owner ordered him to be shot. Squirt's groom begged that the horse's life might be spared, and, fortunately, his request was granted, otherwise there would have been no invincible race-horse Eclipse.

After Squirt was ordered to be shot he got a number of foals. One of these was the stallion Marske, that was trained and started in five races, but won only two of them. When Marske was thirteen years old Spilletta was mated with him. Spilletta was by Regulus, a son of Godolphin Arabian. She was started in but one race and was beaten in that. Her produce by Marske, however, was the renowned Eclipse, foaled in 1764, that was the fastest race-horse of his day. Eclipse was raced against the best horses of his time and beat them all so easily that finally no one could be found to start a horse against him.

The first foal that Godolphin Arabian got in England was Leath, foaled in 1732. Leath was trained and raced and was never beaten. After his racing days were over Leath was used for stock purposes, and was fairly successful as a sire. Leath had a full brother that was named Cade, foaled two years later than Leath. Cade was trained, but Pick states in his Turf Register that he started only three or four times and was successful. Cade proved more successful as a perpetuator of speed, however, than did his full brother Leath, though the latter was far superior to Cade in speed and other race-winning qualities, and his speed was fully developed. Matchem, by Cade, was a successful race-horse and much more successful as a sire and perpetuator of speed than any son of Leath. Cade lived to be thirty-three years of age. A few days before his death a mare was mated with him and produced a foal by him.

King Herod, commonly called Herod, was foaled in 1758. He was by Tartar, a grandson of Byerly Turk, and his dam, Cypron, was by Blaze, a son of Flying Childers. Cypron, the dam of Herod, was never trained, yet Herod proved the most successful sire of his day in England.

It appears from the above that the best of the early English race-horses were not by sires and from dams that had been most fully developed and were the most successful race-winners of their day. The same is true of the trotters that have held the world's records in this country from old Lady Suffolk 2:29½ to Lou Dillon 1:58½. None of them have been by stallions that held world's champion trotting stallion records.

Some trotting stallions that have never been trained

and raced to fast records have proved much more successful as sires and perpetuators of uniform standard speed, and also of extreme speed, than their full brothers that were trained and took standard records. Bourbon Wilkes and Favorite Wilkes 2:24½ are examples. The former was foaled in 1875 and has no record. The latter was foaled in 1877 and trotted to a record of 2:24½. Favorite Wilkes is now credited with 23 trotters and nine pacers that have made standard records, a total of 32. At the close of 1903 Bourbon Wilkes was credited with 53 trotters and 44 pacers in the standard list, which is three times the number that Favorite Wilkes was credited with at the same age. The number of producing sons and daughters of Bourbon Wilkes is about three times that of Favorite Wilkes.

Chimes 2:30½ was trained less than most of the other sons of Electioneer and Beautiful Bells 2:29½, yet he has sired a faster trotter than any of his full brothers that made fast records. Alcantara 2:23 made a record four seconds faster than that of his full brother Alcyone 2:27, yet, though the latter was foaled one year later than Alcantara and died when but ten years old, he proved so much superior to Alcantara as a producer, that the number of standard performers sired by himself and sons, together with those produced by his daughters, now exceeds the number sired by Alcantara and his sons, together with those produced by his daughters.

Cupid was trained and raced to a record of 2:18 after which he was used for stock purposes. He is now credited with five standard performers, the fastest of which is Venus 2d, record 2:11½. Sidney Dillon, a full brother of Cupid, has no record and is several years younger than Cupid, yet Sidney Dillon has sired seven with standard records, among which are Lou Dillon 1:58½, Dolly Dillon 2:06½, and Stanley Dillon 2:07½.

George M. Patchen lowered the world's champion trotting record for stallions to 2:23½ at Union Course, N. Y., August 2, 1860. He made two full seasons in the stud at a fee of \$100 after taking this record and died May 1, 1864. The fastest trotter that George M. Patchen got was Lucy 2:18½. She was foaled in 1856, hence was begotten in 1855. The speed of George M. Patchen had not been developed when he got Lucy 2:18½. He was not started in a race, according to Chester's Complete Trotting and Pacing Records, until 1857, and the time of the fastest heat he won that year was 2:41.

He got in all four trotters that took standard records, but not a single one of the four was begotten by him after his speed was fully developed, or even after he had reduced his record below 2:41. There is no doubt that during the two years that he was kept for stud services, after becoming the world's champion trotting stallion, the best mares in that part of the country were sent to him, for he had proved in his races that he was the fastest trotting stallion then living, and as game a trotter as ever wore harness; and yet during those two years of service after his speed was fully developed he did not get a son or daughter that ever took a standard record.

During the season of 1862, George M. Patchen got the stallion Seneca Patchen, that trotted to a record of 2:38, but was undoubtedly several seconds faster. It seems strange that a horse so fast as was George M. Patchen and from as good a class of mares as those that he must have been favored with during the season of 1861 and 1862 should fail to sire a single standard performer among the entire lot. It shows most conclusively that development, racing and advanced age did not improve his ability to transmit speed qualities to his offspring.

The blood of George M. Patchen 2:23½ seemed to require the assistance of kindred blood in order to produce a nick. His fastest trotters and most successful sires of speed were the result of reinforcing or doubling back upon itself some of the blood elements which entered into the composition of his dam. It is a significant fact too that those elements were similar to, or originated from, the same source as those which were potent factors in the pedigrees of the great brood mare sires, Seely's American Star 14, Mambrino Patchen 58, and Nutwood 2:18½.

George M. Patchen 2:23½ was by Cassius M. Clay 18, a son of old Henry Clay 8, founder of the Clay family. The dam of George M. Patchen was by Headem, a thoroughbred son of imported Trustee. The dam of Headem was Itasca, by American Eclipse, he by Duroc, a son of imported Diomed, and from Miller's Damsel, a daughter of imported Messenger. The second dam of Itasca was Betsy Ransom, by Virginian, a son of Sir Archy, by imported Diomed.

Lucy 2:18½, the fastest of the get of George M. Patchen, was from Lady Clifton, by May Day, a son of Sir Henry, by Sir Archy. The second dam of Lucy 2:18½ was by Prizefighter, a thoroughbred son of Expedition. The dam of Prizefighter was Dido, by imported Bay Richmond, and his second dam was the famous old Slammerkin that was the third dam of Mambrino, sire of Abdallah, Mambrino Paymaster, etc.

The next fastest trotter by the record got by George M. Patchen was Charles E. Loew 2:25½. The dam of Charles E. Loew was by Dutchman, a son of old Abdallah, and his second dam was by the thoroughbred Monmouth Eclipse. The latter was by American Eclipse, a thoroughbred son of Duroc, by imported Diomed. American Eclipse got the dam of Head'em, and Head'em got the dam of George M. Patchen. The dam of Monmouth Eclipse was by imported Expedition, second dam by imported Messenger and third dam the dam of Prizefighter. The latter got the second dam of Lucy 2:18½.

The son of George M. Patchen, that got the greatest number of standard performers was Seneca Patchen 2:38. The dam of Seneca Patchen was Toot, by Hol-

lenbeck's Sir Henry, a son of the inbred Diomed, Sir Henry, by Sir Archy. The second dam of Seneca Patchen was by Nimrod, whose sire was Bailey's Eclipse, a son of American Eclipse.

The fastest trotter got by any son of George M. Patchen was Hopeful 2:14½, that won 139 heats in 2:30 or better, and made a wagon record of 2:16½, which was then the world's champion trotting record to wagon. Hopeful's sire was Godfrey Patchen 2:42. The dam of Godfrey Patchen was Lucy, by Harmon's Jersey Henry, a son of Sir Henry, by Sir Archy. His second dam was by John Richards, and he too was by Sir Archy.

It will be observed that the dams of Lucy 2:18½, the fastest trotter got by George M. Patchen; Seneca Patchen, the most successful son of George M. Patchen as a sire of uniform standard speed, and Godfrey Patchen, sire of Hopeful 2:14½, were all by different sons of Sir Henry, whose sire was Sir Archy, the best son of imported Diomed, and whose dam was also by imported Diomed.

It is also a fact worthy of note as bearing upon the old age and development theory, that Godfrey Patchen, the sire of Hopeful 2:14½, was foaled the same year as Lucy 2:18½, hence was got when George M. Patchen was but six years old and when his record was only 2:41.

It would seem from the above that the blood lines of the dams of the get of George M. Patchen 2:23½ had greater influence on their capacity for speed than did George M. Patchen's age and development. What is true of George M. Patchen is likely to be true, and doubtless is, of other stallions.

Opportunities considered Alexander's Abdallah got, when Rysdyk's Hambletonian was only two years old, and from an undeveloped mare, then only about six years old, that had met with a severe accident which made her a cripple for life, was one of the most successful of Hambletonian's sons as a sire and perpetuator of speed. Goldsmith Maid 2:14, bred and raised in New York State, got, when Alexander Abdallah was only four years old and without a record, held the world's champion trotting record in her day, and was the greatest campaigners that ever lived. She produced several foals, but none of them ever took a record in standard time.

Next to Goldsmith Maid the fastest trotter that Alexander's Abdallah got was the stallion Thorndale, that was foaled in 1865 and made a record of 2:22½ at Buffalo, N. Y., August 3, 1876. The dam of Thorndale was the famous brood-mare old Dolly, by Mambrino Chief. Two other stallions by Alexander's Abdallah were from daughters of Mambrino Chief, viz., Almont 33 and Belmont 64. Neither Almont nor Belmont was ever trained, and raced to records of 2:30 or better. Both were fast natural trotters, but their speed was not developed to the extent of that of Thorndale 2:22½, yet both of them were much more successful in transmitting speed to their offspring, and also imparting to their sons and daughters the ability to perpetuate speed, than was the similarly bred and much more highly developed Thorndale 2:22½.

Wood's Hambletonian was got when Alexander's Abdallah was but five years old. He was from a mare of unknown breeding, but called a Morgan. Wood's Hambletonian was never trained and fitted for racing, and had no record, and yet he proved more successful as a sire and perpetuator of speed than did Thorndale, though Alexander's Abdallah was seven years older when he got Thorndale than when he got Wood's Hambletonian.

At the close of 1904 Thorndale was credited with 10 that had made records in standard time. His sons had sired 31, and his daughters had produced 34 with standard records, a total of 75. Wood's Hambletonian was then credited with 24 in the standard list; his sons had sired 46, and his daughters had produced 25, making a total of 95. The fastest trotter and best campaigner that Thorndale 2:22½ got was Edwin Thorne 2:16½, winner of 112 heats in standard time, but Thorndale was only seven years old when he got Edwin Thorne, and his speed had not then been developed, for he did not start in a race until four years later. The two most successful sons of Thorndale as sires of speed were Marksman, sire of six in the list, and got when Thorndale was but six years old; and Hero of Thorndale, sire of five with standard records and got when Thorndale was but four years old. The dam of Marksman was the undeveloped mare Lady Patriot, that produced Volunteer 55, etc.; and the dam of Hero of Thorndale was a full sister of Volunteer.

Old age and development did not seem to cut much figure in the cases of Thorndale and Wood's Hambletonian. The most successful son of Wood's Hambletonian as a sire of speed is Superior, no record, sire of Wentworth 2:04½. The fastest trotter sired by Marksman, the best son of Thorndale 2:22½, was Misty Morning 2:21, and the fastest of the get of Hero of Thorndale was Bob Johnson 2:28½.

Phallas 2:15½ was the fastest entire son of Dictator. He was the world's champion trotting stallion of his day but he was not so successful as a sire and perpetuator either of standard or extreme speed as was Director 2:17, whose record was three and one-fourth seconds slower than that of Phallas. The most successful son of Phallas as a sire of standard speed is Phallamont and he has no record. Phallas was but three years old, and had not been trained for speed, when he got Phallamont.

Pilot Medium was by far the most successful of the sons of Happy Medium as a sire of speed, yet he was a cripple, and was never handled for speed. Almont Medium, also by Happy Medium, was foaled in 1882, and trotted to a record of 2:18½ in 1892. His dam was by Almont 33; second dam by Mambrino Patchen 58, and third dam by Alexander's Edwin Forrest 49. Almont Medium is now credited with eight trotters and six pacers with standard records.

Happy Heir, by Happy Medium, was foaled in 1883, one year later than Almont Medium. Happy Heir has no record. His dam was by Administrator 2:29½; second dam by Woodburn Pilot 344, and third dam by Peck's Idol 144. Happy Heir is now credited with 21 trotters and 12 pacers in the list. This is more than twice the number of standard performers got by the fast and fully developed Almont Medium 2:18¾. Happy Heir is credited with one trotter and two pacers in the 2:15 list, the fastest of which is Sunny Slope 2:10¾. Almont Medium 2:18¾ is the sire of two in the 2:15 list, both pacers, the fastest, Prince Almont 2:13¾.

The above cases would seem to indicate that if a stallion be endowed by breeding, that is, has inherited from his ancestors the ability to transmit speed, he will do so if he is never trained to a fast record. It would seem too, especially in the cases of George M. Patchen and Thorndale, that training a horse for speed and racing him to a fast record do not add in the least to his speed-perpetuating ability. This is not in accordance with the plausible theory advanced by some theorists but it is in accordance with the facts as shown by the Year Book.

Another case that occurs to mind is the stallion Wilkes, by Alcione 2:27. Wilkes has no record. He was got when Alcione was in his five-year-old form in 1882. Alcione's record was then 2:34, made in a winning race as a three-year-old. Wilkes is now credited with 43 trotters and 12 pacers, that have made standard records, a total of 55. This is a greater number of standard performers credited to any stallion that has ever stood in Maine, not excepting his stable companion, the Northern trotting King, Nelson 2:09, that at one time held the world's champion record for trotting stallions, 2:10, and still holds the world's record, champion trotting record, for stallions to high wheels, and on a regulation track.

The development of a young animal is an advantage to the practical breeder, if not to the animal, for, as has often been stated in these columns, if an animal takes a fast record, it is the strongest kind of proof that the animal in question has inherited, and does possess, all the qualities that are necessary to produce speed. Such an animal will be more likely to prove successful, as a sire or producer of speed, than an animal which is weak in any one of the qualities upon which speed depends.

No one can tell to a certainty, by the combination of blood lines in the pedigree of any animal, whether that animal possesses the ability to trot fast or not. That fact can only be determined by training the animal. The mysterious influence of what is called atavism, or throwing back, is such that if any one of the ancestors of an animal, within several generations, was lacking in speed ability, the animal may throw back to that ancestor, and inherit the same quality that deprived him or her of speed ability. The same is true of the animal with a fast record, hence disappointments have occurred in the past and are likely to occur in the future even when mares with fast records are mated with stallions that have taken fast records.

The above facts however do not seem to indicate that the ability of a sire to transmit and perpetuate either uniform speed or a high rate of speed is improved by developing the sire of speed and racing him to a fast record. If he has inherited and possesses the ability to do so he will transmit speed qualities whether he is trained for speed or not. If he has not inherited the necessary qualities no amount of training and racing will enable him to become a successful sire of race-winning speed.

FAMOUS WAR HORSES.

The stories of Gen. Kuropatkin's devotion to his favorite charger, circulated so widely during the late Japanese war, remind one of many a great soldier between whom and the horse that has carried him through long campaigns there has been an affection almost human in its intensity.

Who does not recall Lord Roberts' gallant charger, Volonel—the little gray Arab which carried its medals and its master so proudly in the diamond jubilee procession? Volonel had belonged in his early years to an Indian chief, and when Lord Roberts bought him he discovered that the Arab's tail had been broken in two pieces to produce a graceful caudal curve. When Queen Victoria awarded medals to her soldiers who fought in the Afghan campaign and in the expedition to Candahar, Volonel was greatly but not undeservedly honored. Lord Roberts proudly hung around his neck the Cabul medal, with four clasps, and the Candahar star of bronze, and later the queen presented him with the jubilee medal.

At the advanced age of 23 the game little steed—he was only 14½ hands high—was as playful as any kitten. He survived to see his 29th birthday, and "lies buried near the Royal Hospital, Dublin, in the Rose Garden."

Copenhagen, Wellington's famous chestnut charger, was only two inches higher than little Volonel. He carried his master through the peninsula war and bore him for eighteen hours on the day of Waterloo. When his fighting days were over the little Danish horse was sent to Strathfieldsaye, where he was tenderly cared for. His last days were somewhat embittered, it is true, by the misguided worship of thousands of his admirers who went to visit him—in fact, the nuisance became so great that the duke was compelled to put him in a cage. When at last he succumbed to old age, he was accorded an impressive funeral, and a tombstone was erected to commemorate his virtues and his loyal service.

An equally honored old age was that of the white charger, Marengo, which carried Napoleon on the field of Waterloo. After his master's flight Marengo was found by an English officer wandering discon-

solately on the battlefield, and he was sent to England, where he spent many happy years in peaceful pastures and tended by reverent grooms. He survived Napoleon nine years, and when old age and pneumonia combined to end his career his skeleton was sent for preservation to the Royal United Service Institution in Whitehall.

There has seldom, if ever, been a braver and more loyal war horse than Traveler, who carried his master, General Lee, through scores of battles, and came through them all without a scratch. It is said that he whinnied pitifully when he followed the general's coffin to the grave; and it was not long after that, while grazing, a nail became embedded in his foot and he died of lockjaw. Copenhagen bore Stonewall Jackson through ten fierce battles before the fatal bullet struck his rider. He survived, through an honored and lovingly tended old age, until 1886; and he may be seen today, stuffed and cleverly mounted, in a glass case in the library of the soldier's home, Virginia.

General Washington had many horses who rendered him devoted service and whom he regarded with affection, but the most prized of them all was the brown charger which he bestrode at the surrender of Lord Cornwallis. Hung with heavy mourning robes and led by a groom, he followed the coffin of his dead friend and master to his last resting place. General Sheridan's famous black war horse, Rienzi, long survived all the dangers of war, and died loved and mourned in 1876. His body was mounted and is to be seen in the museum of Governor's Island, in New York bay.

It seems to have been the fate of most of these famous horses to survive their masters. Such, however, was not the lot of Nellie Grey, the handsomest charger in all the Confederate army. Nellie, with General Fitzhugh Lee on her back, seemed to bear a charmed life, so many were the dangers she escaped, until at last she fell in the very thickest of the fight at the battle of Winchester. Cincinnati, the most loved of all General Grant's horses, was more fortunate than Nellie; for he survived all the horrors of the Civil War and died "as sincerely lamented as he had lived respected."

PROVINCIAL GOVERNMENT BUYS A TROTTER.

The most important event of the past week in trotting horse circles, says the Boston Courier, was the sale by George W. Leavitt, Readville, of the noted trotting stallion Achilles 2:15½, to the provincial government of Nova Scotia. The sale was the result of the visit to that city by Prof. Cumming of the Agricultural College at Truro; J. A. Fraser, editor of the Eastern Chronicle, in New Glasgow, and A. B. Yetter, commissioners for the provincial government of Nova Scotia, who were deputed to buy the best trotting stallion they could find to place at the head of the government stud which is connected with the college at Truro. Among other stallions which they had under consideration were The President 2:09½, Fred Kohl 2:07¾, Joe Patchen 2:01¼, The Beau Ideal, Walnut Hall 2:08¾, Col. Cochran 2:10½, and Prince Selma 2:10¾. After looking the ground over thoroughly they decided that Achilles was the horse that they wanted. This decision was arrived at after they had looked over a large number of the horse's get, and they found these of so uniformly good size, shape and speed that as they liked the horse himself they last Thursday paid over the purchase price, in the neighborhood of \$10,000. Mr. Leavitt is to keep the horse until June 1, in order that he may fulfill his stud engagements, after which he will be shipped to his new home. Achilles is a bay horse, bred by the late J. Malcolm Forbes, and foaled in 1898; sired by Blingen 2:06¼, out of Starlight 2:15½, by Electioneer; second dam Sally Benton, which in 1884 trotted to the world's four-year-old record of 2:17¾, by Gen. Benton. Sally Benton is the dam of Surpol 2:10, Starlight 2:15½, Nordica 2:19½, etc. The third dam of Achilles is the great brood mare Sontag Mohawk, one of the most famous of Palo Alto matrons. He is not only one of the very best bred trotters living, but is also a superb individual, and those who saw him race last year, his only season on the turf, rate him as at least a 2:10 trotter. In getting this handsome son of Blingen the provincial government has made a move that will be of great benefit to every horse raiser in the maritime provinces. At the provincial stud at Truro there are already excellent specimens of the thoroughbred hackney and heavy draught breeds and the acquisition of Achilles will give them a high class trotting sire to round out the stud.

The society editor of the Kentucky Stock Farm thus rebukes some of the careless reporters on the daily papers: "Nobody thought it worth while to send Nick anything, or to describe his wardrobe, or tell where he bought his necktie, but at that he got more than was coming to him. Every man does who marries a good, sweet woman. But let that pass. What the Blue Grass objects to is the persistency with which the daily press designated him a 'groom.' Nick is no groom. A groom is a person who carries horses, a 'swipe.' Nick may be bridegroom, but he is no swipe. There is a wide difference between a groom and a bridegroom. Another thing the daily press ought to know. There is not and can not be any such thing as a 'bride-elect.' A bride is a woman who is newly married or is about to be married. A bridegroom is a man who is newly married or is about to be married."

The trotter A. Penn 2:08¾, son of William Penn 2:07¾, has been bought for shipment to Vienna, Austria, where he will be raced. He is the most noted member of the Strathmore branch of the Hambletonian family to go abroad.

HELENA PROGRAM ANNOUNCED.

Helena, March 10.—The schedule of events and conditions for the State Fair in October, as announced by Secretary Pace, are as follows:

Bankers' Stake, 2:16 trotters, \$1,000.

Breeders' Stake, 2:30 trotters, \$1,000.

Merchants' Stake, 2:14 pacers, \$1,000.

State Fair Stake, 2:25 pacers \$1,000.

Entrance fee, 3 per cent, 1 per cent (\$10) to accompany application for entry May 1, 1906, 1 per cent (\$10) June 1, 1 per cent (\$10) July 1, when horse must be named. Any person desiring to make an entry July 1 may do so by paying 5 per cent and naming horse eligible to the class; 5 per cent deducted from money winners. Division, 50, 25 and 10 per cent of stake. Horse distancing field or any part thereof entitled to first money only. Four starters. Right to declare stake off and return money if not filled satisfactorily is reserved. Other than specified, rules of the National Trotting Association, of which the Montana State Fair is a member, to govern, except hobbies not barred on pacers over 3 years old. No race over five heats.

Trotting, Montana three-year-olds (three-heat plan), \$300.

Pacing, 2:30 class, \$300.

Bankers' Stake, 2:16 trotters, \$1,000.

Pacing, 2:40 class (three-heat plan), \$300.

Clark cup race, free-for-all trotters, amateur owners to drive, \$500.

Merchants' Stake, 2:14 pacers, \$1,000.

Breeders' Stake, 2:30 trotters, \$1,000.

Pacing, Montana three-year-olds (three-heat plan), \$300.

Trotting, free-for-all, \$500.

State Fair Stake, 2:25 pacers, \$1,000.

Trotting, 2:50 class (three-heat plan), \$400.

Pacing, free-for-all, \$500.

Entries close August 23, 1906. Five to enter, four to start. Division, 50, 25, 15 and 10 per cent. Fee, 5 per cent of purse; mile heats, three in five, except where stated. In races marked "three-heat plan" the purse will be divided, and one-third given on each heat, 50, 25, 15 and 10 per cent. Horse distancing the field entitled to first money only.

Special races will be made up where classes do not fill. Classes and days arranged to give horses two starts during the week.

Helena handicap, one and one-fourth miles, \$1,000.

Mountain derby, seven-eighths mile, for Montana colts, three years or under, \$500.

Mountain Stake, one mile, \$1,000.

Henry A. Meyer Hotel Stake, all entrance fees and added, \$250.

Helena handicap, one and one-fourth miles, \$1,000.

Entries close September 1, when horse must be named. Fee, 5 per cent, payable 2½ per cent September 1 and 2½ per cent September 20, before 10 p. m. Weights posted September 30. Division, 70, 20 and 10 per cent of purse; 5 per cent from money winners.

Mountain Stake, one mile, \$1,000. Weights for age; closing time and payments same as in Helena handicap; other conditions the same.

Henry A. Meyer Hotel Stake, \$250 added to entry fees; three-fourths mile handicap. Fee, 5 per cent of purse, payable October 1.

THE BOSTON WORK HORSE PARADE.

Preparations are now making in Boston for the fourth annual Work Horse Parade, which will take place on Memorial Day, May 30th. Last year there were about 900 horses in line, and this year it is expected that the number will be even greater. According to the new system, every entry which is thought worthy of a place in the parade will receive a ribbon; but the entries will be graded, and will be assigned ribbons according to their merits, blue to the first, red to the second, yellow to the third, white to the fourth. In addition, the blue ribbon winners will receive, shortly after the parade, a brass medal, suitably marked. These brass medals are intended to be worn on the harness as permanent ornaments, and they will no doubt be prizes very highly.

Handsome gold and silver medals are offered in the two divisions of the Old Horse Class, the first division being for horses that have served ten years or more but less than fifteen, and the second division for horses that have served fifteen years or more. This class is always the most interesting feature of the parade. Prizes are also offered for drivers who have the longest record of service with one employer; and a special prize, a valuable gold medal, called the Lawrence medal, in memory of the late Ashton Lawrence, the former president of the association, is offered for the best four-horse team.

The association is a purely charitable one, its sole aim being to improve the condition and treatment of work horses; and the parade is a beautiful open-air horse show which attracts thousands of spectators.

The Board of Review of the National Trotting Association gained two good members when it chose H. N. Bain of Poughkeepsie, N. Y., and George Campbell Brown of Spring Hill, Tenn., says an Eastern exchange. Mr. Bain is widely known as a breeder and as a promoter of harness racing, in both of which avocations he has achieved much success, and he is deservedly esteemed on account of his sterling integrity and generous traits. Mr. Brown is the owner of Ewell Farm, at Spring Hill, one of the most celebrated breeding establishments in the South, home of Brown Hal 2:12¾, the great sire of pacing speed, and the place where Star Pointer 1:59¾, was foaled, and where John R. Gentry 2:00¾, is now in the stud. Mr. Brown is regarded as an able, honest, fearless man, with experience and ability that admirably fit him for a place on the Board.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

Jan. 1-June 1—Closed season for black bass.
 Feb. 1-April 1—Closed season for steelhead.
 March 24—San Francisco Fly-Casting Club. Saturday Classification Contest No. 3. Stow lake. 2:30 p. m.
 March 25—San Francisco Fly-Casting Club. Sunday Classification Contest No. 3. Stow lake. 10 a. m.
 April 1-Sept. 15. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
 April 1-Nov. 1—Trout season closed.
 April 1-Nov. 1—Open season for taking steelhead above tide water.
 Sept. 10-Oct. 16—Close season in tidewater for steelhead.
 Sept. 10-Oct. 16—Close season for salmon.
 Sept. 15-April 1—Open season for lobsters and crawfish.
 Oct. 16-Nov. 15—Close season for taking salmon above tide water.
 Oct. 16-Feb. 1—Open season for steelhead in tidewater.
 Nov. 1-Sept. 1—Open season for crabs.
 Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15 July 1—Dove season closed.
 Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
 Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
 March 18—Capital City Blue Rock Club. Kimball & Upson grounds. Sacramento.
 March 18—Union Gun Club. Blue rocks. Ingleside.
 March 25—Golden Gate Gun Club. Blue rocks. Ingleside.
 March 25—Vallejo Gun Club. Blue rocks. Near Flosden Station.
 April 1—California Wing Club. Live pigeons. Ingleside.
 April 1—Blue Rock Gun Club. Grounds foot of High street, Alameda.
 April 8—Empire Gun Club. Blue rocks. Alameda Junction.
 April 14, 15—Los Angeles Gun Club. 18th semi-annual tournament. \$500 added money.
 May 26, 27—Pacific Coast Trap Shooters Association. Third annual blue rock tournament. Vallejo Gun Club grounds, near Flosden Station.
 June 19, 22—Interstate Association. Grand American Handicap target tournament. \$1000 added money. Elmer E. Shaner, Secretary-Manager. Pittsburg, Pa.
 Oct. 15-April 1—Open season for English snipe.
 Oct. 15-Aug 1—Deer season closed.

Bench Shows.

March 13, 16—Buffalo Kennel Club. Buffalo, N. Y. S. P. White. Secretary. Entries close Feb. 25.
 March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. Jas. Matthews, Secretary. Entries close —
 March 17—Bull Terrier Club. San Francisco. Entries close —
 March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary. Entries close March 10
 March 28, 31—Wisconsin Kennel Club. Milwaukee. Jos. Meisenheimer, Secretary. Entries close —
 March 30 31—Haverhill Kennel Club. Haverhill, Mass. A. A. Balch, Secretary. Entries close —
 April 4, 7—Duquesne Kennel Club. Pittsburg, Pa. J. Stewart Laycock, Secretary. Entries close —
 April 9, 10—St. Louis Collie Club. St. Louis, Mo. John A. Long, Secretary. Entries close —
 April 11, 14—Southwestern Kennel Club. Los Angeles. George R. Albers, Secretary. Los Angeles. Entries close April 3.
 April 13, 14—Merrimack Valley Kennel Club. Lawrence, Mass. Albert Mitchell, Secretary. Entries close —
 April 18 21—Seattle Dog Fanciers' Association. Seattle, Wash. Chas. McAllister, Secretary. Entries close —
 April 25 28—Portland Kennel Club. F. E. Watkins, Acting Secretary. Entries close —
 May 29, 30—Long Island Kennel Club. Jos. M. Dale, Secretary, Brighton Beach, L. I. Entries close —
 June 1 2—Ladies Kennel Association of Mass. Mrs. L. M. Speed, Secretary. Entries close —
 June 5, 6—Ladies Kennel Association of America. Mineola, Long Island. Miss E. M. Clark, Secretary. Entries close —
 June 6, 9—San Francisco Kennel Club. 10th annual bench show. Fred P. Butler, Secretary. Entries close —
 June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary. Entries close —
 Aug. 22, 23—Asbury Park Kennel Club. Asbury Park, N. J. A. F. Cottrell, Secretary. Entries close —
 Sept. 3, 5—Miami Valley Kennel Club. Piqua, O. Edwin A. Hiatt, Secretary. Entries close —
 Sept. 3, 6—Taunton Kennel Club. Taunton, Mass. A. J. Leo, Secretary. Entries close —
 Sept. 8—Cedarhurst Kennel Club. Cedarhurst, L. I. Jno G. Bates, Secretary. Entries close —
 Sept. 29—Bryn Mawr Kennel Club. Haverford Pa. Henry D. Riley, Secretary, Stafford, Pa. Entries close —

San Francisco Fly-Casting Club.

SATURDAY CONTEST No. 2, Classification Series. Stow Lake, March 10 1906. Wind southwest. Weather, cloudy. Judges, F. V. Bell and T. C. Kierulff; referee, W. E. Brooks; clerk, A. Craig.

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage (b) delicacy percentage; (c) net percentage. Event 4—Lure casting percentage.

The fractions in lure casting are 15ths.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

AT THE TRAPS.

The Union Gun Club will open the club blue rock season of seven monthly shoots at Ingleside tomorrow.

Four events are on the card: Even No. 1—Club race, 25 targets; entrance 75 cents, 16 yards, class shooting (four classes, champion, first, second and third). Purse of \$600 added each month; \$15 for each class, moneys 5-3-2, Rose system.

Event No. 2—Club medal race, 25 targets, entrance 50 cents, 16 yards (monthly medal winners to shoot at 18 yards after first win and 20 yards on winning thereafter). Class shooting, four classes. Purse of \$20 added, \$5 for each class, distributed at the close of the club season, second high guns to win, final medal winners not competing for cash prizes. Medals for each class to become permanent property of shooter winning oftentimes.

Event No. 3—Open to all race, 10 doubles at 14 yards, 15 singles at 16 yards, entrance 75 cents, added money at each shoot determined by number of entries, money division 5-3-2; 25 per cent of entrance money also added.

Event No. 4—Open to all; A. M. Shields' cup race, entrance 50 cents, 25 targets; shooter scoring most number of monthly wins to own trophy.

A novice medal will be awarded to the shooter making the highest score to 50 per cent or under during the present club season.

The officers elected for this year are: Dr. W. A. Hansen, president; Dan Daniels, vice-president; Thos. L. Lewis, secretary-treasurer, and Dr. Edmond Pitties, captain.

Harvey McMurchy, Otto Feudner, C. C. Nauman, Pete McRae, Jas. Maynard and J. Karney were the guests of J. O. Cadman at the Claremont Country Club on Thursday afternoon. A number of races at blue rocks took place at the club traps.

The Claremont Country Club recently elected the following directors: Frank W. Wilson, Berkeley; W. S. Tevis, San Francisco; George D. Greenwood, Harry J. Knowles, Tyler Henshaw, E. R. Folger, Alfred von der Ropp.

Tomorrow forenoon members of the Santa Clara County Fish and Game Protective Association will crack blue rocks near San Jose on the old trap shooting grounds at the Bridge House on the Monterey road, which have been procured for this season, and set up a blue rock trap. They will also arrange for a number of smaller traps to be used by novices. It is the policy of the association this year to encourage blue rock shooting as much as possible. The members realize that everyone is not a crack shot and it is with this end in view that traps will be specially provided for beginners. The only difference between that used by the best shots and those used by the amateurs is that the one throws a clay pigeon much faster and at a number of different angles than the others. The first regular shoot will probably be held one week from tomorrow.

Reedley, Fresno county, shooters had a lively little shoot on February 22nd. Ed Reed broke 146 out of 170, J. E. Shebley 145-170, Mr. Bebb 141-170, O. D. Lyon 43-80, Frank Blau 66-90, Gus Eyman 18-30 and W. W. Parlier 17 out of 30.

A live bird and blue rock shoot will take place at Avalon, Catalina Island, on April 8th.

Following the two-day shoot at Los Angeles, April 14th and 15th, there will be a two-day tournament at Santa Ana.

The Concord Gun Club is making arrangements to inaugurate trap shooting during the coming season. The club has opened negotiations for the purchase of the required number of traps and they are expected here shortly.

The club has also secured a new lease of the preserves used by it last winter. The past season was not a very good one for ducks, but the members have hopes that the next season will repay them for their past outlay.

Rifle shooting at targets is also becoming a popular sport at Concord.

Inclement weather caused a postponement of the Empire Gun Club's regular club events at Alameda Junction last Sunday. An enthusiastic attendance of shooters present prompted a series of practice matches in lieu of the club's opening races for 1906.

The Bakersfield Blue Rock Club, which has so many enjoyable shoots last season, fixed March 11th as the date for the first club shoot this season.

For last season F. N. Scofield carried off the honors, his average for the year being 91. Jack Nelson was second and E. C. Wilson third.

The membership of the club, as now constituted, is: H. L. Packard, A. F. Stoner, C. E. Getchell, Captain Shafter, F. N. Scofield, Claude Gilbert, E. B. King, E. C. Wilson, Angus Crites, A. C. Tupman, H. A. Blodgett, I. D. Miller, Ira Hochheimer, Monroe Hochheimer, Clarence Wilson, Ed Baer, G. W. Price, J. M. Johnson, A. W. Phitney, Wright Jewett, J. S. Oswald, Tom Klipstein, A. J. Ferguson, F. G. Munzer, John Nelson, S. Yancy, Jack Henry, Philo Jewett, C. M. Higgins.

The annual medal shoot of the Folsom Gun Club, which had excited so much interest and rivalry among Fresno sportsmen, was held Sunday, February 25th. The day was a perfect one and some good shooting ensued.

Marshall Surbaugh, who broke 22 blue rocks out of 25, was the medal winner. In a practice shoot before the main event Surbaugh broke 24 out of 25.

Oscar Miller, who held the medal during the past year, did not shoot in his usual good form. The medal must be won three times for final ownership.

The scores, at 25 targets, were: M. Surbaugh 22, Wm. Wulff 20, J. Broder 20, J. E. Joerger 20, G. Gerber 19, E. Kipp 17, Bobby Keefe 17, O. Miller 17, G. Fleckenstein 15, O. Ferguson 15, Geo. Wilson 14, P. Joerger 14, John Wild 8, F. Houston 6, J. Gomes 6, Lou Biggs 4.

The Sacramento Union makes the following statement about a popular sportsman, a shooter who is also well known to San Francisco powder burners:

Frank M. Newbert is a shotgun expert who is known at every shooting ground in Northern California. He is a remarkably steady shot and his yearly averages vary but one or two per cent.

Mr. Newbert has won the Northern California championship several times, and at present he is holder of the "Gold Dust" trophy, which had to be won three times. He also holds the Kimball & Upson Company trophy and medals for many other events. Mr. Newbert was a member of the Newbert, Ruhstaller and Newbert team that won and still holds the team championship of Northern California, and the silver loving cup that went with it.

The opening shoot of the Capital City Blue Rock Club for the year took place March 4th at the Kimball & Upson Company's grounds on the Riverside Road. The location and the "layout" of the grounds were highly pleasing to the shooters, being free from the wind and so planned that the shooter always has the sun at his back, with a northern sky.

Owing to the uncertainty of the announcement not a many shooters were present as usual, but the lack of numbers in nowise dampened the enthusiasm of the contestants.

Frank Newbert started off right, making the first "possible." He broke 25 targets without a skip, which is very good work for a first day of the season shoot.

Some of the members being prevented from attending the regular club event has been postponed until tomorrow.

A brief summary of scores follows:

At 15 targets—Just, 11, 13; F. M. Newbert, 15, 15, 14; Blair, 12, 9; D. Ruhstaller, 8, 13.

At 20 targets—O. L. Stephens, 14, 14; Jones, 10, 7; E. D. Adams, 16, 16, 14, 8, 4; F. B. Adams, 16, 14, 18, 18, 18; D. Ruhstaller, 10, 12, 14, 17; Hal Stevens, 19, 18, 17; Gene Stevens, 14; H. J. Vetter, 16, 19; H. Derr, 16, 13, 17, 18, 17; W. Inman, 16, 15, 18, 18; A. Just, 14, 17; H. Kessig, 16, 10, 11, 11, 17; F. Lauser, 13, 18; J. N. Blair, 12, 12, 16; F. Newbert, 17, 18, 19; W. Mott, 11, 14, 14; C. Schoenbacker, 13, 9, 10; E. Jones, 10, 11; C. DeMerritt, 18.

At 25 targets—A. Just, 19; F. Newbert, 21, 25; H. Derr, 20; J. N. Blair, 21; D. Ruhstaller, 15, 17; H. Kessig, 21; E. D. Adams, 18.

The officers of the club elected March 2nd are: President, John N. Blair; secretary and treasurer, E. D. Adams; captain of team, Andrew Just.

The membership is rapidly increasing, at present there are seventy-five members, and admirers of the pastime may become members by applying at the Kimball-Upson Co.'s store for blanks. The membership list includes the following: J. N. Blair, E. D. Adams, A. M. Just, F. M. Newbert, L. S. Upson, H. J. Vetter, F. Schoenbachler, Harry Trumpler, C. G. DeMerritt, F. Riechert, D. Ruhstaller, H. R. Kiessig, W. Inman, W. Mott, J. W. Hughes, F. B. Adams, F. J. Ruhstaller, Charles Ludden, H. McWilliams, Ellis Jones, Hal Stevens, Harry Derr, C. F. Bauer, C. Lauser, F. L. Atkinson, George Wittenbrock, W. B. Hamilton, J. Contell, A. A. McKley, George Shepherd, C. C. Cotter, E. B. Julian, Peter Hallaner, Wm. Sayres, H. E. Yardley, W. Wiseman, J. J. Menefee, E. E. Griffin, S. A. Smith, R. R. Flint, P. Snook, George Menke Jr., Wm. Gould, O. J. Herold, J. Gusto, Alden Anderson, W. A. Gage, Frank Hickman, C. Heilbron, B. Gallup, T. Shore, George Neale, J. W. Shinkle, Dr. R. E. Smith, F. C. Yoerk, R. J. Curren, C. H. Baumgartel, Dr. Weldon, W. C. Wright, H. G. Miller, C. A. Palm, Robert Callahan, G. T. Gray, G. Davis, P. Pratt, J. Skelton, D. E. Newbert, Henry Glide, Dr. Duell, Albert Elkus, W. E. Lovdal, August Yoerk, J. R. Hughes.

Members of the Venice Country Club, Los Angeles country, are striving to revive interest in trap shooting. Dana Burks, Abbot Kinney and others are planning to hold a shoot at the Country Club within the next few weeks.

At Lakeview, Monterey county, K. M. Henneken has fitted up a trap shooting ground which bids fair to become popular with the many trap shooters in that vicinity. On March 5th a number of shooters, including "Pop" Carr, Varian and Green, indulged in several practice shoots. The scores were:

Ten targets—Carr 7, Varina 9, Fleming 1, Hartzel 0; Green 6, Varian 9, Carr 7; Fleming 3, Botsch 4, "K" 5; Fleming 0, Botsch 0, Hartzel 2.

Fifteen targets—Green 15, Varian 14, Carr 9; Green 12, Varian 13, Carr 14.

Twenty-five target—Green 18, Varian 22, Carr 19; Varian 24, Carr 20.

Tomorrow the prize shoot will take place. The grounds were open all week for practice.

Mr. Henneken will give a live bird shoot in the near future.

Jack Fanning broke 61 out of 70 at the initial shoot of the Belleville Gun Club recently, near Newark, N. J.

At the Pueblo Gun Club tournament February 22nd Pueblo, Colo., forty-six shooters were on the firing line and there were also hundreds of spectators present.

Jas. T. Skelley of Wilmington, Del., is scheduled to be the next shooter to contest with Alden B. Richardson for the Delaware State championship. Day and time for the match have not yet been announced. The shot will come off on the grounds of the Dover Gun Club.

Twenty shooters took part in the Fresno Gun Club shoot March 4th, the day being an ideal one for the sport.

Scores at 10 targets: Holdscaw, 9, 10; Schlueter, 9, 9, 9; Myers, 7, 6, 5, 6, 8, 7, 6, 8, 5; Garner, 5, 8, 9, 5, 7, 7, 8; Austin, 5, 5; Lewald, 5, 6; Bean, 4; Hemphill, 4, 3, 3, 5, 6, 3; Clark, 4, 3, 4; Joe Hart, 7, 5, 6, 4, 5; H. Martin, 5, 5, 4, 3; Nate Hart, 6; O'Neill, 9, 8, 6, 9, 7; Oswald, 5, 7, 7; Cronkhite, 3, 8; Summers, 3, 2; F. Hart, 5.

Scores at 20 targets: Holdscaw, 18, 17; Schlueter, 9, 17, 14, 16, 13; Myers, 13, 14; Garner, 16, 13, 16, 13; Lewald, 10, 11; Bean, 9, 6; Hemphill, 7; Clark, 5; O'Neill, 15; French, 16.

A live pigeon shoot was held in Fresno two weeks ago, the first in six years for that neck of the woods. The shoot was under the management of J. S. Bradley.

All events were at 6 pigeons, 25 yards rise. Bradley carried off the honors of the day for out of 130 birds he grassed 121, 3 lost and 6 dead out, pretty good shooting that; he killed his first 48 straight. Holdscaw, Adams, Eilert, Hith and O'Neill also scored straight.

During the morning there were eleven events pulled off and during the afternoon fifteen. The shooting stopped at 4:30 o'clock, the supply of pigeons (650) being exhausted. The day could not have been better for the sport.

The scores for forenoon and afternoon, at 6 birds, were:

Schlueter 3, 3; Adams 5, 6, 4, 6, 5; Gargut 4, 2; Hith 6, 4; Bradley 6, 6, 6, 6, 6, 6; Holdscaw 5, 4, 6, 5, 6; Eilert 3, 4, 6, 6, 6, 6; Hunsaker 5, 4, 3; Hemphill 1; H. Hart 3; Garner 4, 3; O'Neill 5, 6, 3, 6, 4; Meinhey 4; George Hart 4.

Hith 4, 5; Wilkinson 2, 1; Bradley 6, 5, 4, 6, 5, 5, 6, 6, 4, 5, 5, 6, 5; Meinhey 4, 5, 5, 5, 5, 3; E. Bradley 3; Dumas 4; Lowery 3; Eilert 5, 3, 3, 4, 2, 5, 6, 6, 5, 5; Holdscaw 4, 5, 5, 3, 6, 5, 5, 6.

From far away Boston comes the announcement of an important trap shooting event:

A gold and two silver medals, of exquisite design and workmanship, have been sent to the New England Kennel Club from Le Fusil de Chasses, the famous gun club of Paris, to be shot for by members of the Boston organization. This announcement was made last week at the clubhouse of the New England Kennel Club at Braintree, where the members met to make arrangements for this special match and and a match with the Boston Athletic Association in place of holding the regular weekly shoot.

The shoot for the French medals will be held on March 17 and 24, and will be 50-bird contests, single barrel, known angles and know traps. Handicaps will be given, but will not be allowed till the close of the second day's shooting. The medals will be awarded the members getting the highest gross scores.

Averages Reported.

Louisville, Ky., Feb. 22.—First general average, C. O. LeCompte, 89 out of 100, shooting "Infallible"; C. E. Walker, Louisville, Ky., first amateur and second general average, 86 out of 100, shooting New Schultze; C. B. Semple, Louisville, Ky., second amateur and third general average, 85 out of 100, shooting "DuPont."

Lancaster, Pa., Feb. 22.—L. J. Squier, first general average, shooting "DuPont"; J. P. Mattson, Doe Run, Pa., tied for first amateur and second general average, shooting "DuPont."

Chicago, Ill., Feb. 22-23.—H. Dunnell, Long Lake, Ill., first average, 362 out of 400, shooting "DuPont"; L. R. Barkley, Chicago, Ill., second average, 358 out of 400, shooting "DuPont."

GOSSIP FOR SPORTSMEN.

Canvasbacks in Thousands.

Now that the duck season has been closed since February the canvasbacks are making their first appearance on the overflows near the city of Sacramento. Few bags of "cans" were obtained in that section during this winter, for the reason that the birds were hard to approach. Now, however, the country back of Clarksburg is white with thousands of canvasbacks, and along the shores of San Francisco and the smaller bays they are more numerous than in many years past. The ducks will not depart upon their northern flight until spring weather has become firmly established.

County Game Association.

The Monterey County Fish and Game Association was organized in Monterey on Tuesday evening. J. W. Flemming was elected president; B. A. Ramsey was chosen secretary and treasurer. Vice-presidents were chosen as follows: H. A. Greene, William Hatton and E. A. Carver of Carmel; Pfeiffer of the Big Sur country; John McCoy of Corral de Tierra; First Lieutenant Binford of the Presidio, and Martin Birks. The following trustees were elected: H. R. Bickford, Martin Birks, L. Goldstine, J. L. Hartnez and J. M. Moore.

Deputy Fish Commissioner Welch was present at

the meeting and made an address in which he stated that there was plenty of work for the association to do in protecting the fish and game of the county. He asserted the hotels of San Francisco are kept supplied with quail from Monterey county, the birds being shipped out in trunks, hides, bee hives and other ways by which it is hard to detect violations of the law.

Prof. J. Loeb addressed the association advocating the passage of a law setting aside a portion of Monterey Bay as a fish preserve.

H. A. Greene, B. A. Ramsey and Prof. Loeb were appointed a committee to go before the city trustees of Monterey and Pacific Grove for the purpose of requesting those bodies to take such action as will prevent the wholesale fishing for shell fish which threatens to very soon exterminate the shell fish of this region.

Truckee Anglers Wrathful.

The recent purchase by the San Francisco Fly-Casting Club of land on the banks of the Truckee river for a club trout fishing preserve has stirred up some feeling apparently on the part of Truckee devotees of the rod, if a recent dispatch to the Sacramento Bee is any criterion, and which states:

During the month of January the San Francisco Fly-Casting Club purchased all the land owned by Dr. Zimmer, who conducts a sanitarium about four miles east of Truckee. This property takes in both sides of the river for a distance of about half a mile east and west of the proposed site upon which the club intends to build a large club house.

This land was purchased for the very purpose of making it a private holding and allowing no one to fish along that portion of the stream except members of the Fly-Casters' Association. Work on the club house will begin next month and a wire fence will be built around the land. As soon as this is done and the grounds beautified, guards will patrol the property, keeping off all local anglers and allowing no one to fish along the river banks on the land enclosed.

This is the first instance of outsiders buying up the wild lands of the Sierra Mountains for the purpose of keeping out old-time fishermen and hunters—men who have resided here these many years—in the interests of sportsmen of San Francisco. The new idea is not taking well here.

Last summer an organization was effected here composed of nearly all the local anglers and hunters. Its title is the Truckee River Fish and Game Protective Association, and it has a membership of seventy. The officers of the association are up in arms at the San Francisco move. They are determined that no private association of men of San Francisco or anywhere else shall take away from them the noted trout stream of the Sierra Mountains—the Truckee River. Some have gone so far as to declare they will throw all the guards in the river if molested while fishing. Others say they will fish in the river if they have to wade down through the center of the stream. The subject has been discussed pro and con in the saloons, the hotels and on the street corners. Some have consulted attorneys to learn whether these San Franciscans can keep people from fishing in that portion of the river which passes through their land. The Truckee is not a navigable river.

A meeting of the association will be held next week to take up the matter, and in all probability attorneys will be engaged to fight the case through the courts, should the Fly-Casters' Association attempt to prevent local anglers from casting lines in the water which runs through their territory.

We believe this cloud on the angling prospects of the Truckee at the particular place mentioned will be easily blown over and a feeling of perfect amity between the club members and Truckee sportsmen will result.

Another Fly-Casting Club.

The Marysville Casting Club was recently organized, the officers elected being: Chas. Peek, president; Morgan Williams, secretary; Leslie Crooks, treasurer. Fly-casting meetings are to be conducted on Ellis lake.

The California Anglers Association, through the Board of Directors, have recently secured a ten years' lease on four miles of excellent fishing water on Waddell creek.

DOINGS IN DOGDOM.

Changes in Show Dates.

We are reliably informed that the published dates of the Seattle show (April 18-21) and Portland (April 25-28) will be changed to later dates in May. The reason for the shift is to bring those shows and the San Francisco show in June in close touch for a number of exhibitors and others who will show and be in attendance at the three shows. The idea is an excellent one and will do much to cement mutual interests and enthusiasm among the coast fancy.

Pay Entrance Fees to Secretaries.

The "handler" parasite is a growing menace to coast shows. The fellow who gathers a string of dogs, collects from exhibitors the entrance fees, express charges both ways, and usually his own compensation in advance. The latter honorarium invariably from the owners of dead ones, for they are fully worked on the start, the owners of winners are "touched up" in proper style afterwards.

His show "graft" consists in working a club for a "handler's prize" and withholding all or part of the entrance fees. The idea of charging entrance fees for "his" dogs is preposterous. "The bench show committee does not appreciate what has been 'done' by him for their show." If they don't "come through" he intimates a deep revenge by keeping out entries from the next show. "You know."

He has "done" many small shows and the sooner bench show committees and exhibitors shut down on this style of "grafting" the better will it be for many shows, and the sooner will the squeezer's occupation be gone.

The Los Angeles show officials have made a move in the right direction when they announce that there will be competent handlers employed by the club, to properly look after dogs sent to the coming show from distant points.

If intending exhibitors will forward or pay entrance fees directly to club secretaries it will serve the dual benefit of avoiding possible disappointment and will also enable show clubs to sidestep "hold up" handlers.

Irish Water Spaniels at Eastern Shows.

This breed seems to have lost its hold on Eastern exhibitors and for what reason it is hard to conjecture. As a duck hunting dog, with the possible exception of the Chesapeake Bay dog, it is hard to find a better one. On the Coast, sportsmen have a warm feeling for the breed and there is an increasing demand for them. Up north in Victoria and Vancouver there are some good ones as also there is in Washington and Oregon. In this State the breed is well liked. Locally there is a strong fancy for the Irish Water Spaniel, enough, we venture to state, to form a specialty club, a movement that would have sufficient support to enable breeders to get in return something a bit more substantial than mere glory.

At the New York show there were ten entries with seven dogs. Of these it was reported that the exhibit "was far superior to anything hitherto seen," "though few in numbers were very high in quality." Rev. T. Moore Smith showed the winning team. Erin's Exile (by Ch. Poor Pat) was best in coat, condition, quality and finish and took winners, all of the prizes, saving a third and a v h c went to Rev. Smith's kennel.

The awards were: Limit, dogs and bitches—1 Erin's Float, Rev. T. Moore Smith; 2 Erin's Harp, Rev. T. Moore Smith. Open, dogs and bitches—1 Erin's Exile, Rev. T. Moore Smith; 2 Erin's Float, Rev. T. Moore Smith; 3 Peggy Shea, W. J. E. Newton; res. Erin's Shamrock, Rev. T. Moore Smith; v. h. c., Lord Nelson, W. J. E. Newton. Winners, dogs and bitches—1 Erin's Exile; res. Erin's Float. Brace class, team class—1 Rev. T. Moore Smith's brace.

We failed to find any entries of Irish Water Spaniels listed in the reports of the Boston show nor in those of Washington, D. C., Washington, Pa., Southern Ohio Kennel Club, Hamilton, O., shows, nor an entry in the published list of entries of breeds for the Buffalo show.

A Question of Service

In discussing a recent case where a bitch had delivered a litter of dead pups, the owner of the bitch, who had paid a fee for stud service, seemed inclined to believe that "it was no more than right that he should have another service," as the essence of the service contract was fulfillment of the same by the production, in due course, of a live and healthy litter of puppies. The owner of the stud dog argued that he had entirely fulfilled his part of the contract—his dog had served the bitch, she became in whelp, there could not be raised a question of potency, for the cause of the dead puppies may have been entirely with the bitch. At all events that particular question was an open one for the time being.

In the absence of any prior and specific agreement covering the case and providing for such contingency among other things, it would seem as a cold business proposition that the owner of the stud dog had fulfilled the letter of the contract.

In this particular respect, there are more controversies, almost, than in any other features of breeders' or fanciers' experiences. Ordinarily, between friends or good fellows, these differences are readily adjusted.

In the spirit of true sportsmanship another service might be cheerfully granted. The dog's owner is at no loss and put to but little bother. Furthermore, there lies the possibility of ascertaining where the original fault may lie, or if either the one or the other dog is impaired. If the stud dog was at fault, it is an easier way of finding it out than by receiving another fee for an unproductive service. If the bitch is unable to whelp a live or healthy litter, the owner can save future expense.

Another phase of the case is this: Giving that both dog and bitch are of good type and breeding, it would not be far fetched to suggest that the owner of the dog could take a pardonable pride as a fancier in having a producing sire of good dogs.

A Bulldog Litter.

T. M. Stateler's bull bitch, Puddin' Face, whelped March 9th, seven puppies (six dogs) to Phil C. Meyer's Endcliffe Baron. Baron is also the sire of another recent whelping of nine puppies. Puddin' Face is by Clyde Nestor out of Norma. Nestor is a grandson of Ch. Rodney Stone. Six of the litter have screw tails, all are brindle or pied brindle. The pups are strong and doing well, indications pointing to a bunch of very promising puppies.

Some Good English Setters.

S. Christenson's good English setter bitch Belle Fontaine whelped a litter of eight puppies (five dogs) on March 2d to S. A. Peeble's Uncle Jimmie White-stone. Both dogs are well known to coast sportsmen. There being two crosses of Count Whitestone in the litter it is argued that there is a strong possibility of a Derby candidate for 1908.

Mr. George Raper will judge at San Francisco in June it is announced.

Jackson's Napa Soda does not tangle the feet.

GROUSE AND WILD TURKEYS OF THE UNITED STATES, AND THEIR ECONOMIC VALUE.

By Sylvester D. Judd, Assistant United States Biological Survey.

The Dusky Grouse.

The dusky, or blue, grouse (*Dendragapus obscurus*) lives mainly in coniferous forests of the western mountain ranges, occurring in the Rocky Mountains from New Mexico, Arizona, and Colorado, north to Canada and Alaska, and west to the Pacific Coast. In addition to the common dusky grouse (*Dendragapus obscurus*) of the Rocky Mountains from New Mexico to Montana, three other geographic forms are known. These are the sooty grouse (*D. o. fuliginosus*) of the northwest coast, from California to southern Alaska; Richardson grouse (*D. o. richardsoni*), from Montana to northwestern British America; and the Sierra dusky grouse (*D. o. sierrae*) of the Sierra Nevada in California and east slope of Cascade Mountains in Oregon. These grouse are large plainly colored birds, mainly of a slaty or dusky shade. In unfrequented forests they are so unsophisticated that they often perch on a low branch and gaze curiously at an intruder until struck by a stone or stick. From their unsuspicious nature they are known in parts of the West, like the previous species, as fool-hens. While commonly habitants of the higher forests, they often descend to lower levels on the mountain sides where deciduous trees and bushes mingle with the conifers.

The dusky grouse is a valuable food bird and weighs from 2½ to 3½ pounds. Wilbur C. Knight says: "Of all the edible birds of the West this and the following variety (Richardson's grouse) are the most desirable. The flesh is highly flavored, tender, juicy, and as white as that of a tame fowl." (Birds of Wyoming, p. 54, 1902.)

The flavor of a game bird's flesh is often affected by the character of its diet, as is the case with the blue grouse after it has been feeding on the pitchy foliage of conifers. "The use of such food imparts to the flesh of these birds," says Major Bendire, "a strong resinous flavor, not particularly relished by me at first." (Auk, vol. 6, p. 33, 1889.) Baird, Brewer, and Ridgway, however, state that the pine taste only improves the bird's gamy flavor. (Hist. N. A. Birds, vol. 3, pp. 424-425, 1874.) Vernon Bailey states that half-grown young of the blue grouse which had been feeding largely on gooseberries were excellent eating, being entirely free from pitchiness. George B. Grinnell, editor of Forest and Stream, notes that a diet of a small species of red whortleberry also makes the flesh delicious. (Forest and Stream, vol. 12, p. 365, 1879.)

As an object of sport the blue grouse is in the front rank of game birds, even though it spends much time in the deep coniferous forests. It lies well to the dog, flies swiftly, and affords shots in heavy timber that test the sportsman's highest skill.

The dusky grouse cock is quite uniformly dark in color, as the name implies. In the mating season the bird presents a striking appearance. The brilliant comblike wattles above its eyes are conspicuous, the large, yellow wind sacs on the sides of its neck are fully inflated, and it struts about like a turkey cock, with drooping wings and spreading tail, emitting a sound that closely resembles the hooting of the great horned owl. The nesting takes place during the last half of May, when the hen bird scratches a slight hollow in the earth and lays from six to twelve cream-colored, brown-spotted eggs. Usually but one brood is reared in a season. Prof. W. W. Cooke, in writing of the habits of the species in Colorado, says that it breeds from 7000 feet altitude to timber line, 4000 feet higher. At the former altitude it lays about the middle of May. In August the birds gather in flocks and visit grainfields, or frequent the more open gulches and foothills for berries. In September they wander above timber line to feed on grasshoppers, reaching an altitude of 12,500 feet. In severe winter weather some of the birds come down into the thick woods, but many remain the whole year close to timber line. (Birds of Colorado, p. 70, 1897.)

Food Habits.—The food habits of the dusky grouse have been studied by examination of the contents of forty-five crops and stomachs, representing every month of the year except May, June, and November. Most of the birds were shot in British Columbia, Colorado, and Idaho, but a few came from Montana, Utah, Wyoming, and California. The food consisted of 6.73 per cent animal matter—insects, with an occasional spider—and 93.27 per cent of vegetable matter—seeds, fruit, and leaves. Grasshoppers constitute the bulk of the animal food, amounting to 5.73 per cent. Beetles, ants, and caterpillars form the rest of the insect food. One stomach contained the common land snail. Major Bendire, Vernon Bailey, and Walter K. Fisher have shown that the young birds feed largely on grasshoppers. Mr. Fisher shot a young bird at Forest Grove, Oregon, July 6, 1897, which had eaten twenty grasshoppers and several smooth, green larvae.

Vegetable Food.—The dusky grouse and its near relative, the spruce grouse, are among our chief foliage-eating birds. Browse is eaten by the blue grouse to the extent of 68.19 per cent of its annual food, and is distributed as follows: Buds and twigs, 5.28 per cent; coniferous foliage, 54.02 per cent; ether leaves, 8.89 per cent. The species spends most of its time in pine forests feeding on needles, buds, and flowers. The yellow pine—male flowers, the white fir, the Douglas fir, the western hemlock, and the black hemlock, are among the trees that afford it subsistence. That the blue grouse thus utilizes the foliage of conifers is well known to everybody familiar with the bird. Major Bendire writes that during the winter its food consists almost wholly of the buds and tender tops of pine and fir branches, refuses

bits of which sometimes accumulate under a single tree to the amount of a bushel. (Auk, vol. 6, p. 33, 1889.) A blue grouse shot by W. W. Price at Slippery Ford, Cal., when fifteen feet of snow lay on a level, had filled its crop with the young leaves of the white fir. (Condor, vol. 2, p. 160, 1901.) Plants other than conifers furnish 14.17 per cent of the annual food of the species. This material includes red clover leaves, willow leaves, blueberry leaves, miterwort, birch shoots, and poplar flower buds. During July, in Montana and Utah, field agents of the Biological Survey have seen the bird feeding on the leaves, buds, and flowers of the Mariposa lily. It eats also the blossoms of lupine, columbine, and the Indian paint brush.

The blue grouse is only slightly granivorous. Its seed food amounts to but 4.99 per cent of the whole—a proportion small indeed when compared with that of the bobwhite and the crested quails. The species is said by Alexander Wilson to resort to seeds only when other food is scarce. (Am. Ornith., vol. 4, p. 191, 1831.) At times it visits fields for oats and other grain. It feeds also on pine seeds (*Pinus flexilis* and other species). It picks up polygonum seeds (*P. polymorphum* and others), is fond of wild sunflower seeds, and has been known to sample false sunflower, caraway, and the capsules of *Pentstemon gracilis*. It picks up also the seeds of various species of lupine, and is fond of acorns, including those of the canyon live oak.

The blue grouse is one of the most highly frugivorous of our gallinaceous birds. Fruit formed 20.09 per cent of the food of the forty-five birds whose stomachs were examined in the laboratory. Manzanita berries constituted a large part, amounting to 13.48 per cent of the total. During the summer and early fall they were eaten in great quantities. The manzanita often forms tangled areas of chaparral and includes a number of species which furnish birds and mammals an abundant supply of berries. The berries eaten by the blue grouse include *Arctostaphylos pungens*, *A. nevadensis*, and *A. uva-ursi*. Its list of fruits also includes the following: Mountain twin berry, red elder, honeysuckle, cherry, mountain ash, salmon berry, service berry, salal, huckleberry, currant, gooseberry.

The food habits of all young birds differ more or less from those of their parents. Young blue grouse at first live chiefly on grasshoppers and other insects and on tender plant tops. Later in the season they subsist on berries, such as gooseberries and salal-berries, and some seeds, such as those of the wild sunflower. Florence Merriam Bailey, in writing recently of the habits of the dusky grouse in New Mexico, says: "Near our camp at the foot of Pecos Baldy, Mr. Bailey discovered a winter roosting tree of the grouse. The tree was on a sheltered part of the wooded slope and was so densely branched that after a prolonged rain the ground beneath was perfectly dry. The earth was strewn with winter droppings, composed entirely of the leaves of conifers. Conifer needles had also been eaten by three of the grouse that were taken . . . in July and August, but at this season the birds were living principally on such fresh food as strawberries, bearberries (*Arctostaphylos uva-ursi*), shepherdia berries, flowers of the lupine and paint brush, seeds, green leaves, grasshoppers, caterpillars, ants, and other insects. One crop contained twenty-seven strawberries, twenty-eight barberries, and twelve shepherdia berries, besides flowers, leaves, and insects, while the accompanying gizzard was filled with seeds, green leaves, and insects."

The Spruce Grouse.

The spruce, or Canada grouse (*Canachites canadensis*) inhabits the transcontinental coniferous forests from the northern border of the United States, east of the Rocky Mountains, to Labrador and Alaska. The spruce grouse (*Canachites canadensis*) is separated into three geographic forms, of which two occur within our territory; these are the common spruce grouse (*C. c. canadensis*) of the northern border from Maine to Minnesota, and the Alaska spruce grouse (*C. c. osgoodi*) of Alaska and western Canada. The male is one of the handsomest of the grouse; it is gray, with black bars above and clear black and white below, with a rusty band edging its fanlike tail. In spring brilliant red combs above the eyes add to the beauty of the strutting cock. These birds drum in an odd way: The male selects an inclined tree and flutters up the trunk for 15 to 20 feet, drumming as he goes. The spruce grouse nests in May or early June and lays from nine to sixteen buff-colored eggs, handsomely marked with rich chestnut and brown.

Food Habits.—Study of the food habits of the spruce grouse has been but meager, since only eight stomachs were available for examination. These were collected in January, May, August, September, October, and November, six of them in Canada, one in Michigan, and one in Minnesota. The material in the stomachs consisted of 100 per cent vegetable matter—18.33 per cent seeds, 19.73 per cent fruit, 61.94 per cent coniferous foliage. The seeds were of spruce, thistle, and several unidentifiable plants. In its frugivorous habits the spruce grouse closely resembles its relative, the blue grouse. The proportion of bear-berries was 16.67 per cent, and of other fruit 3.06 per cent. Solomon's seal, blueberries, bunchberries, crowberries, and juniper berries are among the berries principally eaten. Dr. C. Hart Merriam, Chief of the Biological Survey, has informed the writer that the spruce grouse feeds largely on the bearberry and the wax currant.

When cold weather comes the spruce grouse usually abandons a berry diet and eats nothing but its favorite food—the leaves, buds, and tender shoots of conifers. This kind of browse formed 61.94 per cent of the food of the eight birds examined in the laboratory. It is safe to assume that more than half the year's food of this grouse is obtained by browsing,

and that nearly half consists of the foliage of conifers. Wilson and Bonaparte state that in winter this species feeds on the shoots of spruce (Am. Ornith., vol. 4, p. 208, 1831), a habit so generally known that it has given to the bird its name. According to Major Bendire, this grouse feeds also on the needles of tamarack, and in certain localities feeds upon them exclusively. (Life Hist. N. A. Birds, [I], p. 52, 1892.) It has been known also to eat the needles of *Pinus divaricata* and the fir balsam. As with the blue grouse, resinous food imparts to the flesh a decidedly pitchy flavor.

W. H. Osgood, of the Biological Survey, informs the writer that he examined crops of the Alaska spruce grouse which contained the leaves of blueberry and horsetail. The Alaska spruce grouse, according to Dr. W. H. Dall, was found at Nulato in winter feeding exclusively on the buds of willow. (Nelson, Nat. Hist. Coll. Alaska, p. 130, 1887, 1888.)

The flesh of the spruce grouse is dark and for the table is in no way comparable to that of the blue grouse. Nor is the bird equal to the latter as an object of sport. It is, however, a thing of beauty in the dark northern coniferous forests, where its aesthetic value must impress every lover of nature. This grouse is strictly a forest bird, and nowhere appears to come into contact with agriculture.

The Franklin Grouse.

The Franklin grouse (*Canachites franklini*) is very similar to its near relative, the spruce grouse, and differs mainly in the conspicuous white marking on its upper tail coverts and in lacking the rufous tip to the tail. It is found in the mountains of western Montana and Idaho, westward to the coast ranges of Oregon and Washington and northward through British Columbia to southern Alaska. Major Bendire records that nidification occurs during the last of May and in June. The food habits of the bird are similar to those of the spruce grouse. In Alberta, between August 25 and September 1, 1894, J. A. Loring, a field agent of the Biological Survey, examined the crops of several Franklin grouse and found in them berries and leaves. A. H. Howell, also of the Survey, examined crops and gizzards in Idaho during the last of September, 1895, and found in them large quantities of the leaves of the lodge-pole pine broken into bits from one-fourth to three-fourths of an inch long. Major Bendire notes that in summer they furnish Indians and packers with their principal supply of fresh meat. Their flesh is palatable then because they eat grasshoppers and berries and feed less freely on the buds and leaves of spruce and tamarack. (Life Hist. N. A. Birds, [I], p. 58, 1892.)

Hon. Theodore Roosevelt writes of this bird in Montana: "The mountain men call this bird the fool-hen; and most certainly it deserves the name. The members of this particular flock, consisting of a hen and her three-parts grown chicks, acted with a stupidity unwonted even for their kind. They were feeding on the ground among some young spruce, and on our approach flew up and perched in the branches, four or five feet above our heads. There they stood, uttering a low complaining whistle, and showed not the slightest suspicion when we came underneath them with long sticks and knocked them off their perches." (The Wilderness Hunter, p. 116, 1893.)

(To be continued.)

Ruffed Grouse's Snowy Bed.

Mr. Ernest Harold Baynes, the well-known naturalist, in a recent letter to the Boston Herald, tells the following interesting story about a ruffed grouse:

"On a recent snowshoe tramp along the mountain side, near my home in New Hampshire, I came to a clearing, and beyond it there was a line of dark spruces, with a few hardwood trees to the left. Across this dark belt a barred owl winged its way, and presently alighted on one of the hardwoods, a large rock maple.

"So intent was I on watching the bird that I did not look where I was going, and the toe of my snowshoe caught in something and I measured my length on the snow. That accident in itself would not be worth recording but for the fact that, as I fell, a ruffed grouse burst from the snow, close to my prostrate body, sprinkling me with a shower of snow from his whirling wings.

"Then, as I watched his brown form whizzing through the trees, I realized what had happened. The bird as grouse frequently do at this season, had plunged into the snow the night before, leaving a hole which had been the cause of my sudden descent. He had evidently been sleeping late, when the fall of a heavy body, almost upon the roof of his chamber, caused him to rise with great suddenness, scattering the snow in a shower upon his unwitting disturber. Looking down at the hole from which he had come, I saw the imprints of his strong wings, one on either side, left there at the moment of his departure.

"A curious habit this, and yet a very simple way for the bird to protect itself from severe cold and storm. How was the habit acquired in the first place, I wonder? Was it the result of accident? If so, how many generations did it take before the habit became instinctive, as it doubtless is to-day? Do grouse ever make the mistake of plunging down when the crust of the snow is hard and impenetrable? If so, they must be badly jolted, and I never heard of a grouse having been injured in this way."

State Laws Govern.

The Board of Supervisors of Mendocino, on February 8th, repealed all fish and game laws in force in that county and previously passed by the board. The reason for this was that there was a question as to the validity of the county ordinances, and to avoid any complications the repealing ordinance was passed, thus leaving the county under the State game and fish laws.

BACK TO THE LAND.

Statistics now show that the tendency of the times in this country is "back to the land." A competent political economist has declared that the moment the peasantry desert the farms and start towards the town and cities the prosperity of the country is imperiled. The present rural population is about 35 per cent and the tide is still flowing copiously in the same healthy direction. The ruin of old countries has been this irresistible rush of young men and women to the cities. The agricultural industry has been sadly neglected. Only the old men and the children remain around the rural haunts. The glamor of city life has enveloped the strong adult and left fertile acres to wither for want of cultivation. Other evils follow also. The overcrowded condition of cities in European countries is one of the most perplexing problems the authorities have to deal with. While the United States in population is growing by immense numbers daily there is no menacing congestion in our larger cities. This fact would bear out the theory that the farm is a growing attraction for young men. When the value of farming products become fully known, when it is amply realized that investments in that line are secure and a splendid percentage of profit can be gained, then it may be assumed that in very few years the 35 per cent rural population will have grown to 50 per cent. The increase in the number of banks in farming districts has been astonishing. In the last year the increase in bank deposits in those places ranged from 12 to 25 per cent.

In this state there is more attention given to farming than for two generations past. Vast tracts are being broken up and subdivided for industrious settlers. The number of holdings of extensive area in the hands of one owner is diminishing rapidly. The big cattle territories are being tilled and cottages are being constantly built. California has its share in the general upbuilding of that industry which is universally recognized as the firmest fortress of a nation's security.—San Jose Mercury.

Breeding ewes should have a little grain, but not enough to make them fat.

Few things in sheep husbandry are of more vital importance than the proper selection of ewes.

CHARCOAL GOOD FOR PIGS.

Every hog raiser who does not already know this by experience, should make a note of the following suggestion:

Our readers will contribute very much toward the health of their pigs, however well they may be fed otherwise, by providing them plenty of charcoal. This is an easy problem where farmers have more or less timber. Simply burn the wood until it is thoroughly charred, then smother the fire out. It is quite as easy for the farmers on the prairie to provide charcoal, perhaps of inferior quality, but still answering the purpose very well, by simply charring corn cobs. Dig a hole in the ground two or three feet wide and as many deep. Start a good fire in the bottom with chips or other kindling or corn cobs soaked in kerosene. Then fill up with cobs, and when the charring is complete and the entire cob burned through, but not reduced to ashes, cover up with boards or something else, covering this with dirt to exclude the air. After this is smothered out mix it with salt and wood ashes, put it in a feed box so arranged that hogs can get it when they want it. You will be surprised at the amount of it which they will eat when they have an opportunity.

There are some who obtain forty cents per pound the year round for their giltedge butter. Customers may be scarce who want to pay as high a price as that for butter. But if it is first-class, they may be found. It is hardly worth while to attempt to build up a giltedge trade on butter that is only medium.

Wool is a product that does not take fertility from the soil, but actually adds to the value of the soil for grain-growing.

Do not breed the young ewe until 14 or 16 months of age; earlier breeding is not conducive to vigor of constitution.

\$10 Payment on Three-Year-Olds Due April 1, 1906

(and Must Be Made Not Later than MONDAY, April 2d)

in the

Pacific Breeders Futurity Stakes No. 3, \$6000 Guaranteed TO TAKE PLACE THIS YEAR

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

FOR FOALS OF MARES COVERED IN 1902 TO TROT OR PACE AT TWO AND THREE YEARS OLD

ENTRIES CLOSED DECEMBER 1, 1902

\$3250 for Trotting Foals, \$1750 for Pacing Foals, \$800 to Nominators of Dams of Winners and \$200 for Owners of Stallions.

Starting Payments—\$35 to start in the three-year-old pace. \$50 to start in the three-year-old trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators Must Designate When Making Payments to Start Whether the Horse Entered is a Trotter or Pacer.

Address all communications to the Secretary.

E. P. HEALD, President.

F. W. KELLEY, Secretary, 36 Gary St., San Francisco.

INCUBATOR POINTS.

Dr. Richard M. Wood had prepared a bulletin for the Department of Agriculture, Washington, D. C., on "Incubation and Incubators." The summary of his instructions is given below, and the bulletin may be had on application to the Department:

Study your incubator. Acquaint yourself with all its parts. Read the manufacturer's directions for setting it up.

Set it up carefully and according to instructions.

Never try to run an incubator in a drafty place, nor near the stove, nor where the sun shines on it.

Set fertile eggs only. Waste no effort upon those that are doubtful.

Learn how to trim and clean a lamp. Keep the lamps full and the wick and tube clean.

Avoid smoke.

See that the eggs are clean and dry before setting them.

Balance all eggs, large ends up, a few hours before placing them in the tray.

Do not overfill the tray.

Turn every egg the third day.

Cool the eggs every morning.

Be sure your hands are clean when handling eggs.

Test all eggs by the seventh day.

Test again by the eleventh day.

Test again by the fifteenth day.

If the air space is too large, supply moisture; if too small, put a saucer of dry lime in the room and run without moisture a day or two.

Do not expect to learn all about the air cell the first hatch. You will learn that later.

Do not disturb the eggs after the evening of the eighteenth day.

Have a regular hour for incubator work.

Do not tinker too much with the regulator.

Get the adjustment right and keep it so.

Heat your machine and make your adjustment before placing the eggs in the egg chamber.

KEEP PIGS GROWING.

There is nothing that pays better on the farm than time given to properly caring and feeding hogs and pigs. In years past the pigs had to take care of and shift for themselves. It was thought not worth while to extend any attention or particular care upon them.

It is known now that this failure was expensive, as nothing is more profitable to give time and thought than to the feeding and care of the hogs.

They should be kept growing from the start. Never permit them to become stunted through lack of feed, as it requires too much effort and extra food to get them started up again. It is much easier to keep a car in motion when once started than to be compelled to start it every once in a while.—Exchange

The dairy bull should be a pure bred animal. His ancestry should show a good record and his individual qualities stand out strong.

Rock Island Sheep's Wool Sponges in all sizes, for vehicle washing and harness cleaning. At horse dealers or direct on receipt of price. S. ADDERLEY, 307 Market St., S. F., Cal.

Clean Bones

Any kind of growth knocks the price of the horse. Usually his services are lost too. 99% of these, including Spavin, Ringbone, Curb and Splint are cured by

Kendall's Spavin Cure Used Two Years Successfully.

West Hampton Beach, L. I., N. Y. June 22, 1905. Dr. B. J. Kendall Co., Enosburg Falls, Vt. Gentlemen:—Please send me a copy of your "Treatise on the Horse and his Diseases." I have a stable of fine horses and have used your Kendall's Spavin Cure for two years with the very best results, and cannot speak too highly of it. Yours truly, John Custer.

Price \$1; 6 for \$5. Greatest known liniment for family use. All druggists sell it. Accept no substitute. The great book "A Treatise on the Horse," free from druggists or

BROOD MARES TO LEASE.

On account of leaving the county, I will lease two of the best producing brood mares in the State:

BABE dam of Just D 2:19 1/4 winner of Ocolit-Stated pace of 1:05; total 2:13. Babe is by Danton Moultrie 17064, he by Guy Wilkes dam Carle Malone, full sister to (has Derby and Klatawah 205 1/4 3-year old champion). Her dam was by S. adau 5103 half brother to Stamboul 297 1/4, champion of the long staff on in his day; second dam by Nutwood 8 1/2, half brother to Maud S 2:03 1/4, queen of the turf for days; third dam by Owl 1/2 mile, the handsome son of Belmont, the champion of the California trotter; fourth dam by Old Gray Eagle four-mile runner.

FANNY MALONE dam by Antero, second dam the dam of California Nu wood by Geo M. Patchen Jr.; third dam the Chicago Mare.

Both of the above mares will fall by March 10th to J. R. C. In no way please state what horse you intend to breed to. For particulars address,

THOS. P. KELLY,

No 95 So Market St., San Jose Cal.

FOR SALE.

The standard registered two-year-old colts as follows:

NUTTLE B. 39634, foaled 1904 by Red Nutt's 22357 by Red Wilkes; dam Cameline by Direct Line 22117 by Director; next dam Camilla by Antero.

NUTTLE BAR-TOW 39636, foaled 1904 by Red Nutt 22357; dam D. H. Bar tow by Nutwood Wilkes; next dam Della by Startle.

Both of the above are good prospective trotters, and while they have never been handled they show good action. They are both good individuals and will be sold cheap. Address

MARCUS BLANCHARD,

673 S. First St., San Jose, Cal.

EXERCISE FOR LAYERS.

Experiments conducted at the Utah station concerning the value of exercise for laying hens showed some interesting results.

The best pen record obtained from Leghorns was made by a pen of pullets that produced an average of 191.1-3 eggs per fowl in a year, all the food furnished this pen having been given in a box. While most of the pullets in this pen were bred from selected layers, it shows that good results can be obtained by feeding the grain in boxes.

Another pen of the same age, also bred from good layers, were given their grain in straw and averaged 185½ eggs per fowl. In the first pen the largest number of eggs secured from one pullet was 228 and in the second pen 221 was the limit.

The station's report regarding the matter says: For the first year's laying, or pullet year, the average results of all pens are slightly in favor of feeding the grain in straw; but the difference is so small that it may well be charged up to difference in individual capacity of the fowls. In a former report it was shown that by averaging the first, second and third years' laying the box method gave the better results, the pen fed in a box averaging for the three years 147½ eggs per fowl, and the pen fed in straw 132. In the first year the same pens laid 182 fed in straw and 158 fed in boxes. These results, with later observations, seem to indicate that with Leghorns the violent exercise induced by feeding the grain in straw increases the egg yield in the first year and decreases it in subsequent years; in other words, it forces the hen to lay eggs during the first year that she otherwise or under normal conditions would lay during subsequent years. In addition to the data given in the bulletin mentioned, it may be stated here that hen 131, that laid 120 eggs the first year, when fed in the box laid 241 the second year, when fed in the straw. On the whole, the importance of making the hen scratch for every kernel of grain is not borne out by the result of these tests with Leghorns.

While it was found that Leghorns fed in a box produced about as many eggs as when made to work for their feed, in the heavier breeds the result was just the opposite.

Two pens each of Barred and White Rocks were tested. In Barred Rocks the pen fed in box averaged 117.1-3 eggs for the year, while those fed in straw averaged 129½ each. White Rocks did a little better, the box-fed birds showing 119 eggs to their credit, while those fed in straw averaged 153 eggs each.

The report says: The larger breeds, being less active in disposition, probably require more exercise than the smaller and more active breeds. It is certainly true that Leghorns exercise themselves a great deal more than Plymouth Rocks, or the larger breeds, when confined in yards. A Leghorn on being let out in the yard will go around it, either walking, running or flying, probably two or three times

while the Plymouth Rock is making the distance once.

BALANCED RATION FOR HORSES.

Some experiments carried on at the Hoard's Dairyman farm have proved the great utility and cheapness of a proper combination of alfalfa and corn in feeding horses. Without going into details we will state that we have found that with out six work horses a daily ration of fifteen pounds or so of hay and a dozen ears of corn will keep a horse weighing 1500 pounds in good working condition. We know of no combination of food that is equal to alfalfa and corn. The Utah Experiment Station has made very thorough experiments in comparing the economy of alfalfa and timothy as horse feed. In every instance it was proved that the alfalfa was greatly ahead of timothy both in cheapness and promoting good condition. Some of the figures may prove interesting. It was found that twenty pounds of alfalfa a day would maintain the weight of horses weighing nearly 1400 pounds when at rest. When at work 32.6 pounds a day was necessary.

In Ft. Atkinson, just as present, alfalfa hay is worth \$10 a ton. Bar corn is selling for the same price, and strangely enough timothy hay is also selling for \$10 a ton. This shows that prices in the market are not based upon nutritive value whatever. Hence the importance to the farmer of understanding the nutritive value of the different foods he raises either to sell or feed. Alfalfa hay should sell at \$20 a ton at least, when timothy brings \$10, if we compare their real value in nutrition. With corn and alfalfa hay at the same price per ton we can easily see the greater economy of feeding horses on those two feeds and not on timothy and grain. The comparative economy in feeds is as yet but little studied or known.

MILKING MACHINE DESCRIBED.

L. W. Lightly, inventor of the milking machine that has been on exhibition at the winter dairymen's conventions, describes it as follows:

The milkers consist of an ordinary milk pail holding about fifteen quarts, made of block tin. On top of this pail is a lid of aluminum metal; on this lid is mounted a machine or pump, also of aluminum metal; this pump works automatically when connected by rubber tube to the pipes which are laid throughout the stable with convenient branches between each two cows. Two rubber tubes about three feet long, each, are also connected to convenient nozzles on the lid, and on the other end are four cups which snugly fit over the cow's teats—two cows being milked into one pail.

The milking is done in like manner as the calf employs in drawing the milk from its dam i. e., a suck and a lapse, which method is also employed by hand milking, but instead of a suck it is a squeeze and a lapse, so it employs nature's way, for all animals are sucked by their young; therefore there can be no injury done to the cow when the right method is employed, and right here at this point is where so many inventors have come up against it and given it up.

POULTRY HOSE SPRAYERS.

If you were asked what is the greatest essential in the way of appliances for the rearing of chickens, I believe I would have to reply that after the incubator, first and foremost is a good automatic spray-pump. The two thoroughly solve the problem of annihilating insect pests of any variety.

There are many excellent liquid disinfectants on the market but unless you avail yourself of a spray-pump you are handicapped in your efforts to do effectual work. It is such a pity to hatch out two or three hundred chicks and then, in spite of everything you can do, submit to their being devoured by mites and lice, or if they do not succumb to these dreaded enemies becoming infested, then stunted and eventually reaching maturity under such difficulties that they are never of any profit.

A chicken never recovers from a neglected or unhappy chick-hood, and it is nothing but neglect or obstinacy that need bar any one from a sprayer. It does not cost much and any one can manipulate it and spray every

CHARTER OAK PARK, HARTFORD, CONN.

FOR THE

GRAND CIRCUIT MEETING

Sept. 3, 4, 5, 6, 7, 1906.

ANNOUNCES THE FOLLOWING EARLY CLOSING EVENTS:

No. 1 "The Charter Oak".....	2:09 Class Trotting.....	\$10,000
No. 2	2:30 Class Trotting.....	2,000

No. 4	2:20 Class Pacing.....	2,000

ENTRIES CLOSE TUESDAY, APRIL 10, 1906

When Horses Must Be Named in All Events.

Charter Oak Park is a member of the National Trotting Association, which rules will govern. Hopples are not barred. Liability of nominator ceases when written notice of withdrawal is lodged with the Secretary. Payments are due in cash on dates specified.

Each Event will consist of Three Races of One Mile each.

No. 1. The Charter Oak - - - \$10,000

For trotters eligible to the 2:09 Trot April 10, 1906, divided as follows:

1st RACE, \$2000 to winner, \$600 to second, \$400 to third.
2nd RACE, \$2000 to winner, \$600 to second, \$400 to third.
3rd RACE, \$2000 to winner, \$600 to second, \$400 to third.

\$1000 to horse standing best in summary at end of the third race. He will be declared the winner of the Charter Oak. In case of a tie between two or more horses for first place in the summary, they shall trot off the tie until the winner is decided.

HANDICAP ENTRANCE ACCORDING TO RECORD.

THE SLOWER YOUR RECORD THE LESS YOU PAY.

Horses with record of 2:08½ to 2:09, 5%
Horses with record of 2:09½ to 2:10, 4%
Horses with record of 2:10½ to 2:11, 3%
Horses with record of 2:11½ to 2:12, 2%
Horses without records, or with records slower than 2:12 1½%.

Payments are due in easy installments as follows:—

Horses with records of	April 10	May 8	June 5	July 3	Aug. 21
2:08½ to 2:09	\$75	\$100	\$100	\$100	\$125
2:09½ to 2:10	50	75	75	90	110
2:10½ to 2:11	40	50	60	75	75
2:11½ to 2:12	30	40	40	49	50
Horses without records, or with records slower than 2:12	20	30	30	30	40

Positions will be drawn for before the first race, but in the second and third races the horses shall start as they finished in the preceding one. Horses not finishing within one hundred yards of the winner in any race will be barred from further competition.

Only Horses Named on or Before April 10th can Start in the CHARTER OAK \$10,000 Purse, as there is No Substitution.

Purses 2, 3 and 4 will be divided as follows:

1st RACE, \$500 to winner, \$125 to second, \$75 to third.

nook and corner in the chicken apartments. If used once a month throughout the summer season it will prove the most valuable investment you ever made for poultry raising and egg production, both financially and in genuine satisfaction.—Ada B. F. Parsons, Fairfield, Ia.

Keep a book account with your cows. If the cow is proving unprofitable, send her to the shambles.

DO YOU WANT TO RENT A STALL

—OR—

A WHOLE RACE TRACK?

The owners of the MOUNT DIABLO RACE TRACK, located near Concord, Cal., are constructing 50 new and up-to-date stalls.

After April 1st they will be prepared to rent stalls to trainers and others as may be required. Also they will entertain propositions for the lease of the track and grounds as a whole for a term of one or more years.

Improvements now in course of construction, to cost about \$4000 will result in making this track one of the very best all-the-year-round tracks on the Coast.

LYNWOOD W. 32853

RECORD AS A 2-YEAR-OLD 2:20 1-2

Sired by GUY WILKES; dam, the great brood mare LINDALE by Sultan Jr. 12771

LYNWOOD W. was a sensational colt trotter and is fast proving himself to be a great sire, although he never covered but eight standard bred mares prior to 1905. Still he has to his credit Dumont S. 2:20, Clipper W. 2:24 1/4, Sonoma Queen 2:25, Sonoma May 2:29 1/4, all trotters with records made in 1905. The following are the only colts that ever had any training. They have worked as follows: R. W. P. 2:12 1/4, Charles B. 1:50 1/4, Sonoma Girl 2:15, Sly H. (3) 2:16 1/4, Dumont S. 2:17, Ayeress 2:18, Sonoma May 2:19 1/4, Jim V. 2:25, Ella V. (3) 2:21, Clipper W. 2:21, Sonoma Queen (3) 2:22, Sonoma Star (3) 2:25 1/4, Dennis 2:30, Frank G. (2) 2:30.

Will make the Season of 1906 at Santa Rosa

of the

Sacramento Valley Stock Farm

STALLIONS, BROOD MARES,

and Young Stock Suitable for Training.

CH. STALLION, FOALED 1902, "DILLCARRA."—Sire Sidney Dillon; 1st dam, Guy-cara, 2:18 1/4, by Guy Wilkes, 2:15 1/4; 2nd dam, Biscara (dam of 5 in list, 4 below 2:20), by Director 2:17; 3rd dam, Bicara (dam of 6 in list, including the great stallion Pancoast and other producing sires and dams), by Harold 413 (sire of Maud S); 4th dam, Belle (dam of Belmont, sire of Nutwood, McCurdy's Hambletonian 2:26 1/4, and other producing sires and dams), by Mambrino Chief 11; 5th dam, Belle Lupe, by Bellfounder (Brown's), son of Imp. Bellfounder and Lady Allport by Mambrina, a son of Imp. Messenger, the next dam of Brown's Bellfounder being by Tippoo Sahib, son of Imp. Messenger, and the next dam by Imp. Messenger himself.

This young stallion's pedigree is unexcelled, his sire and the sires of his 1st, 2nd, 3rd and 4th dams having produced world-record holders, as well as many others the gamest and best of all times. In looks and make-up he is as great as his pedigree, unexcelled. Although never trained, his natural speed is phenomenal. For the production of world-record holders, he should excel his sire or the sire of his 1st, 2nd, 3rd or 4th dam, each of which enjoy fame in this respect. As a candidate himself for the record he is entitled to much consideration.

CH. STALLION, FOALED 1902, "FLOSSNUT."—Sire Nutwood Wilkes 2:16 1/4; 1st dam, Flossie, by Cornelius (11335), sire of Connelita 2:10 1/4, etc., by Nutwood; 2nd dam, sister to Ruth Ryan (thoroughbred), by Lodi, son of Imp. Yorkshire and Topaz by Imp. Glencoe; 3rd dam, Eva Bulwer by Bulwer, son of Grey Eagle; 4th dam, Emma Taylor by Imp. Glencoe; 5th dam, Lances 4th dam of Palo Alto and 5th dam of Alcyone, Alcantara, etc., by Lance.

The blood lines in this young stallion's pedigree represented the male line of Nutwood Wilkes laid upon two crosses of Nutwood, one of Echo, one of Geo. M. Patchen Jr., and a thoroughbred female line tracing to Lances, to which female line trace such great ones as Alcyone (sire of McKinney), Alcantara, Palo Alto, and many other great ones. The sires in the thoroughbred female line down to Lances have each produced the dams of trotters. The high degree of natural speed, strength and size, Nutwood type of conformation, and make-up of this young stallion make him worthy of use in the stud and worthy of the opportunity to earn a low record on the track.

BAY MARE, FOALED 1903, "FLOWERET BELLE."—Sire Monbells 2:23 1/4, son of Mendocino 2:19 1/4, by Electioneer and Beautiful Bells (world's greatest brood mare), by The Moor; 1st dam, Floweret (dam of 2 in list and full sister to Wildflower, Manzanita, etc.), by Electioneer; 2nd dam, Mayflower 2:30 1/4 (dam of Wildflower, Manzanita, etc.), by St. Clair 16675.

The sire of this filly represents Electioneer's most famous speed producing line, the Electioneer-Beautiful Bells cross. The dam of this filly represents a great performing and producing line that first made Electioneer famous through the great Wildflower, Manzanita, etc., the Electioneer-Mayflower cross. This filly was bred to Dillcara in 1905, and the pedigree of the produce will be composed almost exclusively of the greatest bloodlines of the greatest producers in the trotting world. Her produce from such mating will always rank of the highest value for breeding purposes, as well as for racing.

CH. MARE, GRISSETTE, FOALED 1902.—Sire Marengo King 2:29 1/4, son of McKinney 2:11 1/4 and By By by Nutwood; 1st dam, Lisette by Abdallah Wilkes 7562 (sire of Wauco 2:14 1/4, etc.), son of Geo. Wilkes; 2nd dam, Musette by Startle 290 (sire of 11), son of Hambletonian 10; 3rd dam, Beckie Sharp by Billy Denton (sire of 2), son of Hambletonian 10; 4th dam, Kent Mare by Black Hawk 5.

In this filly's pedigree we have almost exclusively the producing male lines of Hambletonian 10. Her sire traces to that speed progenitor through McKinney, crosses of Nutwood and Dictator being thrown in. We get to Hambletonian 10 in the male lines of the sire of the 1st, 2nd and 3rd dams very quickly through only one or two generations of producing sires, something phenomenal for close up breeding to Hambletonian 10. This filly was bred to Dillcara in 1905, and the produce will probably have in its pedigree more crosses of Hambletonian 10 than any other horse, following the suggestion, "The way to breed trotters is to get all the blood of Hambletonian 10 that you can, and then get more." Stout and well formed as this filly is, her produce should be not only speedy but useful in the racing game. Not broken to drive.

CH. MARE, FOALED 1902, "BESSIE SWEET."—Sire Diablo 2:09 1/4; 1st dam, Bessie Roan by Hock Wilkes, son of Guy Wilkes; 2nd dam, Bessie by Ventura 2:27 1/4; 3rd dam, Lady Emma 2:39 1/4 by Paul's Abdallah, son of Hambletonian 10. The excellent brood mare sire Ventura 2:27 1/4, a thoroughbred, being the sire of the 2nd dam, a real good half-thoroughbred son of Guy Wilkes being the sire of the first dam, Diablo 2:09 1/4 being the sire of the filly herself, the 2nd and the 3rd dams having been about the best mares ever driven in San Francisco for speeding at the Park, should make this filly most valuable for breeding purposes, she being of large size and stout and blocky. Was never bred or broken.

CH. MARE, FOALED 1899, "FLOSSIE."—Sire Cornelius 11335 (sire Carmelita 2:10 1/4, etc.), son of Nutwood 2:18 1/4, and Jennie G. 2:26 1/4 by Echo, he by Hambletonian 10; 1st dam, sister to Ruth Ryan (thoroughbred), by Lodi, son of Imp. Yorkshire and Topaz by Imp. Glencoe; 2nd dam, Eva Bulwer by Bulwer, son of Grey Eagle; 3rd dam, Emma Taylor by Imp. Glencoe; 4th dam, Lances (to whom trace in female line Alcyone, sire of McKinney, Alcantara, Palo Alto, etc.), by Lance, son of American Eclipse. In this pedigree we have two crosses of Nutwood and Echo, great brood mare crosses, laid upon a thoroughbred female line going to Lances, the 4th dam of Alcyone (sire of McKinney), Alcantara, Palo Alto, etc., the sires in this female thoroughbred line being the most noted for producing the dams and grandams of trotters. Lodi, the sire of the 1st dam, produced the dam of Pedlar and others; Bulwer was by Grey Eagle, whose daughters and grand-daughters produced great trotting performers; Imp. Glencoe's grand-daughters produced several trotters. The dam of this filly was a sister to Ruth Ryan, who produced Strathern, sire of Plunkett 2:13 1/4. Sons of Flossie, by well bred stallions, should become great sires, as well as performers. She is a very large, stout mare, of the Nutwood type. Bred to Dillcara in 1905.

BAY MARE, FOALED IN 1894, "FLOSSIE HOCK."—Sire Hock Wilkes, son of Guy Wilkes and Eda (thoroughbred), by Hock Hocking; 1st dam, Flossie by Cornelius 11335, son of Nutwood and Jennie G. 2:26 1/4 by Echo. (See Flossie for continuation.) This pedigree represents a Guy Wilkes-Nutwood-Echo cross upon an excellent thoroughbred female line. Not bred in 1905. Never broken. A stout, well made mare. No living produce.

BAY MARE, FOALED 1894, "BESSIE HOCK."—Sire Roan Mare, foaled 1895, "Bessie Roan"; Ch. Mare, foaled 1898, "Bessie Babe"; three full sisters; Sire Hock Wilkes, son of Guy Wilkes 2:15 1/4, and Eda (thoroughbred) by Hock Hocking, son of Ringgold by Boston; 1st dam, Bessie by Ventura 2:27 1/4, thoroughbred son of Williamson's Belmont; 2nd dam, Lady Emma 2:39 1/4 to pole, by Paul's Abdallah, son of Hambletonian 10. These three mares, full sisters, are each stout, smooth turned, extra well formed; were never broken to drive or ride. Their sire, Hock Wilkes, was a very stout, speedy, though crippled, half-thoroughbred son of Guy Wilkes. Their 1st and 2nd dams were about the speediest and best road mares driven in San Francisco and speeded in the Park. In this pedigree we have a top cross of Guy Wilkes laid upon a female line with Ventura, a thoroughbred brood-mare sire, for the sire of the first dam, and a son of Hambletonian 10 for the sire of the second dam, extra stout bloodlines for the production of game trotting speed.

ALSO SOME TWO-YEAR-OLDS out of dams whose pedigree is given above, suitable for training and breeding purposes, and entered in Futurity Stakes. One grand 2-year-old stallion.

Address

SACRAMENTO VALLEY STOCK FARM,

Care of BREEDER AND SPORTSMAN, 36 Geary St., San Francisco, Cal.

ALMADEN 2:22 1-4 by DIRECT 2:05 1-4

BUDD DOBLE, San Jose, Cal.

MENDOCINO 22607

RECORD (THREE-YEAR-OLD) 2:19¹/₄Sire of Monte Carlo 2:07¹/₄ (to wagon 2:08¹/₄); Idolita (3 y.o.) 2:21¹/₄ (3 y.o.) 2:12; (a) 2:09¹/₄ Leonora 2:12¹/₄; Polka Dot 2:14¹/₄; etc. Bay Stallion, 15.3% hands; weight 1190 pounds; hind feet and ankles white; foaled April 24, 1899. Bred at Palo Alto Stock Farm.Sire, ELECTIONER 125, son of Hambletonian 10. First dam, MANO (dam of MENDOCINO) (3) 2:19¹/₄; Electant 2:19¹/₄; Morocco (3 y.o. trial 2:22) by Piedmont 904, 2:17¹/₄; second dam, Mamie (dam of M. mile W. (3) 2:17¹/₄; Hyperion 2:21¹/₄; Memento 2:25¹/₄; Mithra (p) 2:14¹/₄ by Hambletonian Jr. 1883; third dam, Gilda (thoroughbred) by Imp. Mango.

MENDOCINO is one of Electioner's youngest and best sons. With very limited opportunities in the stud he has proven his worth by producing such racehorses as Monte Carlo and Idolita. Three new additions to his 2:30 list were made last season, and he now has ten standard performers. His foals are good size, fine lookers, bold and pure galloped and easily developed.

SERVICE FEE for Season of 1906, \$75; usual return privilege.

MCKENA 39460

Brown Stallion; 16.2 hands; weight 1350 pounds; foaled April 11, 1900. Bred at Palo Alto Stock Farm.

Sire, McKINNEY 8818 (record 2:11¹/₄). First dam, HELENA 2:11¹/₄ (dam of Wildcutting 2:11¹/₄; Dobbel 2:22; H. 11a (trial 2:12) by Electioner 125; second dam, Lady Ellen 2:29¹/₄ (dam of six in list including Helena 2:11¹/₄; Ellen Wood 2:14¹/₄ by Mambrino 1789; third dam, Ida May Jr. by Owen Dale; fourth dam, 11a May by Belmont (Williamson's).

MCKENA has proven a remarkably sure foal getter. He should make a great sire as he is a fine individual and bred right. His sire, McKinney, a game and fast racehorse and sire of game and fast racehorses. His dam, Helena, one of the fastest and gamest daughters of Electioner, the greatest sire of trotters the world has yet known. His second dam, Lady Ellen, was one of the best of her day, and as well as her daughter Helena is a great broodmare.

SERVICE FEE for Season of 1906, \$40; usual return privilege.

MENDOCINO and MCKENA will make the season at PALO ALTO STOCK FARM. Mares may run on pasture at \$5 per month. No responsibility assumed by the Palo Alto Stock Farm for injury or escapes. Address all communications to

PALO ALTO STOCK FARM,
Stanford University, Santa Clara Co., Cal.McKINNEY, 2:11¹/₄

World's Leading Sire of Extreme Race Horse Speed.

FEE, \$500.00

Fees are invariably payable before mares leave the farm. No return privilege, but fee returned if mare fails to produce a foal. Keep, \$2. per week. Our terms are rigidly adhered to in all cases, and we cannot deviate from them.

McKinney is now located at the farm, 10 miles from Cuba.

TRIAL 2:12

(at Four Years Old)

Bred at Highland Stock Farm, Dubuque, Iowa

By EXPRESSO 29199 (half brother to Expressive (3) 2:12½) by Advertiser 2:15½, son of Electioneer 125; dam ALPHA 2:23½ (dam of Aegon 2:18½, sire of Aegon Star 2:11¼, etc.) by Alcantara by George Wilkes 2:22; second dam Jessie Pepper (dam of 2 in list and 3 producing sons and 7 producing daughters) by Mambrino Chief 11, etc.

Terms for the Season.....\$25

HIGHLAND is a grand looking young stallion, seven years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed, and has trotted a quarter in 31 seconds over the Pleasanton race track.

HIGHLAND is a coal black horse with one white hind ankle, stands 16.1 hands high and weighs close to 1200 pounds.

Address all communications to

THE STANDARD TROTTER STALLION

Murray M. 2:14

(WINNER OF THE BREEDERS FUTURITY, \$6000, IN 1904)

Will make the Season of 1906 at the

Race Track, University Station,
LOS ANGELES, CAL.

Terms, \$40 for the Season, with usual return privileges.

MURRAY M. 2:14 is by Hambletonian Wilkes 1679 (sire of Phoebe Wilkes 2:08½, Phoebe W. 2:08½, Robert I. 2:08½ and RAY M. 2:14 and La Belle (2) 2:16) by Dawn, sire of 5 in 2:30 list and dams of 8.

MURRAY M. 2:14 is a handsome five-year-old bay stallion with small star and black points. In his three-year-old form he stood 16 hands, and weighed 1125 lbs., and is a natural, square-gaited trotter. He is a horse of grand finish plenty of substance, excellent disposition. He has a stout back, strong loins and stiff good feet and legs. His breeding is excellent, and with his individuality he presents a popular and speed-producing combination of the kind that gets money on the race course and prizes in the show ring.

Excellent pasturage at reasonable rates For further particulars address

PROF. H. B. FREEMAN, University Station, Los Angeles, Cal.

KINNEY WILKES

Sired by McKINNEY 2:11½, sire of Sweet Marie 2:04½, Kinney Lou 2:07½, Charley Mac 2:07½, Hazel Kinney 2:09½, The Roman 2:09½, Dr. Book 2:10, Coney 2:02, China Maid 2:05½, Zolook 2:05½, You Bet 2:07, Jennie Mac 2:09 etc.

First Dam, HAZEL WILKES 2:11½, a great race mare by Guy Wilkes 2:15½, sire of Fred Kohl 2:07½, Hulda 2:08½, Lena Wilkes 2:09, Seymour Wilkes 2:08½, etc., and dams of Antezella 2:10½, Katherine A. 2:11½, etc., etc., and grand sire of John A. McKerron 2:04½; second dam, Blanche (dam of Hazel Wilkes 2:11½, Una Wilkes 2:15, Guyson 2:21, Native Son 2:26½ and Silver Spray 2:28) by Arthurton 365; third dam, Nanny by Gen Taylor, champion 30-mile trotter of the world.

KINNEY WILKES is a very handsome, well made bay stallion, standing 15.3 and weighing 1100 pounds. He is one of the best bred of the McKinnies.

Will make the Season at

LEONARD STATION, Santa Cruz County.

Fee \$25.

For cards containing tabulated pedigree, etc., address

NUTWOOD WILKES 2:16½ (Sire GUY WILKES.....2:15¼
Dam LIDA W.....2:18¼
by NUTWOOD.....2:18¼)

NUTWOOD WILKES 2:11½ is the only stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12½ respectively. Who is it? 12, ex-champion three-year-old gelding of the world, reduced his record to 2:10¼. John A. McKerron 2:04¼ (2:12¼ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES is the sire of John A. McKerron 2:04¼ (sire 3 two-year-olds in 2:30 list), Tidal Wave 2:09, Miss Idaho 2:09¼. Who is it? 10¼, Stanton Wilkes 2:10¼, Cresco Wilkes (4) 2:10¼, George H. 2:12¼, Claudius (4) 2:13¼, North Star (3) 2:13¼, Bob Ingersoll (4) 2:14¼, and 32 in 2:30 list.

His sons Nearest and Stanton Wilkes have sired Alone (4) 2:09¼ and Cavaliero 2:09¼.

His daughters produced Miss George 2:10¼, Mona Wilkes (3) 2:11¼, Lady Mowry (4) 2:12¼, Caroline L. 2:14¼, Illoilo 2:15, and Miss Winn 2:15¼.

NUTWOOD WILKES will make the Season of 1906 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee \$50 FOR THE SEASON, with the usual return privileges if horse remains my property. Good pasturage at \$3 per month. Bills payable before removal of mare. Stock well cared for, but no responsibility assumed for accidents or escapes.

Young Stock by NUTWOOD WILKES for sale.

Send for Tabulated Pedigree For further particulars apply or address

MARTIN CARTER, Nutwood Stock Farm, Irwin, Cal., Alameda Co., Cal.

NUSHAGAK 25939

Get the Blood that Produced the Champions, SWEET MARIE and LOU DILLON, by Breeding to

GRECO

BLACK COLT, FOALED 1900. Sire, McKINNEY 2:11¼, sire of SWEET MARIE 2:04¼, Kinney Lou 2:07¼, Charley Mac 2:07¼, Hazel Kinney 2:09¼, Th. Roman 2:09¼, Dr. Book 2:10, Coner 2:02, China Maid 2:06¼, You Bet 2:07, Jennie Mac 2:09, Zolock 2:05¼, Dam, AILEEN 2:26¼ (dam of Mowitz 2:30¼, Sister 2:30 and GRECO 2:32, trial 2:30) by Anteeo 2:16¼, sire of dams of Directum Key 2:08¼, Grey Gem 2:09¼, W. Wood 2:07, etc.

Grandam, LOU MILTON (dam of LOU DILLON 1:58¼, Redwood 2:11¼, Ethel Mack 2:25 and Aileen 2:26¼) by Milton Medium 2:25¼ (sire of 2 and dams of 5) by Happy Medium 2:32¼, sire of Nancy Hanns 2:04, etc.

GRECO is a handsome black stallion and a natural and fast trotter. He won his only race as a colt, and has shown miles in 2:30 since in his work, and is a sure 2:10 trotter. He will be permitted to serve a limited number of mares at \$100 THIS SEASON. Correspondence solicited. Address

CHAS. De RYDER, Manager, Pleasanton, Cal.

IRAN ALTO 24586 Sire, PALO ALTO 2:08 3-4 Rec. 2:12¼ Dam, ELAINE (4) 2:20

IRAN ALTO'S sire and dam have both held champion trotting records and his dam and granddam both produced a colt that was a world's record breaker, and his grandsire has sired several trotters that broke world's records. No other horse with a record as fast as IRAN ALTO'S can claim this. At nine years he had sired ten colts, four of them with records as follows: Dr. Frasse 2:12¼, Thomas R. 2:15, Vendome 2:17, Dr. Frasse's Sister 2:25—all at four years old. Who can name a horse whose first ten colts can beat that?

Will Make the Season of 1906 at WOODLAND, CAL.

FEE \$40

\$20 due when mare is bred and
\$20 payable when mare is known to be in foal.

GALL CURE

For GALL BACKS and SHOULDERS CRUPPER SORES and SADDLE GALLS there is none superior.
The horse CAN BE WORKED AS USUAL.
For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.
It is very adhesive and easily applied to a watery as well as a dry sore.
Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising, the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cures preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.
It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables.

PRICE:—3 OZ. BOX, 25c; 1 LB. BOX, \$1.00.

Valley Stake, for Three-year-old Pacers, 2 in 3.....	500
Merchants' Stake, for 2:25 Pacers, 2 in 3.....	1000
Greater Salem Stake, for 2:15 Pacers, 3 in 5.....	2000
Rural Spirit Stake, for 2:10 Pacers, 2 in 3.....	700
Oregon Stake, for Two-year-old Trotters, 2 in 3.....	400
Inland Stake, for Three-year-old Trotters, 2 in 3.....	500
Farmers' Stake, for 2:27 Trotters, 2 in 3.....	1000
Lewis & Clark Stake, for 2:17 Trotters, 3 in 5.....	2000
Capital City Stake, for 2:12 Trotters, 2 in 3.....	700

CONDITIONS: Entrance fee 5 per cent of stake and 5 per cent additional from money winners, payable 2 per cent May 15, when horse must be named, and 3 per cent September 1. Money divided 50, 25, 15 and 10 per cent of stake. Horses not winning a heat in three shall not start in the fourth heat, except in a field of eight or more starters, then he must win a heat in four or go to the barn. Horses so ruled out shall have a right to a share of the stake according to their rank at the close of the last heat. Right to transfer or substitute entry in the stakes open to August 1 to horses eligible May 15, subject to approval. The board reserves the right to declare off and return first payment in any stake that does not fill satisfactorily. Right reserved to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, divided 70 per cent to first and 30 per cent to second horse. A horse distancing the field shall be entitled to first and fourth moneys only, and in no other case will a horse be entitled to more than one money. Other than specified rules of the National Trotting Association, of which this Association is a member, to govern, except hoppies not barred.

Two Consolation Purses of \$500 Each.

Free entrance will be given to non-winning starters in the Greater Salem Stake for 2:15 pacers, and the Lewis and Clark Stake for 2:17 trotters, mile heats, 2 in 3, provided there are eight or more starters in each of the original stakes.

WILLIAM WALKER, Manager, Menlo Park, Cal.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Isn't He Worth Saving?

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever used." Price \$1.00 per bottle. Sent by all druggists or sent by mail. Write us for catalogue. W. B. Eddy & Co., Whitehall, N. Y.

Columbus, O., Sept. 17-22.
Cincinnati, O., Sept. 24-29.

ANOTHER CALIFORNIA STALLION has been sold through a small advertisement in the Breeder and Sportsman to go to New Zealand, that happy country, "the land of no strikes." This young stallion is Galindo, and Chas. A. Durfee, who owned McKinney for fifteen years, and who knows all his colts, says Galindo is the best bred McKinney living. Mr. Durfee is the seller of Galindo and Mr. H. J. Tasker of Christ Church, New Zealand, is the purchaser. Mr. Tasker not long ago purchased through this office the stallion Peralta by Nutwood Wilkes 2:16½ out of Rose McKinney, dam of Almaden 2:22½, and now he has a son of McKinney. Galindo is out of Elsie by Gen. Benton, one of the greatest brood mares ever bred on the famous Palo Alto Stock Farm. Galindo himself was bred by that farm, and when all the brood mares were ordered sold, Elsie was one of those consigned to a sale at the Occidental Horse Exchange in this city in 1902. She foaled at the Exchange the morning of the sale, and the mare and foal were sold to the late Henry Pierce of Santa Rosa Stock Farm, who sold the colt a few minutes after to Mr. Durfee. Galindo has grown into a very handsome bay horse, level headed and with a nice way of going, a square trotter, but has not been worked for speed. In his three-year-old form he had an attack of distemper which prevented his being trained, and Mr. Durfee decided to do nothing with him until he was five years old, as there are no stakes for four-year-olds. But he recently decided to sell all his horses, and Galindo is the last of the lot to go. His breeding is of the best. His sire McKinney is known as the greatest sire of 2:10 and 2:15 trotters that ever lived, and is to-day the only trotting stallion in America whose service fee is as high as \$500. Elsie, the dam of Galindo, is the dam of five standard trotters, one producing son and three producing daughters. Her sire, Gen. Benton, sired the dams of such fast trotters as Sunol 2:08½, Serpol 2:10, Cobwebs 2:12 and such pacers as Lena N. 2:05½, Rajah 2:10½, etc. Elsie's dam was Elaine 2:20, champion four-year-old of her day, and a great brood mare with four standard trotters to her credit headed by Iran Alto 2:12½. Elaine was by Messenger Duroc and out of that great brood mare Green Mountain Maid that produced nine standard trotters and four producing sons, among them the mighty Electioneer. Mr. Durfee has reasons for saying Galindo is the best bred McKinney, as his dam produced five, his grandam four and his great grandam nine in the list, and all trotters—no pacers among them. Galindo will be shipped to New Zealand on the steamer Sierra, which sails on the 29th inst., and may he have a safe voyage and live to make a great name for himself, both as a race horse and sire in his new home at the other end of the world.

THE WEATHER has been so rainy during the past month that trainers have had little or no chance to work their horses, and even at Pleasanton, where the track is so adapted to wet weather that horses can be worked between showers, the rain has been so continuous that speed making has been impossible. The rain will not always continue, however, and before many days we can expect the usual glorious sunshine and balmy air of a California spring and fast quarters and halves will soon be giving way to fast miles on all the tracks. There has not been a season for many years that presaged more bountiful crops of all kinds than the present one. Wheat, barley, oats and hay all promise abundant harvests, while fruit trees of all kinds will bear record breaking crops unless something unforeseen happens between now and the harvest season. In every section of California there is a feeling of confidence that the harvest of 1906 will break all records. In nearly every city and town in the State much building is going on and many new enterprises being inaugurated. Two or three transcontinental railroads are heading for California and some are already fighting in the courts for terminal facilities. New factories, some of them requiring an outlay of hundreds of thousands of dollars, are going up in different sections, and the era of good times and great prosperity is upon us. Among the breeders of horses this general prosperity is being felt and values have an upward tendency even though prices are now high for all good stock. In such a year it will be not only unfortunate but shameful if there is not a good circuit of harness racing in this State. The people are ready for a big revival of the sport, breeders and owners are training more horses than usual, and there is everything ready to make a California circuit successful, except the leadership that will assemble the track managers and organize such a circuit. The California horsemen need a leader and need one badly.

In hot weather there is no track like Jackson's Napa Soda—plain or in a lemon.

THE YEAR BOOK for 1905 has been printed and will be on sale within another week. There are many improvements over the last volume, the complete list of all 2:30 trotters and 2:25 pacers being restored, the lists comprising about 32,000 names. This will be a great convenience to everyone who is called upon to use the volume. It will also contain a list of all the dams of standard performers, giving her name, her sire if known and the name and record of her performers. The book contains 875 pages and the price is the same as usual—\$4. It can be supplied from this office.

AT DENVER there is a \$3000 stake for 2:24 class trotters, a \$2000 stake for 2:20 class trotters and a \$1000 stake for 2:30 class trotters. If you can win all three you get \$3000. It's worth getting your green trotter in shape for. The 2:20 pacers have a stake of \$2000 to start for and the 2:13 pacers, one of \$1500. Here is more good money. Entries close April 7th. Go to Denver and get a touch of high life.

MONTANA'S BIG CIRCUIT is causing lots of talk among the California horsemen. One hundred and twenty-five thousand dollars in stakes and purses on one circuit of nine weeks looks very tempting. Entries to the stakes close April 10th. There will be two harness races and three running races daily. All the harness races will be on the three-heat plan.

REMEMBER that there is a \$10 payment due April 1st on all three-year-olds in the Breeders' Futurity Stakes to be decided this year. If this payment is not made the foal can't win either race, because he can't start.

THE LIMIT EXTENDED TO THIRTY MARES.

At the time the announcement was made that Bon Voyage (3) 2:12½ would make the season of 1906 at Pleasanton, in charge of Ted Hayes, the statement was published that this great colt trotter would be limited to twenty mares. As that number have already been booked, Mr. Hayes desires to make the announcement that in deference to a demand from several breeders who greatly desire to send their mares to Bon Voyage it has been decided to extend this limit to thirty mares. As twenty-three mares are already booked this will give the opportunity to book seven more, provided application is made early. The class of mares which this handsome young stallion has already booked to him makes it certain that his first crop of colts will be a very choice lot, and in nearly every instance they will be trained and raced, which will give Bon Voyage a fine start as a sire.

Among the mares booked to him are the trotting mare Sarah S. 2:09½, by Tangent, owned by J. T. Wallace, Fair Grounds, Oregon; a Zombro filly out of the dam of Zomboyette 2:16½ and one more in the list, belonging to L. H. Todhunter of Sacramento; two mares by McKinney 2:11½, owned by Bert L. Davis; two mares owned by William Garland of Los Angeles, owner of Sweet Marie 2:04½; a Silver Bow mare owned by S. Stiles of Oakland; Missie Medium, the dam of Happy Madison, owned by Geo. A. Davis of Pleasanton; a James Madison mare, owned by Tony Bernal of Pleasanton; a Bonnie Direct filly, owned by Chas. L. Griffith of Pleasanton, and several others whose names have heretofore been published.

Highland, the very handsome black stallion, also owned by Mr. Clark, is getting his share of the patronage. Mr. Hayes drove the little pacing filly by Highland a quarter in 43 seconds, with the last eighth in 21 seconds one day last week. She is a regular little pacing wonder and there was never a more popular yearling at Pleasanton track. She will be turned out as soon as the weather is settled and allowed to roam a good pasture at her own free will and grow as much as she can.

ANSWERS TO CORRESPONDENTS.

S. G. Dollenmayer, Hanford—The brown stallion Chandler was foaled in 1888. He is by James Madison 2:17½, out of Betsy Trotter by Abbottsford 2:19½, second dam Alpha Medium, dam of Katy S. 2:19½ and grandam of Bet Madison 2:15½. Alpha Medium is said to be by Happy Medium, but the Year Book gives her pedigree as untraced. Chandler is not registered. The late Col. H. I. Thornton owned James Madison and bred this horse.

Tom McCoy, Salt Lake—To lay out a half mile track, draw two parallel lines 600 feet long and 452 feet and 5 inches apart. Half way between the extreme ends of these two lines drive a stake; then loop a wire around the stake long enough to reach to either side. Then make a true curve with the wire, putting down a stake as often as a fence post is needed. When this operation is finished at both ends of the 600 foot parallel lines the track is laid out. The inside fence will rest exactly along the two parallel lines and the lines drawn for the curves. The turns should be thrown up an inch or an inch and an eighth to the foot. The track can be as wide as desired. It will measure a half mile on the inside fence.

J. S. M., Napa, Cal.—Trilby 2:21½ is by Mambrino Chief Jr., dam Fanny McGill, dam also of Scotty 2:19½.

NOTES AND NEWS.

Dr. Jacobs of Meridian, Cal., sold a two-year-old colt last week to James Purvis of Arbuckle for \$500.

The State Fair of Minnesota hangs up \$25,000 for harness races, and the State Fair of Wisconsin does likewise.

S. Stiles has a Sidney Dillon filly out of his mare Silver Haw, by Silver Bow, second dam by Hawthorne, that is as fine in conformation and size as anyone could desire in a trotter. She is now at the Mokelumne Stock Farm, Clements, Cal.

Charles L. Denman, for many years a trainer of trotting and pacing horses, died in Sacramento, March 16th, of heart disease. He was a native of New Jersey, and 74 years of age. Denman was well known on all the racecourses of the State as "Jersey Jack."

Mr. Hagenbeck, the well known show man, drives a pair of mules to his carriage in Hamburg, and it is said that they attract more attention than the hand-somest Orloff or American trotting bred horse in that city. Mr. Hagenbeck cabled two weeks ago for twenty of the smallest mules that could be got in Missouri, and the consignment was shipped to Hamburg. Besides this consignment of mules, Hagenbeck's agent bought 125 horses, nearly all grays, that weighed on an average of 1600 pounds, for use in the trained animal show. These horses cost on an average \$250.

The Board of Supervisors of Monterey county has made an order appropriating \$500, payable to the Monterey County Agricultural Association, to be used by it in advertising and exhibiting the agricultural resources of the county during the fair to be held this year at Salinas. The citizens of Salinas have subscribed \$1500 towards the fair and there is a movement on foot to have the Salinas Board of Trade take charge of the pavilion exhibit, and ask the Pacific Coast Trotting Horse Breeders' Association to manage the racing. The Agricultural Association will take charge of the live stock exhibit. Salinas has a good mile track and is an excellent location for a first class fair and race meeting.

Mr. Mabry McMahan of this city reports that his mare Lady Ada by McKinney lost twin colts foals last week by I Direct 2:12½. The mare was not due to foal until April 26th, and was being kept in a box stall and exercised every day, the intention being to turn her out to pasture as soon as the weather was a little warmer and more settled. The colts were found in the stall one morning and had it been known that she had foaled during the night one or both might have been saved.

An adjourned meeting of the Board of Review of the National Trotting Association will be held at the Murray Hill Hotel, New York, N. Y., at 11 o'clock a. m., on Tuesday, May 1st, 1906, by order of the president. All communications intended for the consideration of the board at the May meeting must be forwarded to the secretary not later than April 17th. The Board of Review is empowered to act in place of the full board, with the same authority and jurisdiction, and at the above meeting will consider business arising in each and all of the districts.

The most helpful and ingenious devices for trotting and pacing horses have emanated from the brains of successful trainers. Now comes that clever eastern trainer and race driver, Bob Bever, with a knee boot totally different from all others, and said to be far ahead of all previous attempts to aid the horse that hits his knees hard or only brushes them. Bever's boot is a perfect fitting one and its protective quality comes from a cleverly devised pneumatic tube attachment. The inflated tube is so placed that it affords ample protection and prevents any pain being felt by the hardest and most persistent knee-knocker.

Mr. H. W. Sylvester of Santa Ana received last week from Kalamazoo, Michigan, a seven-months-old filly by the good sire Strongwood 2:12½, son of Nutwood. The dam of the filly is by the great sire Allerton 2:09¼. Mr. Sylvester will develop this filly and then breed her to Royal Derby, son of Chas. Derby.

S. H. Crane, the well known farmer and horse dealer of Turlock, has recently removed to Berkeley. He reports the sale of his Diablo stallion Dialect to Jos. Davis of Willows. Dialect has been in the stud at Willows for the past three years in charge of James Sullivan, and has many very handsome colts in that section. Dr. Randolph of Willows owns one, a two-year-old filly that is as handsome a piece of horseflesh as there is in that county, and will weigh 1000 pounds at the present time. Dialect is a horse of excellent breeding, his dam being Electress 2:27 by Richards' Elector, second dam the thoroughbred mare Sugar Plum by Lodi. Electress is the dam of Electress Wilkes 2:28½ by Nutwood Wilkes, that is the dam of Lady Mowry 2:12½.

The fast and handsome stallion I Direct 2:12½ will make the balance of the season of 1906 at the Zibbell Stables, 672 Eleventh avenue, just back of the Chutes, in this city. I Direct is now in superb condition and those desiring to breed to one of the best bred and best dispositioned stallions of the famous Director family should look him over. He is a sure foal getter.

K. McDermid, secretary of the Colorado Springs Social Driving Club, has purchased from B. L. Hough, Clayton, Ill., a fast green four-year-old pacer by Amerigo 2:18¼, son of Gov. Stanford, dam Ruth L. 2:25 by Ottawa, son of Onward, which trialed a mile last season in 2:19 and a half in 1:06. Mr. McDermid also purchased from the same parties a two-year-old trotter by Advoila 2:24, dam Minnie by Ottawa.

The champion four-year-old pacing gelding of 1905, Direct Wood 2:07½ by Direct 2:05½, dam Dolly Fort 2:28¼ by Leewood, is in J. B. Chandler's stable at Terre Haute, Ind.

R. C. Stinson of Brantford, Ont., father of Harry Stinson, trainer at Cruickston Park Farm, Galt, Ont., is said to have a two-year-old colt in his stable that is nothing less than a trotting wonder. The youngster was sired by Dr. John, son of Oro Wilkes 2:11, and last fall, as a yearling, is reported to have trotted a quarter in 33 seconds.

The fast young stallion, J. T. 2:12½ by Live Oak Hero, dam Ada by Dexter Prince, has been purchased by Bay City, Mich., parties, and undoubtedly will be raced late in the season, after a season in the stud.

The Hoster-Columbus \$10,000 stake at Columbus, won last year by Glenwood M. 2:07¼, is for 2:18 trotters this year.

The M. & M. stake will, as usual, be for 2:24 trotters this season.

Capt. C. H. Williams reports the loss by death of the mare Royal Net by Royal Sid, out of Leonetta by Leo Corbitt, second dam Net by Magic. Royal Net died the day after foaling a fine filly by Capt. Williams' McKinney stallion Unimak. The filly is alive and doing well.

We regret to learn that the well known trainer, John Phippen, has been confined to his house for the past two weeks with a serious illness. He has improved considerably in the last few days, however, and expects to be out again as soon as the weather has settled. Mr. Phippen is one of the hardest working men in the business and has been giving his personal attention to a string of twenty horses at the San Jose track. During his illness his horses have been under the care of Mr. Taylor, formerly of the Oakwood Park Stock Farm. Mr. Phippen's legion of friends on this coast sincerely hope that he will soon regain his former rugged health.

Effie Logan, dam of Sir Albert S. 2:03¼, will be bred to Star Pointer 1:59¼ this year.

Edith 2:10 by Dexter Prince, owned by Dr. Rae Felt of Eureka, Humboldt county, has been sent to Pleasanton to be mated with the champion Star Pointer. Edith had no foal last year but the year previous produced a filly by Searchlight 2:03¼ that is a very likely pacer.

In the second race at Pleasanton last Saturday Lee Wells, the popular liveryman of that town, started his handsome bay gelding Major. While the Major finished second in 2:41 and 2:38, he can trot a deal faster than that and can show better than a 2:30 gait. It is not as a race horse, however, that Major is, in our opinion destined to shine. He is a big, round bodied, handsome horse, with a beautifully arched neck and is naturally a high stepper. In the hands of an expert he would be a blue ribbon winner in more than one class in most any horse show. He is the type of horse that may breeders aim to produce but find it very difficult to obtain. He is a very stylish fellow but a remarkably easy horse to handle.

Mr. O. A. Bianchi of San Francisco has presented Cavel Rodriguez of Gonzales with the brood mare Doushka by Western 11344. She is now 25 years of age, but is good for several years yet. Doushka is the dam of Golden Gate 2:13¼. The old mare is well bred, as her dam is by Geo. M. Patchen Jr., and her grandam by Williamson's Belmont.

Free Haney of Modesto has sent his fine mare Lucy L. 2:22½ by Gen. McClellan Jr., out of Mag by Alexander, to be bred to Star Pointer.

Henry Hellman recently received three fine young colts by Prince Nutwood 2:12½ to be trained at Pleasanton. They are owned by Dr. C. W. Evans of Modesto.

The young stallion Vasnut by Vasto out of Daisy Nutwood, dam of Prince Nutwood 2:12½, by Nutwood is in training at Pleasanton and showing up well. He is owned by Frank Kiernan of Modesto.

Members of the Southern California Horse Show Association have received a "straight tip" that among the exhibitors at the show next year will be Reginald Vanderbilt, of Sandy Point Farm, Long Island; J. B. Mitchell of Chicago; M. H. Tichenor of Chicago; Harold A. Richardson of Santa Barbara; Price McKinney of Cleveland, and H. E. Huntington. The latter expressed his interest and approval in the recent show in no unmixed terms and will probably be a large exhibitor next year. It is also confidently expected that J. Hobart Moore will have his string in the show another year. With Messrs. Tichenor and Moore in the show, appointments will have to be looked after to a fine point. As Col. Hogan puts it, with these men exhibiting it will be down to the stitching on a buckle to decide some of the events.

Bricker Cates of Los Angeles recently visited Wheatland, Yuba county, and purchased seventy mules for use in the southern country. The average price per head was \$200, but for the best mules he paid \$250 each.

Mr. L. H. McIntosh, the well known farmer of Butte county, owner of Arthur Wilkes and breeder of many high class trotting horses, recently sold his home place just outside the city limits of Chico to Henry A. Butters, president of the Northern Electric Company, for \$20,000. There are 40 acres in the tract, all in a high state of cultivation and with many improvements.

The old stork that attends to taking orders for and leaving two-minute prospects at Pleasanton and vicinity left a handsome little filly in the box stall occupied by the mare Christabel, owned by Mr. W. A. Clark Jr., one night week before last. Last spring Mr. Clark had Christabel at Los Angeles and one afternoon started her in a matinee race at the meeting of the Los Angeles Driving Club. She won the race, both heats in 2:17. Between the heats of this race the stallion Hal B. 2:04¼ paced an exhibition quarter in 29½ seconds and right after the race the mare was bred to him. The filly is the result of this mating and within ten minutes after she was foaled, got up and paced around the mare, looking for the maternal font which she found without assistance. The boys say she paced an eighth in 15 seconds the next day around the stall, timed by three or four watches. She is about as full of life and vim as any foal ever seen at the horse center and great things are predicted for her. Christabel her mother, is a wonderfully fast pacer, and has beaten 30 seconds for a quarter of a mile twice to decide a bet, and both times was taken right off the road to do the trick without any training. One of these dashes was won in 28½ seconds. She is by Chas. Derby out of Algerdette, dam of Thornway 2:12¼, Allandora 2:18½, and Sable Steinway 2:23¼, by Allandorf, second dam King Girl by Mambrino King, third dam by Blue Bull 75, and fourth dam by Tom Hal. There is pacing blood galore in the little filly's breeding, and if she don't do the trick in two minutes or less there will be several disappointed prophets in Pleasanton.

Last week's New York Commercial said: The feature of the local horse market so far this week has been the marked increase in the sale of pleasure horses. This branch of the market, which has been unusually active for this season of the year for the last two weeks, is feeling the effects of the early spring trade at least a month sooner than usual. Not only are the number of sales greater, but the prices are showing a strong upward tendency, which dealers are confident will be maintained throughout the spring season. Carriage, harness and saddlery goods dealers are feeling jubilant over a rapidly increasing trade and carriage builders have booked many orders in the course of the week for delivery as soon as the driving season gets fairly under way.

The three days race meeting that is to be held by the Colusa Driving Club will commence on Tuesday, April 24th. In conjunction with the races a flower carnival will be held April 24th and 25th and liberal prizes will be put up for the best decorated carriage or buggy for the first day, and on the second day for the best decorated two-wheel vehicle. The purses in both trotting, pacing and running events are good, and Mr. Peart, manager of the club, has received information from horsemen of Marysville, Woodland, Sacramento and other places that they will take their horses to Colusa which assures entries enough to make a very interesting meeting.

Thomas Ronan, owner of the famous Pleasanton training track, made a world's record some years ago with the trotting stallion Meredith 1368. Mr. Ronan was living at Dayton, Washington, at the time, and one morning he bred Meredith to a mare and then drove twenty-four miles to a meeting, where Meredith was entered in a race. Mr. Ronan reached the track in time to rest his horse a couple of hours and then went out and won the race. He then drove six miles to a friend's farm, where Meredith was bred to another mare, and then drove him about twenty miles further and mated him with still another mare before dark. Everyone of these three mares foaled a strong, healthy colt.

Charlie Whitehead, who developed and drove the great three-year-old stake winner North Star 2:13½, by Nutwood Wilkes, to his record is now jogging the big gelding at the Salinas track. North Star will not be raced this year as a four-year-old but may be driven an exhibition mile at the Salinas Fair this fall. His owner, J. B. Iverson, will race him in his class next year however. That a very low record is within his reach is not doubted by any horseman who saw him race last year in his three-year-old form winning every race in which he started. Whitehead does not know how much speed the gelding has, as he has never driven him to his limit for even an eighth of a mile but he can show better than a two-minute gait.

Officers of the United States Army stationed at Monterey recently sent a man to the Hearst ranch in San Luis Obispo county, who selected and purchased twenty-one horses for the private use of these officers. The horses reached Monterey this week and are said to be splendid animals.

Mr. G. Cuneo of this city has booked his fine mare by Chas. Derby to Star Pointer 1:59¼.

A REMINISCENCE.

Dear Breeder and Sportsman: For the first time in years I turned my steps the other day toward San Mateo by way of the new electric road. Being only a plain countryman, not a Blingumite, not wedded to the automobile or the Southern Pacific, nor divorced from our four-footed friend, Saint Horse, the first thing that struck my observant eye was the poor roads or road by which one enters or leaves the metropolis of our coast to journey down the peninsula to San Jose. Narrow, muddy, not turnpiked, flanked on every side by bands of iron on which steam and electric cars whistled by. My memory carried me back to Ralston and his roadsters, that with distended nostrils carried a select few by to Belmont.

"Oh! for the prancing steeds
And the brisk approach
Of the merry load that used to ride
In the old stage coach."

I tried in vain to locate The Willows, where the knights of the sulky in by-gone days made matches, talked horse and fought their battles o'er and o'er. Jim Eoff, Yank Sessions, Squealing Jack, Chet Lusk, Pete Brander and others—

"Whose bones are dust,
Whose bits are rust,
Whose souls are with the saints, we trust,"

met together. My eyes were dim, or the march of improvement had wiped out every trace of the old frequented place, and I knew not where to look for the spot "The Willows" once occupied.

I could place the old Pioneer race track to which many a time and oft on old Rob Roy's back I had ridden in the van. I could place the site of the old track just this side the County Hospital. The Bay View track I thought I could locate. There I first saw a horse with a sore mouth driven with a nose band in a race, and it was on this track I saw Jim Eoff get up behind a beaten trotter and win the race, first divesting the horse he was to drive of overdraw and check bit, substituting a plain bar bit for a harsh snaffle, and winning the remaining heats right off the reel.

I was soon outside the city and county of San Francisco, beyond San Bruno. There, yes, there is a vestige of the old Easton track where I saw Pat Farrel win the first three-year-old trot for Pony Easton with one of his Black Hawk colts. Well do I remember the day; how anxious dear old Pat was to win; how after every heat he soaked the colts legs out in hot water. But he won the race in 2:57 or 2:58—great time in those early days for a youngster.

Now we are gliding by Milbrae. Yes; we are passing the entrance to the Corbitt place, the home of the illustrious Guy Wilkes, the stout son of George Wilkes and Lady Bunker. There are John Goldsmith and John Rogers—why, you old fool, Corbitt, Goldsmith and Rogers are in another land "ye ken not of." Perhaps I was dreaming.

Right well did I remember the railroad crossing to the Corbitt place. I once went to San Mateo—no matter when it was, in the long ago, to breed my mare Pastime to Leo Wilkes. Sable Wilkes, the brother to Leo, was in the height of his glory, having just trotted in 2:18 as a three-year-old. His stud fee was \$500. I said to myself, said I, "Why not save \$400 and breed to Leo, Sable's full brother, for \$100. So I drove to the farm, put up my tired mare, told Mr. Chris Lang, the bookkeeper, who I was, to breed my mare, put away my sulky and harness, and when the mare was safe in foal I would return for her. It was about noon. Mr. Corbitt heard I was on the place and kindly invited me to dinner, where I met his two daughters—one now Mrs. Moody, the other Mrs. McMonagle. During the meal I remarked:

"Your private railway crossing, being on a curve, the view obstructed by trees, must be dangerous."

The younger daughter turned to me and said: "Yes, it is; indeed it is."

"Tell him of your accident," said their father.

I was almost sorry Mr. Corbitt had asked his daughter, as I saw a shadow pass over her face, as if the memory of the event in her life was anything but pleasant. But the fair girl consented, to please her father, and this is the tale she told:

"Well, Mr. Rambler, you must know that sister and I had invited Mrs. Gen. Rosecranz to lunch. I was to go in the carriage to meet her, while my sister stayed at home to see to the arrangements for the comfort of our guest. I met Mrs. Rosecranz at San Mateo. Why we came home by our private crossing and not by the crossing at San Mateo I do not know, but we did. Our coachman, an old servant, sat high up above us on his seat; we half reclined in the body of the carriage below. Mrs. Rosecranz and I, interested in one another, talked on as the team approached the crossing. Our driver must have been listening to our conversation, as he was on the track with his horses ere he saw beneath the trees the Monterey Flyer coming round the bend, running fifty miles an hour. The man hesitated, started to drive across, became bewildered, pulled back, but all too late! The iron monster struck horses and driver, hurled them into the air, killing all three. It cut the front of the carriage clean off, brushing off the toe of my shoe, and leaving us sitting on the seat of the carriage, dazed, almost crazed at the sight. It was a month before we two recovered from the shock."

"Indeed, it is a dangerous crossing," I replied. "I should think you would shun it always."

The dinner over, I walked with the bluff owner out into the fields where he and John Goldsmith picked out, now this colt and now that, running with its dam, to enter in the great colt stakes in the East. John Rogers broke the colts to harness, and after the youngsters were tractable genial John Goldsmith developed them into stakewinners. How few mis-

takes or failures Goldsmith made is known to all of us who knew him.

At San Mateo I found that the Haywards' private track was being cut into building lots. Harvest Queen, Menlo, Arab and many another gallant steed has gone around these turns here, and into the stretch, all for the love of the trotter.

On my return to the city I passed Tanforan, and saw Ingleside in the distance, and thought with grim satisfaction, if the trotting tracks I knew are all gone, some of the running tracks are closed, and on one of these costly plants the grass is growing on the stretches. In the whirligig of time will no Stanford, Corbitt or Rose return with Electioneers, Wilkes or Moors. At Pleasanton the Sidneys under Millard Sanders can tell us how wisely Valensin bred and planned. The Directors remain and will as long as Monroe Salisbury is in the game.

But the car has stopped; I hear the roar of Market street. My journey's o'er and the tale is ended.

March 19, 1906.

THE RAMBLER.

SUCCESSFUL MATINEE AT PLEASANTON.

Between 600 and 700 people were at the Pleasanton track last Saturday to witness the program of races that had been arranged for the celebration of St. Patrick's Day. The weather was bad. There was very little sunshine during the forenoon and in the afternoon an occasional shower made the people without umbrellas hunt the cover of the sheds. There was a cold wind that made fast time out of the question, and the showers made the track slow. But in spite of all these drawbacks the ardor of the several hundred admirers of the harness horse was not dampened, and the crowd remained until the entire program was finished.

The first race had but two starters out of the five original entries. These were Mr. Fred Hellwig's pacer Byron Lace 2:14½ by Lovelace, and Dr. McConnell's pacer Phoenix 2:15½ by Direct, better known as Sharkey. This race resulted in a close contest, the first heat Sharkey winning by a short length in 2:26. The next two heats went to Byron Lace, in 2:23 and 2:26.

Three horses started in the second race, Mr. Goulart's pacer Hal Welcome, Mr. Peach's pacer Roan Dick and Mr. Lock's trotter Husky. Hal Welcome won in straight heats in 2:30½ and 2:35.

The third and last race had three starters. Mr. Lee Wells named and drove his very handsome, high-stepping horse Major, Mr. Fred Nagle was up behind his trotter Shoshone, and Mr. Thos. Ronan, proprietor of the Pleasanton race track, drove his stylish and beautifully gaited mare Anguinet. Mr. Ronan not only had the sympathy of the crowd, but he had the fastest horse and proved himself an excellent reinsman. He won in straight heats in 2:41 and 2:38 amid the plaudits of the crowd.

After the races were over Mr. J. O'Keefe of San Francisco brought out his mare Centereye, according to program, to go against time. It had been advertised that he would drive the mare to beat 2:10, but as the rain was falling and the track in poor shape few expected that the performance would be given. Mr. O'Keefe had his word out however, and proposed to keep it. He was delayed in San Francisco until after the last train for Pleasanton had left, but took the electric line to Haywards and drove sixteen miles to Pleasanton over the roads, arriving in time to start the mare. There was no chance to warm her up, but accompanied by a runner as pacemaker he scored her down once and was then given the word. The mare paced the mile in 2:16½, as good as 2:12 under the ordinary conditions. The crowd gave Mr. O'Keefe and his mare a round of applause and he received many congratulations on her splendid performance. Centereye is a large bay mare with perfect pacing action and is one of the great green prospects at Pleasanton. She was bred by the Santa Rosa Stock Farm and is now five years old. Her sire is On Stanley 2:17½ (son of Direct 2:05½ and Lilly Stanley 2:17½); her dam was Silver Eye, dam of Ramon 2:17½ and Fram 2:17½, by Abbotsford 2:19½, grandam Princess by Henry Williamson a son of Williamson's Belmont, great grandam Annie McCloud by Jack Hawkins Jr. She has had all her training under Mr. O'Keefe's tutelage and he is strictly an amateur. He drove the mare a mile in 2:13½ the week previous at Pleasanton on a day when the weather and track were good. He turned Centereye over to Millard Saunders this week, and in that eminent trainer's charge she may be confidently expected to pace a mile in 2:10 or better within a very short time. Her breeding is first-class; she is of good size and absolutely sound and has every qualification of a game race mare.

Farmer Bunch acted as starter and announcer, Millard Saunders filling the position of presiding judge.

During the afternoon some of the leading stallions at the track were led out for inspection. Star Pointer 1:59½, Bonnie Direct 2:05½, Zolock 2:05½ and Bon Voyage 2:12½, as a three-year-old, were shown. Mr. Bunch giving a short statement of the breeding and performances of each horse.

After the races the trophies were presented. Mr. Hellwig was awarded a handsome and massive silver loving cup, presented by Mr. N. Hansen of the Hotel Pleasanton for driving the fastest two heats of the day. Mr. Goulart was awarded a beautiful silver cup, presented by Mr. J. O'Keefe of San Francisco for winning the second fastest race of the day. A beautiful and expensive Ivory-handled whip, the gift of Millard Saunders, was presented to Mr. Thos. Ronan for driving the third fastest horse in the summaries, and a very handsome whip, the gift of C. H. Dall, was presented to Mr. J. O'Keefe for driving the fastest heat of the day.

All the arrangements for this pleasant little matinee were carried out without a hitch and but for the in-

clement weather there would doubtless have been 2000 people present.

The Danville Brass Band contributed much to the pleasure of the day, and its members, who volunteered and donated their services, were voted good musicians and royal good fellows.

The Pleasanton people contemplate giving another matinee in the near future, on which occasion it is likely better weather will prevail.

STATE FAIR TRACK IS POPULAR.

Although the new track of the State Agricultural Society has been in existence less than a year, it is already gaining, among horsemen all over the Pacific Coast, a reputation that will eventually make Sacramento, a center for the development of fast runners and harness horses. Even during its first brief season of seven days, before the smooth surface had been afforded the necessary treatment of a season's rainfall, the performances at the Park created a considerable amount of comment, and C. W. Allen, the architect and builder, was complimented by many a horse owner who had reason to recognize the worth of his achievement.

Since the last fair, however, the officials of the State Agricultural Society are becoming confirmed in the belief that they have under their direction the finest race course on the Pacific Coast, says the Union. Horses of every class take to it so kindly that the trainers at once recognize its advantages and trial performances are generally followed by an application for stable room at the park. In other words, the condition of the track is gaining for the association a number of permanent four-footed lodgers, and it is hoped, in time, that the number will be so greatly increased as to afford a considerable revenue that may be devoted to maintenance of the track.

The new track has remarkable powers of absorption, and it is a current expression among trainers that they are able to warm up between showers, so rapidly does the surface dry off. The earth of which it is composed has just the proper degree of resilience, and it was noted, last season, that even sore-footed horses pulled up sound after performances that generally left them useless for days afterward. The surrounding country, too, affords breeders an opportunity to establish their homes and farms close to the track, which is considered a great advantage.

Charles Herdon, who is employed at the track during the greater part of the day, says that the impromptu matinees and the daily try-outs demonstrate better than anything else the fastness of the oval.

It seems to be a foregone conclusion that if harness records are to be shattered anywhere the coming season, it will be at Agricultural Park. The list of entries in the possession of Secretary Albert Lindley indicate that the finest colts in the West will contest for the more valuable stakes, and the result will advertise the new track all over the country.

MATINEE RACING AT SAN BERNARDINO.

Before an enthusiastic crowd of spectators the San Bernardino Driving Club held an excellent program of harness races on Saturday, March 10th. This program was arranged for Washington's Birthday, but was postponed on account of a flooded track. Saturday the course was fast and the time fair. The spectators were not confined to local people, Riverside, Redlands and Colton adding their quota of visitors. The results were:

Pacing—3:00 class: This event started with Steel-dust, belonging to and driven by R. F. Garner; Foxy Bob, owned and driven by O. W. Newcombe; Nellie, owned and driven by W. C. Daniels, and Laura K. owned by Beatty and driven by Alex Wilson. Laura K. won by a close margin in 2:39½ and 2:36½. Steel-dust won one heat in 2:38½. This gives the winner one leg on the beautiful stop watch offered by Benjamin Davis, won heretofore, one event each by L. E. Keifhaber, L. E. Shaw, J. T. Garner and Robert T. Curtis.

Trotting—Free for all: Ambush, owned and driven by Geo. W. Bonnell; Hazel Kinney, owned by John A. Cole and driven by F. J. Burwell. Ambush won time 2:19, 2:21. Hazel Kinney broke badly. This event was won by John A. Cole in January. Each winner now has one leg on the silver cup offered by A. C. Denman, Jr.

Trotting—Two-year-olds: Peggy McGinn, owned by R. T. Curtis, driven by C. O. Thornquest; Raven Lock owned by Albert Johnson, driven by George H. Parker; Captain, owned and driven by N. S. Young; won by Peggy McGinn in 1:33 and 1:29 for half-mile heats. Prize, a blanket.

Mixed event—2:40 class: The Blonde, owned by John A. Cole, and driven by Frank Burwell; Loretta, owned by W. A. Hayt and driven by G. H. Judd; Adalanta, owned by G. W. Prescott, driven by G. W. Bonnell. Won by Loretta, time 2:23 and 2:25½. Prize, a fine halter.

Pacing—2:40 class: Won by Roscoe, owned by A. S. Fox and driven by James Seeley. Prize, set of harness.

Trotting—3:00 class: Won by Baby, owned and driven by Maurice Griffin. Prize, a bridle.

Still further improvements are in progress on Mr. Whalen's Santa Rita Stock Farm at Pleasanton. A number of new paddocks enclosing alfalfa fields are about completed. A variety of trees selected from the nursery of the University of California are being planted in forest form on various parts of the farm. Two new water plants will be installed, from which the water will be piped to the paddocks, thus making complete the accommodations for the comfort of horses pastured on this well known farm.

Jackson's Napa Soda does not tangle the feet.

ST. PATRICK'S DAY AT PHOENIX.

Phoenix, Arizona, March 18, 1906.

Breeder and Sportsman: The St. Patrick's matinee at Phoenix, Arizona, was one of the best in its history. There were eight events on the card, but for the lack of time the last one was not finished. The weather was the real ideal Arizona weather and was just fine. There was a large attendance and much interest was taken in each race. The two tracks were in excellent condition and good time was made, especially in the first race, won by a daughter of the good Boydello 2:14½. It was her first start in years, and her two heats in 1:03 and 1:03½ were good for this early in the season. She has been a mile in 2:13 over a half-mile track on Mr. Adams' ranch. The son of Zombro, that was second in this event, has shown himself to be a good horse and no doubt will make himself known in the East this season.

The second race was for two-year-old trotters and due credit must be given to the owners of the colts for their good showing. Mr. Tiffany sat still and won the last two heats from the favorite.

The third event was Florence Wilton against time. She was out to beat 2:10, but the daughter of Wilton was not ready for such work. It was her day off, as last week she paced in 2:10½ with ease.

The fourth race was the second best of the day, the three pacers being of good reputation and known all over Arizona. The famous Paul D. Kelly was beaten by Tommy Lawson, a valley raised colt, who showed his Electioneer blood in the starting of the race. Senator Foraker (Arizona's friend), whom everyone wanted to win, came in third, as he had only two weeks preparation and was not able to beat the hobbled pacer.

The fifth race was a two-horse race from wire to wire. The black stallion Silver Russell from J. C. Adams' farm, showed his California breeding. He is a son of L. W. Russell, dam Silver Eye, and he looks to be a very promising colt. Otto Sarony is quite a trotter.

The sixth race was a very hot affair as the four pacers were well matched and it was in all a very interesting race; but the two-year-old by Oh So had the speed of the bunch. His dam was third in the first race, hence his name is Prise Oh So. Nelly's Baby, who drove him out, was only worked two days and shod the day before the race, and Tommy Mac, the Chicago pacer, will be heard from by the next matinee.

The last race was also a two-horse race from start to finish and there was blood in the eyes of the drivers of both horses but the pacer beat the trotter in a very close finish in both heats.

In all it was a very good afternoon's sport and we are to keep it up all spring, until our big spring meeting, the last week of April or the first of May.

The directors of the association are to hang up \$5000 in purses for the spring meeting. There are about forty head of horses working now at the track. J. C. Adams' Custer has begun his work, which will land him in the "C. of C." this year.

The most noted horse on the track at present is Bystander 2:13 by Zolock 2:05½, who is also headed east, and is going fast. Mr. Hall, who trains for Mr. Adams, worked him out last week, the last quarter of a mile in 28½ seconds, the last eighth in 13¼. In a mile in 2:16 the last half was 1:03 and the last quarter in 30 seconds.

Lillian Zolock is also being worked by Mr. Robinson and may be raced by Mr. Davidson this year in the East.

Mr. Robinson, who has been ranch manager for Mr. Adams, has been appointed superintendent of the track and no doubt will fill the place with satisfaction to all the horsemen.

A good bunch of California horses are expected over for our spring meeting, then to El Paso and the Colorado Circuit. The summaries follow:

Pacing, half-mile heats.
May Dello by Boydello..... 1 1
Col. Greene 2 2
Surprise 3 3
Time—1:03, 1:03½.

Trotting, two-year-olds, mile heats.
Senator Tirzah 2 1 1
Montrose 1 2 2
Mayo L. 3 3 3
Special, to beat 2:11.
Florence Wilton by Wilton.....lost
Time—2:19½.

Pacing, half mile heats.
Tommy Lawson 1 1
Paul D. Kelly 2 2
Senator Foraker 3 3
Time—1:15, 1:12.

Trotting, half mile heats.
Silver Russell 1 1
Otto Sarony 2 2
Time—1:24, 1:21.

Pacing, half mile heats.
Prise Oh So. 2 1 1
Nelly's Baby 1 2 2
Tommy Mac 3 3 3
Time—1:26, 1:24, 1:23.

Trot or pace, half mile heats.
Billy B. (pacer) 1 1
James V. (trotter) 2 2
Time—1:16, 1:13½.

RAIE.

While you are looking over the list of trotting stallions, stop a minute and contemplate the breeding of Dad Trefry's good colt Kenneth C., whose three-year-old record is 2:17. He is by McKinney 2:11½, and his dam is by Cresco and has produced three standard performers, while Dad is training another that will enter the list this year. Kenneth C. is good enough to breed any mare in California to.

TRACK AND ROAD.

E. F. Binder of Riverside has recently received from Galesburg, Illinois, three fine two-year-olds, one a colt by Allerton 2:09½, the other two fillies by Expedition.

Al. McDonald drove a gray trotter by James Madison, owned by Constable Groom of Danville, a quarter in 33½ seconds last week at Pleasanton. This horse is an excellent prospect.

The Kenney Manufacturing Company at 531 Valencia street, has the agency for a gearless gas engine that is the newest and the best thing on the market. Just the thing to have in the stable or on the farm for chopping feed or pumping water. It only costs a hundred dollars with a discount for cash.

Geo. Fox of Clements, Cal., writes us that it was not his mare Bessie Pancoast that was sent East to be bred to Cresceus 2:02½ three years ago, but her daughter, Silpan, by Silver Bow 2:16, that made the trip and returned with two fillies by the champion trotting stallion and is due to foal again to him about the 25th of next month. This makes these fillies still better bred, as they have two crosses to Robert McGregor 2:17.

The expression of every person who visits Pleasanton, and sees the colts and fillies by Bonnie Direct 2:05½, is one of admiration. They are invariably handsome and fast.

The stallion McKinley 2:29 by McKinney, owned by John W. Martin of Woodville, Cal., weighs 1400 pounds and has trotted a quarter in 32 seconds. Mr. Martin believes he is the fastest big trotter in the world.

The fast pacer C. E. Hasey by Don Derby 2:04½ was sold last week by Chas. De Ryder of Pleasanton to Mr. Easterbrook of Denver. This pacer is a coming 2:10 horse, having shown a shade better than that in his work and will be raced by Mr. Easterbrook.

One of the most promising youngsters at Pleasanton track is a three-year-old colt by Bonnie Direct 2:05½, dam a mare by imported Sain, Barney Schreiber's great thoroughbred stallion, second dam Morgiana by Gen. Benton, third dam Lady Morgan by Hambletonian 10, fourth dam by Exton Eclipse, fifth dam by Young Traveler. This colt was bred by Mr. C. L. Griffith who also bred his dam, and there is probably not another colt bred like him in the entire country. Mr. Griffith bred the Gen. Benton mare to Sain to get a filly and succeeded, and then bred the Sain filly to Bonnie Direct in the hopes of getting another filly. At the sale of the Griffith estate horses in 1902, the Sain filly was purchased by Dr. Rae Felt of Eureka, Humboldt county, and the Bonnie Direct colt was foaled his property. He has sent the youngster to John Quinn at Pleasanton, who is training him, and the colt is showing up well. Dr. Felt first decided to call this colt Sain Direct, but has changed the name to Bonnie Sain, a more euphonious cognomen. The colt is entered in and eligible to start in the three-year-old division of the Breeders' Futurity this year.

Jacks are ready money in Missouri. At an auction sale held at Smithton in that State, March 6th, twenty-seven head of jacks averaged \$860. The top price of the sale was \$1600, and but four brought less than \$600. Californians who are trying to buy good jacks for \$500 or less should make a note of this.

The imported Percheron Norman stallion Ulema was found dead in his stall on the morning of the 16th inst. Ulema had been purchased from Oscar Harris of San Francisco by Messrs. Meyn & Jensen of Livermore but ten days before his death and his loss is a heavy one to his new owners as well as to the breeding interests of Livermore Valley.

The mare Walda by Waldstein, nominated in Breeders' Futurity No. 6, and owned by Mrs. C. L. Jones of Modesto, foaled a fine filly by Carloklin (3) 2:20½, last Thursday morning. Word was received from W. G. Durfee at Los Angeles that Carloklin trotted a mile in 2:16½ last week. This son of McKinney is improving right along and looks as if he would soon be a good one in the 2:10 classes.

Red McKinney, a well bred son of McKinney 2:11½, will make the season of 1906 at the City Stables, Tulare, Cal. The dam of this stallion is Bonnie Red, daughter of the great Red Wilkes, second dam Bonnie Belle, dam of five standard performers and two producing sons by Almont 33, third dam Alice Drake, dam of three standard performers and two producing sons and two producing daughters, by Alexander's Norman 25, fourth dam by Pilot Jr. 12. Red McKinney is undoubtedly one of the best bred McKinney stallions ever raised in this State. He is now a four-year-old, a rich mahogany bay, stands nearly 16 hands high and weighs 1100 pounds. He is said to be a show horse, which one would expect from his breeding, as he comes from families that have been noted for producing handsome horses. His service fee will be only \$30, which is ridiculously low for a horse of his individuality and breeding.

"Senator" Henry Helman is training at Pleasanton the three-year-old filly, Carrie Shreve, owned by Mr. A. R. Shreve of Cathlamet, Washington. This filly is by Zombro 2:11 and out of Ferina, the dam of Sophia 2:16. Helman says she is a trotter all right and that he expects great things of her in the near future. She trots so steadily and with so much speed

that he has obtained permission from her owner to use her as a pacemaker for Mack Mack 2:12½ in his early work. Mr. Shreve is the owner of a yearling colt by Diablo 2:09½ out of Ferina, that he has registered as "Senator Helman," and says if good looks and size count for anything he will do justice to his name.

Quite a number of good mares have been sent to Nutwood Stock Farm during the last two weeks to be bred to Nutwood Wilkes 2:16½, sire of John A. McKerron 2:04½. Among them were Operetta by Longworth 2:19, owned by Mr. Coombs of Alameda, Charivari 2:20½ by Sterling, owned by Chas. Hug of San Francisco; Mora Mac by McKinney, owned by Dr. Dunn of Oakland; Bee Bee by McKinney, owned by Bruce Cornwall of San Francisco; Twenty-third, by Director 2:17, owned by Capt. C. H. Williams of Palo Alto, and several other well bred matrons.

Babbie, the full sister to Cavalier 2:11½, owned by Mr. H. W. Meek, is working nicely for Chas. De Ryder at Pleasanton. She stepped a mile out in 2:15 one day last week.

Lexington, Ky., March 10.—George Spear, the former trotting horse driver, who, it is alleged, made the affidavit on which Murray Howe seized the Memphis Gold Cup won by E. E. Smathers' Major Delmar, and which is just now the bone of contention in the big scandal of the trotting turf, made an emphatic denial here to-day that he knew or had anything to do with the alleged doping of Lou Dillon in the race, and said he could not understand how his name was ever connected with the affair. Spear said he knew absolutely nothing about the matter except what he had seen in the newspapers, and had not made or sworn to any affidavit tending to show that the mare had been doped before the race, and that he had acted for Smathers in the matter and attended to the alleged act. He also denied the report credited to him that Peter Duryea had acted as the betting commissioner for Smathers on the day of the race and said that he had never heard Duryea's name mentioned in regard to the affair until he read the account in the trial of the breath of promise suit in New York, which was suddenly dropped by Sara Maddern several days ago.

DEATH OF A NOTED PIONEER.

Martin J. Burke, one of the early pioneers of California, and a man who has been prominent in the affairs of San Francisco for more than half a century, died last Tuesday, in his ninety-sixth year. He was the father of Mr. Frank H. Burke of this city, and up to a few months ago was a constant road driver, nearly always driving a pair of trotters. Martin J. Burke was in many respects a remarkable man, and one of the few of the fast diminishing band of the early-day pioneers who could speak from personal experience of San Francisco at the height of the gold rush. He was born in Ireland early in the last century of an English mother and Scotch father. He was educated in England for the practice of surgery, and was at the time of his death a member of the Royal College of Surgeons. He was also a graduate pharmacist and before coming to California, after leaving England, he had practiced medicine for eight years at Milwaukee, Wis. In 1849 he sailed for San Francisco, doubling the Horn, and landed here in January, 1850. Believing that there was as certain a fortune in the city of San Francisco as there was in the gold fields, he determined to remain in the city, and established himself in a pharmacy, devoting himself also to the practice of his profession. From his first arrival he took an active part in the affairs of the city government and was recognized as one of the leaders in civic life. When the Vigilance Committee was organized Dr. Burke became chairman of the executive subcommittee and in that capacity was active and prominent, making his name a terror to evil doers.

With the disbandment of the last Vigilance Committee in 1856, he was made Chief of Police, a position that he held for ten years. After his retirement from that office he entered the firm of Hoogs & Madison, and on the death of Mr. Hoogs the name was changed to Madison & Burke. The firm was established in 1858 originally, and was one of the first firms in the city to do a rent collecting business. His fortune was reported some time ago as being over \$1,000,000, accumulated in the real estate business.

MAY DAY RACES AT DIXON.

The two-year-old trotting race to be given at the Dixon track May 1st closed with the following entries: Grant Chadbourne's bay gelding, Thomas D.; T. C. Horgan's black colt, Ringlight; Alex. Brown's brown gelding, Prince Lot; W. C. Kufer's brown filly, The Bloom, and Rush & Halle's brown filly, Annabel.

The two-year-old pace has up to this time received but three entries as follows: E. D. Dudley's chestnut colt, Dr. Millar; H. B. Robben's sorrel filly, Diablo Maid, and Rush & Halle's Edna Earle.

For the three-year-old trot there has so far been entered Alex. Brown's bay filly, Red Blossom, and J. A. Kilkenney's bay gelding, Dr. Douglas Hyde.

For the three-year-old pacing stake there is only one entry, H. B. Robben's bay horse, Smiley.

It has been decided by the management to leave the list for the last three events open until April 2, and if no further entries are made for these two three-year-old events before that date they will have to be declared off.

The list is now open until April 15th for the named race, for which the following have already been named: Little Dick, Hoyt's Mare, Sleepy Joe, Mickey Free, Autorious, Suisun, Ingo, Ben Bolt, Mona, Cooper's gelding, Chaser, Smiley and Happy Jack.

LOS ANGELES HORSE SHOW.

The Pasadena open air horse show, which came to a successful ending March 10th, was so well managed that a clean profit of \$2000 resulted. The Los Angeles people now propose to make their horse show next month even more successful. It will be held at Fiesta Park, Los Angeles, on the evenings of April 18th, 19th and 20th, and the afternoon of April 21st. Prizes for this exhibit will aggregate \$5000.

The plans as outlined by the association call for a tent show and when the alterations of Fiesta Park are completed as proposed it will be transformed into one of the most charming horse show grounds in California.

It is planned to cover the grand stand with a canopy, reaching out to a tent 100x200 feet, which will inclose the exhibition ring, all entrances for horses being in the rear connecting with the tent stables. Myriads of electric lights will make the inclosure as bright as day, and the arrangement of the grand stand will afford a charming spot for social courtesies and all functions properly a part of a horse show.

The arrangements for the exhibition will be under the guidance of Secretary and Director A. E. Ashbrook, assisted by the following officers and directors: Col. John H. Norton, president; Ferd. K. Rule, first vice-president; Byron Erkenbrecher, second vice-president; W. J. Doran, treasurer; O. Rey Rule, assistant secretary.

Directors: Byron Erkenbrecher, John H. Norton, Howard G. Bundrem, Ferd. K. Rule, John G. Mott, W. J. Doran.

Judges: John K. Pallister, Yorkshire, England; J. M. Kuykendall, Denver, Colo.; D. Boyland, Los Angeles; L. G. Waring, Riverside; W. J. Hogan, Louisville, Ky. Ringmaster, O. P. Updegraff, Topeka, Kan. Veterinary, Dr. J. A. Edmonds.

A LIBERAL PROGRAM.

Charter Oak Park, Hartford, Conn., is advertising the most liberal harness racing program ever offered. It pays the winners most and costs the losers least. It is progressive, in advance of the times, and depends on your support to make such liberal conditions so popular that they must become common. You can name your promising trotter in a \$10,000 engagement for \$20, and if he continues promising start for \$150.

If you have a good horse for sale such an engagement increases his value out of all proportion to the cost.

The average full paid up entrance in the Charter Oak Stake is about 3 per cent, and there is nothing additional from winners—no fine for coming in front, but liberal reward for winning any race or any position in any race.

The classes are believed to afford engagements that will satisfy the greatest number of horses likely to be in training—fast and slow classes for trotters and pacers.

If you wish to see such programs continue and become general help make this one popular and put money in your own pocket by filling out an entry blank and mailing it on or before April 10th to Albert H. Moone, secretary.

EVERY HEAT A RACE.

The New England Trotting Horse Breeders' Association announces in this issue six rich early closing stakes to be decided at its Grand Circuit meeting. These stakes close Tuesday, April 10th, and are all to be on the three heat plan, every heat a race, the stake to be divided into three equal purses, and these purses to be cut up into three moneys. The leading stake is the Massachusetts, which is for 2:14 class trotters. A total of \$9000 is offered for this class, \$3000 for each race, of which \$2100 goes to the winner of the heat, \$600 to second and \$300 to third. The Blue Hill for 2:30 class trotters and The Ponkapog for 2:10 class trotters are for \$4500 each, divided into three purses of \$1500 each, \$1050 to first, \$300 to second and \$150 to third. The Readville for 2:08 class trotters, The Norfolk for 2:08 class pacers, and The Neponset for 2:06 class pacers are for \$3000 each, divided into three purses of \$1000 each, of which \$700 to first, \$200 to second, and \$100 to third in each heat. The entrance fee to these stakes will be 5 per cent of the purse, and nothing deducted from the winners of any part of the purse. Another splendid feature of these stakes is that owners may enter more than one horse in any event, if trained in the same stable, and only one per cent additional will be charged for each horse so entered. While but one horse in the same ownership will be allowed to start, this condition will enable an owner or trainer to enter two or three horses in a race and to start the best one. All the conditions are fully set forth in the advertisement which appears in our business columns.

NEW YORK ROAD DRIVERS.

Road driving and speedway brushing in New York will be more popular than ever this year. The Times of March 14th says:

One of the best attended meetings in the history of the organization was held last night by the Road Drivers' Association at the Hotel Cadillac, when plans for the Speedway parade, horse show, and brushes to be held on Saturday, May 5, were decided upon. This is one week earlier than originally intended. The route of parade will be similar to that of last year, and the Old Guard's Band was engaged for the occasion.

The first matinee brush will be held on Thursday, May 10. An effort was made to change the day this year to Saturday, but the success of last year influenced the members to retain Thursday. Entries for

the first brush must be sent to the secretary by May 3. J. H. Campbell donated a silver cup for competition, making a total of eleven trophies.

The cup committee reported that the Morosini Cup will be awarded to the horse winning the greatest number of heats regardless of the gait of the horses. The Frazier Cup will be awarded on a point system similar to that in vogue at Empire track. The Executive Committee and Board of Directors Cups will be set aside for trotters and pacers respectively. As no horse will be eligible to win more than one cup, the winner of the Morosini Cup will be barred from winning either of the latter two prizes. The Schuyler Cup will be reserved for teams, and the remainder of the trophies will be devoted to competitions for points in rotation according to classification. It was decided that in view of the difficulties in speedway racing no horse shall be expected to go against its record. As the point competition prohibits walkovers, no horse will be permitted to go over the course alone.

It was decided that as the horse is counted as a point winner and not the driver the points won by a horse in case it is sold during the season shall be credited to its new owner. The distance flag question provoked a warm debate. It was decided that in brushes where more than five horses start it will be 75 yards, and where less than this number start the distance shall be 50 yards. A recall bell will be used in the future, so as to avoid the difficulties of past seasons. The question of a permanent headquarters was held over until the next meeting. The treasurer's report shows a balance of \$935 in the treasury, with no outstanding bills.

ABOUT HORSES.

Now that for some little time the horse trade has been drifting towards the horse repositories, or auction places, a few notes as regards their customs may not be out of place. The advantage of these repositories is that the seller there finds that quick sale which is the saving of much expense in keeping a horse until a private customer can be met with. On an average the prices realized at an auction are lower than any dealer, breeder or other person usually obtains in private sales, hence the expert buyer, who knows a horse when he sees one, will naturally go to the cheapest market. Then there are guarantees at auctions which differ naturally from those of any dealer or private vendor, and the auction guarantees possess the supreme advantage of keeping all parties free from litigation in cases where horses do not turn out satisfactory. One of the chief rules observed in all first class repositories, in the description of the horse, is the importance of the word good, hence a "good" harness horse must be sound in wind and eyes, and fully capable of doing his work. If found not to be answering this warranty, he can be returned within forty-eight hours of purchase, the auctioneers then acting as arbitrators between seller and buyer, the while holding the money paid by the buyer before the horse was delivered. Unless the vendor voluntarily takes back the horse, the latter is then tried by those appointed by the auctioneer, and the party found to be in error pays the expenses. If it is ruled that the horse does not answer the description given by the vendor, the buyer gets all his money back from the auctioneers. The guarantees of wind and eyes and other things covered by the word "good" are so reliable that the writer has seen a dealer pay over \$1,000 for a good looking animal without any previous knowledge of the horse, and without seeing him more than the short time the horse is in the auctioneer's hands.

Cart and van horses are usually guaranteed as "good workers," which terms are interpreted by auctioneers as quiet in harness, able to draw and back a load, sound in wind and eyes, and capable of being worked. From these notes it will be seen that a good repository is a proper place to buy in, but if the buyer is not an expert, he should call to his aid someone who is, and then he can not go far wrong. An intricate knowledge of horses is not possessed by many (though no one will own it) and only those who have thoroughly studied the subject are competent to make selections.—W. R. Gilbert.

DROPPED SOLE, OR PUMICED FOOT.

This is a subject which even the most practical among the shoers have rarely confronting them, and, consequently, less concerning this trouble is known than many of the different diseases or defects that come under our daily notice, writes a shoer in the Horseshoer's Journal. The dropped sole, or pumiced foot, is known among scientists as a form of founder, or laminitis, and is caused in many cases by the same abuses which create the latter trouble. The horse's weight is suspended by the laminae. The bottom of the internal foot, always in contact with the sole, does not in the case of the founder horse, press equally on all portions of the foot. The back part of the laminae remains more sound than the that part which surrounds the toe, and the weight of the horse being suspended by those laminae, the natural consequence is, when an equal distribution of it is not present, that the toe naturally takes an upward turn while the sole is caused to drop, and the sole becomes like a piece of pumice, hence the word, "pumiced," is used in this case.

The practical farrier, acquainted with this form of disease of the foot, is never wanting for a remedy that will bring about natural conditions. The first thing necessary to do is to obtain a proper diagram of the foot, which is done by rasping away all of that fungus growth which is usually attached to the wall of the toe. The sole being weak and dropped, cannot be treated as in ordinary feet. The foot must be level, as nearly as the case will allow, the heels usually having the growth, which is removable. The shoe should have a broad web all around to the heels,

the heels of good length and turned, with the toe calk set back on the web, the clips drawn up on each quarter, and the weight taken off the front quarter and toe of the foot. In adjusting such a shoe, it is found necessary to apply the nails well back to the heel, and thereby obtain a pressure on the only perfect part of the foot. By placing the toe calk well back, as described, we remove the pressure from the diseased part, and place the center of gravity more directly under the foot and leg, thereby enabling the weakened laminae to attain its former strength.

This method always prevents the horse from stumbling, and if proper precaution is taken by the groom or stableman in applying poultices and swabbing clothes to the foot and coronary band, a growth of new horn will be noticeable. A very good plan is in such cases, to place a layer of thin sole leather between the foot and the shoe particularly at the weak portion, and if there be a separation between the outer wall and the internal foot, splendid results can be obtained by filling the same with a salve of some kind that will stimulate a growth, covering the whole up with oakum. Again, the plan of a wet swab placed around a coronary band serves largely to bring about not only a healthy but a speedy growth of horn.

ABOUT RINGING.

A well-informed turfman has suggested a plan to eliminate "ringing." He says: "No intelligent horseman can deny the fact that the frequency of the cases is due mainly and mostly to the carelessness of track secretaries who accept entries without the necessary information for a thorough and complete identification of the horses as well as of the men making the entries. For the sake of getting a large list of entries and correspondingly big sums of entrance money, the track managers do not even comply with the existing rules, deficient as they are, in the matter of recording their entries. The latest ringing case is an example.

"An unknown man drives to the Johnstown, Pa., track, applies for a blank, enters a pacer named Mildred, pays his entrance fee, borrows a sulky from some one, wins the race and walks away. He says the mare was sired by Moquette 2:10. He goes to another track, enters the same way and says she was a daughter of Millwood, and disappears with a portion of the purse. Absolutely no thought is given as to the identity of the man and horse and no questions asked. As long as some one has to win the money, what does it matter to the track managers who it is? If a rule be passed imposing heavy fines, or even expulsion of the association and its members who accept entries without the necessary details for further identification, and who, for the sake of the extra income of entrance fees, do not reject those whose statements look suspicious, even the boldest will hardly dare to take the risk.

"The parent associations should prescribe a form of entry blanks and demand that track managers accept entries to their meetings only when the said blanks are properly and satisfactorily filled. In case of failure, the track managers should be held equally guilty with the parties who do the actual ringing. The following detailed information should be demanded:

1. Name, color, sex, sire, dam, her sire and by whom bred.
2. By whom the said entry was last owned.
3. Three most distinctive marks, besides the size.
4. If the entry has a mark, when, where and in what race it was obtained, and if a record against time, to be so stated, with necessary documents.

"The breeding of some few horses may not be known, and in rare cases, the owner or trainer making the entry may not know the name of the breeder, but there could not be any single instance in which the parties will not know the last owner of the horse, nor be unable to give the marks asked for.

"With the above in the list of rules and regulations of the two associations, and backed by heavy fines and suspensions of both the parties concerned and track associations, will make the ringing of horses on trotting tracks almost an impossibility. For the good of the game, leading trotting turf weeklies should take up this matter and push it until something is done against the ever-increasing evil."—Kentucky Stock Farm.

BOERS AND THEIR HORSES.

The Boers' horses, says an English writer, are seldom stabled, never groomed, and rarely fed; they pick up their living as best they can off the veldt. Some of the richer and more humane Boers give their animals shelter at night, and in summer, when the herbage is scorched to nothing, give them a feed of mealies (Indian corn) or oat hay. Nevertheless, the Boer ponies have wonderful staying power, being able to cover from thirty to fifty miles a day for days together. The Boer never rides at a trot—always at a walk or a canter, or at the gait, peculiar to South Africa, called "tripling," between a fast walk and a slow trot. It is a very pleasant gait for the rider, and very easy to the horse. An indispensable part of his gear is the rawhide halter, with a loose end about four feet long. When the Boer off-saddles, this loose end is wound twice round the horse's foreleg, just above the knee, and knotted fast. Thus secured, the animal can graze comfortably, but cannot run away. The Boers never hobble their horses. The seat of the Boer is diametrically opposed to that taught in English riding-schools, with no grip anywhere, but depending entirely on balance. He affects very short stirrups, sticks his feet well home in the irons, and at right angles to the horse's body; he mounts and dismounts with lightning rapidity and there is not a more docile or better trained animal anywhere. A hand laid gently on its neck, and the Boer pony—for it is hardly more—stops dead instantly.

CERTIFICATION OF AMERICAN BOOKS OF RECORD.

The regulations for the Certification of Associations of Breeders of Pure Bred Live Stock and Books of Record of Pedigrees, as adopted by the United States Department of Agriculture, are as follows:

In accordance with paragraph 473 of the Act of Congress entitled "An act to provide revenue for the government and to encourage the industries of the United States," approved July 24, 1897, authorizing the Secretary of Agriculture to "determine and certify to the Secretary of the Treasury what are recognized breeds and pure bred animals," and amended by the act of Congress approved March 3, 1903, entitled "An act regulating the importation of breeding animals," the following regulations are hereby prescribed for the certification of association of breeders of pure bred live stock and books of record of pedigrees:

1. Any association in the United States desiring certification by the Secretary of Agriculture to the Secretary of the Treasury, under the provisions of paragraph 473 of the act of July 4, 1897 (amended March 3, 1903), shall submit the following:

(a) If incorporated, with capital stock, a statement showing amount of capital stock and number of shares, the names of incorporators, names and residences of directors and officers, names and residences of shareholders with the amount of stock held by each, and a copy of its charter.

(b) If unincorporated, or if incorporated without stock, a statement showing the names and residences of officers and directors, and the names and residences of members. An association incorporated without capital stock shall submit a copy of its charter.

(c) Each association shall submit a copy of its constitution and by-laws and rules of entry, and copies of all blank forms used in the conduct of its business, such as applications for registry, certificates of registry, transfer, etc., of its financial condition on the thirty-first of December preceding date of application.

2. (a) Each certified association shall submit, on or before February 1, 1905, copies of the published volumes of its book of record, if such have not already been filed with the department. If the association has not yet published a book of record, such a publication must be submitted on or before February 1, 1906, otherwise certification may be withdrawn. When a volume of the book of record is published, a copy shall be forwarded to the Department without delay. The Department advises that at least one volume be published annually; however, in cases where circumstances make it impossible to do this, a statement shall be submitted showing how often the book of record will be published, and this statement will be considered and acted upon according to its merits. The schedule so adopted shall be adhered to, but the interval allowed between the publication of any two volumes shall not exceed four years.

(b) On or before February 1st of each year, each certified association shall submit copies of its constitution, by-laws, rules of entry, and all blank forms used in the conduct of its business, such as applications for registry and transfer, certificates for use in the importation or exportation of animals into and from the United States, etc., and a statement showing the names of foreign pedigree-record associations and books of record of pedigree with which it is affiliated, with the names and addresses of the secretaries of such associations and custodians of books of record.

(c) Should any association fail to act in conformity with any or all of these regulations, notice shall be sent at once to such association. Failure to comply within thirty (30) days after the sending of such notice, or to submit reasonable explanation for the delay shall be regarded as sufficient ground for the withdrawal of the certification of the Secretary of Agriculture.

(d) Statements made under the provisions of these regulations shall be on oath by the secretary of each association.

(e) Each association in the United States which has, or may have, the certification of the Secretary of Agriculture shall hold all its books open to inspection by the Department at any time, should such inspection be deemed necessary.

3. When the certification of a book of record published in a foreign country is requested, the custodian shall submit a complete set of the published volumes of said book of record to date of making application, with the indorsement of a certified association in the United States. The Department reserves the right, however, to be governed in all cases by the advice of representatives of the United States abroad, if the necessity for such a course exists.

4. Custodians of foreign books of record now on the certified list should supply volumes of their books or record needed to complete the Department sets and submit additional ones as issued.

5. All books of record, official papers, reports, and other communications submitted under the provisions of these regulations should be addressed to the Chief of the Bureau of Animal Industry.

6. The following American horse associations and books of record have been certified to the Secretary of the Treasury to date:

American Trotting Register Association—Wm. H. Knight, secretary, 355 Dearborn St., Chicago, Ill.

American Association of Importers and Breeders of Belgian Draft Horses—J. D. Coonor, Jr., secretary, Wabash, Ind.

Cleveland Bay Society of America—R. P. Stericker, secretary, 80 Chestnut ave., West Orange, N. J.

American Clydesdale Association—R. B. Ogilvie, secretary, Union Stock Yards, Chicago, Ill.

French Coach Horse Society of America—Duncan E. Willett, secretary, 2112 Michigan ave., Chicago, Ill.

National French Draft Horse Association—C. E.

Stubbs, secretary, Fairfield, Iowa.

German, Hanoverian and Oldenburg Coach Horse Association of America—J. Crouch, secretary, Lafayette, Ind.

American Hackney Horse Society—A. H. Godfrey, secretary, P. O. Box 111, Madison square, New York City.

American Morgan Register Association—H. T. Cutts, secretary, Middlebury, Vt.

Oldenburg Coach Horse Association of America—C. E. Stubbs, secretary, Fairfield, Iowa.

Percheron Society of America—Geo. W. Stubblefield, secretary, Union Stock Yards, Chicago, Ill.

French Coach Horse Registry Company—Chas. C. Glenn, secretary, Columbus, Ohio.

The Percheron Registry Company—Chas. C. Glenn, secretary, Columbus, Ohio.

American Saddle Horse Breeders' Association—I. B. Nall, secretary, Louisville, Ky.

American Shetland Pony Club—Mortimer Levering, secretary, Lafayette, Ind.

American Shire Horse Association—Chas. Burgess, secretary, Wenona, Ill.

American Suffolk Horse Association—Alex. Galbraith, secretary, Janesville, Wis.

The Jockey Club—James E. Wheeler, registrar, 571 Fifth ave., New York City.

AMERICAN 2:10 TROTTERS ABROAD.

(Horse Review.)

Susie S. goes to Europe, the announcement of her sale to Mr. Louis Winans, of Brighton, England, being made in our news columns this week. While she was twice beaten last year, her record of 2:09½ was the fastest made by any three-year-old of the season and her performances were such as to stamp her one of the greatest trotters of her age that has yet appeared before the public. There was, therefore, every reason to believe that the daughter of Moko would train on to a very low record at maturity, especially as she possessed the physique which warranted such an expectation. Her loss to the American turf is, therefore, a considerable one. However, what is our loss is the gain of Europe and Mr. Winans, who, we trust, will be rewarded as well in her purchase as he was in that of Alta Axworthy 2:10½. It will be remembered that he bought that great filly shortly after the close of her remarkable three-year-old campaign, and that last season she won the trotting championship race of Europe. If Susie S. should duplicate this achievement it will be a remarkable thing. In the connection it is interesting to note that Susie S. won last year's three-year-old Review Futurity, while Alta Axworthy also won that of the year before, previous to which she had won the two-year-old division in 1903.

Susie S. is the second of last year's new 2:10 trotters that has been sold to the Europeans, A. Penn 2:08½, whose sale for export we announced some time ago, having been the first. According to our count she is the twenty-eighth 2:10 trotter to "cross the water," the list being as follows:

Stallions—Onward Silver 2:05½, Tommy Britton 2:06½, Caid 2:07½, Jupe 2:07½, Gayton 2:08½, Trevilian 2:08½, A. Penn 2:08½, Poindexter 2:09, Dillon Boy 2:09½, Idolita 2:09½, Baron Rogers 2:09½, B. B. P. 2:09½, Ellard 2:09½, Que Allen 2:09½, Athanio 2:10, Brownie Wilton 2:10, Kirkwood, Jr. 2:10, Senator A. 2:10. Total, 18.

Mares—Dolly Dillon 2:06½, Belle Kuser 2:08, Derby Princess 2:08½, Dulce Cor 2:08½, Countess Eve 2:09½, Susie N. 2:09½, Neeretta 2:09½, Bonnatella 2:10, Contralto 2:10. Total, 9.

Gelding—Lord Clinton 2:08½.

Of these the stallions Tommy Britton 2:06½, Ellard 2:09½, and Athanio 2:10 are dead, while the mare Derby Princess 2:08½ has returned to America. As horsemen are generally aware, no geldings are raced on the continent, the demand being exclusively for stallions and mares which can be used for breeding purposes after their retirement from the turf. European breeders of trotters seem to be strong believers in the maxim "Breed to the Winner," and very few stallions, in special, are used by them unless they have won distinction as race horses. The influence in the evolution of European trotting breeding which the blood of the 2:10 stallions and mares enumerated above—and it may be possible that we have overlooked one or two that belong in the list, which has been compiled from memory—cannot but be immense. Most of them have been taken there in the last ten years (in fact we think that Ellard 2:09½, the first 2:10 trotter shipped abroad, did not go until 1895 and he died at sea) and their produce is as yet young; but despite this several of the stallions have already achieved great success, especially Caid, whose get have done extraordinarily well. He was last year the leading sire of the Austro-Hungarian turf, fifteen of his sons and daughters—of which none was older than five years—winning 128,500 kronen, or about \$32,000, this being over \$5,000 more than was won by the get of any other sire. His heaviest winner was the five-year-old Ama Z., who captured 29,000 kronen, or over \$7,000, besides making the fastest record ever made by an Austrian-bred trotter.

It is Austria and Austro-Hungary which have taken the lead in importing American 2:10 trotters, the great majority of those above noted having been taken there. Italy ranks next, and to her belongs Onward Silver 2:05½, the fastest and the highest-priced (\$21,000) trotter ever exported. One or two have gone to Russia, notably Baron Rogers 2:09½, whose get are doing splendidly. Several of the ex-American 2:10 stallions have found their way from Austria to Russia and to Germany, while, we believe, Senator A. 2:10 was once, and possibly now is, standing in Belgium.

Sober up on Jackson's Napa Soda.

JUDGES BECOME AUTOMATONS UNDER THE RULE.

Rules regulating harness, shoeing, methods of sulky construction and other features which should be left to the individual will never take the place of competent officials in the judges' stand. Proper enforcement of the old rules serve to make good racing, but President Johnston and his associates act as though they believe that they can legislate brains into racing officials.

The new rule forbidding drivers carrying watches while driving in a race is rendered useless because of the clause giving judges the right to waive it in individual cases. Undoubtedly there have been cases where drivers have consulted their watches in order to determine whether or no their horses would go out of their class provided they won the heat. Competent judges would be able to note such cases of fraud and would act accordingly.

Modern drivers have depended for years on their watches to inform them of pace and it will take a long time for them to learn how to judge the rate of speed without a watch. Deprived of the watch as many races are apt to be lost because of ill-judged rating of pace as were liable to be lost because of a desire to avoid a handicap.

Geers invariably drives with a watch in his hand and knowing the ability of his horse to a second he has won many a race by not being over-anxious at the half, because certain horses were ahead of him. A glance at his watch has, time and again, revealed the fact to him that his competitors were racing faster than the ability of their horses to go the mile would warrant and he has remained as quiet as the Sphinx, knowing full well that in the succeeding half the others would "come back" to him, and he would be first at the wire by maintaining the same rate of speed in the second half of the mile.

A watch in a case like that has insured the public a better race, a better contest than if all the drivers had gone to the half as fast as they could and come home as best they could. A few more rules like this one and the judges can as well be mere automatons. Deprived of the right of initiative, they will merely have the power to time the heats and announce the results and racing will degenerate in the same ratio as the judges are made effective.

Possibly some day men will be at the head of the National Association who will realize that they can better earn their salaries than by merely rattling around loudly at each meeting of the association. As it is they fool themselves more than the men who are responsible for high-class sport as it exists today. —Chicago Horseman.

WILL ABATE THE EVIL.

Harness racing in Great Britain has made great progress in popularity during the past few seasons, owing to the intelligence with which it is directed by the Association of Trotting Horse Owners of that country, an organization embracing in its membership the ablest and most thoughtful and energetic horsemen of England. This association has recently adopted a new code of trotting rules, which show an appreciation of the necessity of good methods and attention to strict discipline which is not too frequently manifested in this country, where the sport is far more advanced. These rules have been formulated to meet and to remedy the abuses and annoyances which have been experienced in the conduct of harness racing, and they go right to the source of the trouble, without any equivocation, applying the sort of treatment that will abate the evil without the necessity of a second application.

For instance, in the case of a driver failing to appear on the track when the race is called, one of the most frequent, annoying and unnecessary causes of delay, our own rules provide that the delinquent driver may be fined or that the judges may consider his horse drawn. Our British cousins have experienced the same trouble, but their method of preventing it is much more simple and efficacious. They provide a large electric stable bell, which is rung when it is time for the drivers to get ready, and when a second bell is rung ten minutes later the gates of the track are shut and no horse is thereafter allowed to go on the course. The horse which finds the gate closed is disqualified for the race and is as much "out of the running" as though he had not been entered. Under the administration of our own rules bearing upon the point, a fine of five or ten dollars is the utmost penalty imposed, and more usually the offending driver is let off with a reprimand, neither the fine nor the rebuke having the least effect in abating the evil. The British method, however, cannot help being most salutary, as the driver who realizes that the barrier will fall before his horse in case he is not on the track when called, will generally be there ten minutes ahead of time.

This is only one of the methods which our English friends have adopted to reform abuses in the sport. All are equally summary and direct. There is no temporizing or palliating anywhere, but the prompt, inexorable application of a remedy which will go right to the root of an evil and prevent its recurrence. Some of our trotting managers have reason to pattern after the ways of our friends on the other side.—Trotter and Pacer.

A gentleman who resides at Eureka, Humboldt county, and breeds several mares every year, informs us that Eureka is an excellent location for a well bred stallion that has a low record and is a producer of speed. There are many well bred mares in Humboldt county, and while there are several well bred young stallions there, the breeders would very much like to have a stallion such as the one described located there and would give him a large patronage.

THOROUGHBRED DEPARTMENT.

By RALPH H. TOZER.

The Ascot Park meeting ended last Saturday and there was a marked increase in the attendance at Emeryville all this week. Advices from the south indicate that the association cleaned up \$125,000 on the season, which means a shade less than \$1,400 per day profit during the session of ninety days. As Manager Brooks had a fourth interest in the profits at last accounts, he will reap a clever harvest. Considering the track would never have been built but for Brooks and that it was a case of "all going out and nothing coming in," the first season, Brooks' share is none too large. George Rose is reported to have lost \$75,000 on the season at booking, others less, but the only winner reported among the pencilers there is Ray Offitt, credited with being \$30,000 to the good. This speaks well for the form of the Los Angeles racing, and shows that the judges must have kept the horsemen well in line all the time, otherwise there would be more than one bookmaker a winner on the season. At Emeryville there is just about the reverse to report. The vast majority of the pencilers are well ahead on the season, while the plunger "on the outside" that can show a balance on the right side of the ledger is as rare as flowers in Alaska in February. Of late the Emeryville bookmakers have secured the coin steadily and in large bunches, while the true form of a host of the horses has been conspicuous by its absence. Raibert's running is a record at zigzagging probably never excelled, and it is laughable that the judges should take tickets as evidence that the horse was trying when he lost. Few owners there are that do not possess a friend or two amongst the pencilers, and the latter would provide tickets in thousands if necessary, provided they are enlightened as to whether the zigzaggy flyer is to finish first or last. It seems Mr. McCafferty has been very liberal in the past with his entries at a certain track in the Middle West, and appreciation of that liberality may cause the running of the halter man's horses to be seen in an all too lenient a light to suit the racing public, who believe that in-and-out running should not be tolerated for a moment.

J. Schas, of Jordan Valley, Or., has purchased of the Emeryville feed man, Stoerer, the chestnut mare, Princess Zula, four years old, by Take Notice-Princess Zeika, by Rey del Sierras.

Barney Schreiber, leads the winnings owners at Emeryville with about \$33,000 to his credit. As the second man has not reached the \$18,000 mark, the genial German will doubtless head the list at the end of the season by fully \$12,000. A number of his horses are to be shipped to Memphis to-morrow.

The Seattle meeting is to run from June 1st to September 1st this season. H. H. Egbert will be presiding judge, with Fred Mulholland and Robert Leighton as associates. As Dick Dwyer could not arrange it to do the starting there, Ed. Duke will probably be called upon to do the barrier raising. It is announced that there will be no syndicate book tolerated at the coming meeting, but the management is so used to the 1 to 2, 2 to 2 and 3 to 2 prices the belief is prevalent that after a short trial there will be a relapse into the old order of things that has disgusted the thinking public thoroughly. The old saying that "a sucker is born every minute" is not altogether untrue, for I understand the races are fairly well patronized at Seattle, even under the sure-thing system of booking that has prevailed.

David Boland was "boosted" from \$500 to \$1,000 by C. Stubenbord last Monday when he won, but he was retained by Owner Fountain. David has come to be almost as lively an acrobat as Raibert, which is saying much.

Barney Schreiber's Missouri-bred colt, Horace E., the fastest two-year-old in California, was raised on cow's milk, his dam, the fleet Miss Lynah, dying a few weeks after Horace E. was foaled. As the great Ruinart, best son of St. Carlos, was raised on the same diet, the question arises, isn't it the proper caper for breeders to use cow's milk as food for foals instead of mare's milk?

The appeal of C. E. Durnell was heard by the Pacific Jockey Club stewards last Tuesday, with the result that the young turfman was not only not wanted, but the penalty was changed from a suspension of one year and a \$1000 fine to ruling off the turf for life. Blacksmith Wm. Roth reiterated his story to the stewards of the governing turf body—that both New Mown Hay and Alderman Batt had worn training shoes in races, and when set for the coin had on light racing plates. Of course, one hates to see a young man like Durnell go to the bad, because he was rated as a clever trainer, but if he was to resort to the trick of which he was convicted he would try others, and such men are dangerous to the best interests of the turf. Durnell was not lacking in "gall" and energy, and had he trodden the right path would almost surely have reached the pinnacle of fame and incidentally have acquired a fortune. He got into trouble years ago in California, and later was placed under the ban in France, his reinstatement in the land of the Gaul hardly being cold before he is caught playing bad tricks in Los Angeles.

J. J. McCafferty was also ruled off for life by the Pacific Jockey Club stewards for "doping" The Huguenot, but this will hardly stand, as McCafferty had

decided to take his medicine (a year's suspension and a \$1000 fine), and had not appealed his case. However, the rules of the governing turf body gave the Los Angeles stewards no right to inflict the penalty they did. The rules are explicit, and say that any person found guilty of "doping" a horse is ruled off the turf. There are no "may be's" about it. McCafferty and President Williams, it is understood, had trouble years ago, when Racine was racing in Mr. W.'s colors, and it was never patched up. McCafferty was a noted rider in those days. This is a mixed case. Even the McCaffertys are divided into warring factions.

The above decisions, reversing the Los Angeles stewards, comes as a surprise to most persons, but I very recently wrote my opinion of the decisions in this journal, and it appears that the stewards of the governing turf body take the same view of matters that I expressed. It was that either the men were guilty or not guilty. If guilty, there was no middle ground, such as the Los Angeles stewards took. The evidence against them was conclusive, and the punishment meted is just.

THE HORSE IN DAYS GONE BY.

Those who are fond of the horse may be interested in some scraps of information gathered from a little book, which was published in 1726, a copy of which the writer picked up in a shepherd's hut on an Australian sheep run, entitled "The Farrier's and Horseman's Dictionary." The author was evidently a man of great erudition, and his method of approaching his subject and treating it, so far as it was understood in those days, emphasizes much of the simple wisdom, as well as the errors and superstitions of the seventeenth and eighteenth centuries. Many of his precepts have not yet been improved upon, and though it is probable that our standard of requirements in the matter of horsemanship, and our knowledge of what is honest in dealing with it, has improved much since the days in which he wrote, yet one cannot but feel that his sincerity is unimpeachable. He lets us into the secrets of the jockey and horse dealer with such apparent and ingenuous faith in our appreciation of the trouble, he has taken for us, that though we may not feel inclined to allow our help to use the means he describes to make our horses seem other than they are, we cannot find it in our hearts to quarrel with him on the score of the benefits which he wishes to confer on them.

The Horse, he tells us in defining the "noble Beast," is a Creature by Nature valiant, strong and nimble, and of all other Beasts the most apt and able to endure the most extreme Labour. The quality of his composition being so moist that extreme Heat will not dry up his Strength, and extreme Cold freeze the warm Temper of his Spirits. He is gentle and loving to Mankind, docile, and when an impression is fixed in his Brain, not apt to be forgetful. He is wakeful above most other Beasts, and will go through his Labour with a most empty Stomach. He is generally cleanly and of a grateful Scent.

The book is a very quaint and curious little collection of partly forgotten lore, and contains among other things "Direction for the Knowledge of Horses, or Instructions how to make a right Judgment of their Goodness and Imperfections," some of these directions being so very ludicrous and unexpected that it is worth while to quote them, if not for equine at least for human amusement. Some of the definitions, too, are full of unconscious humor, and a few of the prescriptions would be quite sufficient to make a modern horse's hair stand on end, or "become upright," as the little book quaintly puts it, in treating of a cure for horses whose hair is in the habit of assuming this unusual position. There are directions for almost every possible situation in which a rider might find himself, and the paces of the horse are particularly considered in treating of the education he ought to receive. If his movements are not sufficiently brisk, the "Aid of the Tongue" is strongly recommended, this being a sort of "agreeable Clacking, or a certain Sound, which the Horseman makes in striking his Tongue against the Roof of his Mouth when he would animate the horse, and sustain him, and make him work well in the Menage." If, however, he is so lethargic as to be unmoved by this gentle mode of encouragement, we may fear that he is attacked by the "Sleeping Evil," a disease which will end by making him "sleep continually and deprive him of Memory, Appetite, and all Alacrity of Spirit; white and dun horses are most subject to this Distemper, which proceeds from cold." In order to effect a cure for it, we must "keep him continually awake by Noises and Frights. Then bleed him in the Neck and Palate of the Mouth, and let his drink be water, in which Camomile, Wheatblack Star, Bran, Salt and Vinegar have been boiled; make it lukewarm, and it will not be improper to put Parsley seed and Fennel seed into it. Also perfume his head and make him Sneez, and anoint the Palate of his Mouth with Honey and Mustard. Bathe his legs, and stop his hoofs with Bran, Salt and Vinegar boiled together. Apply it as hot as it can be borne, and let the stable be lit some and full of noise. You may also hold to his Nose Volatile Spirits or Salts, as Sal Amoniac and Hartshorn." When the horse has sufficiently enjoyed this treatment, we are led to infer that he will be perfectly cured—unless perchance he should not survive it—and his mettle and spirit will return in all their pristine vigor.

Now, there are some persons, we are told, who confound "Fleryness with Vigor or High Mettle," and the definition of the two qualities is worth recording. "Fleryness is an earnest and immodest desire of Horses to go forwards, and are subject to fret, trample and dance, through the Desire they have to gallop, nor will suffer any horse to go before them. Such Horses are good for nothing but to fatigue the rider and themselves. A vigorous and true mettled Horse

is one that is very cold in his actions, but very obedient to the Spurs; whose sides are all very sensible; though we can not say but Flery Horses are sometimes very high mettled; but it is their fault to be so, with this fretful and flery Disposition."

There is a charming disregard of grammar and sequence about these remarks, born of the days when each man was a law unto himself as to the way in which he should express his thoughts, for as long as his general drift was intelligible to his readers, the average author of two centuries ago recked little of an occasion and local obscurity in style or expression. Yet the author evidently writes for all sorts and conditions of horsemen and horsewomen, both the most cultivated as well as professionals of a lower type, and he does not disdain to give us among other things a recipe to "Make an old Horse seem young," to "Make a white star in a horse's forehead or elsewhere," to "Make a red or a black star," or to "Dye a mane or tail red or scarlet, yellow or gold." The method of making an aged horse seem but six years old would today call forth so much just indignation from humane societies that I will not venture to quote it. Though I fear that some of the directions are but too well known in certain quarters, but the quaintly callous way of stating these directions reminds us of the fact that our great great grandfathers were far less timorous on the subject of pain in animals than are we. As to the beautiful colors we may produce in our horses' manes and tails "by boiling them in the Dye," to be done by means of a charcoal brazier, held up to the proper height from the ground, with a board between it and the horse's body as a humane precaution against the heat, we are hardly likely to appreciate them, unless scarlet manes and tails should come into fashion again.

There is, however, much humanity as well as worldly wisdom about the following directions for feeding a horse, but though the substance of them is well known, the method of stating them is charmingly naive: "If there be any particular meat or drink that you would have the Horse eat, that you know is good for him, and he refuses it, do not thrust it violently upon him, but win him to it by gentle Means and Allurements, especially when he is most hungry and dry, and always give him less than he would have and in order to bring him to it sooner, to mix that he loves most with that he loves least, till both become alike familiar. And by this means the Horse will not be a stranger to anything that is good and wholesome."

A last piece of advice as to the management of horses on secret expeditions might be very useful to couples about to elope, should they intend to ride away on horseback. The hint comes in connection with a little dissertation of the "Cry" of the horse, which is at any time unpleasantly loud, and might be exceedingly disastrous in its results to a lady, the success of whose hopes depended upon a silent transport. This cry or neigh is not a sound which is heard so very often, and yet accidental circumstances may arise at any moment to produce it, more probably perhaps when silence is especially desired than at any other time. So the author counsels his readers "fairs" to "tie a list of woollen cloth in many folds about the Tongue, and he will neither Neigh nor make any extraordinary Noise with his Voice, when you are upon any expedition that you would not have your horse to Neigh or make a Noise."—W. R. Gilbert in Stock Farm.

MERIT PUBLIC CONFIDENCE.

There never was a time in the whole history of trotting racing when more was required of the men who conduct trotting meetings, and every driver, trainer, owner and racing manager should unite in an effort to elevate and build up the sport. The public, in all parts of the country, have shown that they are willing and anxious to extend their patronage to trotting meetings, and it is the duty of racing men to see that the sport is kept clean and respectable. No association can expect to retain the confidence of the public and allow the most flagrant violations of turf laws to go unheeded. Racing must be conducted honestly and fairly, and if those most directly connected with the conduct of meetings will stand up firmly for clean racing, there is no danger of trotting racing losing any friends. Trainers and drivers are most vitally interested in the success of trotting racing, and they should come to the front and stand shoulder to shoulder with race managers in an effort to eliminate everything of a questionable character which has crept into the conduct of race meetings.

The parent associations, by their recent actions, have shown a disposition to take some forward steps along the line of improving the sport, and every trotting-horse man should stand up for everything which tends to improve and benefit the sport. There never has, in the whole history of the sport, been a series of successful race meetings held by an association which allowed sharp practices and wrongful motives to prevail. There is only one successful way to conduct a trotting meeting, and that is to conduct it honestly, and insist on clean and honest racing. No association can hope to succeed which winks at a violation of turf laws, and no driver or owner will be successful by violating the rules of honest racing. Make trotting racing so respectable and attractive that all of the better class of people will be attracted to race meetings, and there will be no danger of trotting racing losing any of its present popularity.—Western Horseman.

Bayswater Wilkes 2:24½ is making the season of 1906 at the Dixon Driving Park, in charge of Dick Wright. He has sired such fast ones as Kelly Briggs 2:09½ and Friskarina 2:13½ as a three-year-old, and is one of the best bred horses in California.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

Jan. 1-June 1—Closed season for black bass.
 April 1—Closed season for steelhead.
 March 24—San Francisco Fly-Casting Club. Saturday Classification Contest No. 3. Stow lake, 2:30 p. m.
 March 25—San Francisco Fly-Casting Club. Sunday Classification Contest No. 3. Stow lake, 10 a. m.
 April 1-Sept. 15, Oct. 16-Feb. 1—Open season for taking steelhead in lower water.
 April 1-Nov. 1—Trout season open.
 April 1-Nov. 1—Open season for taking steelhead above tide water.
 Sept. 10-Oct. 16—Close season in tidewater for steelhead.
 Sept. 10-Oct. 16—Close season for salmon.
 Sept. 15-April 1—Open season for lobsters and crawfish.
 Oct. 16-Nov. 15—Close season for taking salmon above tide water.
 Oct. 16-Feb. 1—Open season for steelhead in tidewater.
 Nov. 1-Sept. 1—Open season for crabs.
 Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-July 1—Dove season closed.
 Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
 Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
 March 25—Golden Gate Gun Club. Blue rocks. Ingleside.
 March 25—Vallejo Gun Club. Blue rocks. Near Flosden Station.
 March 25—Capital City Blue Rock Club. Kimball & Upson grounds, Sacramento.
 April 1—California Wing Club. Live pigeons. Ingleside.
 April 1—Blue Rock Gun Club. Grounds foot of High street, Alameda.
 April 8—Empire Gun Club. Blue rocks. Alameda Junction.
 April 14, 15—Los Angeles Gun Club. 18th semi-annual tournament. \$500 added money.
 April 22—Union Gun Club. Blue rocks. Ingleside.
 May 26, 27—Pacific Coast Trap Shooters Association. Third annual blue rock tournament. Vallejo Gun Club grounds, near Flosden Station.
 June 19, 22—Interstate Association. Grand American Handicap target tournament. \$1000 added money. Indianapolis, Ind. Elmer E. Shaner, Secretary-Manager, Pittsburg, Pa.
 June 20, 24—Northwest Sportsmen's Association. Blue rocks and live birds. Walla Walla, Wash.
 Sept. —Interstate Association shoot. Blue rocks. Ingleside. Elmer E. Shaner, Manager. Pacific Coast Handicap under auspices of S. F. Trapshooting Ass'n, A. M. Shields, Secretary.
 Oct. 15-April 1—Open season for English snipe.
 Oct. 15-Aug 1—Deer season closed.

Bench Shows.

March 14, 17—Passaic County Fish and Game Protective Association. Paterson, N. J. Jas. Matthews, Secretary. Entries close —
 March 21, 24—Wolverine Kennel Club. Detroit, Mich. K. G. Smith, Secretary. Entries close March 10.
 March 28, 31—Wisconsin Kennel Club. Milwaukee. Jos. Meisenheimer, Secretary. Entries close —
 March 30 31—Haverhill Kennel Club. Haverhill, Mass. A. A. Balch, Secretary. Entries close —
 April 4, 7—Duquesne Kennel Club. Pittsburg, Pa. J. Stewart Laycock, Secretary. Entries close —
 April 9, 10—St. Louis Collie Club. St. Louis, Mo. John A. Long, Secretary. Entries close —
 April 11, 14—Southwestern Kennel Club. Los Angeles. George R. Albers, Secretary. Entries close April 3.
 April 13, 14—Merrimack Valley Kennel Club. Lawrence, Mass. Albert Mitchell, Secretary. Entries close —
 April 28—Bull Terrier Club. San Francisco. Entries close April 21.
 May 23, 26—Seattle Dog Fanciers' Association. Seattle, Wash. Chas. McAllister, Secretary. Entries close —
 May 29, 30—Long Island Kennel Club. Jos. M. Dale, Secretary, Brighton Beach, L. I. Entries close —
 May 30, June 2—Portland Kennel Club. F. E. Watkins, Acting Secretary. Entries close May 22.
 June 1 2—Ladies Kennel Association of Mass. Mrs. L. M. Speed, Secretary. Entries close —
 June 5, 6—Ladies Kennel Association of America. Mineola, Long Island. Miss E. M. Clark, Secretary. Entries close —
 June 6, 9—San Francisco Kennel Club. 10th annual bench show. Fred P. Butler, Secretary. Entries close —
 June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary. Entries close —
 Aug. 22, 23—Asbury Park Kennel Club. Asbury Park, N. J. A. F. Cottrell, Secretary. Entries close —
 Sept. 3, 5—Miami Valley Kennel Club. Piqua, O. Edwin A. Hiatt, Secretary. Entries close —
 Sept. 3, 6—Taunton Kennel Club. Taunton, Mass. A. J. Leo, Secretary. Entries close —
 Sept. 8—Cedarhurst Kennel Club. Cedarhurst, L. I. Jno. G. Bates, Secretary. Entries close —
 Sept. 29—Bryn Mawr Kennel Club. Haverford Pa. Henry D. Riley, Secretary, Stafford, Pa. Entries close —

AT THE TRAPS.

The opening club shoot for 1906 of the Union Gun Club was a strong enough attraction to bring fifty shooters out to the Ingleside trap grounds last Sunday. Weather conditions were excellent and good scores were the rule. A pleasing feature and strong indication of the growing popularity of the sport was a large representation of "new recruits." Class shooting seems to work well at the Union shoots. A departure from stereotyped match features is the mixed style of two events, as will be noticed below. If there is anything that will give a shooter the eye for distance, time and flight, these events should develop those qualities. Another agreeable feature was the presence of a number of veteran shooters, sportsmen who have been prominent figures at many shoots here, and elsewhere, for the past two decades.

The winners in the various events were as follows: Event 1, champion class—Otto Feudner 25 straight, "Dick" Reed 24, Emil Holling 24, Edgar Forster 22. First class—M. J. Iverson 22, D. Daniels 21, Dr. Pitres 20. Second class—J. Scott Leary 22, E. Hammond 21, F. Knick 19, W. Janssen 19. Third class—B. Patrick 19, F. Haupt 18, Geo. Barber 16.

Event 2—Feudner won the champion class medal

for the month on 23 breaks. Iverson won the first class medal, repeating his initial season's medal win of 1905, breaking 24 out of 25. C. F. Harvey annexed the second class medal with a score of 24. Bert Patrick cracked 20 targets and won the third class medal. The open to all event honors were annexed by Feudner, Daniels and Reed in the order named.

The Shields trophy race had 39 entries. Clarence Nauman and Ed Schultz tied on 24 breaks each, under the conditions, excellent scores. Shooting off the tie at 20 yards Schultz broke 19 to Nauman's 18. This trophy will be the final property of the shooter scoring the most wins in the race this season. A summary of scores follows:

Event 1—Club shoot—25 targets, members only, 16 yards, entrance 75 cents, class shooting, \$60 added (\$15 for each class), 3 moneys, 5-3-2.

Event 2—Medal shoot—28 targets, members only, entrance 50 cents, four medals, class shooting.

Champion class—

	Event 1.	Event 2.
Reed, R. C.	24	22
Forster, E. L.	22	22
Nauman, C. C.	21	22
Feudner, M. O.	25	23
Hawxhurst, L.	21	19
Holling, E.	24	21

First class—

Daniels, D.	21	23
Murdock, W. E.	17	18
Pitres, Dr. E.	20	16
Kelly, H.	19	22
Iverson, M. J.	22	24
Donohoe, E.	14	21

Second class—

Lewis, T. L.	14	13
Hauer, J. B.	17	14
Knick, F.	19	17
Harvey, C. F.	18	24
Hammond, E.	21	21
Jacobsen, H. P.	16	19
Frankel, C.	15	23
Janssen, W.	19	..
Gill, R. C.	18	12
Leary, J. S.	22	19
Bruns, J.	13	13
Fisher, O.	13	13

Third class—

Patrick, B.	19	20
Sylvester, Dr. A. J.	14	15
Pickersgill, L.	14	16
Lynch, J.	7	13
Bodkin, Dr.	9	11
Johnson, W. H.	15	19
Biller, J.	11	7
Haupt, F.	18	16
Hedapp, F.	14	14
Settin, R.	9	5
Barber, Geo.	16	14
Finnie, Dr.	13	12

"Billy" Clayton of Kansas City and Gus Knight of Santa Ana shot a live bird race at 50 pigeons for \$250 a side on Thursday. The shoot came off on the Los Angeles Gun Club grounds at Sherman.

The Richmond Gun Club will hold regular blue rock shoots this season.

As guests of Harry H. Haight at the Claremont Country Club on Wednesday there were present: M. O. Feudner, C. C. Nauman, Ed Schultz, Pete McRae, Jas. Maynard, J. Karney and Harvey McMurchy, J. O. Cadman and several other members of the club were also present. The party had a lively afternoon at the Country Club traps.

The regular Golden Gate Gun Club monthly blue rock shoot will take place at Ingleside tomorrow.

The Vallejo Gun Club will open the club trap season tomorrow on the new grounds near Flosden Station.

It will be pleasing news to many Coast sportsmen to know that the Interstate Association will hold a three day tournament at Ingleside early next September.

The Northwest Sportsmen's Association tournament is a fixture for June 20 to 24 inclusive at Walla Walla, Wash. A number of local shooters will be in attendance. Shooters from other California cities will also be present.

The tournament is open to California, Oregon, Washington, Idaho, Nevada, Montana, British Columbia and Utah shooters. The shoot will be held at the new fair grounds, an excellent location, and will last five days, during which 100,000 clay pigeons will be thrown. The first day will be devoted to practice, the next three for the regular contests and the last day to shooting off ties. Aggregate value of medals will be \$2400; in cash, \$700. Special prizes will be very numerous. Two hundred Pacific Coast shooters are expected to participate in the tournament.

Chico sportsmen are getting into line. A meeting of the Chico Gun Club was held recently for the purpose of arranging for the opening of the clay pigeon traps at an early date. A few of the Chico shooters expect to participate in the shoots to be held in Northern California during the spring and summer, and they desire to get an early start in training for those events.

As the Northern Electric Company's road will soon be in operation to Oroville, it will be possible to more frequently meet with the Oroville shotgun cracks, before the traps, a pleasure that the Chico contingent has occasionally enjoyed in the past.

Game in Mexico.

Sportsmen who arrive in the state of Coahuila from the United States find there an abundance of game to satisfy their keenest desires. Game of all kinds can be found in the republic, while the streams abound in fine fish. Several parties who have left Torreon during the last two weeks after spending a few days in the country tributary to that city have returned well rewarded for having made the trip. While the winter has not been as severe as in other sections, still hunters have reported seeing large numbers of fine duck throughout the Laguna country, and fresh game can now be found on the local market.

Ignore Fishing Laws.

The fishermen of Reno have agreed to ignore the special ordinance passed by the County Commissioners delaying the open season for trout fishing in the Truckee River. Instead of waiting until June 1st, they commenced to fish on March 15th. In case arrests are made the ordinance will be tested, the claim being made that it is in direct conflict with the State laws.

Truckee Anglers Not Barred.

Members of the San Francisco Fly-Casting Club deny the reports emanating from Truckee and generally believed there that their grounds and as much of the stream as flows through their property will be shut to all local anglers without fear or favor. They say fishing in reason will be allowed, and that no fence will be put up or guards stationed.

Fishing out of season will not be countenanced, and Indians will not be allowed to spear fish. Spoon fishing may also be prohibited. A watchman will be employed to carry out the club's purposes.

A quail, as everyone knows, is naturally one of the driest of birds, and it is always a question with cooks how best to preserve its juices. To take off the skin is to take away the greatest part of the juices, and such a quail broiled or roasted would be little better eating than cottonwood chips. In North Carolina they cook a quail in the middle of a potato. This little receipt is worth a column on skinning quail.

GROUSE AND WILD TURKEYS OF THE UNITED STATES, AND THEIR ECONOMIC VALUE.

By Sylvester D. Judd, Assistant United States Biological Survey.

The Willow Ptarmigan.

Ptarmigans are characteristic of the arctic and arctic-alpine regions. During summers they are mainly gray and brown, resembling the mottled colors of the bare earth, but at the approach of winter they change this plumage for one of pure white. Thus they harmonize with their surroundings at all seasons and are better able to escape their numerous enemies. There are four species of these birds in the United States and Alaska. Of these the willow ptarmigan (*Lagopus lagopus*), white ptarmigan, or willow grouse, as it is variously known, is the largest, most abundant, and consequently the most important. It is found in the arctic regions of both hemispheres, and is widely spread and abundant throughout the tundra country of Alaska, except on the Aleutian Islands. Throughout its range, especially in winter, it is an important food bird. In the north periods of famine are ever recurring among the natives, and these birds frequently stand between them and starvation. It rears but one brood in a season, nesting on the ground early in June and laying from seven to twelve eggs. By the middle of August the young are nearly grown. In the northern part of its range the willow ptarmigan is a summer resident only, and at the approach of winter most of the birds migrate in large flocks, sometimes numbering a thousand or more, southward or inland to a region of scattered trees or bushes. Ernest Thompson Seton, quoting from Hutchins' manuscript concerning observations on Hudson Bay in 1782, says that over 10,000 ptarmigans were caught with nets at Severn from November to April. (Proc. U. S. Nat. Mus., vol. 13, p. 514, 1890.) The birds are so tame, especially in winter, that their capture is easy. Like all other gallinaceous birds, ptarmigans require gravel for milling their food, and in winter deep snow makes this hard to procure. The natives, taking advantage of the birds' necessities, bait their nets with gravel, and sometimes catch as many as 300 at one spring of a net. (Hearne, *Journey to the Northern Ocean*, pp. 413-415, 1795.) E. W. Nelson writes of encountering flocks of several thousand white ptarmigans in Alaska in midwinter, and says that the whirring of their wings as they rose sounded like the roll of thunder and seemed to shake the ground. He reports that the birds are snared and shot in great numbers by both the Alaskan Eskimos and the Indians. (Nat. Hist. Coll. in Alaska, p. 132, 1887, 1888.) The flesh is not so palatable as that of many other game birds, and is decidedly dry and often bitter when the bird feeds on willow buds. The flesh is not so palatable as that of many other game birds, and is decidedly dry and often bitter when the bird feeds on willow buds. The flesh of old birds is dark colored, but that of the young is white and delicately flavored.

Foot Habits.—Study of the food of the willow ptarmigan unfortunately has been slight, for only five birds were available. Their food was entirely vegetable. Three shot in January in Labrador had eaten 10 per cent of berries and 90 per cent of buds, more than half the buds being willow. One stomach contained about 300 willow-flower buds. The two other birds were collected in December in Labrador and had eaten willow buds exclusively. Though the data are so scanty, the results agree with those of other students. Ludwig Kumlien, for instance, says:

"They (willow ptarmigans) are quite common in the larger valleys, where there is a ranker growth of willows. The stomachs of those I examined of this species contained willow buds and small twigs." (Bull. 15, U. S. Nat. Mus., pp. 82-83, 1879.)

Baird, Brewer, and Ridgway have stated that the crops of ptarmigans were often found to contain a double handful of willow buds. (Hist. N. A. Birds, Land Birds, III, p. 461, 1874.) L. M. Turner writes thus of the bird in Alaska: "During the winter these birds subsist on the past year's twigs of willow and alder or other bushes. I have cut open the crops of many of these winter-killed birds and found them to contain only pieces of twigs about one-third of an inch long, or just about the width of the gape of the posterior horny part of the bill, as though this had been the means of measurement in cutting them off. The flesh at this time is dry and of a peculiar taste. In spring the ptarmigans congregate in great numbers on the willow bushes and eat the tender, swelling buds. The flesh then acquires a bitter but not unpleasant taste. As open weather advances they find berries that have remained frozen the entire winter, and tender grass shoots, and later, insects. The young are insectivorous to a great degree in their youngest days. They consume great numbers of spiders that are to be found on the warm hillsides." (Nat. Hist. Alaska, p. 153, 1886.)

In writing of the food of the willow grouse, Major Bendire says that the buds and tender leaves of birch are eaten, and the berries of cranberry, whortleberry, and arbutus. (Life Hist. N. A. Birds, I, p. 74, 1892.) Wilson and Bonaparte state that it feeds on berries, including the crowberry and the mountain cranberry. (Am. Ornith., IV, p. 328, 1831.)

(To be continued.)

Why, of Course.

You ask what I'm a-fishin' fur? Why fish.

Yes, I may git a whale. It's the wish

That sure as a gun,

Makes half of the fun.

You can't see no fun in it? Aw plish!

JAB EZSWAN.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

TROUT FISHING IN NEW ZEALAND.

"God might have made a better angling country than ours," wrote an enthusiastic New Zealand trout-fisher once, "but it has not yet been discovered. The angler detects design even in its geographical configuration. Take the South Island, for instance. Right through the center of it runs, like a backbone, a chain of mountains. Snow-covered and glacier-belted, they carry every here and there lakes on their hips, like soldiers' canteens. Radiating from these lakes and mountains, as the ribs of the human body, innumerable rivers and streams swing themselves east and west to the sea. Less than a generation ago these had no interest for an angler. His rod had never cast a shadow over them, for—save for bull-heads or eels and other unconsidered fish trifles—there was no trout in them. Now they are, as an enthusiast once put it, 'fairly stiff wid 'em.' For this the work of the Acclimatization Societies is worthy of all praise."

New Zealand has, indeed, not without good reason, been called the Anglers' Paradise. In this much-favored land the trout-fisher may whip or troll thousands of miles of good fishing waters for seven months of the year, October to the end of April, for the expenditure—ridiculously small it seems to the new arrival—of £1 on a license fee. It is the cheapness of the shooting and fishing in the land of the Maori that surprises even more than its exceeding abundance. There are no vexatious survivals of the old feudal game laws of Europe and Great Britain.

The best trout waters are free to anglers, and the best of the lordly antlers of the Wairarapa and Hawea and South Nelson deer forests are secured either on government lands or on the domain of large sheep farmers who readily accord permission to the reputable stalker to shoot over their properties. Every summer brings out to New Zealand sportsmen from the Old World, more particularly anglers who have heard of the colony's trout-waters with their inexhaustible supply of grand heavy fighting fish.

The quantities and weights of the rainbow, and brown trout taken from New Zealand waters every season would be beyond belief where they not attested by carefully kept records. Trout catches in special localities are reckoned by the ton. The phenomenal success which has attended the acclimatization of trout is quite on a par with the prolific increase of the deer herds. The trout with which the rivers and lakes are stocked are the California rainbow (*Salmo irideus*), English brown trout (*salmo-fario*), and the Loch Leven trout. Attempts to acclimatize the true salmon have, so far, been only partially successful, but the trout has found the country a most congenial habitat. The acclimatization of trout began in Otago in 1867, and the first successful hatching took place there in 1868. In 1868 some young trout were placed in the Canterbury Rivers, and in the Wellington province the first successful matching-out and liberating of fish took place about 1882.

No more striking illustration can be given of the abundance of rainbow trout in the fishing waters of the North Island of New Zealand than the enormous catches at Rotorna during the fishing season. During the 1903-04 season upwards of twenty tons of trout were caught in Lake Rotorna and vicinity and adjacent streams. This great quantity was, however, eclipsed by the catch of the 1904-05 season beginning in November and ending on April 30th. A register was kept of all the known catches, and it is from this that the figures were compiled. Many anglers, however, particularly Maoris, did not record their catches. The register kept shows that during the period mentioned not less than 17,762 fish of an aggregate weight of 61,052 pounds or over twenty-seven tons, were taken from Lake Rotorna and Rotoiti, and the streams which flow into and drain from them. The unregistered catches not included in this return are considered to be at least 50 per cent, more so that probably forty tons of rainbow trout—to give a moderate estimate—were captured in this most prolific of fishing waters during the last season. The greater proportion of the trout were taken by means of "trotting" on Lake Rotorna. In spite of this enormous take, the supply of fish shows no apparent diminution; the streams and the lakes are rich in the food supplies that the trout loves, and the beautiful brooks that spring from the hills surrounding Rotorna are ideal breeding-places.

At Rotorna, indeed, are all the elements that combine to make the angler's pastime a delightful one. Fish are wonderfully abundant, of good quality and marvellously game; the climate is mild and pleasant; the angler may fill his basket within a few hundred yards of his hotel; and all in a grand scenic garden of which the components are the lakes of lovely blue, the rippling crystal streams, the purple wooded hills and the snowy jets of steam rising from many a geyser and hot spring. The fisherman way whip a score of good rivers within easy distance of Rotorna town, and he may enjoy some excellent sport on the lake itself, where trolling from power launches and boats has become established as a very successful fishing method.

Near the shores of Lake Rotorna there is a remarkable little spot known to the whites as the "Fairly Spring," and to the Maoris as the "Puna-a-Tuhoe" ("Tuhoe's Fountain"), which is taboo to rod and line, but which is a fascinating sight for the angler in the spawning season. The spring, about three miles from Rotorna town, bubbles up in a fern-covered hollow, the source of a considerable stream, running into the lake. The fountain pool is literally thick with trout in the spawning season; one wonders how all these hundreds of speckled beauties can find swimming room, so abundant are they. This spring and the stream it supplies are protected as breeding-places; millions of fry annually find their way down from the Puna-a-Tuhoe to the lake.

But Rotorna is by no means the only abundantly

stocked fishing region in the North Island. Lake Waikaremoana, a beautiful mountain lake, 2000 feet above the sea, a day's coach drive from Wairoa, Hawkes Bay, is earning fame amongst anglers for its splendid fish, which, like those of Rotorna, weigh anywhere from 5 to 20 pounds. Ten-pounders are as common as, say 1½ to 2-pounders in English or American fishing streams. The Waikato River teems with fish from Lake Taupo to the sea.

In the South Auckland district where the Main Trunk Railway runs through the beautiful region known to the Maoris as the Rohe-potae and to Europeans as the "King Country," the land abounds in crystal clear streams flowing through a romantic limestone country, now rushing down in short rapids and now stealing along in quiet reaches and deep pools. These are ideal trout-streams, already carrying good fish, and the angling possibilities of the King Country rivers, when their waters are fully stocked, are very great indeed. Coming southwards to Taranaki and Wellington, there are good fishing waters in innumerable places, chiefly stocked with brown trout.

The South Island is an older fishing district than the North, and brown trout of enormous size are frequently taken. The fish are exceedingly plentiful and show great "fight." One monster landed some time ago near Blenheim, in the Marlborough Province, measured nearly three feet in length and weighed 28½ pounds. This fish was exhibited at the St. Louis Exhibition in 1904. As in the north, trout of 10 to 20 pounds in weight are frequently taken. Canterbury, Otago and Southland are beautiful fishing districts with innumerable clear streams coursing through the grassy plains or curving around the tussocky hills. Then at the mouths of the large, snow-fed rivers, "where the sea-trout's jumping crazy for the fly" there is grand sport. The sea-brown trout grows to a great size, and remarkable catches are made at mouths of such streams as the Waiau, Ashburton, the Rangitata, the Waitaki and others that drain the glacial lakes and snowfields of the interior. The Waiau, draining the famous lakes Te Anau and Manapouri, is one of the great rivers of the island—deep and swift and of large volume—and is full of big fish. Tons of trout are caught every season at and near the mouth of the Waiau, one month's catch not long ago totalling three tons eight hundred-weight. And even in the remote interior of the Sounds Country, between the great lakes and the West Coast Fiords, the angler may ply rod and line along the Clinton River and in Lake Ada surrounded by scenery grand beyond description.

Irish Water Spaniel Club of California.

A number of Irish Water Spaniel fanciers met on the evening of March 16th and organized the above named specialty club. The officers elected were: Wm. Bay, president; A. Kohler, vice-president; Achille Roos, treasurer, and Wm. F. Watson, secretary. The charter roll, it was decided, will be kept open for further membership for the next thirty days. The club was organized for the purpose of encouraging the breeding and keeping up the standard of the Irish Water Spaniel, and also for the purpose of receiving more extended recognition of the breed from show clubs.

If there ever was a fancy for a useful breed of dogs and one that was worthy of encouragement this club should have the full support of every owner and breeder of Irish Water Spaniels.

As a working dog, for marsh or upland, they are worthy of far more consideration by sportsmen than has been given the breed in late years. However, we are pleased to state that the breed has a stronger following among the Coast fancy than prevails in the East. We wish the new club a successful and most enthusiastic career.

Bull Terrier Show.

The Bull Terrier Club one day specialty show, it is reported, is now a fixture. Sanction for application to the A. K. C. has been granted by the Bull Terrier Club of America. The show will be held on April 28. Entries will close on April 21st. Secretary Dr. W. H. Watkins, 1505 Stockton street, San Francisco, will receive entries.

Portland Show.

The dates for the Portland show will be May 30th to June 2nd inclusive, instead of April 25th to 28th. Major J. M. Taylor will judge all breeds. Entries will positively close on May 22nd.

The club will offer, so Secretary Frank E. Watkins writes us, "about sixty solid silver cups as trophies, to be won outright, no strings on any of them." The indications so far are suggestive of a four point show.

Interest is lively and growing among the Oregonians in the coming show. The club has the support of some of the swellest people in Portland who are directly interested in the success of the show.

Premium lists can be obtained at the office of the Breeder and Sportsman. For further information, or entry blanks and premium lists, address Secretary Frank E. Watkins, 250 Alder street, Portland, Ore.

In answer to a Merced correspondent we will state that the following colors are the standard for:

Bull Terriers—Uniformly white.

Boston Terriers—Any color of brindle, evenly marked with white is strongly preferred. (White muzzle and blaze and white chest are much in vogue.)

Entries for the Los Angeles show close on April 3rd. Secretary Geo. Albers, 4949 Marmion Way, Los Angeles, will forward entry blanks and premium lists on application.

James Cole, it is reported, will judge at Seattle in May.

TRIMMING.

Mr. Harding Cox, in a very recently published work, proclaims his views on the fixed question of the preparation of rough-coated dogs for show with no uncertain sound. He says:

"For many years past, the question of the preparation of dogs for exhibition has been of absorbing interest, and has given rise to the airing of views that are diametrically opposed to one another. Personally, I have always been in favor of allowing a very free hand to those whose commendable wish it is to show their dogs trim, taut, neat and well favored. I would only draw the line as follows:

"1. No mutilation of any kind, either by cutting, burning, or breaking of any sensitive portion of the dog's anatomy.

"2. No dye or coloring matter to be used, except a dry shampoo for the purpose of cleaning the coat; such substance to be removed before the dog enters the ring.

"Apart from this, I would allow any and every manipulation of the coat tending to make it trim and presentable.

"Why forbid cutting, singeing, breaking, etc., of the coat? You might as well expect a man to go unkempt of locks and unshaven of chin; or ask an exhibitor of high class trotting horses to bring his charges into the ring with long hair on the fetlocks, coat unclipped, or mane unkempt. You cannot breed dogs of the rough-haired varieties to maintain a coat of constant and uniform length and appearance, and unless such coats are properly tended and manipulated, the appearance of the wretched animals is archaic and prehistoric. Why are Poodles the only exception to this illogical and unnecessary rule? Why are all other breeds denied the right of coiffure?"

In the matter of mutilation, no one is likely to disagree with Mr. Cox, writes John Brown in The Asian. It may be assumed that he does not refer to the docking of the tails of certain breeds, such as Irish, Welsh, Airedale, and Fox Terriers, and Field and Cocker Spaniels, which is not a cruel process and cannot by any possible means deceive a show judge. Nor would he allude to such merciful and necessary operations as the removal of dew-claws, or of warts from lips or tongue. Illegitimate mutilation, now that "cropping" has been definitely interdicted and is illegal (in Great Britain), would be usually in connection with ear-carriage, as, for instance, to make a naturally prick ear assume the button fall. The operation here would not be very painful; but such mutilation would very rightly be debarred, if only for the reason that it is undesirable to breed from strains with hereditary defective ear-carriage. The same argument might of course be advanced in the case of coats which rendered much trimming essential; but not with the same force, and the point will be referred to later. It is in the matter of Mr. Harding Cox's second postulate, and the remarks which follow it, that there will be most room for difference of opinion.

This postulate is not very well expressed. A dry shampoo is not a dye or coloring matter that it should be excepted from that category; nor is it clear why a shampoo should be removed before the dog enters the ring; what is there in a shampoo to remove? As a matter of fact what Mr. Cox refers to is the not uncommon practice of cleansing the coat of white dogs, such as Fox-Terriers, by means of some such substances as magnesia or chalk. In the case of colored dogs, the question of cleanliness is not of great moment, but a white dog is another affair. Washing just prior to a show softens the coat, and weather and other circumstances may render a bath undesirable or inconvenient. Dry cleaning therefore possesses certain advantages; and as long as the substance used does not give a fictitious value to the texture of the coat there is no reason why material other than soap should not be employed. But if employed, it must of course be removed before exhibition.

Dyeing, or artificially coloring the coat, should of course be interdicted. It is taking an unfair advantage if white hair, where there should be no white, is concealed in this way; or if any specially admired color, such as the brilliant black and tan of a Black and Tan Terrier, or the red of the Irish, is the result of extraneous means. Washing a dog does not deceive a judge; he knows that a white dog must be washed to appear clean; but a dyed dog is obviously a fraud. And coloring matter may not be confined to the coat; there are such things as "dudley" or "but-terfly" noses, which the art of the expert faker can conceal by artifices very rightly tabooed. So far then, Mr. Cox can be implicitly followed. It is when he says that he would permit of manipulation, including cutting and singeing, that many will disagree with him.

The arguments of dissentients are mainly three. Firstly, it is contended that the trimmed coat is calculated to deceive the judge. Secondly, it is held that the artificially manipulated dog acquires a fictitious value to which it has no real claim. It may appear well enough in the ring, but its appearance is unnatural; and breeding from such dogs, because they may happen to be prize winners, perpetuates defects. And thirdly, it is claimed that the trimming practice places amateurs at a disadvantage with professionals, who are able to put a dog down in a show condition to which no amateur can aspire. These arguments are not without their force, but they are by no means wholly truths.

It is very doubtful whether any good judge is ever deceived by the trimming process. Judges of rough-coated breeds are usually men with considerable experience of such breeds, and that experience tells them what sort of coats they wear in a natural state. They have themselves prepared dogs for show and seen them both au naturel and as they appear in the ring. People who advance this argument should re-

member the profound truth lying under the words spoken by a Scotch merchant, "there's no an honest mon in the world, a ken it by mysel."

It should also be remembered that although good preparation will accomplish a great deal, it will not accomplish everything. If a dog's coat, which should be hard, is hard but there is too much of it, skillful grooming will effect the necessary reduction of the super-abundance; but no amount of trimming will render a soft coat hard. Trimming will not hide the curl in the coat if the coat should be straight. Removal of the silky top-knot will not conceal the silky hair beneath. Exhibits trimmed ever so wisely, by their signs shall judges know them. A dog with not too good a jacket, manipulated by an expert, has no doubt won in the past and may often win again; but this does not necessarily signify that the judge has been deceived. It is conceivable that a dog may win in spite of a defective coat and not because of it. There are other points to take into consideration, the coat may not be up to standard, but feet and legs, head and ears, and general make and shape may be high class. Some judges of some breeds, such as wire Fox Terriers, lay such stress on coat that no poor-coated specimen can win whatsoever their excellencies in other directions; but some judges again will attach to coat the prominence indicated by the marks in the standard of points, and provided the coat is not so defective that it amounts to positive disqualification who can blame them? Moreover, although a dog's coat may be anything but first class, and may have been liberally manipulated, the other exhibits may be still worse, and the dog may win because, with all its faults, it is the best in the ring.

It is not thought that the argument with reference to breeding possesses much force. Now and then, perhaps, a novice may employ the services of a dog, which should not be at stud at all on account of coat defects, but novices may be wanting in judgment in many other directions. Experienced breeders, for their own sakes, will always be specially careful in the matter of coat. Owners of large kennels, and professional men, do not want to be troubled with coat preparation more than they can possibly help. They will all aim at coats demanding a minimum of attention, and a stud dog which fails in this particular is not at all likely to be largely patronized.

On the subject of the third point, it will, of course, be admitted that the amateur is at a disadvantage with the professional expert, but it is not solely in the matter of coat that he is so. The expert will put a smooth-coated breed, where the question of trimming does not come into play, into the ring in a manner that no novice can approach. There are all the matters of condition and handling in the ring which cannot fail to tell. A professional trainer will train a racehorse better than an amateur, but that is no argument in favor of horses not being trained at all. A very little examination will make contentions such as these look foolish.

On the whole, Mr. Harding Cox seems to have the best of it. As long as shows continue, and rough-coated breeds require some attention to make them look their best, trimming will prevail. It is permissible to pull out, or groom away, dead hair, and who is going to distinguish between dead hair and live after a dog has been prepared? And so and if live hair can be removed with finger and thumb why not cut it? Men would not relish the finger and thumb process at the hands of a barber, and if dogs could speak they also would prefer razor and scissors to the annoyance to which they are at present subjected. In the ring the result would be the same, to the dog it would make all the difference in the world.

Temptations for Anglers.

Never in the history of angling on the Pacific Coast did the angling fraternity have opportunity to inspect as complete and varied a stock of tackle and anglers' sundries as may at present be seen in the sporting goods emporium of Messrs. Clabrough, Golcher & Co., No. 538 Market street, San Francisco.

A full description of the many recent devices and improvements in rods, reels, etc., etc., would be much too lengthy for ordinary space.

A new idea in Leonard fly rods is a beautiful split bamboo creation, $4\frac{1}{2}$ ounces in weight, perfect in action, finished in dull dark olive lacquer, ferrules and reel seat oxidized, snake guides, aluminum rod case, in fact a dream of perfection in fly rods. Another style of rod that will be a favorite is the "Duplex," a light rod, that can be made a two joint rod if desired by substituting a specially made ferrule. A rod with a sliding grip, for use either as a bait or fly casting rod should be seen to be appreciated.

A collection of Alcock's, imported Scotch. John Benn's, and other celebrated makes of flies has never been excelled by a sporting goods house on the coast; fly-books, reels and these latter are in tempting variety, style and price, and invite the inspection of every devotee of the gentle art.

One of the Best.

Did it ever occur to you when out in wet weather that a good way to avoid an exasperating balk—when the triggers are wet and your finger slips, was to use a single trigger gun.

At the initial shoot of the California Wing Club this season there were five Hunter Arms Co. single trigger guns in use—twenty-five guns were entered in the club race. These guns are fast becoming favorites—they do not balk nor double. By the way, do you ever wrap your trigger guard or the front trigger so that the recoil of your gun will not lacerate or jam your finger? The "Hunter One-Trigger" renders those recoil sorenesses impossible.

The one-trigger attachment can be put on any grade of L. C. Smith guns, either new or old. Send to The Hunter Arms Co., Fulton, New York, for a catalogue. Besides a full description of the one-trigger mechanism, there is also contained in the beau-

tifully illustrated book information of value to every devotee of the shotgun.

Good Tidings From an Old Firm.

One of the neatest looking and most serviceable casting reels ever offered to trout fishermen is the \$3.50 reel recently introduced by Shreve, Barber & Co., 739 Market street and 521 Kearny street, San Francisco. This reel is also a first-class bait fishing reel. A new pattern of salmon reel now in stock is already a great favorite with a number of anglers. Another reel that is in demand is one that can be easily taken apart; it is simple in construction and perfect in action. A Montague City made combination rod is a new idea that appeals to discerning anglers. Rods wrapped in steel tinsel—or rather steel ribbons, is a new idea for a combination of strength and lightness. "Duplex" and other makes of rods for all kinds of fishing are on hand.

Fly books in many styles and a complete line of imported and American made flies, John Benn's flies, silk and linen lines, and all of the thousand and one things needed by the angler are on hand in a variety that can not help but be satisfactory to the most exacting fisherman.

Elk Outing Goods Company.

The attention of sportsmen is called to the recent venture of four well known local sportsmen who have opened at No. 20 Geary street, this city, a complete and up to date sporting and outing goods store.

The new firm is composed of Mr. J. Harry Scott, a popular ex-official of this city and a well known business man. Mr. E. J. Kaplan, formerly with Will & Fink, the Skinner Arms Company, and manager of the Olympic Arms Company—a gentleman identified with the sporting goods business in this city for the past fifteen years; Julius Bruns, formerly with the E. T. Allen Company, the Skinner Arms Company and the Olympic Arms Company—a popular sportsman and prominent trap shot for twenty years past—and Mr. F. L. Bonn, recently with the Skinner Arms Company and Olympic Arms Company.

The experience and trade acquaintance of the members of the new firm is a guarantee that the wants of sportsmen will be looked after and catered to in a manner mutually satisfactory.

The location of the store is a central and convenient one. The new quarters will be thoroughly fitted up and in running order early during the coming week. A large stock of guns, pistols, rifles, ammunition, fishing tackle of every description, a complete line of outing goods—in fact everything for sportsmen and sportswomen will be kept in stock or made to order.

One of the specialties of the Elk Outing Goods Co. will be "ladies' outing goods of every description."

Further and special announcements will appear in the Breeder and Sportsman later on.

He Wanted Something Good.

A telephone message was received by Baker & Hamilton, this city, on last Wednesday, from Los Angeles.

"Billy" Clayton of Kansas City ordered 250 Selby factory loaded shells—loaded with Ballistite powder. He used the shells yesterday in a live bird match.

Sim Glover broke 96 straight and 188 out of 195 at New Bedford, Mass., February 8th. At Boston, February 10th, he broke 63 straight and 145 out of 150—with Ballistite. "Good shots shoot good powder."

A Grand Winchester Showing for 1906.

The shooting recently done with the Winchester "Leader" shells is in a way quite remarkable, both on account of the very high scores made and also because perfect scores have been duplicated in different places, which is rather unusual. For instance, at the Kansas City tournament the high professional average was won by Chas. G. Spencer, shooting a Winchester "pump" gun and Winchester "Leader" shells, the combination Mr. Spencer always uses. At this tournament Mr. Spencer wound up his great work by scoring his last 100 straight. The first and second high amateur averages at this shoot were also won with Winchester "Leader" shells, the scores being very high. An interesting feature of this tournament was the brilliant shooting done by Mrs. Adolph Topperwein, the wife of Ad. Topperwein, the world's champion rifle shot. Mrs. Topperwein scored 99 out of the 100 she shot at, which is probably the highest score ever made by a lady at a regular shooting tournament. Both Mr. and Mrs. Topperwein always use Winchester guns and Winchester ammunition.

At the Florist Gun Club tournament, held at Philadelphia, C. E. Mink, shooting a Winchester "pump" gun and the "Leader" shell, made the only perfect score of 100 straight, winning first high amateur average for this shoot. The second and third averages were also won by shooters that used the Winchester products.

At the Detroit, Michigan, Gun Club tournament, John R. Taylor won the high professional average, C. V. Phellis being second. Alex. Toisma captured the high amateur average at this shoot. In addition to winning the high average in the professional class, Mr. Taylor also won the Gillman & Barnes trophy, which is emblematic of the International Championship at live birds. All the above shooters used the reliable, time-tried "Leader" shells, and in addition Mr. Taylor used a Winchester "pump" gun. With the winning of the Gillman & Barnes live bird trophy, every live bird and inanimate target trophy, all the championships, and all the world's records are now held by shooters that used either Winchester "pump" guns or Winchester "Leader" or "Repeater" shells when they captured the same. This is a record that no other arms or ammunition manufacturer can boast of, or has ever been able to.

American Trotting Register PUBLICATIONS.

NOW READY THE YEAR BOOK For 1905 - Vol. 21

BROOD MARES TO LEASE.

On account of leaving the county, I will lease
two of the best producing brood mares in the
State:

HABE, dam of Just It 2:19 1/4, winner of Occi-
dent-Stanford pace of 1905; trial 2:13. Habe is by
Danton Moultrie 17064, he by Guy Wilkes, dam
Carrie Malone, full sister to Chas. Derby and
Klatawah 2:05 1/4 (3-year old champion). Her dam
was by Soudan 5103, half brother to Stamboul
2:07 1/4, champion trotting stallion in his day; sec-
ond dam by Nutwood 604, half brother to Maud S.
2:08 1/4, queen of the turf in her day; third dam by
Owen Dale, the handsome son of Belmont, the
foundation of the California trotter; fourth dam
by Old Gray Eagle, four-mile runner.

FANNY MALONE, dam by Anteeo, second
dam the dam of California Nutwood by Geo. M.
Patchen Jr.; third dam, the Chicago Mare.

Both of the above mares will foal by March 10th
to J. R. C. In answering please state what horse
you intend to breed to. For particulars address,
THOS. P. KELL,
No. 95 So Market St., San Jose, Cal.

Just Enough

and just as they want it. The right way to

"SAVE-THE-HORSE" SPAVIN CURE

Registered Trade Mark

KNIGHT & HOGGERTY,
LAW OFFICES
230 MONTGOMERY ST. SAN FRANCISCO
TELEPHONE 444-18

Dec. 19-

D. E. Newell Esq.
519 Mission St
San Francisco

Dear Sir

I have a standard bred
"Cupid" Mare raised by
Adolph Speckles the well
known Californian and
horse breeder and after
driving her a few months

a bad spavin showed
itself - It was fixed and
blistered by a Veterinary and
the animal turned out for
three months - The spavin
was obstinate and the
Mare continued lame -
I used two bottles of Save
the Horse and a Complete
Cure was the result.

Yours
Geo. A. Knight

Cal. Service fee \$40.

PURE BRED SHEEP.

The use of pure bred sheep is one of the first principles of success in any line of the sheep industry. Therefore, those who should become breeders should first select those which have descended through successive generations without admixture of impure blood or blood of different breeds, from a breed having a fixed type and desirable characteristics which are transmitted with reasonable certainty to their offspring. They may be divided into two classes, one as recorded, and the other as unrecorded.

The recorded ones are those having their names or numbers, and their pedigrees recorded in a record book kept by an association of breeders. The rules of the several record associations require that no animal shall be admitted to record unless satisfactory evidence can be furnished that it has been purely and honestly bred. The recorded side is therefore to be depended upon for his purity of blood, and if due judgment is exercised in his selection the best results should be gained from his use in breeding up the common stock.

The unrecorded sheep may be pure bred animals or they may not. The pure bred are those which have been carefully bred, and a private record kept of their breeding, but have not been presented for entry in the record book of the association. Others may be pure bred, but as there has been no record kept of their breeding, we can only depend on the statement of the breeder as evidence that they are so.

No matter how long a pedigree a ram may have, or how many of his ancestors may have been recorded, he may be practically worthless on account of lack of individual characteristics.

There is just one way to wash tinware used in the dairy. First, rinse with cold water. Then use scalding water. Then rinse again with cold water and set out in the sunshine and open air to dry. That will settle with bacteria and keep your milk perfectly sweet and pure.

To make a success of dairying you can't know too much about your cows. No two cows are just alike.

Warranted to Give Satisfaction.

Gombault's
Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. New England Trotting Horse Breeders Association
Boston, Mass.READVILLE
GRAND CIRCUIT MEETING
Entries Close Tuesday, April 10, 1906

ALL CLASSES WILL BE EVENTS OF THREE RACES OF ONE MILE.

EARLY CLOSING PURSES.

No. 1—The Blue Hill, 2:30 Class Trotting.....\$4500

Divided: \$1050 to first, \$300 to second, \$150 to third—each race.

No. 2—The Massachusetts, 2:14 Class Trotting.....\$9000

Divided: \$2100 to first, \$600 to second, \$300 to third—each race.

No. 3—The Ponkapoag, 2:10 Class Trotting.....\$4500

Divided: \$1050 to first, \$300 to second, \$150 to third—each race.

No. 4—The Readville, 2:08 Class Trotting.....\$3000

Divided: \$700 to first, \$200 to second, \$100 to third—each race.

No. 5—The Norfolk, 2:08 Class Pacing.....\$3000

Divided: \$700 to first, \$200 to second, \$100 to third—each race.

No. 6—The Neponset, 2:06 Class Pacing.....\$3000

Divided: \$700 to first, \$200 to second, \$100 to third—each race.

In all classes horses must be named at the time of the closing of entries.
The Entrance Fee will be Five Per Cent of the Purse with Nothing Deducted from the Winners of Any Part of the Purse.

More than one horse, if trained in the same stable, may be entered in a class, and one per cent of purse additional will be charged for each horse so named; but only one horse in the same ownership will be allowed to start. Any horses of a plural entry which may be separated from the stable from which they were named will be eligible to start by paying a sum, in addition to that already paid on the horse, which will equal the full five per cent entrance fee.

Conditions. The rules of the National Trotting Association (of which this Association is a member) will govern, except that horses not finishing within one hundred yards of the winner in any race will be ruled out of further competition in the event. Racing will begin at 2:30 p. m.

The positions of contending horses will be drawn for the first race of every event, but in the second they will start as they finished in the first, and in the third as they finished in the second.

Forfeits will be due in amounts and on dates as follows:

	APRIL 10.	MAY 10.	JUNE 9.	JULY 10.	AUGUST 7
Classes No. 1 and 3.....	\$20	\$30	\$45	\$60	\$70
Each additional horse.....	9	9	9	9	9
Class No. 2.....	50	70	90	110	130
Each additional horse.....	18	18	18	18	18
Classes Nos. 4, 5 and 6.....	10	20	30	40	50
Each additional horse.....	6	6	6	6	6

Nominators will not be held liable for forfeits falling due after they have declared out in writing. The American Horse Breeder Futurities—\$7000 for Three-year-old Trotters, \$1000 for Three-year-old Pacers, and \$3000 for Two-year-old Trotters—will be held at this meeting.

All entries, requests for information, etc., to be made to the Secretary.

JOHN M. JOHNSON, President. C. M. JEWETT, Secretary, READVILLE, MASS.

Stakes for Two-Year-Olds

Offered by the California State Agricultural Society to be given at the

CALIFORNIA STATE FAIR, 1906

ENTRIES CLOSE MAY 1, 1906

The A. B. SPRECKELS STAKE for Two-Year-Old Trotters.....\$1000

The BEN RUSH STAKE for Two-Year-Old Pacers.....1000

ENTRANCE PAYABLE AS FOLLOWS: \$20 on May 1, 1906; \$20 additional if not declared out on or before June 1, 1906, and \$10 additional if not declared out on or before July 1, 1906. Declarations (to declare out) must be mailed to the Secretary and will not be accepted unless accompanied by the amount due at time declaration is made.

CONDITIONS.

Distance to be one hundred yards. Right reserved to reject any or all entries. Five per cent of the amount of the Stake will be deducted from each money won.

The Board of Directors reserve the right to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided 66 2/3 per cent to the first and 33 1/3 per cent to the second. A horse distancing the field shall only be entitled to first and fourth moneys, but in no other case will a horse be entitled to more than one money.

The Board of Directors reserve the right to start any heat after the fourth score, regardless of the position of the horses.

When there is more than one entry to any Stake by any one person or in one interest, the horse to be started must be named by 5 o'clock p. m. on the day preceding the race.

Otherwise than as herein specified in these conditions, Rules of the National Trotting Association (of which this Association is a member) to govern.

For Entry Blanks and further information address the Secretary.

BEN F. RUSH, President.

ALBERT LINDLEY, Sec'y State Ag'l Society,
SACRAMENTO, CAL.

THE STANDARD-BRED TROTTER STALLION

RED MCKINNEY

By MCKINNEY 2:11 1/4. First dam, BONNIE RED by Red Wilkes; second dam, BONNIE BELL by Belmont 33; third dam, ALICE DRAKE by Alexander's Norman; fourth dam, VILY by Pilot Jr. 12.

RED MCKINNEY is four years old, a rich mahogany bay, stands 15 3/4 hands, weighs 1100, and is a show horse. Has shown great speed with very little work. His breeding shows him to be one of the best bred sons of the great McKinney.

Will make the Season of 1906 at the

CITY STABLES, TULARE, CAL.

FEE \$30, with return privileges.

W. R. MURPHY, Owner.

YOUNG HAL Race Record 2:10 1-4
Reg. No. 0410.....

By the great pacer, HAL DILLARD 2:04 1/4 (sire of Fanny Dillard 2:03 1/4, Hal B. 2:04 1/4, Hal Clipper 2:07 1/4, Cambria Maid 2:08 1/4, Young Hal 2:10 1/4, Hal C. 2:10, and 5 more in 2:15 list). Dam, OZORA (dam of Young Hal 2:10 1/4, Strathdale 2:30, and dams of Citation 2:06, Strathline 2:07 1/4, Baraja 2:14 1/4, Reality 2:17 1/4, and Blackline 2:22) by Smuggler 2:15 1/4; second dam, Odd Stocking (dam of Springlock 2:19 1/4, Happy Russell 2:21 1/4, sire of 32 in 2:30, etc.) by Happy Medium 4:00; next dam, County House (dam of Nettie 2:18) by American Star 14, etc.

Will make the Season of 1906 at

Agricultural Park, Los Angeles.

Terms, \$25 for the Season, with usual return privileges.

YOUNG HAL 2:10 1/4 is a very handsome mahogany bay horse, stands 15 hands 3 inches and weighs 1100 pounds. Goes without straps, is a game race horse, and one of the best of the great Hal family. This is his first season in the stud and he should prove a great sire of extreme pacing speed. Good pasturage and excellent care taken of mares, but no responsibility assumed for accidents or escapes. For further particulars address

I. C. MOSHER, 686 West 36th St., Los Angeles, Cal.

LYNWOOD W. 32853

RECORD AS A 2-YEAR-OLD 2:20 1-2

Sired by GUY WILKES; dam, the great brood mare LINDALE by Sultan Jr. 18771.

LYNWOOD W. was a sensational colt trotter and is fast proving himself to be a great sire, although he never covered but eight standard bred mares prior to 1905. Still he has to his credit Dumont S. 2:30, Clipper W. 2:24 1/4, Sonoma Queen 2:25, Sonoma May 2:29 1/4, all trotters with records made in 1905. The following are the only colts that ever had any training. They have worked as follows: R. W. P. 2:12 1/4, Charles Beiden 2:13 1/4, Sonoma Girl 2:15, Sly B. (3) 2:16 1/4, Dumont S. 2:17, Ayeress 2:18, Sonoma May 2:19 1/4, Jim V. 2:25, Ella V. (3) 2:21, Clipper W. 2:22, Sonoma Queen (3) 2:22, Sonoma Star (3) 2:27 1/4, Dennis 2:30, Frank G. (2) 2:30.

Will make the Season of 1906 at Santa Rosa.

SERVICE FEE \$25.

GENERAL CONDITIONS for Butte, Bozeman, Livingston, Billings, Big Timber, Great Falls and Missoula.

All harness races shall be on the Three Heat plan. Money divided at the end of each heat unless otherwise specified on programs. Money divided 50, 25, 15, 10. Entrance 5%, payable as follows: 1% April 10, when entries close; 1% May 1; 1% June 1; 1% July 1, and last payment August 1, when horse must be named, and unless otherwise specified 5% additional will be deducted from the first and second money winners only in each heat. Horse distancing the field entitled to first and fourth money. Horses not finishing within 100 yards of the winner in any heat will be barred from further competition in the event. American Trotting Association Rules to govern, except hoppers not barred on horses over three years old.

NOTICE—Each member of the Circuit has good track, plenty of stable accommodations and good hotels, and every assistance will be given horsemen to get the best of shipping accommodations. The Circuit is arranged with no dates conflicting, and no long jumps or doubling over road. Each member reserves the right to declare off or reopen as a purse any stake not filling satisfactorily by refunding entrance money, and to postpone or call off races in case of bad weather. Books, auctions and mutuels will be used. For further particulars and Entry Blanks address the local Secretaries or the Circuit Secretary.

TWO HARNESS AND THREE RUNNING RACES DAILY.

Pres., R. D. STEELE, Bozeman.

Circuit Sec., A. D. GALBRAITH, Butte.

DO YOU WANT TO RENT A STALL
—OR—
A WHOLE RACE TRACK?

The owners of the MOUNT DIABLO RACE TRACK, located near Concord, Cal., are constructing 50 new and up-to-date stalls. After April 1st they will be prepared to rent stalls to trainers and others as may be required. Also they will entertain propositions for the lease of the track and grounds as a whole for a term of one or more years.

Improvements now in course of construction, to cost about \$4000, will result in making this track one of the very best all-the-year-round tracks on the Coast.

For particulars address
IRA B. KILGORE,
Concord, Cal.

Washington McKinney 35751
By McKinney 2:11½; dam, Lady Washington. In every point he shows his breeding; has good style and action. Stands 16 hands, weight 1200 pounds. His get bring big prices.

Will make the Season at Rose Dale Stock Farm Fee, \$30 for season. For further particulars address ROSE DALE STOCK FARM Santa Rosa, Cal.

PRIVATE SALE.

MENDOCINO 22607

RECORD (THREE-YEAR-OLD) 2:19¹/₄

Sire of Monte Carlo 2:07¹/₄ (to wagon 2:08¹/₄); Idolita (2 y. o.) 2:21¹/₄; (3 y. o.) 2:12; (a) 2:09¹/₄; Leonora 2:12¹/₄; Polka Dot 2:14¹/₄; etc. Bay Stallion, 15.3¹/₄ hands; weight 1190 pounds; hind feet and ankles white; foaled April 24, 1899. Bred at Palo Alto Stock Farm.

Sire, **ELECTIONEER** 125, son of Hambletonian 10. First dam, **MANO** (dam of MENDOCINO) (3) 2:19¹/₄; Electant 2:19¹/₄; Morocco (3 y. o. trial 2:22) by Piedmont 904, 2:17¹/₄; second dam, Mamie (dam of Mamie W (3) 2:17¹/₄; Hyperion 2:21¹/₄; Memento 2:25¹/₄; Mithra (p) 2:14¹/₄) by Hambletonian Jr 1882; third dam, Gilda (thoroughbred) by Imp. Mango.

MENDOCINO is one of Electioneer's youngest and best sons. With very limited opportunities in the stud he has proven his worth by producing such racehorses as Monte Carlo and Idolita. Three new additions to his 2:30 list were made last season, and he now has ten standard performers. His foals are good size, fine lookers, bold and pure gaited and easily developed.

SERVICE FEE for Season of 1906, \$75; usual return privilege.

MCKENA 39460

Brown Stallion; 16.2 hands; weight 1350 pounds; foaled April 11, 1900. Bred at Palo Alto Stock Farm.

Sire, **McKINNEY** 8818 (record 2:11¹/₄). First dam, **HELENA** 2:11¹/₄ (dam of Wildnuttling 2:11¹/₄; Doppel 2:22; Hytia (trial 2:12) by Electioneer 125; second dam, Lady Ellen 2:29¹/₄ (dam of six in list, including Helena 2:11¹/₄; Ellen Wood 2:14¹/₄) by Mambrino 1789; third dam, Ida May Jr. by Owen Date; fourth dam, Ida May by Belmont (Williamson's).

MCKENA has proven a remarkably sure foal getter. He should make a great sire as he is a fine individual and bred right. His sire, McKinney, a game and fast racehorse and sire of game and fast racehorses. His dam, Helena, one of the fastest and gamest daughters of Electioneer, the greatest sire of trotters the world has yet known. His second dam, Lady Ellen, was one of the best of her day, and as well as her daughter Helena is a great broodmare.

SERVICE FEE for Season of 1906, \$40; usual return privilege.

MENDOCINO and MCKENA will make the season at **PALO ALTO STOCK FARM**. Mares may run on pasture at \$5 per month. No responsibility assumed by the Palo Alto Stock Farm for injury or escapes. Address all communications to

PALO ALTO STOCK FARM,
Stanford University, Santa Clara Co., Cal.

WAYLAND W. 22516. Record 2:12¹/₂.

ONE OF THE LEADING SIRE OF 2:10 PERFORMERS OF 1905.

Sire of Bolivar 2:06¹/₄, leading money earning pacer of season 1905. Sire of Morosco 2:12, highest class trotter on California circuit in 1904. Wayland W. is by Arthur Wilkes 2:28, dam Lottie (dam of Wayland W. 2:12¹/₂; Welcome 2:10¹/₂; Maud Singleton 2:28) by Wayland Forest. Although Wayland W. has never been mated with mares by Electioneer, Director, Nutwood, Sultan, Stamboul, Antee or any of our great sires, he is the sire of Bolivar 2:06¹/₄; Nellie R. 2:10; Arthur W. 2:11¹/₂; Morosco 2:12; John A. 2:12¹/₂; Forrest W. 2:14¹/₂; Leland W. 2:16; Al Sandy 2:19¹/₂; Maud Sears 2:21; Bonita Wilkes 2:26¹/₂. Wayland W. will make the Season of 1906 at SANTA ROSA, at McGregor & Hockins' Stables.

Terms \$40 for the Season. Pasture \$3.00 per month.

W. C. HELMAN, Owner.

MONTEREY 2:09 1-4 Reg. No. 31706

(Sire of IRISH 2:08¹/₄, Fastest Four-Year-Old Pacer of 1904).

By **SIDNEY** (grand sire of Lou Dillon 1:58¹/₄); dam, **HATTIE** (also dam of Montana 2:16) by Commodore Belmont 440. MONTEREY 2:09¹/₄ stands 15 3 hands, weighs 1200 lbs. and is one of the finest individuals on this Coast. FEE, \$50 for the Season.

YOSEMITE By MONTEREY 2:09¹/₄.
Dam, **LEAP YEAR** 2:26 (full sister to Iago 2:11) by Tempest 1881 son of Almont 35.

YOSEMITE is a very high-class young trotter, and as he will be trained this year he will be allowed to serve only six choice bred mares. FEE, \$35 for the Season.

Will make the Season at SAN LORENZO and ALAMEDA.

I have leased a fine, roomy barn with 14 large box stalls on Sherman street, four blocks from the race track, Alameda, and am prepared to do public training. Would like to get two good trotters and a promising three-year-old to prepare for the races this season.

For particulars call or address

The following Stallions, owned by W. A. Clark Jr., will make a public season:

Bon Voyage

Champion 2 y.o. Stallion of 1904
Champion 3 y.o. Stallion of 1905

Two-year-old Record.....2:15
Three-year-old Record.....2:12½
Timed in a Race.....2:10½

WINNER OF HARTFORD FUTURITY (\$8500) FOR 1905.

BON VOYAGE (3) 2:12½ is by Expedition 2:15½ by Electioneer 125; dam Bon Mot by Erin 2:24½; second dam Farce 2:29½ by Princeps 538; third dam Roma by Goldust 150. For breeding, individuality and racing qualities he is unsurpassed. He is a rich bay in color with black points, stands 15.3 hands and when matured will weigh 1300 pounds.

Season of 1906 at PLEASANTON RACE TRACK, where he will be limited to twenty outside mares.

\$50 for the Season. USUAL RETURN PRIVILEGES, or money refunded should mare not prove in foal. A rare chance to breed good mares to an exceptionally high-class and highly bred young stallion.

Highland

TRIAL 2:12

(at Four Years Old)

Bred at Highland Stock Farm, Dubuque, Iowa

By EXPRESSO 29199 (half brother to Expressive (3) 2:12½) by Advertiser 2:15½, son of Electioneer 125; dam AL-HA 2:23½ (dam of Aegon 2:18½, sire of Aegon Star 2:11½, etc.) by Alcantara by George Wilkes 2:22; second dam Jessie Pepper (dam of 2 in list and 3 producing sons and 7 producing daughters) by Mambrino Chief 11, etc.

Terms for the Season.....\$25

HIGHLAND is a grand looking young stallion, seven years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed, and has trotted a quarter in 81 seconds over the Pleasanton race track.

HIGHLAND is a coal black horse with one white hind ankle, stands 16.1 hands high and weighs close to 1200 pounds.

Address all communications to

TED HAYES, Manager, Pleasanton, Cal.

ZOMBRO 2:11 GREATEST SON OF McKINNEY 2:11½

Will make the Season of 1906

At LOS ANGELES, CAL.

Fee, \$50 for the Season.

With usual return privilege provided I still own the horse and mare does not change ownership. Money due at time of service, or all bills paid before mare is taken away.

ZOMBRO is the sire of eleven standard performers as follows: Zephyr 2:07½, timed separately in a race in 2:08½; Charley T. 2:13½, trial 2:10½; Italia 2:14½, over half-mile track, trial 2:08½; Belmont, three years old, record 2:15½, trial 2:13½; Zombowette 2:16½, trial 2:14½; Zenobia 2:19, trial half in 1:05½; Tee Dee Coe 2:19½, trial 2:13½; Lady Zombro 2:24, trial 2:10; Lord Kitchener 2:24½, trial 2:19½; Zealous 2:26½, trial 2:20; Nina Bonita 2:27.

ZOMBRO has won more first prizes in the show ring than any California stallion, and his get have sold for more money during the past three years. He is the only horse living or dead that ever won forty heats in standard time as a three-year-old. His get are all large, beautifully formed and endowed with great natural speed. The choicest pasture for mares. Address

GEO. T. BECKERS, 3949 Figueroa St., Los Angeles, Cal.

NEAREST 35562

(RECORD 2:22½)—Sire of Alone (4) 2:09½ (trial 2:06½), Just It (3) 2:19½ (trial 2:12½), High Fly (2) 2:24½ (trial 2:12½ last half in 1:00½) and full brother to the great John A. McKerron 2:04½, the second fastest stallion in the world.

By NUTWOOD WILKES 2:16½, sire of John A. McKerron 2:04½ (second fastest stallion in the world), Tidal Wave 2:09, Miss Idaho 2:09½, Who Is It 2:10½, Stanton Wilkes 2:10½, Cresco Wilkes (4) 2:10½, George B. 2:12½, North Star (3) 2:13½, winner Pacific Breeders Futurity Stakes \$6000 Guaranteed of 1905 and 32 in 2:30 list; dam INGAR, the greatest producing daughter of Director; second dam Annie Titus by Echo 462; third dam Tiffany mare (dam of Gibraltar 2:23½) by Owen Dale, son of Williamson's Belmont. NEAREST is a dark bay, 15.3 hands and weighs 1200 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Will make the Season of 1906 at San Jose, with return privilege in case horse remains in California. For terms and extended pedigree address

Phone: Red 1431.

THE STANDARD TROTTER MURRAY M. 2:14

(WINNER OF THE BREEDERS FUTURITY, \$6000, IN 1904)

Will make the Season of 1906 at the

Race Track, University Station, LOS ANGELES, CAL.

Terms, \$40 for the Season, with usual return privileges.

MURRAY M. 2:14 is by Hambletonian Wilkes 1679 (sire of Phoebe Wilkes 2:08½, Phoebe W. 2:08½, Robert I. 2:08½ and RAY M. 2:14 and La Belle (2) 2:16) by Dawn, sire of 5 in 2:30 list and dams of 8

MURRAY M. 2:14 is a handsome five-year-old bay stallion with small star and black points. In his three-year-old form he stood 16 hands and weighed 1125 lbs., and is a natural, square-gaited trotter. He is a horse of grand flesh, plenty of substance, excellent disposition. He has a stout back, strong loins and stifles, good feet and legs. His breeding is excellent, and with his individuality he presents a popular and speed-producing combination of the kind that gets money on the race course and prizes in the show ring.

Excellent pasturage at reasonable rates. For further particulars address

PROF. H. B. FREEMAN, University Station, Los Angeles, Cal.

KINNEY WILKES

Sired by McKINNEY 2:11½, sire of Sweet Marie 2:04½, Kinney Lou 2:07½, Charley Mac 2:07½, Hazel Kinney 2:09½, The Roman 2:09½, Dr. Book 2:10, Coney 2:02, China Maid 2:05½, Zolook 2:05½, You Bet 2:07, Jennie Mac 2:09 etc.

First Dam, HAZEL WILKES 2:11½, a great race mare by Guy Wilkes 2:15½, sire of Fred Kohl 2:07½, Hulda 2:08½, Lessa Wilkes 2:09, Seymour Wilkes 2:08½, etc., and dams of Antezella 2:10½, Katherine A. 2:11½, etc., etc., and grand-dam of John A. McKerron 2:04½; second dam, Blanche (dam of Hazel Wilkes 2:11½, Una Wilkes 2:15, Guyson 2:24, Native Son 2:28½ and Silver Spray 2:28) by Arthurton 365; third dam, Nancy by Gen. Taylor, champion 30-mile trotter of the world.

KINNEY WILKES is a very handsome, well made bay stallion, standing 15.3 and weighing 1100 pounds. He is one of the best bred of the McKinneys.

Will make the Season at

LEONARD STATION, Santa Cruz County.

Fee \$25.

For cards containing tabulated pedigree, etc., address

JAMES T. LEONARD,

Rural Delivery No. 3, Watsonville, Cal.

I DIRECT 2:12 1-2

(Officially Timed in 2:08½ in a Race)

Will make the Season of 1906 at

THE ZIBBELL STABLE

672 Eleventh Avenue, San Francisco.

I DIRECT is one of the best bred of all the sons of the great Direct 2:06½. His dam is Francesca by Almont (dam of Sable Frances 2:15½, Guyson 2:28 and the sire Earl Medium, sire of 6 standard performers); next dam Frances Breckenridge by Sentinel 260, full brother to Volunteer. As an individual I DIRECT is perfect, and with his breeding he cannot help transmitting speed.

Terms \$50 FOR THE SEASON, LIMITED TO A FEW APPROVED MARES. For particulars address

MABRY McMAHAN, Owner, 207 Sansome St., San Francisco.

Pedigrees Tabulated

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED

NUTWOOD WILKES 2:16¹/₂

NUTWOOD WILKES 22116 is the only stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12¹/₂ respectively. Who is it? 2:12, ex-champion three-year-old gelding of the world, reduced his record to 2:10¹/₂. John A. McKerron 2:04¹/₂ (2:12¹/₂ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES is the sire of John A. McKerron 2:04¹/₂ (sire 3 two-year-olds in 2:30 list), Tidal Wave 2:09, Miss Idaho 2:09¹/₂. Who is it? 2:10¹/₂, Stanton Wilkes 2:10¹/₂, Cresco Wilkes (4) 2:10¹/₂, George B. 2:12¹/₂, Claudius (4) 2:13¹/₂, North Star (3) 2:13¹/₂, Bob Ingersoll (4) 2:14¹/₂, and 32 in 2:30 list.

His sons Nearest and Stanton Wilkes have sired Alone (4) 2:09¹/₂ and Cavaliero 2:09¹/₂.

His daughters produced Miss Georgie 2:10¹/₂, Mona Wilkes (3) 2:11¹/₂, Lady Mowry (4) 2:12¹/₂, Caroline L. 2:14¹/₂, Lollo 2:15, and Miss Winn 2:15¹/₂.

NUTWOOD WILKES will make the Season of 1906 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee \$50 FOR THE SEASON, with the usual return privileges if horse remains my property. Good pasturage at \$3 per month. Bills payable before removal of mare. Stock well cared for, but no responsibility assumed for accidents or escapes.

Young Stock by NUTWOOD WILKES for sale.

Send for Tabulated Pedigree. For further particulars apply or address

MARTIN CARTER, Nutwood Stock Farm, Irvington, Alameda Co., Cal.

NUSHAGAK 25939

Sire of ARISTO 2:08¹/₂, winner of Occident and Stanford Stakes of 1902.

Get the Blood that Produced the Champions, SWEET MARIE and LOU DILLON, by Breeding to

GRECO

BLACK COLT, FOALÉD 1900. Sire, McKINNEY 2:11¹/₂, sire of SWEET MARIE 2:04¹/₄, Kinney Lou 2:07¹/₄, Charley Mac

2:07¹/₄, Hazel Kinney 2:09¹/₄, The Roman 2:09¹/₄, Dr. Book 2:10, Coney 2:02, China Maid 2:06¹/₄, You Bet 2:07, Jennie Mac 2:09, Zolock 2:05¹/₄, Dam, AILEEN 2:26¹/₄ (dam of Mowitza 2:20¹/₄, Sister 2:20 and GRECO 2:24, trial 2:20) by Antee 2:16¹/₄, sire of dams of Directum Keny 2:08¹/₄, Grey Gem 2:09¹/₄, W. Wood 2:07, etc.
Grandam, LOU MILTON (dam of LOU DILLON 1:58¹/₄, Redwood 2:21¹/₂, Ethel Mack 2:25 and Aileen 2:28¹/₄) by Milton Medium 2:25¹/₄ (sire of 2 and dams of 5) by Happy Medium 2:32¹/₂, sire of Nancy Hanks 2:04, etc.

GRECO is a handsome black stallion and a natural and fast trotter. He won his only race as a colt, and has shown miles in 2:30 since in his work, and is a sure 2:10 trotter. He will be permitted to serve a limited number of mares at \$100 THIS SEASON. Correspondence solicited. Address,

CHAS. De RYDER, Manager, Pleasanton, Cal.

IRAN ALTO 24586 Sire, PALO ALTO 2:08 3-4

Rec. 2:12¹/₄ Dam, ELAINE (4) 2:20

IRAN ALTO'S sire and dam have both held champion trotting records and his dam and granddam both produced a colt that was a world's record breaker, and his grandsire has sired several trotters that broke world's records. No other horse with a record as fast as IRAN ALTO'S can claim this. At nine years he had sired ten colts, four of them with records as follows: Dr. Frasse 2:12¹/₄, Thomas R. 2:15, Vendome 2:17, Dr. Frasse's Sister 2:25—all at four years old. Who can name a horse whose first ten colts can beat that?

Will Make the Season of 1906 at WOODLAND, CAL.

FEE \$40
\$20 due when mare is bred and
\$20 payable when mare is known to be in foal.

For further particulars address

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR, the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Sprains, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Lickens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, sprains, windpuffs and all bunches it has no equal." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

California State Payments Due in 1906.

Pacific Breeders' Futurity Stakes.

(Payments should be made to F. W. Kelley, secretary, 36 Geary street, San Francisco.)

Stake No. 3, \$6000, foals of 1903—\$10 due April 1, 1906, and starting payment of \$50 on three-year-old trotters and \$35 on three-year-old pacers ten days before the meeting.

Stake No. 4, \$6000, foals of 1904—Starting payment of \$35 on two-year-old trotters and \$25 on two-year-old pacers ten days before the meeting.

Stake No. 6, \$7000, foals of 1906—\$5 due May 1, 1906, and \$5 due October 1, 1906.

Stanford Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Stanford Stake of 1906, foals of 1903—\$10 due June 1, 1906, and starting payment of \$20 ten days before State Fair opens.

Stanford Stake of 1907, foals of 1904—\$10 due June 1, 1906.

Occident Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Occident Stake of 1906, foals of 1903—Starting payment of \$50 due 30 days before the race.

THE GRAND CIRCUIT FOR 1906.

Detroit, Mich., July 23-Aug. 4.
Buffalo, N. Y., Aug. 6-11.
Poughkeepsie, N. Y., Aug. 13-18.
Readville, Mass., Aug. 20-25.
Providence, R. I., Aug. 27-Sept. 1.
Syracuse, N. Y., Sept. 10-15.
Columbus, O., Sept. 17-22.
Cincinnati, O., Sept. 24-29.

THE STATE BOARD OF AGRICULTURE, at its meeting last week deposed Secretary Albert Lindley and elected in his place Mr. J. A. Filcher. During the year that Mr. Lindley held the position he has made a good official and aimed to raise the tone of the State Fair to a higher plane than that on which it had been conducted for some time previous. What objections the directors, or those who voted to oust him, had, was not stated by them, but doubtless politics of some sort had much to do with it. The new secretary is a gentleman of ability and excellent reputation. He had charge of the California exhibits at the St. Louis and Portland expositions, and is an expert at the gathering and placing of exhibits, as well as managing fairs. That he will make a good secretary is certain if he is allowed to manage the office of secretary, as he should be. The State Board of Agriculture has the opportunity to make the fair of 1906 one worth attending. One bad step it has taken is in fixing the day of opening on Saturday instead of Monday. This is in the interests of Sacramento alone, and compels the Woodland people to move their date back a week, much to their disadvantage. Director F. H. Burke of this city, who was unable to be present at the meeting, sent in several suggestions that the board should have adopted, but they were turned down. Governor Pardee is the one who will be held responsible by the people if the fair of 1906 turns out a failure, as he has the opportunity to appoint six new members of the board who will unite with other members in making the fair what it should be. The terms of six directors have expired but as the Governor is a candidate for re-election he will probably let matters drift as they are rather than to incur any enmities. In the meantime few will envy Mr. Filcher his job.

THE CALIFORNIA CIRCUIT is assuming shape. At a meeting of the directors of the Pacific Coast Trotting Horse Breeders' Association, held at the office of Secretary Kelley, 36 Geary street, last Tuesday, letters were read from secretaries in different parts of the State and it was concluded by those present that the California circuit would surely be a go and that it would be about as follows:

Los Angeles for the week ending July 7.
Fresno for the week ending July 21.
Salinas for the week ending July 28.
Breeders' fall meeting for the week ending August 4.
Santa Rosa for the week ending August 11.
Woodland for the week ending August 18.
State Fair beginning Saturday, August 25, and ending Saturday, September 1.

This will make a circuit of seven weeks and as at all the places mentioned there are good mile track and good purses will be given the circuit will be worth training horses for. All that now remains is for the associations at the above places to arrange and announce their programs, and just as soon as this is done, horsemen all over the State will begin working their horses with the intention of entering in them. The very wet winter has kept the horses back a great deal, but they are probably all the better for it, as there are very few lame horses now at any of the tracks.

TWO STAKES OF \$1000 EACH for two-year-olds have been offered by the California State Agricultural Society. The stake for trotters has been called the A. B. Spreckels Stake in honor of the last president of the society, and the one for pacers is called the Ben Rush Stake in honor of the present president. The value of these two events should make the list of two-year-olds in training by August 1st a large one. There are 125 two-year-olds in the Breeders' Futurity on which payments were made March 1st. Out of these there should be a large number put in training for the two State Fair Stakes. The two-year-old trotting division of the Futurity is worth \$1000, and the two-year-old pacing division \$750, with additional sums for the owner of the sire and the dam. Consequently a two-year-old trotter that can win the Breeders' Futurity and the A. B. Spreckels Stake will earn \$1000, and the two-year-old pacer that can win in the Futurity and the Ben Rush Stake will earn \$875. These sums will be pretty fair for a two-year-old to earn in two starts. Entries for the two State Fair stakes close May 1st.

A DISPATCH from Riverside, Cal., states that Stanton Wilkes 2:10½, sire of Cavallero 2:09¼, died there last Wednesday from blood poisoning, the result of a seemingly trivial injury sustained a few days previous. Stanton Wilkes was the property of Mr. A. W. Bruner, and his death will be a severe loss to him. Stanton Wilkes was a very fast pacer, much faster than his record. He had shown better than two-minute speed for a half mile in his work-outs, and

since his retirement to the stud has been looked upon as one of the coming sires of great speed in California. The only one of his get to start is Cavallero 2:09¼. Stanton Wilkes was sired by Nutwood Wilkes 2:16½, his dam Ava 2:34 by Dan Voorhees 2:23½, second dam Sweet Meat by Gen. Knox 2:31½, third dam Belle by Black Hawk 5. He was a dark chestnut horse with one white hind ankle, standing an inch over 16 hands and weighing nearly 1300 pounds.

NEXT MONDAY, April 2d, a payment of \$10 must be made, if not made before, on all three-year-olds entered in the Breeders' Futurity for this year. Remember this stake has a guaranteed value of \$6000, and will probably be worth more, but you cannot win any part of it with your colt unless this payment is made, as he cannot start. You have made all the payments so far, and it would be very unwise to allow this payment to lapse and thus lose all chance for any part of the big purse. We know of several fast colts whose speed was not developed until a few months before the race last year, that might have won had they been kept in the two-year-old stakes. It may be the same with the three-year-old stakes this year, so the proper thing to do is to make the payment, stay in, and try for the money.

THE DATE OF CLOSING of the four big stakes offered for the Pacific Coast Trotting Horse Breeders' Association's fall meeting has been postponed until May 1st. The very wet winter, and the almost continuous rain during the month of March has kept the horses in their stalls the greater part of the time since the year opened, and it was not fair to the owners or trainers to close these big stakes as first advertised on April 2d, for very few have much idea up to this time as to what the capabilities of their green horses are. By the time of closing, May 1st, the dates for the California circuit will all be selected and programs announced, and this will be a further advantage to horsemen.

On Friday night of last week the well known trainer, Al McDonald of Pleasanton, shot and killed Joseph Mello, a young business man of that town. Mello was a widower whose wife died four or five months ago. About that time McDonald married a young lady of Santa Rosa and rented Mello's house at Pleasanton, the latter taking a room in the house. On Friday night McDonald and his wife quarreled over her desire to attend a skating rink, and McDonald left the house. His wife attended the rink and the husband went home and hid behind a lounge in the sitting room. When she returned Mello came in the house with her. McDonald rose from his place of concealment, words passed between the two men, and McDonald states that Mello raised a chair and struck him. He drew a pistol and shot Mello, the latter dying in a very short time. McDonald gave himself up to the officers of the law and was taken to Oakland, where he is now confined in the jail there. At the inquest held by the coroner on Tuesday of this week the jury charged McDonald with murder. No date for his trial has thus far been set. There were no witnesses to the affair except McDonald and his wife, neither of which testified before the Coroner's jury by direction of counsel.

In referring to the coming season on the New York speedway, the Trotter and Pacer says: "The free-for-all class promises to attract special interest this season, as James A. Murphy with his fleet pacers, Don Derby 2:04½ and Free Advice 2:10¼, will find a formidable competitor in Charlie Weiland's Sir Albert S., who acquired a race record of 2:03¾ at Lexington, Ky., in 1902, and the following week at Memphis, in a match against Prince Alert, he forced the hopped gelding to pace a half-mile in 57¾ seconds. In this particular match Sir Albert S. drew the outside position and led Prince Alert the first quarter in 28¾ seconds, where he went to a break. Notwithstanding this break, Prince Alert was forced to pace the half in the record-breaking time for a race for a half-mile of 57¾ seconds in order to win. Sir Albert S. turned up lame, but a after a long rest of nearly three years he is as sound as a gold dollar for speedway purposes, and Weiland will be on deck when the free-for-all dashes are arranged, and the horse that beats the California bred gelding will certainly be obliged to go a record-breaking half over the Harlem drive."

The Kenney Manufacturing Company, 531 Valencia street, sold two of those long-shaft McMurray carts, one to Al Schwartz, the other to V. Verhilac. The former is driving his mare Clara L. to the new vehicle and says she can speed faster to it than to any sulky she was ever hitched to. Mr. Verhilac made the same report after he had driven his mare Gertie A. to the cart. Kenney has a second-hand Toomey and a second-hand McMurray cart for sale.

To prevent ringing in harness horse racing is the purpose of a bid presented to the Ohio lower house by Representative George Reed, of Wood county. It recites that "Whoever colors, changes, marks or disfigures or changes the name of any trotting or pacing horse for the purpose of entering classes which they are not eligible to enter shall be fined not more than \$500 or be imprisoned six months or both."

APTOS RANCH SALE.

Tuesday, April 10th, is the date fixed for the sale of the horses from Aptos Ranch, the property of Mr. A. B. Spreckels. The place is at the St. Lawrence Stables at 423 Post street, formerly occupied by W. Bridge. Fred H. Chase & Co., who will manage this sale, are lucky in getting such a central location for the disposal of this splendid consignment of young horses, and will fit up the place so that it will be by far the neatest, most comfortable and most convenient place for a horse auction ever seen in San Francisco. The big building in which the St. Lawrence Stables were situated is to be torn down and a new modern structure erected in its place, but Chase & Co. have secured the use of the building for this sale, and are already at work clearing out the vast room and having seats arranged to accommodate the large crowd that is certain to be present.

Chase & Co. are to erect in this city a fine large tattersall for the sale of horses, the land having already been purchased, and it was intended that the Aptos Ranch sale should inaugurate its opening, but several unavoidable circumstances have delayed the construction of the building, and Mr. Chase has secured the St. Lawrence Stables for the sale.

There are twenty-five horses to be sold, all bred at Aptos Ranch. There are twenty-three trotters and two pacers in the consignment, and a finer or better bred lot of horses has not been sent to a sale in this city in years. Sandy Smith, the well-known trainer, has had them in charge at the ranch track for the past three months, and has driven them daily on the roads about Aptos, where steam and electric cars, automobiles and motorcycles are familiar sights. The horses are from two to five years old, good lookers, of good size, and sound. There are eleven by Cupid 2:18, own brother to the great Sidney Dillon, sire of the world's champion, and himself sire of five with records below 2:17. Nine head are by the great stallion Dexter Prince, who died last year, and has sixty-six standard performers, among them Lisonjero 2:08½, Eleata 2:08½, James L. 2:09½, and other noted fast ones. Three head are by Aptos Wilkes, own brother to Hulda 2:08½, and two are by Altivo 2:18½, own brother to Palo Alto 2:08½.

Among the horses catalogued is a bay mare, own sister to Venus 2:11½; a bay gelding, own brother to Psyche 2:16½; a chestnut mare, own sister to Harold D. 2:11½; a chestnut gelding, half brother to Zambia 2:14½; a brown mare, own sister to the Cupid mare now owned by Budd Doble, who says she is the fastest thing he ever sat behind, and many more that might be particularized had we space this week. Aptos Ranch has never bred for quantity. Twenty-five or thirty foals per year is about the limit at the farm, but the rule has been for quality. The brood mares are fine individuals, and size, soundness and conformation have been the qualities first in mind. Speed has been produced there, and of a high order. The mares Dione 2:07½, Hulda 2:08½, Venus II 2:11½, Zambia 2:14½, Lottie Parks 2:16½, and Psyche 2:16½ were all bred by Aptos Ranch, and are all trotters. The pacers Harold D. 2:11½ and Belle Dawson 2:16½, besides many others, were also bred at this farm. Many of the best and fastest road horses that go over the San Francisco roads and through the park speedway first saw the light of day down at this beautiful stock farm on Monterey Bay.

A full and complete catalogue of the horses to be sold has been printed and can be had by application to Fred H. Chase at 1728 Market street, this city. The horses to be sold are the following:

Sired by Cupid 2:18.

Bay gelding, 1902, dam Emma S. by Speculation; bay mare, 1902, dam Princess Louise by Dexter Prince; bay mare, 1902, dam Lady Ashcat by Aptos Wilkes; bay mare, 1900, dam Lady Ashcat by Aptos Wilkes; chestnut mare, 1901, dam Livingston Mare by Dexter Prince; bay gelding, 1901, dam Erosine by Eros; chestnut mare, 1901, dam Countess by McKinney; bay mare, 1901, dam Lillie S. by Speculation; chestnut mare, 1902, dam Sen Sen by Dexter Prince; bay gelding, 1902, dam Satella by Aptos Wilkes; brown mare, 1902, dam Countess by McKinney.

Sired by Dexter Prince.

Brown mare, 1902, dam Erosine by Eros; chestnut gelding, 1902, dam Galata by Stamboul; bay gelding, 1902, dam Psyche 2:16½, by Cupid; bay mare, 1902, dam Lady Aptos by Aptos Wilkes; bay mare, 1902, dam Sunrise II by Gossiper Jr.; bay mare, 1901, dam Susie Wilkes by Aptos Wilkes; chestnut mare, 1901, dam Neonta by Steinway; chestnut mare, 1902, dam Christina by Chris Smith.

Sired by Aptos Wilkes.

Bay gelding, 1901, dam Christina by Chris Smith; brown gelding, 1901, dam Nenie by Eros; bay gelding, 1902, dam Livingston Mare by Dexter Prince.

Sired by Altivo.

Bay mare, 1900, dam Princess Louise by Dexter Prince; brown gelding, 1900, dam Satella by Aptos Wilkes.

J. A. Jones of Springfield, Oregon, is the owner of a two-year-old trotter by Oro Guy, out of Alta Norte 2:16½ that can pull a cart a 2:40 gait and is only just broken. They call this colt Rastus and Ira Slenker, who is training him at Irvington track, Portland, thinks the two-year-old stakes decided this year will have the name of Rastus among the money winners.

Will Durfee drove the Zombro gelding Zomont a half in 1:05½ last week at Los Angeles, and Walter Maben stepped the five-year-old Zombro mare Geraldine through the stretch in 30½ seconds. This mare is one of the best gaited trotters in the State, and is owned by Lee Mayberry.

RUSTIC SEES WAYLAND W. 2:12½.

Dear Breeder and Sportsman: Let me say a few words in your paper in praise of Wayland W. 2:12½. I was in Petaluma a short time ago, when Chas. Northrup said to me:

"Rustic, have you seen Hellman's horse, Wayland W.?"

"No."

"Well, go to the Brick Stable and look him over and then tell me what you think of him."

So at the first opportunity I met Mr. Hellman by appointment and together we walked down to the stable to see his stallion. Wayland W. as he was led out first impressed me as a horse perhaps a little too big for a carriage stallion and a little too big for a great trotter. But the more I looked at him fore and aft, before and behind, now on one side, now on the other, the more I was impressed with the symmetry of the horse. The smooth, soft outline of his figure, the carriage of his neck, the poise of his head, the set of his tail (as if held up by a crupper before it fell to the floor), the "tout ensemble," the general appearance of Wayland W. was to me that of a high-class thoroughbred. The closer my scrutiny, the more muscular, the taller and broader this grand horse became.

All horsemen know that the Hambletonian has a big bony head, broad between the eyes, jaws wide apart, big nostrils, good pointed ears, but not a fine head. Wayland W. has as fine a head as any thoroughbred; a pointed muzzle in repose; a thin pointed ear, as thin as a piece of cardboard; a mild, intelligent eye, rendered so by years of training and development in his ancestors and in himself; a neck as long, as flat, as fine as a thoroughbred, he carries it "Like crested leader proud and high, tossed his beamed frontlet to the sky." Flat backed, no droop to the loins; muscles well let down on the arms, stifles and gaskins; good flat legs on small, sound black feet. (I never saw a great race horse with big feet, reader, did you?)

After my scrutiny was over I turned to Will Hellman (a very modest man by the way) and said:

"There, Hellman, is the finest American trotting horse, take him for all in all, I ever saw. I will send a mare to him. If you had him in Kentucky you would be getting \$100 a season for his services if you asked it. Where does Directum, \$300 a season, lay over your horse, considering opportunities? Where does Directum outbreed him? What did Alfred G. do here in the stud? In Kentucky \$150 the season where he sired Charley Herr 2:07½."

Great horses do not have to depend on pedigree. A great horse is like Richard III, who said: "I am myself alone—I have no brothers." I consider By Holly, Joseph Cairn Simpson and Governor Stanford the three greatest horsemen I ever knew, or our generation has seen. All three picked out first the individual, next the pedigree. By Holly won race after race, running, trotting or pacing with all kinds of breeding. Joseph Cairn Simpson picked out of comparative obscurity Bonnie Scotland, A. W. Richmond, and bred Marian, one of the greatest dams of race horses America has ever known. Governor Stanford turned his back on Messenger Duroc, all pedigree and no horse, and bought for half the money Electioneer. Hence I say, breed to get what you want in the individual, not in the pedigree, unless it is absolutely supported by the sire. I would that I owned Wayland W., but as I don't here's to his genial owner; may he win fame and fortune from his horse.

RUSTIC.

[While every horseman who has seen Wayland W. will vouch for his individuality, it must not be considered for a moment (and we know our correspondent, Rustic, did not intend to convey the impression) that his pedigree is lacking. He is by Arthur Wilkes 2:28½, a son of Guy Wilkes (Geo. Wilkes-Mambrino Patchen) that was out of a mare by Arthurton (Hambletonian-American Star). The second dam of Arthur Wilkes was Old Lady by the Black Hawk horse David Hill Jr., and the next dam a daughter of Williamson's Belmont. So much for the sire side of Wayland W.'s pedigree. His dam is the great brood mare Lettie, that produced Welcome 2:10½ (sire of two in the 2:15 list), Wayland W. 2:12½ (sire of Bolivar 2:06½ and five more in the 2:15 list), and Maud Singleton 2:28½ (dam of one in the 2:15 list). The next dam was Mary, one of the greatest of brood mares, she having two daughters that produced two 2:15 performers. Mary is not only the dam of Lettie but she is the dam of Grace, dam of Daedalion 2:08½, Creole 2:15 (sire of Javelin 2:08½) and Eagle 2:19½. A stallion that has a trotting record of 2:12½, that is by as well bred a producing sire as Arthur Wilkes, is out of a great brood mare whose dam is a great brood mare, can be considered to have an excellent pedigree. The idea Rustic doubtless intended to convey was that where a breeder found an individual as good as Wayland W., that had accomplished what he has on the race track and in the stud, there was little use in looking up pedigree, and we agree with him, but as Wayland W. has the pedigree qualification also we have taken the liberty of referring to it, and know that Rustic will not consider we are "butting in" or trying to complete a piece of finished work. It is only for the benefit of some of our readers who may not be familiar with Wayland W.'s breeding, that we have added these lines.—Ed. B. & S.]

The long continued wet spell has had a bad effect on horses used in those parts of the country where roads are poor. Mild fever has been very prevalent in some sections, and livermen have had difficulty in keeping enough horses in commission to carry on their business.

THE REDFIELD THEORY.

Casper Redfield, whose original theories about heredity have attracted much attention from the breeders of harness horses since he began publishing them to the world through the medium of the turf papers, has written many articles explaining his ideas, but like the writings of many persons who thoroughly understand their own theories, these articles have not been clearly understood by the average reader. Mr. Redfield's ideas are plain enough to anyone who will sit down and carefully study them, but the lay reader generally wants something that he can grasp during a casual reading.

A subscriber to the Breeder and Sportsman who has read Professor Redfield's articles has prepared from them the following epitome of the Redfield theory, which he thinks will make it clear to the average reader. The editor of this journal has read nearly all the published articles of Professor Redfield and believes that this epitome is a correct though condensed interpretation of the "dynamic development" or "old-age" theory advanced by the professor, and which he is trying to substantiate by facts from the records:

Redfield Theory of Dynamic Development.

Relating to inheritance by offspring of the characters acquired by parents.

1. Characters which animals acquire are those which are developed by exercising them.
2. An acquired character does not mean a new character, but the development of one already existing, and were better called "acquired development."
3. If dynamic development acquired by parent is inherited by offspring, then the amount of such inheritance should be proportional to amount of acquirement.

4. If offspring is to inherit dynamic development which the parent acquires, then the parent should acquire the development before he begets the offspring, for the offspring cannot inherit anything which the parent acquires after offspring is born.

5. Dynamic development being acquired by exercise, and active animals continuing to exercise throughout their lives, therefore:

Old and active animals have acquired more dynamic development than young and inactive ones possess.

In other words, its transmission depends upon age and activity, and therefore if acquired dynamic development is transmitted, it is to be expected from a line of progenitors either old or highly developed by special training.

The facts establishing above were derived from comparison of records of ages and produce of 1000 registered standard stallions.

Secondary Part of Theory.

1. It is well known that certain characteristics are transmitted by sex; that is:

sire to son

or from

dam to daughter,

but never from sire to daughter nor from dam to son. Characteristics thus transmitted are called "secondary sexual characteristics."

2. Development acquired as the result of exercise while a horse is immature is an ordinary characteristic and is transmitted by the animal equally to progeny of both sexes, but development acquired after the animal is mature becomes a secondary sexual character.

It is well known that a male, castrated while immature, never inherits the secondary sexual characteristics which his sire had.

3. From the fact that an animal does not reproduce until after he has arrived at sexual maturity, it follows that the age of the sire has nothing to do with the qualities of a daughter or a castrated son; and

The age of a dam has nothing to do with the qualities of an uncastrated son; and

Any development acquired after maturity of a sire will affect only uncastrated sons; and

Late development in females will affect only daughters and castrated sons; therefore,

- a. Old and highly developed horses have become the best parents of sires.

- b. Undeveloped sons of an old and highly developed horse are much better as sires of mares and geldings than as sires of stallions.

- c. Development which occurs in the youth of the parent is of the ordinary kind and is transmitted in the way in which all development is supposed to be transmitted, but

- d. Development occurring after the parent is mature is transmitted in a special way—namely, from sire to son and from dam to daughter or from dam to castrated son.

2. Age in parents denotes length of life in offspring, and thus furnishes ground work upon which still greater development may be built.

Horsemen who have attended the Canadian ice races this winter say the amount of enthusiasm which the public displays is simply amazing. At some of the meetings the attendance has averaged 5,000 persons, and this with the thermometer many degrees below zero.

Maid of Del Norte, the handsome daughter of Del Norte 2:08, owned by Mr. C. A. Harrison of Victoria, B. C., has been bred to Star Pointer 1:59½. Maid of Del Norte will be raced this year.

J. E. Smart has been appointed secretary of the British Columbia Agricultural Association at Victoria, B. C., where preparations are being made for a big fair this year.

STATE BOARD OF AGRICULTURE.

At last Saturday's meeting of the Agricultural Society J. A. Filcher, who has represented California as Commissioner to the St. Louis and Portland Expositions, was elected to succeed Albert Lindley as secretary of the society.

Director Charles W. Paine of Sacramento took the initiative. After an attempt to leave to Director Thomas Fox, as superintendent of the park, the appointment of a secretary, Mr. Paine made the motion that the office of secretary be declared vacant on April 1st. He said that an industrial State Fair should be held this fall; that the only way to effect this result was a change in the management; and, in reply to a question from Director Wilson, stated that he was prepared to place in nomination another candidate.

"I want to know why Lindley should be thrown out," demanded Mr. Wilson. "If you can show me how the society will be in any manner benefited I will vote for the motion."

Director William Land said that he had nothing against Mr. Lindley, but that the society needed a promoter who could go out and get exhibits; someone with influence who was up in this line of business. He said that there is not enough to employ both a secretary and a promoter. The directors had been criticised. The fair two years ago was "rotten" and he was sorry to be the superintendent of the pavilion. "We have for this place a man who was sent to Oregon and St. Louis and has done great work. That is the man."

Director George W. Kingsbury of San Francisco came forward for the defense of Mr. Lindley and said:

"We elected a man to this office with a hammer hung over his head. Go where he might and do as he would he had no assurance from month to month that his place was a permanent one. We have as good a secretary as we ever had or ever will have. If you will let him alone you will find him competent to do the promoting."

Director Wilson said: "When Lindley assumed the duties of this office the society was \$100,000 in debt and on everybody's black book. Through his legislative knowledge and his acquaintance with newspaper men he accomplished the result that was desired. We are now out of debt and have the new grounds well started. This is due more to the work of Lindley than any man in California."

"I cannot see wherein he has failed, and the governor, apparently, does not think the society is going to the dogs. There is no good reason for this action. It is done simply to make a place for someone else who must be taken care of. The same gentlemen who are trying to throw him out today failed in a similar attempt several months ago because they did not have the votes, and I hope they have not the necessary number today."

Director Land affirmed that the Legislature had been moved to make appropriation for the society through the efforts of Directors Rush and Fox and the late B. W. Cavanaugh.

At this point Mr. Lindley arose and said: "I was positive that an effort would be made to throw me out today, and equally sure that I would not try to stop it. I have known that the undercurrent of feeling against me was strong, but I did not hand in my resignation because I wanted to be fired. I feel that I have done as much for this State Fair as honest effort and my ability would allow, and I have the satisfaction of knowing that I tried conscientiously to elevate its tone and lift it out of the condition in which I found it. I wish my successor and the society all kinds of success."

President Rush took the vote on the question of Lindley's dismissal, and the result was as follows:

For Lindley's dismissal—Directors Rush, Fox, Paine, Land, Stabler and Howard—6.

Against Lindley's dismissal—Directors Wilson, Kingsbury, Rose and Whitaker—4.

Director Burke was absent and Director Jastro asked to be excused from voting, saying that he knew nothing of the conditions.

Director Paine made a motion for the election of J. A. Filcher at a salary of \$200 per month. He stated that he had no personal feeling in the matter and knew nothing of Mr. Filcher, whereupon Director Kingsbury retorted that he would not propose for an important position a man about whom he knew nothing. Mr. Kingsbury stated that he had heard some things about Filcher that he did not like, and suggested that the board ascertain something about him from the Chamber of Commerce, which had several times assisted the society and was entitled to some consideration.

The vote was taken, and Filcher was elected by the votes of Directors Rush, Fox, Howard, Paine, Land, Rose, Stabler and Wilson. Directors Kingsbury and Whitaker were excused from voting.

Mr. Lindley was asked if he would remain in the office for a period sufficient to instruct his successor in the details of the office. Mr. Lindley assented, saying he would be willing to do anything to help the society.

Director F. H. Burke of San Francisco had conveyed in a letter to H. A. Jastro a number of recommendations that were read. He suggested that Admission Day be not included; that an effort be made to secure the labor of county prisoners at the fair grounds; that provision be made at the grounds for campers and university students. He also recommended the investigation of the number of horses stabled at the track and the amount derived from this source. He expressed a desire that better premium ribbons be given exhibitors, and suggested that rosettes might be made by university co-eds or orphan asylum children. For the State Fair he advises bronco-busting and steer-riding contests. He

affirms that \$2000 for music during the fair is excessive, and suggests the employment of Indian bands. He spoke of the success of miners' drilling contests for prizes.

Mr. Burke says he has learned that the same sewing exhibits have taken annual awards of \$325 for several years past. A similar complaint is made in regard to floral displays.

In regard to revision of the premium list for track exhibits, Director Burke suggests the addition of prizes for sheep shearers and farming implements and that sweepstakes of \$50 be offered in all thoroughbred and standard-bred classes. The recommendations were referred to a committee.

The society fixed the date of the next State Fair, selecting August 25th to September 1st, inclusive.

Director Wilson suggested that the State Fair be held from August 30th to September 8th, inclusive, but some of the members decided that time must be given the stock owners to reach Portland on September 8th. It was then suggested that the Fair begin on Saturday, August 25th, and end on Saturday, September 1st. This was the week finally selected.

Director Fox stated that he believed that the track would hereafter be self-sustaining, and that the income at present was almost as much as the amount required for track supervision.

It was ordered that the board request Professor Carlisle to act as a judge of live stock, Governor Sparks of Nevada and some other expert to be selected. Governors Pardee of California and Chamberlain of Oregon were suggested as honorary associate judges.

The next meeting of the board will be held on April 9th.—Sac. Union.

I DIRECT 2:12½ GOES TO OGDEN.

Mr. Mabry McMahan of this city has sold his stallion I Direct 2:12½ to Mr. A. G. Fell of Ogden, Utah, and the horse will be shipped to his new home this week. Mr. Fell, accompanied by his trainer, Mr. W. H. Goan, has been on a tour of the western country in search of a stallion well enough bred and with good enough individuality for the stud, and with speed enough to race in his class, and after examining a number of stallions finally settled on this handsome son of Direct 2:05½. We congratulate Mr. Fell on his selection. I Direct is one of the best-bred stallions ever sired by that great sire of speed and race winners, Direct. His dam is Francisca, dam of I Direct 2:12½, Sable Frances 2:15½, Erosmont 2:22 and Guysisca 2:26, by Almont 33, second dam Frances Breckenridge, granddam of Tuna 2:12¼ by Sentinel 280, third dam by Bayard 53, fourth dam Luna by Swigert's Lexington, fifth dam Eagless by imported Glencoe, sixth dam by Gray Eagle, seventh dam by Medoc, and on to the twenty-fourth dam, the famous Layton Barb mare.

I Direct took his record in a race, and was separately timed in 2:08¼, when he finished second to the famous ringer Walter K. at Santa Rosa, the latter winning the heat in 2:08. He is a double-gaited horse, trotting on the road up to a 2:40 gait, and being a square, even trotter. When called on for speed he goes easily and naturally into a pace. It is his new owner's intention to train and race I Direct after a short season in the stud this year, and many horsemen here believe the horse can lower his record. Mr. McMahan has used I Direct on the road for the past three years and has found him an ideal road horse.

Owners of standard-bred mares in Utah will find I Direct a fine individual, perfectly dispositioned, royally bred and very fast. He is a member of the family that has "the winning habit," and no better horse will be found to breed their mares to, as he will get race horses.

BELIEVES IN ADVERTISING.

Editor Breeder and Sportsman—I have to thank you for sending Mr. D. Bonham down here in answer to my advertisement. He has bought my mare Petrina at the price advertised, and I have just shipped her to him at Hanford. I may add that I am now a thorough believer in advertising.

I was interested in reading in your last issue of Mr. Ronan's record in breeding mares. I think I did pretty well here myself, viz.: In 1899 I received Gossiper 2:14¼, and the four brood mares, Zetta, Lizzie R., Fanny Vasto and Lizzie H. from Senator Fair's Sonoma ranch, and in 1899 these mares foaled four colts, in 1900 four colts, in 1901 four colts, in 1902 four colts, and in 1903 three colts, Fanny Vasto having missed; total nineteen out of a possible twenty colts.

Yours truly,

S. T. CORAM.

Ferndale, Humboldt county, will hold a fair and race meeting this year, opening on Monday, September 10th, and closing Friday, September 14th. At a meeting of the directors held last week, the secretary was instructed to send out entry blanks for the two and three-year-old stakes, trotting and pacing. The events are open to trotters and pacers owned in Humboldt, Del Norte and Mendocino counties on January 1st, 1906. The association will add \$100 to the total entrance fee paid if four or more start, \$75 if three start, \$50 if two start, and \$25 if a walkover. The entrance fee is \$15, payable as follows: \$2.50 at the time of entry, April 1st, 1906; \$2.50 on or before May 1st, 1906; \$2.50 on or before June 1st, 1906; \$2.50 on or before July 1st, 1906, and \$5 on or before August 15, 1906. The races will be mile heats, best two in three. The total entrance and added money will be divided among the winners at the ratio of 60, 30 and 10 per cent if four start, same ratio if three start, and at the rate of 65 and 35 if two start.

TRACK AND ROAD.

Mr. E. A. Branscom, of Norwalk, Cal., is breeding two mares to Zombro 2:11 this year. They are full sisters, and sired by Conifer.

The well known trainer J. E. Stetson, formerly of Denver, has moved his string of four horses from the Los Angeles track to Santa Rosa.

Officer Van Keuren of this city has sent his mare Mattie B. 2:15 by Alex Button, to Modesto, to be bred to that splendid young stallion Ed McKinney.

Remember, the date of closing of the four early closing guaranteed stakes offered by the Pacific Coast Trotting Horse Breeders' Association has been postponed until Tuesday, May 1st.

Mr. Robert Lee Bettner of Riverside, Cal., a polo enthusiast, and one of the best players of this game on the Coast, contemplates starting a polo pony breeding farm, using the small California mustang mares as matrons.

The Portland, Ore., Horse Sale Company has been organized to conduct horse auctions and will give its first spring sale at Irvington Park, Portland, May 2d, 3d and 4th. M. D. Wisdom is president and G. A. Westgate manager.

Mr. Armes of Chicago, who purchased Zealous 2:26½ by Zombro last year from W. G. Durfee of Los Angeles, states that the man to whom he sold her drove her a trial mile in 2:11 last year, and that she will doubtless get a low record this year.

Three high class pacing mares were bred to Zombro 2:11 last week. They were Miss Williams 2:09¼, Arabella, trial 2:10, and Cleone, trial 2:12½. The mare Mary Scott 2:24½, owned by Mrs. Nelly Covert of Vancouver, was also mated with Zombro last week.

Mr. J. H. Jack, formerly of Bisbee, Arizona, but now a resident of Berkeley, Cal., purchased last week from Mr. R. P. M. Greeley of Oakland the brood mare Winnie Wilkes 2:17½ by Rey Wilkes. The mare is in foal to Lecco 2:09¾ and will be bred this year to Star Pointer 1:59¼.

Mr. J. H. Jack offers for sale or trade his lumbel business at Bisbee, Arizona, the advertisement appearing on another page. Mr. Jack will trade for a ranch within fifty miles of Berkeley, Cal., where he is now living at 1431 Spruce street. He will take standard bred trotting mares in part payment.

Those new McMurray training carts that W. J. Kenney has just received from the factory are especially adapted for training or matinee racing. By the way many of the eastern amateur driving clubs are now designating carts as the hitch for matinee racing, as wagons are not only expensive but not so safe for an amateur driver as a cart.

Zolock 2:05¼, the fastest entire son of McKinney, will be taken to the Oregon State Fair Grounds after the close of his season at Pleasanton. He will reach there soon after June 1st, and should be well patronized by the Oregon breeders as he is not only a magnificent individual, a great race horse and one of the best bred McKinneys living, but he is proving a great sire.

W. J. East of Fortuna, owner of the stallion Casiar, will enter two of that horse's colts in the stakes at the Ferndale Fair this year. In the three-year-old race Evelyn E. will be entered. This animal, it will be remembered, won the two-year-old colt race at the Ferndale fair last year and made an excellent showing. In the two-year-old race Mr. East's entry will be Cassine.

The new Panhandle Stables, of which the well known horseman, T. C. Cabney, is proprietor, are located at 1225 Fell street, between Devisadero and Broderick streets. Take either the Haight, Hayes or Ellis street cars. At these stables horses are bought, sold, boarded, trained, gaited or exercised at popular prices. Neat and commodious box stalls are provided for those who desire them for their horses. Call up phone park 436 and ask Mr. Cabney about boarding or training your horse.

One day last spring, just before Lou Dillon was shipped East, some gentlemen friends of Mr. Doble were at the San Jose track to see the queen in her last work-out before leaving California. One of the party remarked that he had never seen Kinney Lou in action and requested Mr. Doble to move him up a little that he might get a line on his way of going. This the driver of Goldsmith Maid readily consented to do, stating, however, that he had given the horse no fast work in over a year. After jogging two or three miles the great son of McKinney was turned the right way of the track and jogged around into the stretch and started up just before the seven-eighths pole was reached. Then it was that those visiting horsemen and others saw the purest and most perfect piece of trotting machinery that had ever been their lot to witness, as Kinney Lou, without being driven, stepped that last eighth in 15 seconds and no one who saw the performance was more surprised than Mr. Doble when he looked at his watch and saw that he had ridden a two-minute gait when he had no idea of showing better than 2:20 speed. He has ever since wondered how fast Kinney Lou would have trotted that day had he called on him to make an effort.

NOTES AND NEWS.

Don't miss the sale of the Aptos Ranch horses if you want something of your own price. They will be sold Tuesday evening, April 10th, at the St. Lawrence Stables, 423 Post street, this city. This is right down town, and the finest place to hold a sale in San Francisco.

To show that the Salinas race track is only next to Pleasanton as a winter training track, it need only be said that last Monday the track was in fairly good shape for some fast quarters and the following day the trotters and pacers were getting their lessons as though there had been no rain for a month. In fact the horses are as well along in their work there as at Pleasanton.

Peter Weber, the well known veteran trainer, who has had a half century experience with both trotters and runners, and who could once drive with the best of them, will leave Monday for New York in charge of four harness horses owned by Mr. F. J. Kilpatrick, who is shipping them there for use on the road. Among them is the fast pacing mare Virginia 2:09 by Bob Mason. She should show the way to some of the best ones on the famous New York speedway when she is right. Mr. Weber trained horses for Mr. Kilpatrick's father many years ago, and drove his mare Lucy Walter in a \$4000 stake for three-year-olds won by the Palo Alto filly Wildflower by Electioneer at Morris Park, New York, in 1882.

Melvin Keefer, proprietor of the Hotel Julian at Woodland, and Chas. Spencer, superintendent of the Woodland Stock Farm, were in the city this week and attended a meeting of the Pacific Coast Trotting Horse Breeders' Association. They report that there will be a fair and race meeting at Woodland in August, the week before the State Fair opens. The outlook is for one of the best meetings ever held at this popular track. There are quite a large number of horses in training there and all the trainers say that it is a first class winter track, and can be used whenever it is not raining.

Los Angeles has a good horse of the Hal tribe in Young Hal 2:10½, which Mr. I. C. Mosher will make the season there with. Young Hal is by the great pacer Hal Dillard 2:04½, and is out of the great producing mare Ozora by the old champion Smuggler 2:15½, second dam another great brood mare, Odd Stocking by Happy Medium 400, and third dam the famous County House Mare, dam of Nettie 2:18 by American Star 14. Young Hal is a game race horse and a natural pacer, going without the straps. He stands 15.3, weighs 1100 pounds and is a beautiful mahogany bay. This is his first season in the stud, but he cannot help being a sire of great speed and game race horses.

The work of raising a sum of money among the citizens of Red Bluff sufficient to save the race track and fair grounds there from relapsing into farming land, is progressing satisfactorily. Chairman T. H. Ramsey of the Reorganization Committee reports that more than half the sum necessary has already been secured.

A carload of mules were purchased at Biggs, Butte county, last week for shipment to Cook's Inlet, Alaska, where they will be used in packing materials to the mines. The price paid for the mules was \$185 per head.

The three-year-old division of the Kentucky Futurity has not been shortened. It is still best three in five.

Billy Andrews has great hopes of the four-year-old pacer by John R. Gentry, out of Star Pointer's sister, Vilette.

The Montana Fair and Racing Circuit for 1906 will offer \$125,000 in stakes and purses. The first meeting on the circuit will be at Butte, opening August 22. There are three \$1000 stakes for trotters and three for pacers, besides smaller purses. The Butte meeting will continue ten days. Then will come the Livingston meeting, four days, with two \$1000 stakes; the Billings meeting, four days, with four stakes of \$1000 each; the Bozeman meeting, five days, with two stakes of \$1000 and four of \$500, then Big Tumber, whose stakes will be announced later; then Great Falls, where four \$1000 purses are offered; then the Montana State Fair at Helena, opening October 1st and continuing five days, with five stakes of \$1000 each, and then the meeting at Missoula will wind up this excellent circuit with four days of racing closing October 11th, during which there will be four stakes of \$1000 each. Here are eight weeks of harness racing provided for with no less than twenty-seven stakes of \$1000 each for trotters and pacers. All these races will be on the three heat plan. Entries close April 10.

"Second, under restraint, at Columbus last fall in 2:45½" is the way the owner of a pacer eligible to the 2:12 class is advertising in defiance of turf law.

It is said that Major P. P. Johnston and other stockholders of the American Trotting Register Association favors compulsory registration. The question will come up for consideration at the next annual meeting of the stockholders, February, 1907. The idea of compulsory registration has been growing for the past five years.

The Los Angeles Herald says: Hazel Patch, which raced at Agricultural Park and decisively beat Zolock, the coast sensation, has been sold by J. W. Flack to W. W. Fleming of Winnipeg, Canada, for \$9000, and will be shipped to his new owner at once. The sale was consummated in Chicago last week, and in commenting upon it the Milwaukee Sentinel says: "Hazel Patch 2:02¾, the fastest harness horse ever owned in Wisconsin, and one of the fastest in the world, has been sold by J. W. Flack for \$9000 to W. W. Fleming of Winnipeg, Manitoba, delivery to be made April 1, 1906, at Milwaukee. Flack has ordered the horse shipped from Los Angeles and he will doubtless arrive in Milwaukee some time within the next ten days. One of the conditions of the sale is that Hazel Patch be started against The Bronco or any other horses that may enter the \$2500 free-for-all at the Wisconsin State Fair in 1906. Mr. Flack is confident the black stallion can go in 2:00 in 1906 and lower the colors of any horse now racing. The new owner of Hazel Patch will fill all engagements made for exhibitions by Hazel Patch. Flack will now devote his time to training Hazel Dell, the two-year-old sister of Hazel Patch. She has speed and under Mr. Flack's training may develop into a great race horse."

Donlon Bros. of Los Angeles have at last won in the courts their long fight with the Southern Pacific Company to recover damages for the death of Charley D. and the injury to another horse. They were shipping these horses from Salinas to Sacramento in 1902, when the car in which the horses were was struck by another at Niles. The Donlon Bros. sued for \$5000 damages for the loss of Charley D. and \$3000 for the injury to the other animal. In the Superior Court of Los Angeles county they were awarded \$600 damages. The railroad company appealed, but the Appellate Court has affirmed the decision.

Entries close Tuesday, April 10th, for the big early closing stakes of the Readville Grand Circuit meeting. See the advertisement in this paper.

Don't fail to enter your two-year-old in one of those \$1000 stakes offered by the California State Agricultural Society. The A. B. Spreckels stake of \$1000 is for two-year-old trotters. The Ben Rush \$1000 stake is for two-year-old pacers.

At the recently held sale of trotters and pacers at Cambridge City, Ind., the pacing filly Princess Manlove, said to have paced a quarter in 27½ seconds, half a mile in 1:00 and a mile in 2:10½ last year as a two-year-old, was bid off by Will J. Davis, the Chicago theater manager, at \$5,000.

According to advance advices at the English Hackney Show, held in London, March 6 to 9, there were in all 660 entries and the prize money amounted to \$10,000. Representatives of many foreign governments were on hand to make purchases. Diplomatist, the stallion imported to this country by Eben D. Jordan and later sent back to England where he won the championship at London last year, changed hands at \$5000 and other high prices were recorded.

Tom Sharkey, one of the active members of the New York Drivers' Association, and who participates in a series of spirited brushes during the driving season on the famous Harlem Drive, received a cable from Ireland week before last, announcing the sad news of the sudden death of his father, James Sharkey, who lived to the ripe old age of 82 years. Mr. Sharkey had always enjoyed the best of health up to the date of his death. Mrs. Sharkey is well and hearty and is 73 years old. She, together with eighteen children, survive the husband and father. Tom was the sixteenth child, the baby boy of the family being brother Jack, who is just past 25 and who is associated with him in business in New York.

There are many traditions assigned to the color of horses, although, as a matter of fact, it is of very little consequence, and no rule can be laid down as to any special merit belonging to any. For a long time prejudice attached to a white horse on account of the fabulous tradition that they could not stand the cold, because white is a non-conductor of heat, a hypothesis at once controverted by the fact that polar bears, which habitate the regions of eternal cold, are white. The same prejudice existed against black horses, on the other extreme, as black is a conductor of heat, a black horse would succumb to the enervating heat of summer. In this age of the world it is needless to say that the color of a horse has nothing to do with his constitution. The powers of endurance may be just as great in a white horse as in a black, and in a black as of any other color. The diversity and universality of color in horses is a provision of nature, and the cause of it can not be explained by finite minds. Why there should be more bay horses than brown, more browns than gray, more grays than black, is a problem that the human mind cannot solve. No more can it explain why the union of a black sire with a gray dam may result in a bay, chestnut, brown or black offspring, or a union of two of a color may produce the opposite color.

A hint to the race committee: "Hereafter none but the judges of the race in progress, the clerk of the course and three timers shall be allowed in the judges' stand during the pendency of a heat. Any association convicted of violating this rule shall be fined in any sum not exceeding \$100."

It is reported that Mr. L. V. Harkness, proprietor of Walnut Hill Farm, Donerail, Ky., recently refused \$50,000 for his great speed sire, Moko.

LEADING BROOD MARES.

A correction of a slight error in Mr. Parlin's book, "The American Trotter," was made editorially in this paper last week, changing the number of standard speed performers that Beautiful Bells was entitled to at the close of 1903, in the first and second generations, from 219 to 229, writes "Griffin" in American Horse Breeder. The mistake occurred in a paragraph relating to Alma Mater, and the compiler expressed some astonishment at the fact that the daughter of Mambrino Patchen was in the lead of all the others by this test, her total being 278, while that of Dolly was 256, Miss Russell 254, Beautiful Bells, as corrected, 229, and Green Mountain Maid 226. The change put the daughter of The Moor in fourth instead of fifth place. This seems to be a very fair criterion of merit, probably the best that could be devised. I find that the performances of the two years since 1903 have changed the relative standing of Beautiful Bells among turf matrons very greatly to her advantage, and the quintette now rank as follows: Alma Mater 288, gaining 10; Beautiful Bells 276, gaining 47; Dolly 270, gaining 14; Miss Russell 262, gaining 8; Green Mountain Maid 229, gaining 3. It is easy to see that at this rate of progress Beautiful Bells will soon take the lead of all, and very likely by the close of the present season. Should she and Alma Mater keep up the same gain as in the past two years this table at the end of the approaching season would be, respectively, 299 and 293 in favor of the California mare. This leading pair are the youngest of the five, and were both foaled in 1872, hence the race between them is a very pretty one. Beautiful Bells has been badly handicapped through her sons being so short-lived as a rule, while Alma Mater suffered similarly in the early death of her greatest son, Alcyone. However, the daughter of The Moor is entitled to expect numerous increments from Adbell, Bow Bells, Chimes, Elastic Bell and Belsire, and some of the get of her dead sons are likely to be heard from. For Alma Mater the most likely sources of increase are Alcantara, Alfonso and Allandorf, but they cannot be very prolific. It is virtually certain that Beautiful Bells will be the first brood mare to pass the 300 mark in the first and second generations. Alma Mater is also likely to attain this distinction, but the chances of any other matron doing so is small. Director and Onward cannot contribute much more to the list for Dolly, nor Nutwood for Miss Russell, and the sons of Green Mountain Maid are practically out of it.

RACES AND POLO PONY SHOW.

The spring race meeting, match polo and polo pony show, under the auspices of the California Polo and Pony Racing Association, will be held today and Wednesday, weather permitting, at Francis J. Carolan's "Crossways," Burlingame. The Presidio band will be in attendance.

Major G. L. Rathbone is presiding judge and the stewards of the association are F. J. Mackey, Thomas A. Driscoll and Francis J. Carolan.

The racing program and entries follow:

First race, three-eighths of a mile—Montera, F. J. Carolan, 147 pounds; Midlove, C. W. Clark, 155; Leash, J. A. Lynch, 143.

Second race, half a mile—Bas Blancs, C. W. Clark, 144 pounds; Wonderful, R. Spreckels, 143.

Third race, one mile—Carololly, R. Spreckels, 145 pounds; Ethel G., C. W. Clark, 143.

Interval for lunch.

Fourth race, three-sixteenths of a mile, for polo ponies, to be ridden by amateurs: Mufti, F. J. Carolan; Jack Rabbit, W. S. Hobart; Julia, J. Lawson; Kids, C. S. Tobin.

Fifth race, three miles, catch weights, 150 pounds minimum—Honoma, R. Spreckels; Bobby, J. O. Tobin; Cakewalk, D. W. Donnelly; Beau Brummel, F. J. Carolan.

Sixth race, one-quarter of a mile—Leah, J. A. Lynch, 148 pounds; Peggy Williams, F. J. Carolan, 152; Bas Blancs, C. W. Clark, 156.

Match polo at 3 p. m. for presentation trophies: Reds—P. Clagstone, P. Martin, C. Tobin, J. Lawson. Whites—E. J. Tobin, F. J. Carolan, R. M. Tobin, W. S. Hobart.

At 3:30 p. m. the San Mateo county hounds will meet and throw off at Crossways. J. Keating, huntsman.

The program of classes for the open-air polo pony show, to be held on Wednesday, is as follows:

Judge, E. Duplessis Beylard.

Class 1—Heavyweight polo ponies. Class 2—Lightweight polo ponies; ponies that have been played in match games. Class 3—Heavyweight green polo ponies. Class 4—Lightweight green polo ponies; ponies never played in match games. Class 5—Polo ponies to be judged by performance only. Class 6—Open cup for the best polo pony in the show. Class 7—For ponies that have raced at the California Poly and Pony Racing Association race meetings. Class 8—Polo pony sires. Class 9—Poly pony dams. Class 10—Sire and three of his get. Class 11—Dam with foal at foot. Entries to the above classes close Monday, April 1st, to Paul Clagstone, San Mateo.

FAIR DATES CLAIMED.

At the meeting of the North Pacific Fair Association held last week at Portland the following dates were agreed upon:

Seattle Sept. 3 to 8
Salem Sept. 10 to 15
North Yakima Sept. 17 to 22
Spokane Sept. 24 to 29
Walla Walla Oct. 1 to 6
Lewiston Oct. 8 to 13

Everett was given the privilege to select such dates as they may decide on.

THOROUGHbred DEPARTMENT.

By RALPH H. TOZER.

Up to this season the turf writers have had considerable to write about in the line of large winnings of newly-developed "plungers," but this year the big winners are conspicuous by their absence. True, such men as John Lyons and Del. Fountain have hit the bookmakers hard at times, the former on Corrigan and the latter on Boloman and David Boland more than once, their winnings running as high as \$10,000 on a race, but the pencilers have more than evened up the score and the balance is beyond doubt on the wrong side of the plungers' ledgers. Indeed, since the death of "Pittsburg Phil" (George E. Smith) the American turf has no "plunger" in its ranks that steadily deplete their bank-rolls as he did. The reason for this can easily be found in the fact that while "Pittsburg Phil" would not make a wager until he thought he saw a horse that "shone out in the light," or in other words completely out-classed its field, and was at a pleasing price, the vast majority of heavy turf operators play nearly every race on the card, the result being that they are playing against a percentage that is certain to land them a loser. Steve L'Hommideu makes and loses annually three or four big fortunes. Just at present his boat is reported as riding on the crest of the wave of success, but it will surprise no one to hear of her being swamped in short order. "Plunger" McManus, at present booking at the Emeryville track, is again basking in Dame Fortune's smiles, but he secured most of his capital through his booking operations, and not through "plunging." An ex-brick layer named O'Brien, hailing from Chicago, has made a fortune of perhaps \$100,000 with the proverbial "shoestring." He will scarcely average two bets per racing day, and his wagers are generally of the "place" and "show" variety. The wrecks of "plunging" craft that strew the racing shore are fifty times as numerous as the noble ships that weather the financial storms for a number of years. I see nearly every day men that not so very long ago possessed fortunes ranging from \$50,000 to \$150,000, in their time the most sought-after men around the race courses they frequented, and today they are glad to make a \$2 wager and their opinions on races are not considered worth anything. A few of the "plungers" came to a realization, ere they struck the rocks, that the booking end of the game was the best, and thus "saved their bacon," but, as said before, the heavy players "on the outside" that "lasted" are exceedingly scarce.

Walter B. Jennings left for the East last Tuesday night, and his horses preceded him. Mr. Jennings had a fairly successful season at Emeryville, winding up second on the list of winning owners, with nearly \$18,000 to his credit.

The coming Memphis meeting will be conducted under the auspices of the Western Jockey Club, it was decided and announced last Tuesday at New Orleans. This will result in the City Park track (Corrigan's course) running until April 7th, if, indeed, not longer. The book is made up until April 7th. The Western Jockey Club will place several of the Corriganites on their outlaw list and prevent them from running at Memphis. The dispatches hint that a settlement of the turf war between the Western Jockey Club and the American Turf Association seems farther off than at any previous period.

Black Art, a winner at Emeryville in good company, captured a five-and-one-half-furlong race at Hot Springs last Tuesday, and Il Dottore, by Brutus-Installation, won again at the Fair Grounds track, New Orleans, on the same date.

Charles T. Boots has about determined to take his good long-distance horse, Borghesi, to Melbourne, Australia, to try for the cup there. He expects to ship several other flyers also, and will have the honor of pioneering the Australian racing way for America.

The writer is in a position to secure a royally-bred stallion of great racing reputation and a number of young winning mares from the best racing families of this country at a bargain not often met with. He is in close touch with most of the owners at Emeryville track, and is prepared to execute commissions and pass on pedigrees of thoroughbreds for anyone desiring to embark in the breeding industry either on a large or small scale. Only those will be selected that come up to his ideas regarding conformation, pedigree and turf performances.

W. Miller, who was regarded as about the best rider at Los Angeles this season, piloted three winners at Benning (Washington) last Wednesday. Tommy Burns rode two on Tuesday and one Wednesday. Knapp had not distinguished himself up to Thursday.

Sam McGibbon will act as clerk of the scales at the coming Seattle meeting, which begins June 16th and ends September 1st. He will also be secretary of the Petaluma meeting over Stover's track.

The second circuit at the far East bids fair to be a good one this season. It begins at Benning (Washington), then there will be racing at Kenilworth track, Buffalo, at Toronto, Montreal, Providence and Salem, N. H.

Thomas Kehoe, the big cattleman, died a few days ago at Ogden, Utah, where he made his home for several years. Mr. Kehoe, a brother-in-law of McCornick, the great Salt Lake breaker, was an ardent admirer of the thoroughbred horse, and on his ranch in Idaho bred quite a few gallopers with winning ways, the best probably being Gold Bug, by Pittsburg-Mollie S. Mr. K. owned Emma Skaggs (by Norfolk), the grand dam of Gold Bug, and also had Pittsburg on his place. A few years ago he bought imp. Paladin of John Mackey, who was an old and highly-esteemed friend, and whenever the old cattleman was in the city he would attend the races, if they were in progress. Mr. Kehoe's friends in California were legion, and they will be exceedingly sorry to hear of his passing.

SURPRISES FOR BREEDERS.

The law of inheritance and the influence of atavism are such that breeders of trotting stock are often surprised with the results of their breeding ventures. These surprises are often disappointments, but fortunately they are sometimes of an opposite nature. It sometimes happens that a mare of pleasing conformation and good size, which appears to possess unusual merit when used for breeding purposes and mated with first-class stallions, fails to produce anything that, so far as individual merit is concerned, is the equal of herself.

On the other hand, it has not infrequently happened in the past, and will undoubtedly occur again, that mares which are far from ideal in size and conformation, and so far as can be judged by gait and appearance, do not possess unusual merit or an unusual amount of nerve force, have produced such noted trotters as George M. Patchen 2:23½, Hopeful 2:13½, Ralph Wilkes 2:06½, Sweet Marie 2:04½, and many others of note that might be named.

When mares that are mated with good stallions fail to produce animals that are equal in speed, conformation and in other valuable qualities, to themselves, it will generally be found by learning the character of their ancestors, near or remote, that some of those ancestors were lacking in merit. In cases of mares that appear to be lacking in merit, but surprise their owners by producing a much more valuable class of animals than other mares which appear to be their superiors, so far as can be judged by their looks and gait, it will be found by analyzing their pedigrees and learning the character of their ancestors, that the inferior appearing mares really possessed an inheritance that was superior to the better looking ones, that had failed to meet expectations as producers.

Following is an example: In February, 1905, Excursion, an eight-year-old mare by Expedition 2:15½ was sold at auction for \$90. Her dam was by Harold; second dam the great brood mare Pera, by Alexander's Belmont 64, and third dam Neta, by Woodford, thoroughbred son of Kosciusko by Sir Archy. In 1903, two years before she was sold for \$90, Excursion produced a foal by Jay McGregor 2:07½. This colt, now three years old, is claimed to be a trotting wonder. It is announced that he has trotted a half this season in 1:07½, and a quarter in 32½ seconds, a 2:10 clip. He is owned by G. A. Staples of Alexandria, La. Judging from the speed that this colt is showing, the actual value of his dam for brood purposes was greater than many of the fast record mares that some wealthy breeders would have considered prizes at fifty times the amount that Excursion sold for.

Those who select for brood purposes mares that show great merit combined with a good pedigree, will undoubtedly get a larger percentage of prizes, or at least a smaller percentage of blanks, than those who select solely on merit; or others who are governed in their selection by pedigree alone. The man who selects his mares solely on pedigree, regardless of merit, however, is quite as likely to get as large a percentage of fast trotters or pacers as the one who, in selecting, is governed entirely by the merit shown by the animal, and pays no attention whatever to the combination of blood lines in her pedigree.

It is true that an apparently good pedigree in both sire and dam is not always a sure guarantee of superior merit in the offspring, but it is as sure a guarantee as can be obtained. The animals whose pedigrees terminate at both ends in stout thoroughbreds, like those of Nutwood 2:18½, Expedition 2:15½, Alcantara 2:23, Alcyone 2:27, Mambrino 2:21½, Delmar 2:11½, Anteeo 2:16½, and others which might be named, are, in our judgment much more liable to prove successful as speed perpetrators than those whose pedigrees on the dam's side end with some animal that is not bred from high-class race-winning stock, because the former have inherited less of the elements that are detrimental to speed.

The second and third dams of Rysdyk's Hambletonian, the greatest of all perpetrators, were by running-bred sires, and his fourth dam, Jin Black, whose breeding has never been given, possessed unmistakable thoroughbred characteristics. There is little doubt that the second dam of Electioneer was by Iron's Cadmus, and from a running bred mare. If Captain Lewis, a man of unquestioned veracity, did not tell an absolute and unexcusable falsehood, the third dam of George Wilkes was imported from England, and her endurance as a roadster indicates that she was highly bred. It has been stated upon apparently good authority that this imported English mare was driven by Parson Stule one hundred miles in one day.—American Horse Breeder.

BEST FOR SPRAINS AND SPAVIN.

Concord, N. H., Aug. 25, 1902.
The Lawrence-Williams Co., Cleveland, O.
Please send me lithographs of the celebrated horses (all of them) to advertise GOMBAULT'S CAUSTIC BALSA. We know it to be the best remedy for sprains and spavins.
GEO. F. UNDERHILL.

WHERE THE TROTting STALLIONS ARE STANDING.

(Horse Review.)

It was fifteen years ago that the first mile in 2:10 was trotted by a stallion, the epochal performance having been achieved by Allerton at Independence, Ia., September 4, 1891. Since that day seventy-one other entire horses have joined him in the "select list," including Stamboul 2:07½, whose record is not, for technical reasons, officially, recognized. As was printed in the Review last week, no less than eighteen of these 2:20 stallions have been sold abroad, their roster being as follows: Onward Silver 2:05½, Tommy Britton 2:06½, Caid 2:07½, Jupe 2:07½, Gayton 2:08½, Trevillian 2:08½, A. Penn 2:08½, Poindexter 2:09, Dillon Boy 2:09½, Idolita 2:09½, Baron Rogers 2:09½, B. B. P. 2:09½, Ellard 2:09½, Que Allen 2:09½, Athanlo 2:10, Brownie Wilton 2:10, Kirkwood Jr. 2:10, Senator A. 2:10. Three of these, Tommy Britton 2:06½, Ellard 2:09½ and Athanlo 2:10, have died since exportation, while seven others, as follows, have died in this country: Ralph Wilkes 2:06½, Stamboul 2:07½, Grattan Boy 2:08, Askey 2:08½, Palo Alto 2:08½, Altao 2:09½ and Pamlico 2:10. This makes a total of twenty-five that are now beyond the reach of American breeders. There remain, therefore, forty-seven which are, or should be, available. But some of them, for various reasons, are not in public service, while among those which are there are a number whose owners seem averse to affording the public any information as to their whereabouts, ownership, fee, etc., etc. We have, however, been able to locate some forty-three of them and present the following list, which, if not absolutely is nearly correct, of the States in which they are now located:

Kentucky, 7—Rhythmic 2:06½, Charley Herr 2:07, Jay McGregor 2:07½, *Peter the Great 2:07½, General Forrest 2:08, Walnut Hall 2:08½, Dan Cupid 2:09½.

Massachusetts, 5—Bingen 2:06½, Kremlin 2:07½, Dare Devil 2:09, Alliewood 2:09½, Benton M. 2:10 (?).

Ohio, 4—John A. McKerron 2:04½, Lord Vincent 2:08½, Strader H. 2:09½, Hesperus 2:09½.

Illinois, 4—Redlac 2:07½, George Muscovite 2:08½, *Allerton 2:09½, Tom Miller Jr. 2:10.

Minnesota, 3—*Cresceus 2:02½, *Directum 2:05½, *Arion 2:07½.

New York, 3—Fred Kohl 2:07½, Directum Kelly 2:08½, *Oakland Baron 2:09½.

Indiana, 3—*William Penn 2:07½, Crescent Route 2:08½, Boreazelle 2:09½.

California, 2—Kinney Lou 2:07½, Monterey 2:09½.

Missouri, 2—Early Reaper 2:09½, Serp 2:10.

Maine, 2—Nelson 2:09, Early Bird 2:10 (?).

Delaware, 1—Admiral Dewey 2:04½.

Georgia, 1—Lecco 2:09½.

Iowa, 1—Lockheart 2:08½.

Montana, 1—Direct View 2:08½ (?).

Nebraska, 1—Pat L. 2:09½.

Pennsylvania, 1—Moquette 2:10.

Tennessee, 1—Pilatus 2:09½.

West Virginia, 1—Baron Bell 2:09.

Wisconsin, 1—The President 2:09½.

*The asterisks indicate horses that are also sires of 2:10 trotters.

As above said, this list is substantially correct, but not absolutely so. We have queried (?) the names of several horses whose whereabouts we are not entirely sure of. It is also possible that several of the stallions listed are not in public service at present.

The list, however, will afford a good idea of the opportunities which the breeders of the various States now have of patronizing 2:10 trotting stallions. It must be confessed that these are not by any means as extensive as they should be. Of the forty-five States of the Union, only nineteen possess 2:10 stallions, and nine of these possess but one each. Students and statisticians have been for some years pointing consistently to the fact that the production of 2:10 stallions is inadequate. Last year saw a decided improvement in this respect, however, when eight were developed—the largest number for many seasons. The recent scarcity has, undoubtedly, been due in considerable degree to the great depression which affected the breeding industry a decade ago, resulting in the gelding of innumerable colts that would otherwise have been kept entire.

The indiscriminate keeping of colts entire is certainly not to be encouraged, but no more is their indiscriminate castration, which has cost many a breeder heavily. A weedy stallion can be reduced to the ranks of geldings whenever it becomes advisable; but no gelding can ever be made into a stallion. Breeders are often heard to express regret that such-and-such a trotter was ever gelded, as he would have made a valuable sire. The moral is that well bred colts should be well tried out before the castrator is called in. The extremely fast stallion is the most valuable and profitable of all light-harness horses and it is doubtful if the supply is ever adequate to meet the demand. No breeder should ever lose sight of this all-important fact.

An Eastern paper says: "Ed Benyon has finally given up Jessie Benyon, the roan daughter of Moko, and she will be bred to Walnut Hall 2:08½. As a two-year-old she was second to Grace Bond in the Kentucky Futurity, and the next week was again second to her in 2:14½. In the three-year-old Futurity she was fourth and was separately timed two heats below 2:12. Last season she was unable to get to the post, and now retires without a record. Her turf career would undoubtedly have been brilliant had she not been foaled with a leg which was almost malformed, which was the ultimate cause of her breakdown."

There is no better place in the world to raise good horses than on American farms where the mares can do farm work and raise a colt.

TEN CROSSES TO HAMBLETONION 10.

What of it? Does it signify anything? Are such matters worthy of attention? Would ten crosses to any other stallion be equally valuable? Here are a few of the many reasons why owners boast of "Ten crosses to Rysdyk's Hambletonian," as well as the chief features of his history and career in the stud, all of which may be old, but mighty good reading for all that.

Rysdyk's Hambletonian was foaled in 1849 and died in 1876. He was the greatest sire of his generation, and the family established by him is a long way ahead of any other family of light harness horses. Hambletonian served 1,920 mares, siring 1,334 foals. Not one of these foals was a chestnut or a sorrel. This is the first of his many remarkable qualities to attract the attention of thoughtful students. It is written of his great-grand sire, Messenger, that he never begat a chestnut or sorrel foal. Imported Bellfounder, sire of the dam of Hambletonian, came of a long line of bay horses.

It has been frequently stated that Hambletonian was not a trotter. This is a mistake. As a four-year-old he trotted a mile in 2:48½ over Union course. Many of his descendants can do no better in this year of our Lord 1906. It has also been stated that Hambletonian's immediate ancestors were not trotters. His sire, Treadwell's Abdallah, trotted a mile as a four-year-old in 3:10. His dam, the Charles Kent Mare, as a four-year-old, trotted a mile, to saddle, in 2:42, and right out of a butcher's cart at that.

Abdallah, the sire, was naturally a trotting horse. The Kent Mare, dam of Hambletonian, was naturally a trotting mare. Imported Bellfounder, sire of the Kent Mare, was wholly a trotter—came from a family of trotters, and was not advertised as good at any other gait.

Bellfounder, as before stated, was wholly a trotting horse. He stood 15½ hands high, his neck was long and fine, his head well formed, and his feet and legs first class. His trotting action was very pure, with just enough knee and hock action to please, and he could trot a mile in 2:40. Nowhere have we ever been able to learn that Bellfounder was noted for anything in the way of speed excepting the already stated fact that he was a trotter. It was not claimed of him that he could run fast, could pace fast, could draw immense loads, etc., and it has never been stated that Bellfounder was not a trotter.

Abdallah (Treadwell's) was a trotter and the sire of trotters. One of his sons, and the fastest and best, was out of a mare by King's Bellfounder, son of Imported Bellfounder. His only son to become a sire of 2:30 speed was Hambletonian, and he was out of a daughter of Imported Bellfounder. Belmont, the greatest son of Alexander's Abdallah, had for a granddam a daughter of Brown's Bellfounder son of Imported Bellfounder.

Examine the pedigree of Hambletonian from any standpoint; trace the various lines of breeding to some remote cross, and everywhere the selfsame fact comes prominently to view, to wit: That Hambletonian was trotting bred; that even though his ancestors were English-bred horses, belonging to the thoroughbred, or running, type, yet many of them were capable trotters. It is trot, trot and trot, all the way through Hambletonian's pedigree, and when one stops to realize this fact it quickly brings one around to the belief that Hambletonian was predestined to establish a family of trotters.

Had the Charles Kent Mare been physically able to stand training and given the attention usually bestowed upon trotters showing promise, it is quite certain that she could have secured a fast record. In an early issue of the Kentucky Stock Farm it was stated that some time after her exhibition of speed to saddle, over Union course, Long Island, when she trotted a mile in 2:42, the Kent Mare was again started under saddle, trotting the mile in 2:30. It should be remembered that at the time this performance was reputed to have taken place, not a single horse had trotted a mile in 2:30 in a race. The Charles Kent Mare produced eleven foals, the first being a filly that, in time, became the dam of Green's Bashaw, a noted Western sire of trotters. Below appears a list of the Kent Mare's foals:

1844, br f Belle (dam of Bashaw 50)...By Tom Thumb
1845, blk c (gelded).....By Tom Thumb
1847, ch f (died at four years old).....By Abdallah
1848, br f (died at four years old).....By Abdallah
1849, b c Hambletonian.....By Abdallah
1850, br f (no history of).....By Young Patriot
1851, lost foal.....By Black Hawk 24
1852, br c Tippoo Saib.....By Brooks' Black Hawk
1853, ch c (died young).....By Fiddler
1856, b c (gelded).....By Plato
1859, b c.....By Almack

The mating of the Kent Mare with Treadwell's Abdallah was certainly fortunate. Bred to other stallions, she produced other colts, none of which became noted as sires. The same holds true regarding her dam, One Eye, by Bishop's Hambletonian, who was mated with a number of stallions, yet the foal sired by Imported Bellfounder is the only one among the number that became famous.

Hambletonian was a Messenger-Bellfounder horse. He was inbred to Messenger, a thoroughbred stallion showing an inclination to trot. Mambrino, sire of Messenger, was certainly more than an ordinary trotter, as his owner at one time offered to wager one thousand guineas (about \$5000) that Mambrino could trot fourteen miles in an hour. Mambrino (the American-bred horse bearing that name) is reported as having been "a slashing gaited trotter." He undoubtedly inherited his trotting action from his sire, Messenger. Three sons of Mambrino established families of trotters, to wit: Abdallah sired Hambletonian 10; Mambrino Paymaster sired Mambrino Chief II; and Almack sired Grinnell's Champion.

Through the male and female line Hambletonian

traced to Blaze, the famous son of Flying Childers, as Messenger and Bellfounder both traced through the male line to Blaze, Bellfounder being one remove farther from Blaze than Messenger. As Bellfounder also traced to Blaze through the female line, the proportion of Blaze blood in Messenger and Bellfounder was practically equal. Even though the strains of blood referred to all had their origin in either the Darley or the Godolphin Arabian, or, to be more exact, in both stallions, it may be well to add that even during the time of the American revolution English horses were capable of trotting fifteen miles within an hour, and that such horses were descendants of Darley Arabian and Godolphin Arabian, to whom Hambletonian traced in his remote blood lines.

To the writer's notion, nothing that can be written of Hambletonian is more to his credit as a sire of speed than the fact that the Year Books give him credit with forty standard performances, all of which are trotters. These records range from the 2:17¼ of Dexter to the 2:30 of Pickering. Only one other stallion, known to students of the light harness horse, equals this showing, and the one referred to is Stamboul, sire of fifty-one 2:30 performers, all of which are trotters, and this horse is out of a daughter of Hambletonian 10, and his great-grandam was sired by Abdallah, the sire of Hambletonian. Stamboul also carried an additional cross to Hambletonian, through the dam of his sire, Sultan. But the fact that Hambletonian was the first horse to sire as many as forty standard performers, all trotters, and that one of his daughters became the dam of the only other stallion with an equal number of trotters, and no pacers among his standard performers, is, to our mind, one of the strongest arguments that can be produced regarding the wonderful trotting inheritance possessed by Hambletonian 10, and by him bequeathed to his descendants.

For over thirty years the writer has been a fairly close student of matters pertaining to the breeding of horses, and during that time he has never learned of any stallion the equal of Hambletonian in what should be considered the greatest proof of a stallion's greatness, and that is that Hambletonian is the only founder of a family of horses which was equally prepotent through the male and female lines, and whose most noted sons were equally prepotent in both lines of descent. Other stallions, noted as having established a particular type of horse, were only fertile through the male line, requiring an outcross to retain their prestige in after generations. The Hambletonian blood has been doubled, trebled, quadrupled, etc., with the very best of success. The inbred Hambletonians are the popular horses of the day. They are the winners of rich stake races or substantial purse races, and of ribbons at the matinees or the horse shows. They form practically all of the recent additions to the extreme speed list. They are absorbing the new standard lists. They are outnumbering all other applicants for registration. Shortly they will be the only breed of horses known to breeders of trotters.

Hambletonian never sired a 2:10 trotter. Such an animal was not known at the date of his death. However, the first 2:10 trotter was sired by one of his sons, as was likewise the second. The greatest sire of 2:10 speed is Gambetta Wilkes, a grandson of Hambletonian. The only sire of three trotters with records as fast as 2:06 and better is Chimes, a grandson of Hambletonian. The greatest sire of 2:10 trotters is McKinney, a great-grandson of Hambletonian. The fastest pacer in the world traces to Hambletonian through both sire and dam. The champion trotting stallion, the champion trotting gelding, the champion trotting mare, the champion trotting yearling, the champion trotting two-year-old, the champion trotting three-year-old, the champion trotting four-year-old, the champion five-year-old trotter, and numerous champions at various ages and styles of going, all trace to Hambletonian 10 through the male line.

As 2:10 is considered the extreme speed test, it may be learned by those interested that of the 258 trotters with records of 2:10 or faster, 231 are male-line descendants of Hambletonian 10. Take the 2:10 trotters of 1905, if you please. There were thirty-three additions to this list last season, thirty-two of them being male-line descendants of Hambletonian, while the odd one, tracing through the male line to other sources, marches back to Hambletonian through the female line. Something like 2100 additional standard performers (including trotters and pacers) were added last season. Of this number, nearly 1600 trace through the male line to Hambletonian, and by this is meant the direct male line, and not through the dam of either a sire, grandsire, great-grand sire, etc. Take the case of Prodigal, one of the leading sires of new standard performers. This stallion traces to Hambletonian 10 through the male line, but not through the "direct male line," as his sire is a member of the Mambrino Chief family, though the sire of his dam was a son of Hambletonian. Were one to tabulate the pedigrees of all the new standard performers of 1905, it would doubtless be learned that practically every one of these newcomers traced through some line to Hambletonian 10. We would almost be inclined to lay a wager that at least 98 per cent of the trotters traced at least once to the stallion referred to. Each year but adds to the greatness of the Hambletonian cross. Ultimately every 2:30 trotter, every 2:25 pacer, will carry one or more lines tracing to Hambletonian 10. This is inevitable. One may declare that there is too much "Wilkes" talk, too much "Electioneer" talk, too much of anything that traces to Hambletonian, but the facts warrant the assertion that in time even those who do not fancy the Hambletonian family will be obliged to use horses tracing to Rysdyk's great stallion for racing and pleasure driving. It will either be this, take to the automobiles, the saddle horses, or pattern after Daniel O'Leary.

In conclusion, it may be interesting to present a table showing the stud services of Hambletonian, who made twenty-four public stud seasons, which gives the number of mares served each season, service fee received and number of foals resulting from such service:

Year.	Age.	Mares.	Fee.	Foals.
1851	2	4	None	3
1852	3	17	\$25	13
1853	4	101	25	78
1854	5	88	35	62
1855	6	89	35	64
1856	7	87	35	64
1857	8	87	35	63
1858	9	72	35	54
1859	10	95	35	65
1860	11	106	35	72
1861	12	98	35	68
1862	13	158	35	111
1863	14	150	75	92
1864	15	217	100	148
1865	16	193	300	128
1866	17	165	500	75
1867	18	72	500	42
1868	19	none—sick		
1869	20	22	500	18
1870	21	22	500	16
1871	22	30	500	26
1872	23	30	500	24
1873	24	31	500	20
1874	25	32	500	24
1875	26	24	500	2
Totals.....		1,920	\$308,100	1,334

Note No. 1.—So many friends having mailed us tabulations of a favorite colt or filly, showing a certain number of crosses to Hambletonian 10, and the unusual per cent of these tabulations tracing ten times to the same stallion, has at length compelled "Columbus" to harken to the oft-repeated assertion, boastfully though it was made, "And what do you think of that?" "Ten crosses to Hambletonian" and "What do you think of that?" chasing through one's mind so many times, is quite apt to create trouble. The reader has it in the foregoing paragraphs.

Note No. 2.—The table presented above was taken from some paper devoted to the light-harness horse, but so many years ago that we have no remembrance of which journal it was published in; so can not give proper credit. It appears in one of our scrap books, without credit.—Columbus, in Western Horseman.

OPPORTUNITY.

An unequalled opportunity is knocking at the door of every breeder of the trotting horse on the Pacific Coast, the opportunity of a lifetime and one that may knock but once. Not since the boom days have trotters and pacers of merit, youngsters of promise and any light harness horse of "class" been in so great demand in the East. The visible supply falls far short of the demand and the scarcity of first-class material has caused an increase in values that has brought the present range of prices up higher than at any time since the days of the boom. The many auction sales held in the East during the past winter season have been stupendous successes. Every animal of merit that has been offered has brought full value, and this is particularly true of youngsters of promise.

The announcement of the annual "Blue Ribbon" sale of Fasig-Tipton Company, to be held at Cleveland, Ohio, the week of May 14th to 19th, occupies a prominent place in our advertising columns this week. It is The Opportunity, and every California horseman with material ready for the market should grasp the opportunity and consign his stock to this, the greatest of spring sales. By so doing he is assured of every requisite that goes to make a great sale—a great market, good company and the presence of every buyer of prominence in the East, and at a time when the demand is good and prices rule high. The man who takes advantage of the situation, ships his stock to the Cleveland sale ready to show its true worth, will reap the harvest. But the time is short, and prompt action is necessary. Write today to Fasig-Tipton Company, Madison Square Garden, New York City, and tell them what you have to sell. It will pay you.

DATES FIXED FOR BIG STAKES.

Readville, Mass., April 2, 1906.

Editor of Breeder and Sportsman: Dear Sir—We are much gratified to learn from trainers that they have been quick to grasp the opportunities that our series of Early Closing Purses coupled with our short system of racing afford for starting a horse twice at our meeting, thus giving it two chances at big purses for the cost of one shipment. So many trainers have written us that they would start a horse in the Blue Hill and Massachusetts events, or the Norfolk and Neponset events if two days were scheduled between the races, that we have, in advance of our usual custom, arranged that the Early Closing Purses shall be raced in the following order:

Monday, August 20th, the Blue Hill, 2:30 class, trotting.

Tuesday, August 21st., the Norfolk, 2:08 class, pacing.

Wednesday, August 23rd, the Ponkapoag, 2:10 class, trotting.

Thursday, August 23rd, the Massachusetts, 2:14 class, trotting, and the Readville, 2:08 class, trotting.

Friday, August 24th, the Neponset, 2:06 class, pacing.

Very truly yours,

C. M. JEWETT, Secretary.

OILED ROADS IN CALIFORNIA.

The making of road surfaces by means of oil is peculiarly a feature of California ingenuity, says the Sacramento Union. The spectacle so common to the Californian is looked upon with perplexity by the visitor who does not understand the absence of dust, the smooth resilient surface, and the impermeability to water. Then when it is explained to him that these admirable features are due to oil, he examines the road with a new interest as illustrating a kind of roadmaking of which he has heard, but which has not yet been introduced to the world outside of California.

But its advantages are so great that it must eventually be adopted elsewhere, and California will be called upon to supply her full share of the oil. Already experiments have been made in Texas, and also to a limited extent in Pennsylvania, New Jersey, Indiana, Colorado, and the District of Columbia. England, France and Switzerland have also been tempted into trials, and when these tests have been proved to be satisfactory, it must be found that the use of oil upon roads has become an established principle.

The remarkable effect of oil upon road surface was almost an accidental discovery. In 1898 the Supervisors of Los Angeles county, confronted with the problem of intolerable dust, determined to try the effect of oil as being probably more efficacious than water. They had reason to be satisfied with their experiment, for the dust disappeared and was no more in evidence for the season.

A renewal of the application for the following year was equally successful, and it was then found that the dust was permanently banished. Dust in the southern part of the State means more than it does in the northern. In the south it was one of the great miseries of life, one of the plagues of existence. It could not be excluded from the houses, because it was as pervasive as the air itself, while its destruction of orchard produce was one of the permanent discounts upon agricultural profits. But wherever the oil has been spread the dust has become merely a page of history.

But it was very soon found that the abolition of the dust was a secondary advantage only, and that from the struggle against a nuisance, an important discovery had been evolved. It was noticed that the oil exercised a binding effect upon all loose particles, and that a kind of asphalt covering had been made that was quite unlike any kind of road yet known. Roads that were hitherto almost impassable through drifting sand and soft clay became hard, tough and resilient, and where driving had been a labor and a nuisance it had become a pleasure. These results, of course, varied in degree, but they were sufficiently evident to show the importance of the discovery and to tempt to new investigations and observations.

At the end of the year 1904 practically the whole of California had risen to its opportunities and oiled roads were the order of the day. Los Angeles county was in the van as the pioneer, and no less than 383 miles of roads and 130 miles of streets testified to her energy in improved construction. In all, forty counties had adopted the new methods to a greater or less extent. San Francisco had only ten miles and Sacramento had 103. Santa Clara had 173 miles and Ventura 150. The total for the State was 2776 miles, and in addition there were 1099 miles of oiled railway bed, certainly a remarkable showing for so short a space of time. In Sacramento county the first work was done in 1902, and the best examples of the work are perhaps to be found on the six miles extending south from Sacramento on the Upper Stockton Road, the eleven miles extending east on the Folsom Road, and the three miles on the Riverside Road.

Nathaniel Ellery of the State Department of Highways probably knows as much about oiled roads as any man in California. With a view to getting the most up-to-date opinion upon the subject a Union reporter asked Mr. Ellery to say something as to the latest experiments and conclusions upon a matter so important to the State. Has the last word been said as to the way in which the work should be done, and the present results—admirable as they may be—the best that can be looked for? Is there a right way and a wrong way of oiling roads, and are different methods called for by different kinds of surfaces? These and many similar questions were propounded to Mr. Ellery, and he answered them all with admirable and patient clearness.

"The oiling of roads," he said, "has not been so successful as it should have been. The methods could, in my opinion, be so far improved upon as to effect an immense advance over what we have at the present time, and to give us permanent results instead of impermanent."

The whole subject, and every department of it, has to be made the subject of minute and analytic study. The oil itself varies greatly in its constituents, and of course no two roads are identical in their make-up. Every road has its own individuality, and any particular variety of oil may be congenial to one kind of road and not to another. We want to know exactly how the oil will behave on different kinds of roads and in conjunction with different soils. Oil and sand, for instance, produce a kind of artificial bitumen that gives good results, while oil mixed with alkali will disintegrate as a result of certain chemical processes. In such cases the effect is temporary and not of much practical value, but between these two extremes there are many gradations. There is one general principle that must be adhered to in road building, and in the oiling of roads, and that is to keep the density of the soil even and equal, and the density of the soil may vary every few yards. It has also to be remembered that lime has a chemical action upon the oil, and when this takes place it

destroys the qualities in the oil that are necessary to the making of a good road. In a general way it may be said that the whole question resolves itself into a study of soils. You must know the road that you are working upon, and you must modify your conditions to suit its individuality.

Perhaps the very best road is a macadam treated with a heavy asphalt oil. The oil should be allowed to penetrate between the top layers of rock, so as to cement them together. The oil that remains upon the top should then be sanded, and the sand should be allowed to thoroughly incorporate with the oil. No traffic should be allowed to pass over it for a week or ten days so that it may get firm and solid. If such a work is thoroughly and carefully done an ideal road will be the result. You will then have a bituminous macadam.

Oiled roads should be built for heavy traffic as well as for light, and it is from the heavy traffic that the complaints have largely come. Oiled roads have been said to throw a great strain upon the horses, and to produce an undue drag. Now this ought not to be, and it would not be if the right conditions were observed. The road that is to be used for heavy traffic ought to have some kind of foundation, and it must be saturated with the oil. A macadam road such as has been described, where the oil has been allowed to drain in, will have none of the disadvantages sometimes complained of, and it will be suitable for heavy traffic without undue strain upon the horses. The system has already been transformed by experiments since the early days of its discovery. In such places a lack of success has been encountered, while in other places the success has been very marked. There ought to be a uniform success, and there will be when conditions are properly observed and studied. Even density throughout the work is of primary importance, and the oil should be taken up with a good sand. Then the results will be satisfactory. But oil alone will not suffice for heavy traffic. For this there must be a foundation if you are going to have a surface that will withstand the pressure of heavy wheels.

Adobe soils that are often met with present special difficulties. The only thing that can be done with adobe is to give it all the sand and fine gravel that it will hold. It should be saturated with the sand and gravel to a depth of from 12 to 15 inches. Then oil it, being careful to keep water away from it, and the result will be as good as any.

In addition to the information supplied directly by Mr. Ellery, the bulletin upon the subject that has been issued by the Department of Highways contains much valuable information. The oiled roads of Sacramento county have been of many different kinds—gravel, adobe, red clay, sand, sandy loam and macadam. The best results have been secured from macadam roads, and the next best on sandy loam, while the most difficult have been those on adobe soil. In some cases an injury has been caused by the rows of trees, which have produced a continual dripping of water and an undue amount of shade. The oil was obtained from the Kern county oil fields at a cost of 70 cents per barrel, delivered in Sacramento. For the city streets the quantities used were 1.42 gallons per square yard for gravel streets and 1.34 gallons for the macadam streets.

WHERE ARE THE HORSES?

Where is the great crop of colts that the prophets told us would mature in 1906? When horse breeding began to breathe again in 1898 and to become general in 1899, expanded in 1900 and still more largely followed in 1901, we were assured by many seers with owl-like wisdom that by the year of grace 1906 there would be a plethoric oversupply of horses and that prices would once more have fallen below the point of profit. Now here we are in that year, prices are on the highest level, take them all through, ever known, and the shippers are hunting high and low, wearing out shoe leather in great quantities and though seeking many horses finding few. Obviously the prophets have erred somewhere. They are now without honor in any country so far as the horse business is concerned. Not so long ago it was confidently stated by a certain species of the genus calamity howler that "we had gone through the period of scarcity and not known it." Perhaps we did travel along such a line, but, if we did not know it, it could not hurt us. The actual fact is that whatever may be said of its past, the present horse market looks awful good to the man up a tree. Thousands of four-year-olds that are not yet "hard horses" in the language of the trade and therefore not fit to turn to work in city streets, are being sold each week in all the great marts, a great many three-year-olds are being marketed and as adverted to elsewhere even two-year-olds are passing through the auction sales at all of the leading centers of trade. Diligent inquiry elicits the most contradictory views as to the supply of colts and fillies not yet three years old, but it is sure that if the present rate of borrowing from Peter to pay Paul, that is, the drawing on not only one but two or three successive crops of foals, to meet the demands of the present, we must bump into the stone wall of an under supply sooner or later, and it surely looks as though things would soon be worse than they are now.—Breeder's Gazette.

Sterling R. Holt, owner of Sidney Dillon and proprietor of the Maywood Stock Farm, Indianapolis, is putting up an addition to his main barn which will contain an inclosed speedway, straightaway, of some 700 feet. The addition will be modern in every detail, and the building as a whole will be one of the most complete and spacious ever constructed by a trotting horse breeder.

Jackson's Napa Soda does not tangle the feet.

HAGGIN STALLIONS FOR PUBLIC SERVICE.

(Kentucky, Farmer and Breeder.)

Yielding to the pressure brought to bear upon him, Mr. J. B. Haggin, owner of the magnificent Elmendorf Stud near Lexington, has decided to allow a few outside seasons to the remarkable array of stallions which he has gathered together at Elmendorf. There is no other collection of stallions in the world that compares with it in point of numbers and few others that surpass it in the individuality of some of its members. With horses of proven reputation like Watercress, Star Ruby, Goldfinch and with others such as Kinley Mack, Africander and Dieudonne, which have the recommendation of performance, breeding and individuality behind them to assure their success, it is indeed a source of genuine gratification to all who have at heart the advancement of the breeding interests of this particular section and of the whole country that Mr. Haggin has come to his present conclusion. During his long and prominent connection with the thoroughbred breeding industry, this is the first time he has advertised any of his horses at public service. It should be borne in mind that the present course is adopted without desire to urge any breeder to patronize the Elmendorf stallions. Indeed we are convinced from personal knowledge of the situation that it would be much more acceptable to Mr. Haggin to be able to confine all his stallions to the Elmendorf matrons. But he doesn't wish to seem to ignore requests coming from other breeders, and these requests have been so numerous and so persistent that he has decided to offer the opportunity to send outside mares to his different horses.

The terms that will apply in the matter of service fees have not been made public. All of the horses are advertised as by private contract. But we have no doubt that those terms will be thoroughly reasonable. It is a matter of surprise to breeders of thoroughbreds in every other country of the world that the service fees of American stallions are placed so low. In England, France and elsewhere some horses are held as high as three thousand dollars a season, and many rank from a thousand dollars up. At the dispersal sale of the Rancho del Paso Stud, Mr. Haggin paid \$70,000 for Watercress, \$30,000 for Star Ruby and \$16,000 for Goldfinch. These amounts represent a very considerable investment. To receive on such an investment an adequate interest, the service fees of these horses must necessarily be of some size. It may be recalled that after the fall yearling sales closed we published a table showing the average attained by the yearlings of different stallions sold publicly last year. Watercress headed the list. Fourteen of his get, sold in the spring and fall sales, brought an average of \$4,509 each. Twelve of the yearlings of Dieudonne brought an average of \$1,850, fourteen of Star Ruby's an average of \$1,668, and eleven by Goldfinch an average of \$1,313. Of course the best of the get of Hamburg, of Meddler, of Disguise, of Ben Brush and of other stallions were not offered at public auction, but were kept by the owners of these horses for their own purposes. But it is a notable fact that the average attained by Watercress, \$4,509, was almost two thousand dollars ahead of his nearest competitor, Yankee, whose average was \$2,740, and practically twice as much as the average of the third horse, Solitaire II, six of whose youngsters, reached the very creditable figure of \$2,271.

Within the last few years there has been a great deal of complaint among the smaller breeders of this section about the scarcity of good stallions. They have maintained that whenever a horse secured a reputation through the performance of his progeny he was immediately held by his owner as private and no outside mares were allowed to be sent to him. The argument has consequently been advanced that the small breeder was not on an equal footing with the larger breeder, that even if he refused to sell his valuable mares he could not find horses of any proven merit with which to mate them. For more than a year we have been urging the men who control the large private breeding establishments of the Bluegrass to allow a few outside seasons to their stallions. We have suggested that sometimes an outside mare might be sent to one of them from which better results would be obtained than from the mares of the horse's owner. It is a notable fact that a large number of the most famous of the progeny of different sires, both in this country and abroad, have come from outside mares, and long experience in breeding in England has resulted in the making public of practically every stallion in that country. Of course some of them can only be had at very high fees and only for the most approved mares at those fees, but the wall around them is not insurmountable and it is possible to get to them under proper circumstances at a given outlay. True enough, there are no breeders in England who own as many mares as are to be found at our larger breeding establishments here. The best results there have been obtained from studs that were limited to ten or fifteen mares. This may have had something to do with the rule that holds sway with reference to outside seasons. We hope a similar rule may soon apply in America and that no horse here, no matter how great his fame, may be kept absolutely private if an outside breeder is willing to pay the price necessary to get to him.

We are exceedingly glad Mr. Haggin has seen fit to take this action. As we said before, we think it is a service of great value to the whole thoroughbred breeding interest of America. At least it can now be seen whether the smaller breeders, who have heretofore complained of the impossibility of securing seasons to desirable stallions, were sincere in their complaint, and whether they will be willing to patronize the Elmendorf stallions at reasonable prices.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

COMING EVENTS.

Rod.

Jan. 1-June 1—Closed season for black bass.
April 1-Feb. 1—Close season for steelhead.
April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Nov. 1—Trout season open.
April 1-Nov. 1—Open season for taking steelhead above tide water.
April 7—San Francisco Fly-Casting Club. Saturday Classification Contest No. 4. Stow lake, 2:30 p. m.
April 8—San Francisco Fly-Casting Club. Sunday Classification Contest No. 4. Stow lake, 10 a. m.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Oct. 16-Feb. 1—Open season for steelhead in tidewater.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-July 1—Dove season closed.
Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
April 1—California Wing Club. Live pigeons. Ingleside.
April 1—Blue Rock Gun Club. Grounds foot of High street, Alameda.
April 8—Empire Gun Club. Blue rocks. Alameda Junction.
April 8—Vallejo Gun Club. Blue rocks. Near Floden Station.
April 8—Capital City Blue Rock Club. Kimball & Ujson grounds, Sacramento.
April 14, 15—Los Angeles Gun Club. 18th semi annual tournament. \$500 added money.
April 15—Union Gun Club. Blue rocks. Ingleside.
April 22—Golden Gate Gun Club. Blue rocks. Ingleside.
May 26, 27—Pacific Coast Trap Shooters Association. Third annual blue rock tournament. Vallejo Gun Club grounds, near Floden Station.

April 23—Bull Terrier Club. San Francisco. Entries close April 21. Dr. W. H. Watkins, Secretary, 1505 Stockton street, San Francisco.
May 23, 26—Seattle Dog fanciers' Association. Seattle, Wash. Chas. McAllister, Secretary. Entries close —

PROSPECTS FOR TROUT FISHING.

Indications for tomorrow's sport, the opening of the trout season, in this State, point to rather an unpromising day. The recent rains have swollen the streams bank high. Reports from many points state that trout are—or were several weeks ago, plentiful.

At all events the anglerworm and spoon will have a long innings this year before the fly-fisher will find streams in favorable condition for casting.

Nearby resorts will get a flailing tomorrow that will go down in local fishing history, for the first falls on Sunday and this means, rain or shine, fish or no fish, there will be an army out.

The Paper Mill is promised a visit that will make Arthur Rochefort smile and smile again, but the denizens of Pario-land (or water) will be frightened out of their scales by the array of

Rods uplifted

And bait boxes fly-blown, along the banks of the main creek and its tributaries.

INTERSTATE'S PACIFIC COAST HANDICAP.

Editor The Breeder and Sportsman: Please announce to the readers of The Breeder and Sportsman that the Interstate Association's second Pacific Coast Handicap will be held at San Francisco, Cal., Sept. 7, 8 and 9, Ingleside grounds, under the auspices of the San Francisco Trap Shooting Association; \$1000 added money.

Yours very truly,

ELMER E. SHANER, Sec'y-Manager.

Pittsburg, Pa.

Among the visiting shooters at Ingleside last Saturday were H. A. Greene of Monterey and W. H. Varlen of Pacific Grove.

Mr. James T. Skelly of Wilmington, Del., has been a familiar figure on Sportsmen's Row during the past week.

Harvey McMurchie can't swim and proposes to leave Frisco today; since he has been here it has rained almost every day.

San Francisco Fly-Casting Club.

The fractions in lure casting are 15ths.

AT THE TRAPS.

The California Wing Club shoot at live birds is the scheduled trap event for Ingleside tomorrow.

Blue rock shooters will have a chance at the discs at the Blue Rock Gun Club shoot at the foot of High street, Alameda, tomorrow.

The opening shoot of the Vallejo Gun Club was held on the new grounds near Floden Station, March 25th. There were twenty-two contestants present, a fine showing for the first meeting. Mr. J. V. O'Hara and W. Chapelle shot in rare form (the latter in an event breaking 20 straight), centering their birds like veterans at the game.

At 20 targets the scores were: T. L. Lewis 12, 18; W. Rooney 16, 17; J. V. O'Hara 15; C. Drake 19, 16; Sessarego 12, 14; Wisecarver 11; Chappel 18; Comfort 14; Cadman 17; Elias 13; H. McMurchy 20; Burnett 14.

In the eleven-man team shoot at 20 targets per man, Capt. Clyde Drake's team beat Capt. Wm. Chappel's team, 160 to 145 out of 210 targets. The scores were: Drake's team—Drake 19, McMurchy 19, Cadman 17, Comfort 16, Clark 14, Sessarego 11, Wisecarver 15, Stelling 13, Magistrini 16, White 13, Lewis 16; total 169.

Chappel's team—Downing 15, Reams 14, Shouse 9, King 11, Togo Hirschle 18, Chappel 13, O'Hara 14, Rooney 14, Mayfield 17, Burnett 15; total 145.

In a five-man team shoot at 20 targets Drake's team again prevailed, the scores being:

Drake's team—McMurchy 20, Drake 18, Cadman 14, Rooney 15, Burnett 17, Sessarego 13; total 97.

Chappel's team—Chappel 20, O'Hara 16, Clark 13, Lewis 12, Comfort 18, Elias 13; total 92.

McMurchie broke 59 out of 60 in the above events and served 124 out of a possible 136. Among the other high guns were Hirschle, Sam Mayfield of Napa, W. Cadman of San Francisco, Drake and Shouse of Vallejo.

Taking the Vallejo Club members as a whole, their average is fully equal to the shooting qualities of any club in the State. The well known hospitality and enthusiasm of the Vallejo sportsmen gives assurance of a successful tournament, which will be held in their city May 26th and 27th, under the auspices of the Pacific Coast Trap Shooters' Association. We predict a fine and well managed shoot and indications point to a large attendance.

The Golden Gate Gun Club's regular shoot last Sunday at Ingleside was the culminating magnet that induced the attendance of thirty-five shooters despite the inclement weather conditions. A heavy gale from the southeast proved a handicap for most of the guns but nevertheless good scores were the average.

Emil Holling of the champion class in the regular club event of 100 targets showed in wonderful form, retiring with 96 breaks to his credit, for which he received first money. Mr. M. O. Feudner, with 89 breaks, was the winner of second money. Edgar Forster, with 87 kills, third money, and E. Schultz with 85, fourth money in the same class.

The winners in the first class were H. A. Green of Monterey first, W. S. Wattles second, Lee Harpham and F. Schultz dividing third money, and Mr. Hull fourth.

In the second class there were ten contestants facing the traps, of whom H. P. Jacobsen won first money, followed by E. A. Fano and H. C. Terrill dividing third money, F. Knick fourth and E. D. Harvey fifth.

Last, but not by any means the least, were the third class shooters. The winners in this squad, in the order named, were Turner, Dr. Sylvester and Johnson.

The closing event of the day was the A. M. Shields' trophy race, which resulted in a tie between C. C. Nauman (16 yards), W. S. Wattles (16 yards), and M. O. Feudner (18 yards), each breaking 23 out of 25 targets. Nauman won on the shoot-off at 10 targets, breaking 9; Feudner broke 8 and Wattles 7. The regular scores during the day were as follows:

Club race, 100 targets, 16 yards, class shooting, \$100 (\$25 for each class, 4, 5 and 3 moneys respectively):

Champion class—

Holling	25	23	24	24—96
Feudner	21	23	22	23—89
Forster	24	22	18	23—87
E. Schultz	19	24	21	21—85

Second class—

Jacobsen	22	19	18	17—76
Fano	19	21	16	19—75
Terrill	18	20	18	19—75
Knick	16	21	16	18—71
Harvey	17	18	19	15—69
Shields	17	12	19	19—67
Pisani	17	16	19	15—67
Hoey	19	18	16	13—66
Burns	14	17	16	18—65
Masterson	16	16	16	15—63

Third class—

Turner	15	21	20	16—72
De Sylvester	15	15	21	13—64
Johnson	16	16	16	16—64
Patriot	9	10	14	20—53

Shields trophy race, 25 targets, distance handicap:

Nauman, 16 yards, broke 23; Feudner 18-23, Wattles 16-23, Masterson 14-22, Iverson 14-22, La Mott 14-22, G. Sylvester 16-22, Reed 14-21, Terrill 14-21, Prior 14-20, Haight 14-20, Forster 18-20, E. Schultz 18-20, Greene 16-19, Holling 20-19, Dr. Pitres 14-18, Varlen 16-18, Jacobsen 14-18, Pisani 14-16, Fano 14-14, Donahoe 14-13.

At the Fresno Gun Club shoot on the 18th inst. J. Ed. Vaughan of Santa Ana was high gun 131 out of 140. A summary of individual scores follows:

At 10 targets—Holdscrow 7, Ellert 9, Vaughan 10, Donald 6, Adams 7, Weinberg 9.

At 20 targets—Holdscrow 17, 16, 18, 19, 18, 17, 17, 18; Ellert 18, 14, 19, 17, 15; Vaughan 18, 17, 19, 19, 19; Donald 9, 7; Adams 17, 15, 16; Weinberg 16, 11, 11, 8, 14, 10, 6; High 15, 10, 11; Webb 10, 13, 11; Stone 13, 16, 19; Crawford 11; Garner 8, 12, 11, 17; Schleuter 13, 13, 16, 16, 16; Slim 14, 15, 8; Meyers 15, 13, 8, 13; Lewald 20 rocks 11, 12; 25, 15.

At 25 targets—Holdscrow 24, Ellert 20, Garner 14, Schleuter 20, Meyers 18, Lewald 15.

The Capital Bluerock Club held its regular shoot at the new grounds on Whisky Hill, near Sacramento, last Sunday. Despite the threatening rain and high wind some good scores were made. Harry Derr broke 76 out of a possible 80 and F. Newbert 57 out of 60. The Capital City medal was won by Mr. Derr with a score of 19 breaks. Dave Ruhstaller won the Washington medal with a clean score of 20. He had none to spare, there being several 19 scores. At the next shoot Derr and Ruhstaller will be obliged to shoot from the 18-yard mark.

Following are the scores of each shooter in two 20-target races:

G. Davis 10-10, G. Menke 12-12, J. W. Hughes 17-14, F. Newbert 20, H. Derr 18-20, Menke Jr. 9, E. B. Julian 10-10, F. Adams 6, C. Morgan 11, C. Cotter 14-11, D. Ruhstaller 15, H. J. Vetter 16-13, W. Mott 8, F. Schoenbacher 12, H. Kessig 12-11, J. Fraser 7, E. D. Adams 12, Dr. R. Smith 13-18, G. F. Shepherd 10-13, C. Laauser 14-15, F. Ruhstaller 17, W. Sayers 15, H. L. Pearson 10, F. Reichert 14, W. O. Blinn 13.

Washington medal race at 20 targets—Mott 6, Cotter 10, Sayers 15, Pearson 7, Menke 8, Davis 13, Laauser 11, Newbert 19, F. Ruhstaller 18, Menke Jr. 10, Schoenbacher 10, Reichert 18, Al Merritt 16, Dr. Smith 15, E. Adams 15, D. Ruhstaller 20, Schenkle 12, Vetter 16, Hughes 14, A. Elkus 8, Kissig 15, Julian 7, Trump-ler 12.

Capital medal race at 20 targets—F. Adams 17, Cotter 10, Bauer 10, Sayers 16, Pearson 6, Menke 12, Davis 11, Derr 19, Laauser 16, F. Ruhstaller 17, Newbert 18, Schoenbacher 9, Morgan 6, Reichert 12, E. Adams 13, Morgan 6, Reichert 12, E. Adams 13, D. Ruhstaller 16, Vetter 15, Hughes 18, Dr. Smith 13, Shepherd 8, J. Fraser 10, Kissig 14, Mott 11, Schenkle 12, De Merritt 18, Pratt 8.

Twenty targets, three-man team—Mott, Vetter and

Schenkle, 31; Pearson, Schoenbachler and Laauser, 29; Ruhstaller, Menke and Ruhstaller, 36; Smith, Davis and Julian, 26; Newbert, Derr and Menke, Jr., 50; E. Adams, Kessig and De Merritt, 47; Elkus, Sayers and Hughes, 37; Cotter, Reichert and Trumpler, 28. Newbert, Derr and Menke, Jr., won with 50 breaks out of 60.

At San Bernardino on the 23rd inst. Gus Knight Jr. won a 100 live bird match against "Bill" Clayton of Kansas City on a score of 91 again 88 for a wager of \$200 a side.

In spite of rain, the match was witnessed by more than 100 Southern California enthusiasts. The Missouri man had several out of town backers in San Bernardino with him and they played some money on his ability to defeat Knight, which of course they lost. Their losses, including the wager, are said to be not far from \$600.

Clayton's defeat, however, was by no means ignominious, and it was only because he met one of the best shots on the Coast that he went down to defeat for the first time in several years in a live bird race. Clayton is down south at present for the purpose, among other things, of attending the Catalina shoot early next month. A return match for \$500 a side is talked of. Knight lost 7 birds dead out. The scores were:

Knight—
2 1 1 1 1 * 1 1 1 1 1 1 * 1 1 2 2 * * 2 1 1 1 1 1—21
1 1 1 2 2 1 1 2 2 2 1 2 1 2 2 1 2 1 1 1 1 2 1—25

The San Jacinto Gun Club has issued invitations to all the gun clubs in Southern California, and all sportsmen within reaching distance for its annual blue rock tournament, which will be held on the club grounds at San Jacinto, April 18, 19 and 20. The shooting will be open to all, with a handicap to experts. There will be several team shoots open to members of organized clubs, and cups will be offered to teams and individual shooters, together with a number of merchandise prizes in the sweepstakes and several cash prizes.

The Monarch Gun Club of Reno, Nev. held the initial club shoot on March 17th. The main event was at 16 live birds, the scores were: H. Cohn 14, D. Brown 13, L. Sauer 12, G. Sauer 12, F. Quinn 9, M. Parrott 8, H. May 7, T. Stapleton 5, J. O'Brien 5.

The Reno Journal states: The prizes were a pig's head and a bottle of hair tonic, which were declared by the members of the club to have been appropriate awards. Another shoot will be held in the course of a few weeks.

SPECIAL MEETING OF THE INTERSTATE ASSOCIATION.

New York.—A special meeting of the stockholders of the Interstate Association was held in the offices of the Lafin & Rand Powder Company, 170 Broadway, New York City, on Friday, March 2.

The meeting was called to order at 10 o'clock a. m. with President J. A. Haskell in the chair.

The roll call showed the following members present: Union Metallic Cartridge Company, by A. C. Barrell; Winchester Repeating Arms Company, by S. G. Lewis; Parker Brothers, by W. F. Parker; E. I. Du Pont Company, by J. T. Skelly; Lafin & Rand Powder Company, by J. A. Haskell; the Peters Cartridge Company, by T. H. Keller, and the Lefever Arms Company, by A. H. Durston. The Remington Arms Company was represented by A. C. Barrell by proxy. A. W. Higgins of the Lafin & Rand Powder Company, W. R. Clark of the Winchester Repeating Arms Company, and L. C. Parker of Parker Brothers were also present, as was Elmer E. Shaner, secretary-manager of the association.

The minutes of the annual meeting, held at Oakland, N. J., December 14, 1905, and those of the adjourned annual meeting, held in New York City, December 14 and 15, 1905, were read and approved.

The association reiterated its resolution to add \$500 to each of the subsidiary tournaments, and expects that each of the clubs holding the subsidiary tournaments will add \$500 also, making a total of \$1000 added to each.

On reconsideration the motion made at the annual meeting of 1905, covering program advertising at fixed rates, was annulled.

Mr. W. P. Markle tendered his resignation as a member of the tournament committee, and his resignation was accepted. He had severed his connection with the Hoyt Metal Company, and therefore was no longer in a business way interested in association matters. Mr. Harvey McMurchy of the Hunter Arms Company was unanimously elected to fill the tournament committee vacancy.

Mr. L. B. Fleming was elected to fill the vacancy on the handicap committee, consequent on the death of the lamented Will K. Park.

It was decided that the entrance fee to the Grand American Handicap championship events shall be \$15.

The following resolutions were unanimously adopted:

"Whereas, In view of the loss we have sustained by the decease of our friend and associate, Mr. Will K. Park, and of the still heavier loss sustained by those who were nearest and dearest to him; therefore, be it

"Resolved, That it is but a just tribute to the memory of the departed to say that in regretting his removal from our midst we mourn for one who was, in every way, worthy of our respect and regard.

"Resolved, That we sincerely condole with the family of the deceased on the dispensation with which it has pleased Divine Providence to afflict them, and commend them for consolation to Him who orders all things for the best, and whose chastisements are meant in mercy.

"Resolved, That this heartfelt testimonial of our sympathy and sorrow be forwarded to the wife of our departed friend by the secretary of this meeting."

Many other business matters of routine importance were attended to fully.

ELMER E. SHANER, Sec'y-Manager.

DOINGS IN DOGDOM.

Signs of the Times.

Field and Fancy in a recent issue offers the thinking fancier a significant statement to consider. This, following the paragraphs concerning English judges, prompted by the selection of home talent entirely for the Westminster Kennel Club show, is a sign of the times that heralds a coming change long desired by dogdom at large. We know of not a few Coast fanciers who will heartily agree with the facts as set forth below, for they have found that, although "distance lends enchantment" in some things, it don't go in the doggy game. The statement we refer to is the following:

"One of the favorite expressions of the English doggy writers is the term 'Dollarland,' which is taken to mean the United States. One of the leading English weeklies goes so far as to use the heading 'Dogs in Dollarland' over its American items, and the expression is continually used in this and other papers' regular columns. The use of the term ought to cause our fanciers to stop and think, for it shows very plainly what English dog people think of this country. They seem to have an idea that Americans were put on the earth for the sole purpose of buying remarkably poor specimens of dogs for very wonderfully high prices, and the word that they use to indicate America is only one of the indications of what they think of us. That they have been given good reason to think as they do there is not the slightest doubt, but is it not time that we woke up to the fact that we are being played for suckers?

Great credit must be given to the English people, for they have certainly played their cards well—so well, in fact, that even to-day there are people in this country who think that any imported dog can beat a home bred to a standstill. This idea has been fostered and promoted very largely by the English handlers, who by their periodical trips of purchase to the other side, are able to keep the wolf from the door.

These men have outlived their usefulness. A few years ago they were a necessity, for when we did not have any good dogs here we naturally had to go to England for them, but things have changed, and we now have both knowledge and dogs enough to stand by ourselves.

There is enough breeding stock in practically every breed right here in the United States to produce dogs as good, if not better, than those that are being brought over here now, but we see into have gotten the habit for importing. If Americans would only remember the slur—yes, the insult—that is thrown in our face twenty times a week by the use of the term 'Dollarland' they would never again send to the other side for a dog. Of course, wise and careful importation will always be a good thing, but the indiscriminate way in which it is now being done does not nearly repay the expenditure of money that it involves. In one or two breeds, to be sure, we have not stock enough to breed what we want, but this is the exception, not the rule, and in most cases you can get just as good here as you can on the other side, and for about one-tenth the price. Englishmen think that an American can and will pay any price—the higher the easier to sell—and it is dollars to doughnuts that you will not get any very great bargain when you buy in England.

Remember the term 'Dollarland,' support the American breeder, and, above all, be a breeder yourself, and it will not be many seasons before we will have the best dogs in the world. It will also then be no longer necessary for the A. K. C. to pass rules that will be protective of the breeders for this country.

Entries Close Soon.

It is well to bear in mind that entries for the Bull Terrier Club's one day show will positively close on April 21st. Get your entries in early, it will save the bench show committee lots of time and trouble. The list of specials and cups will be worth trying for. The show, it is claimed, will count four points.

Winners will show again, of course, either on the circuit or surely at the June show. Losers will go to the June show, if to no others, just to find out what a better judge will say about their dogs.

Stilleto Kennels.

Mr. Chas. Reid Thorburn has applied for the name of Stilleto as a kennel name. One of the recent litter, a dog puppy, out of Meg Merrilies II by Bloomsbury Baron, was sold this week to a visiting Eastern fancier for a good price.

Stilleto Kennels, with that remarkably fine bitch Meg Merrilies II and Woodlawn Baron, a vigorous young stud dog, one that will go in the very best company, as a nucleus, can be reckoned as one of the best Bull Terrier kennels on the Coast.

Entries for the Southwestern Kennel Club show in Los Angeles, April 11-14, will close on April 3.

Wandee Kennels Broken Up.

The report is published in several Eastern exchanges that Mr. Chas. K. Harley has decided to give up the Wandee Kennels and dispose of his string of Fox Terriers.

Mr. Harley arrived here last week for a stay of about ten days. Pressure of business is alleged as the reason for the move.

Mr. Lyndon joined Mr. Harley here, coming direct from the Buffalo show, and will arrange for the disposal of all of the dogs now at Menlo Park, possibly more than 100 in number, where Wandee Kennels are located.

This news will, no doubt, be received with much regret by the Coast fancy, for Mr. Harley was a staunch supporter of our shows and a thorough sportsman. As to the fancy for the breed, we believe, notwithstanding all Mr. Harley has done here, his retirement will leave the Fox Terrier cult in the hands of several fanciers who will maintain the high standard achieved by Coast dogs. Mr. Harley can retire with the satisfaction of breeding a dog that carried the Wandee colors to the front against the strongest competition the United States could muster one year ago. Wandee Knight, whose most recent win, the Challenge Cup at Buffalo, was the fitting close of a phenomenal homebred dog's career in Mr. Harley's string. Wandee Florence, a daughter of Knight, is regarded by many Eastern fanciers as a coming champion; she certainly was a sensation this spring in the East.

Of the stars in the kennels Coastguard and Lucretia are for sale and in fact the majority of the dogs will be offered for sale.

Mr. Lyndon will in the near future locate in the vicinity of New York and devote his attention to Fox, Irish, Bull and Scotch Terriers, in which breeds he is without a peer in this country today.

TRADE NOTES.

Averages Reported.

Des Moines, Ia., March 14th to 16th.—W. R. Crosby, first general average, 561 out of 600, shooting "New E. C." (Improved); L. R. Barkley, Chicago, Ill., first amateur and second general average, 559 out of 600, shooting "DuPont"; Don Morrison, third general average, 553 out of 600, shooting "New Schultze"; H. C. Horton, Fonda, Ia., second amateur average, 549 out of 600, shooting "DuPont." F. A. Weatherhead, Red Oak, Ia., won Iowa State Championship Cup with 96 out of 100, shooting "DuPont"; Charles Spencer won the prize for experts above 90 per cent with 97 out of 100, shooting "DuPont"; John Burmister, Spirit Lake, Ia., won the Ottumwa Diamond Badge with 46 out of 50, shooting "DuPont."

Fiddling Avoided.

A pleasing and none the less important feature of the many good ones embodied in the Hunter One-Trigger gun is the fact that the shooter using this now favorite combination, the L. C. Smith gun built to order or afterwards fitted with a single trigger, can maintain a firm, steady grip on both barrels. There is no relaxing, no regripping, no reaccommodating oneself to the different length of stock, nor to a different trigger in a different place and of a different shape. A sportsman can hardly appreciate, until he has tried the Hunter One-Trigger, just how much of a benefit this firm, steady grip is. In other words, while he is "fiddling" around, adapting himself to the changes in the two-trigger gun, his bird, or target, is rapidly moving out of range. While, on the other hand, the one-trigger so completely does away with all these handicaps that in every case it means a better and a surer shot.

For inanimate target shooting the Hunter One-Trigger is commended for many reasons.

At the Vallejo Gun Club shoot, March 25th, Harvey McMurchy, shooting an L. C. Smith single-trigger gun, broke 59 out of 60—two twenties and a nineteen—dusting his last bird.

History Repeats Itself.

The Golden Gate Gun Club shoot at Ingleside, March 25th, took place under the handicap of a heavy gale of wind.

Emil Holling broke 96 out of 100 targets, using a Remington gun and U. M. C. ammunition. M. O. Feudner broke 89, Edgar Forster 87 and Ed Schultz 85 each out of 100.

Four of the winners in the first class used U. M. C. products exclusively.

Three of the winners in the second class used U. M. C. shells.

The three winning guns in the third class used U. M. C. ammunition exclusively.

Two of the three high and tie guns in the Shields trophy race used U. M. C. shells.

C. C. Nauman, the final winner, won with U. M. C. shells.

The entire list of contestants numbered 35, when it is taken into consideration that 26 out of this number were users of U. M. C. ammunition, to the exclusion of all other makes, it is a sufficiently noteworthy showing for the famous products of the U. M. C. and renders it unnecessary to further extol the perfection and accuracy of this always reliable ammunition.

Adjectives are now put aside for the plain business statement of the day's showing in purse winnings: \$100 was distributed in the four classes—champion, first, second and third, and of this amount \$75, or three-fourths of the entire money, went to users of the U. M. C. ammunition.

The Vallejo Gun Club opening shoot, March 25th, was participated in by 22 shooters, 20 of whom used U. M. C. "Acme," "Magic" and "Monarch" shells. Another evidence of far reaching popularity, built upon a foundation of well justified confidence, was the showing of U. M. C. ammunition at this shoot.

GROUSE AND WILD TURKEYS OF THE UNITED STATES, AND THEIR ECONOMIC VALUE.

By Sylvester D. Judd, Assistant United States Biological Survey.

The Rock Ptarmigan.

The rock ptarmigan (*Lagopus rupestris*) inhabits arctic America from Labrador to Alaska (including the entire Aleutian chain, where the willow ptarmigan is unknown). It is similar to the latter bird, but smaller and has a black line from the bill to the eye, by which it may readily be distinguished. This bird is less common than the willow ptarmigan and prefers more rocky and elevated situations. Owing to its smaller size and fewer numbers it is far less important to the people of the north as an article of food than the willow ptarmigan. Besides the typical *Lagopus rupestris* of arctic America, the rock ptarmigans of North America include the Fairbaird ptarmigan (*L. a. fairbairdi*), of Greenland and Northern Labrador, the Welch ptarmigan (*L. w. welchi*), of Newfoundland, and four forms found in the Aleutian Islands—*L. a. leucotis*, *L. a. atkinsensis*, *L. a. townsendi*, and *L. evermanni*.

Food habits.—No stomachs of the rock ptarmigan have been available for examination. In Alaska, during May, E. W. Nelson found it feeding on berries of the preceding season. (Nat. Hist. Coll. Alaska, p. 136, 1887, 1888.) Major Bendire says that the sub-species *Lagopus rupestris fairbairdi* feeds on insects, leaves, berries, including the crowberry (*Empetrum nigrum*), tender leaves of the dwarf birch and white birch, willow buds, and sorrel. (Life Hist. N. Am. Birds (I), p. 80, 1892.) Samuel Hearne notes that the rock ptarmigan eats the buds and tops of the dwarf birch (*Betula glandulosa*). (Journey to Northern Ocean, p. 416, 1795.) Kumlien examined a crop that was crammed with sphagnum moss. (Bull. 15, U. S. Nat. Mus., p. 83, 1879.)

The White-Tailed Ptarmigan.

The white-tailed ptarmigan (*Lagopus leucurus*) is found above timber line in Alaska, in the mountains of British Columbia, and in the higher Cascades south to Mount Hood and Jefferson. It ranges south along the Rocky mountains through Colorado to northern New Mexico. Unlike the other species, this ptarmigan has no black feathers in the tail. Writing of this bird in Colorado, W. W. Cooke says that it breeds above timber line, virtually under arctic conditions, and that only in most severe winters does it descend into timber. He records that it breeds at from 11,500 to 13,500 feet altitude, and wanders up to the summits of peaks 1,000 feet higher. Nesting takes place early in June and is similar to other ptarmigans. In winter, when the birds descend to lower altitudes, the sexes are in different flocks.

The white-tailed ptarmigan is a trusting creature, lacking the fear necessary for self-preservation. Clark P. Streater, while employed by the Biological Survey in the Cascade mountains of Washington, reported that one could approach within ten feet of it, that miners killed it with stones, and that it was very good for food.

In Colorado public sentiment is strongly in its favor, and it is protected by an absolutely prohibitory law. The ptarmigan is one of the sights pointed out to tourists in the Colorado mountains. Its status here may be contrasted with that of the willow grouse in the north, where thousands are killed by Eskimos and Indians. Killing birds for food, however, even by wholesale, has its excuse, but wholesale slaughter for millinery purposes, such as has overtaken the ptarmigans in the Old World, is unpardonable. A single shipment of ptarmigan wings in Russia consisted of ten tons. (Engelhardt, A Russian Province of the North, 1899.)

Food habits.—During winter in Colorado, according to Professor Cooke, they subsist, like other ptarmigan, largely on willow buds. The stomachs of two birds collected at Summitville, Colo., in January, 1891, at an altitude of 13,000 feet, were found to contain bud twigs from one-third to one-half inch long, but the kind of bush from which they came could not be determined. Doctor Coues, quoting T. M. Trippé, states that the food of this bird is insects, leguminous flowers, and the buds and leaves of pines and firs. (Birds of the Northwest, p. 427, 1874.) According to Major Bendire, the flowers and leaves of marsh marigold (*Caltha leptosepala*) and the leaf buds and catkins of the dwarf birch (*Betula glandulosa*) are eaten. (Life Hist. N. A. Birds (I), pp. 85-86, 1892.) Dr. A. K. Fisher examined the stomachs of two downy chicks collected on Mount Rainier, Washington, and found beetles and flowers of heather (*Cassiope mertensiana*) and those of a small blueberry.

The Wild Turkey.

The wild turkey (*Meleagris gallopavo*), our biggest game bird, was formerly abundant over a wide area. It has been exterminated throughout much of its former range, and unless radical measures are taken it will become extinct in a few years. The typical *Meleagris gallopavo* is restricted to Mexico; but four geographic races have been recognized within the United States. These are the wild turkey of the Eastern States and the Mississippi Valley (*Meleagris gallopavo silvestris*); the Florida turkey (*M. g. osceola*); the Rio Grande turkey (*M. g. intermedia*); and the Merriam turkey of Colorado, New Mexico, Arizona and the tableland of northern Mexico (*M. g. merriami*). In early colonial days it was numerous in Massachusetts, coming about the houses of the settlers in large flocks. It is now totally extinct in New England. It is hard to realize that at the beginning of the nineteenth century turkeys were so abundant that they sold for 6 cents apiece, though the largest ones, weighing from 25 to 30 pounds, sometimes brought a quarter of a dollar. A big wild turkey nowadays would not long go begging at \$5. It is their food value as food that has made it worth while to hunt turkeys to the very point of extermina-

tion. So-called sportsmen go out in the late summer ostensibly to shoot squirrels, but really to pot turkeys on the roost. Another practice is to lie in ambush and lure the game by imitating the call note of the hen in spring. The writer has personal knowledge of such methods of hunting in Virginia and Maryland, and they are largely responsible for the extermination now imminent. Trapping turkeys in pens—a very simple matter—has also accelerated the destruction of the species.

William Brewster found the turkey breeding in North Carolina among the conifers at 5,000 feet altitude, and also in the hardwoods at low altitudes. Edward A. Preble, of the Biological Survey, discovered a turkey's nest, in June, 1893, in Somerset county, Pa., which contained fourteen eggs. William Lloyd states that the Texas turkey breeds twice a year. He found a nest, May 29, containing eight eggs. The chicks, like those of the tame turkey, are very delicate, and are especially sensitive to wet. Audubon says that during wet weather they are fed by their mothers with the buds of spice bush, much as human youngsters are dosed with quinine. (Ornith. Biog., vol. 1, p. 7, 1831.) When the chicks are two weeks old they fly up and roost on low branches with their mother. At this age they have weathered most of their early perils.

During the last of December, 1902, along the Roanoke River, near the North Carolina line, the writer found turkeys in typical turkey country. Few of the plantations here are under a thousand acres, and many include three or four thousand. Along the river are lowlands, often flooded during high water. Several hundred yards farther back is a bluff, the old river terrace, which marks the beginning of the uplands. A part of this bluff, half a mile long by an eighth of a mile wide, consists of a slate outcrop, much elevated above the rest and varying from 50 to 150 feet above the river. It is locally known as "the mountain," and is heavily forested with pine and oak. The turkeys were found on the backbone of the "mountain," among white oak trees, where fresh droppings and places where the birds had scratched in the dry oak leaves to the depth of two or three inches were visible. So recently had the birds been there that the humus had not dried. The scratching places were from 15 to 18 inches in diameter and circular in shape. In the growth of white oaks there were fully fifty scratching holes, as many as five being found within one square rod, where the birds had made diligent search for acorns. A turkey dog was sent ahead and soon flushed a bird, which came flying by, looking like a giant ruffed grouse. All through the woods were turkey blinds, some made of young pine trees and others, more elaborate, of logs. Most of the turkeys killed here are shot by calling them up to these blinds. In a patch of rank broomsedge and briars a 20-pound gobbler sprang into the air and was shot while making off in clumsy fashion. It had not had time to eat much, and the stomach and crop contained seven dipterous larvae, the remains of white-oak acorns, and about a hundred flowering dogwood berries. On the 15th of June, 1903, two broods of young about the size of game hens were seen.

Food Habits.—The Biological Survey has examined, in all, sixteen stomachs and crops of wild turkeys. These were collected during February, March, July, September, November, and December. They contained 15.57 per cent of animal matter and 84.43 per cent of vegetable matter. The animal food consisted of insects—15.15 per cent—and miscellaneous invertebrates, such as spiders, snails, and myriapods—0.42 per cent. Grass hoppers furnished 13.92 per cent, and beetles, flies, caterpillars, and other insects 1.23 per cent.

The 84.43 per cent of the bird's vegetable food was distributed as follows: "Browse," 24.80 per cent; fruit, 32.98 per cent; mast, 4.60 per cent; other seeds, 20.12 per cent; miscellaneous vegetable matter, 1.93 per cent.

The wild turkey is very fond of grasshoppers and crickets. William Hugh Roberts has observed a flock of a hundred busily catching grasshoppers. (Am. Field, vol. 55, p. 42, 1901.) Vernon Bailey, of the Biological Survey, killed a turkey at Corpus Christi, Tex., in May, 1900, that had eaten a large number of grasshoppers and a sphinx moth. During the Nebraska invasion of Rocky Mountain locusts, Professor Aughey examined the contents of six wild turkey stomachs and crops collected during August and September. Every bird had eaten locusts, in all amounting to 259. (First Rep. Ent. Com., App. II, p. 46, 1878.) The wild turkey has been known also to feed on the cotton worm. (Alabama argillacea), (Fourth Rep. Ent. Com., p. 88, 1885), the leaf hoppers, and the leaf-eating beetles (*Chrysomela suturalis*). The grasshopper (*Arnica sp.*) and the thousand-legs (*Julus*) form part of the turkey's bill of fare. Tadpoles and small lizards also are included.

Besides the bird shot on the Roanoke, already mentioned, the stomachs and crops of four other Virginia turkeys have been examined by the Biological Survey. One of these contained only small quartz pebbles. Another bird had eaten only a few grapes and flowering dogwood berries. A third had made a respectable meal. Ten per cent of its food was animal matter and 90 per cent vegetable. The animal part consisted of one harvest spider, one centipede, one thousand-legs (*Julus*), one ichneumon fly, two yellow-jackets, one grasshopper, and the katydid. The vegetable food was wild black cherries, grapes, berries of flowering dogwood and sour gum, two chestnuts, twenty-five whole acorns (*Quercus palustris* and *Q. velutina*), a few alder catkins, seeds of jewel weed, and 500 seeds of tick-trefoil. Another turkey, also shot in December, had eaten a ground beetle, an ichneumon fly, two wheel bugs, ten yellow-jackets, a meadow grasshopper, seventy-five red-legged grasshoppers, a few sour-gum berries, some pine seeds (with a few pine needles, probably taken accident-

ally), several acorns, a quarter of a cupful of wheat, and a little corn.

One turkey, collected December 23, 1899, in North Carolina, had eaten half a pint of dogwood berries. Its crop contained also a few pine needles. Four Florida wild turkeys also were examined. Nearly 100 per cent of their food was vegetable. The animal matter was found in two birds and consisted of the useful predaceous ground beetle, and the injurious twelve-spotted cucumber beetle; also caterpillars, grasshoppers, and one centipede. This is the only record of the first-mentioned grasshopper's occurrence in Florida. A third turkey had eaten half a pint of long-leaved pine seeds. Many of these seeds were germinating, and some of them had cotyledons more than an inch long. The Florida bobwhite also is very fond of these pine seeds. The same bird had eaten three thimblefuls of grass seed, twelve spice-bush berries, twenty berries of the wax myrtle, two live-oak acorns, and fifteen acorns of the Spanish oak. Another turkey had taken twenty-five tubers of the ground nut—some of them exceeding an inch in length—and the berries of false Solomon's seal, southern tupelo, and wax myrtle. Half a pint of the fruiting panicles of a grass (*Muhlenbergia sp.*) was taken from the crop of a New Mexican turkey shot in November in the Manzano Mountains. It had eaten also grass blades, seeds of cheat, pinon nuts, and seeds of other pines.

Although grain was found in only one stomach, the writer observed turkeys on the Roanoke bottoms in December, 1903, feeding on corn after the crop had been harvested. During November and December half of the food of the turkey is fruit. The kinds most frequently eaten include, besides those already mentioned, myrtle holly, mulberries, wild strawberries, blackberries, cedar berries, and holly berries. On San Francisco Mountain, Arizona, Dr. C. Hart Merriam found turkeys in August feeding on wild gooseberries. A month later, at the same locality, he found them living on pinon nuts. (N. A. Fauna, No. 3, p. 89, 1890.) In Arizona E. A. Goldman found a flock of 150 young and old turkeys that roosted in one place. The gobblers were at this time in a separate flock. These birds were feeding on nuts of the pinon, a staple Indian food of the West. They ate also juniper berries. (Auk, vol. 19, p. 123, 1902.) On the upper Gila River, New Mexico, in November, 1873, H. W. Henshaw found turkeys very numerous and feeding almost exclusively upon grass seeds and grasshoppers, the crops of many birds being fairly crammed with the former. Major Bendire says that the Florida turkey feeds on white-oak acorns, chinquapins, chestnuts, pecan nuts, black persimmons, fruit of prickly pear, leguminous seeds, all cultivated grains, and tender tops of plants. (Life Hist. N. A. Birds, I, p. 114, 1892.) Wild turkeys feed also on mountain rice, mesquite beans, sedge, poa grass, and composite flowers.

Florence Merriam Bailey, in writing of the wild turkey in New Mexico, says: "Mr. Vilas, a cattleman of the country, told us that in the fall they go down to the nut pine and juniper mesas in the Glorieta region and, gathering at the few springs that furnish drinking places, are shot down by wagon loads by the Mexicans. The only specimen we obtained was taken July 27, at over 11,000 feet. Its crop and gizzard held mainly grasshoppers and crickets, but also grass seed, mariposa lily buds, and strawberries, while its gizzard contained in addition a few beetles." (Auk, vol. 21, p. 352, 1904.)

The wild turkey consumes both insect pests and seeds of weeds, but now is nowhere abundant enough to have much effect on agriculture. The domestic turkey's habit of hunting grasshoppers and of "worming" tobacco shows what might be expected from the wild species were it sufficiently numerous.

The Blue Jay.

For several years there has been a warfare against the bird known as the blue-jay, and bounties have been offered for the heads of dead birds. A few years ago the sportsmen of Grass Valley formed a club and offered two and a half cents for the head of each bird that was brought to them. That year more than three thousand birds were killed and a bounty paid for them. Two years ago half that number were disposed of. An effort was made to have the Supervisors offer a bounty, but it was argued that they were of benefit to the farmers in a measure, as they destroyed many of the young birds that destroy fruit.

A citizen who felt that the killing of these birds in the manner described was not right, wrote to the Department of Agriculture to determine if possible if the blue-jay was such a menace to other birds as had been alleged. The answer came back that hundreds of blue-jays from different parts of the country had been sent to the department, and that the stomachs of these birds had been examined. "Although the blue-jay has been accused," says the department, "like the crow, of eating corn and young birds and eggs, it has been found that he prefers mast, seeds of trees, such as acorns, etc., and 22 per cent of his food consists of grasshoppers, caterpillars, etc., so that he does more good than harm."

Farmers and hunters in the country below Grass Valley do not agree with the Department of Agriculture examiner. One farmer stated that he was obliged at times to protect his chicken houses against the inroads made upon the nests of eggs, and that they have been known to carry off small chickens. The sportsmen claim that they destroy the nests of quail and eat the eggs, and are a menace generally.

It is likely, therefore, that in spite of the decision of the department at Washington that the blue-jay does more good than harm, the people of that part of the country will consider it an enemy and continue to kill it.

Kendall's Spavin Cure

What horseman does not know the standard cure? Infallible when taken in time for Ringbone, Curb, Splint, Spavin. Never two opinions as to its powers.

Bone Spavin Entirely Cured.
Kenton, Ohio, Feb. 20, 1905.
Dr. B. J. Kendall Co.,
Enosburg Falls, Vt.

Gentlemen:—I had a fine horse which I priced at \$200.00, which got a Bone Spavin almost half the size of a hen's egg; I used two bottles of your liniment and entirely removed the Spavin and now no one can tell one limb from another.

Yours truly,
Lawrence Althausen.

Price \$1; 6 for \$5.
Greatest known liniment for family use. All druggists. Accept no substitute.
"Treatise on the Horse" free from druggists or

Dr. B. J. Kendall Co., Enosburg Falls, Vt.

BROOD MARES TO LEASE.

On account of leaving the county, I will lease two of the best producing brood mares in the State:

BABE, dam of Just It 2:19½, winner of Occident-Stanford pace of 1905; trial 2:13. Babe is by Danton Moultrie 17064, he by Guy Wilkes, dam Carrie Malone, full sister to Chas. Derby and Klatawah 2:05½ (3-year old champion). Her dam was by Sudan 5103, half brother to Stamboul 2:07½, champion trotting stallion in his day; second dam by Nutwood 60, half brother to Maud S 2:08½, queen of the turf in her day; third dam by Owen Dale, the handsome son of Belmont, the foundation of the California trotter; fourth dam by Old Gray Eagle, four-mile runner.

FANNY MALONE, dam by Anteeo, second dam the dam of California Nutwood by Geo. M. Patchen Jr.; third dam, the Chicago Mare.

Both of the above mares will foal by March 10th to J. R. C. In answering please state what horse you intend to breed to. For particulars address, THOS. P. KELL, No. 95 So Market St., San Jose, Cal.

FOR SALE.

The standard registered two-year-old colts as follows:

NUTTLE B. 39634, foaled 1904, by Red Nuttle 22357 by Red Wilkes; dam Cameline by Direct Line 22117 by Director; next dam Camilla by Antevolo.

NUTTLE BARSTOW 39636, foaled 1904, by Red Nuttle 22357; dam Dell Barstow by Nutwood Wilkes; next dam Della by Startle.

Both of the above are good prospective trotters, and while they have never been handled they show good action. They are both good individuals and will be sold cheap. Address **MARCUS BLANCHARD**, 673 S. First St., San Jose, Cal.

"SAVE-THE-HORSE" SPAVIN CURE

Registered Trade Mark

Costs Less for..... Results than All Other Treatments and Remedies....

SPAVIN **SOUND**

WHAT IS THIS HORSE WORTH? **\$5.00 MORE!**

GENTLEMEN:—Our horse was lame for about a year in ankle from continually knocking. He could not even jog. I blistered; did everything; looked as though he would not be able to race again. Concluded to try "Save-the-Horse." I used it three days and then worked him two slow heats and he did not show lame, so I used the whole bottle and he is as sound today as he was the day he was foaled. The first race out this year he won easy in three straight heats at Colusa, trotting one heat in 2:20½, and the first half in 1:07, and is ready today to trot the best race of his life. I think it is a God-send to the horsemen and horses. Very truly,
JOHN D. BLAMEY.

GRASS VALLEY, CAL.

\$5.00 per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

YOUNG HAL

Race Record 2:10 1-4
Reg. No. 0410.....

By the great pacer, **HAL DILLARD 2:04½** (sire of Fanny Dillard 2:03½, Hal B. 2:04½, Hal Clipper 2:07½, Cambria Maid 2:08½, Young Hal 2:10½, Hal C. 2:10, and 5 more in 2:15 list).
Dam, **OSORA** (dam of Young Hal 2:10½, Strathdale 2:30, and dams of Citation 2:06, Strathline 2:07½, Baraja 2:14½, Reality 2:17½, and Blackline 2:32) by Smuggler 2:15½; second dam, Odd Stooking (dam of Springlock 2:19½, Happy Russell 2:21½, sire of 32 in 2:30, etc.) by Happy Medium 400; next dam, County House (dam of Nettle 2:18) by American Star 14, etc.

Will make the Season of 1906 at

Agricultural Park, Los Angeles.

Terms, \$25 for the Season, with usual return privileges.

YOUNG HAL 2:10½ is a very handsome mahogany bay horse, stands 15 hands 3 inches and weighs 1100 pounds. Goes without straps. Is a game race horse, and one of the best of the great Hal family. This is his first season in the stud and he should prove a great sire of extreme pacing speed. Good pasturage and excellent care taken of mares, but no responsibility assumed for accidents or escapes. For further particulars address

I. C. MOSHER, 666 West 36th St., Los Angeles, Cal.

THE STANDARD-BRED TROTTER STALLION RED MCKINNEY

By **MCKINNEY 2:11½**. First dam, **BONNIE RED** by Red Wilkes; second dam, **BONNIE BELL** by Almont 33; third dam, **ALICE DRAKE** by Alexander's Norman; fourth dam, **VILY** by Pilot Jr. 12.

RED MCKINNEY is four years old, a rich mahogany bay, stands 15¾ hands, weighs 1100, and is a show horse. Has shown great speed with very little work. His breeding shows him to be one of the best bred sons of the great McKinney.

Will make the Season of 1906 at the

CITY STABLES, TULARE, CAL.

FEE \$30, with return privileges.

W. B. MURPHY, Owner. **JOE DALL, Manager.**

25 HIGH CLASS YOUNG HORSES 25

From the Celebrated APTOS RANCH

PROPERTY OF MR. A. B. SPRECKELS

To Be Sold **TUESDAY EVENING, APRIL 10, 1906**
At Auction

By FRED. H. CHASE & CO., Live Stock Auctioneers,

AT ST. LAWRENCE STABLES, 423 POST STREET

SPECIALY FITTED UP, COMFORTABLY SEATED AND BRILLIANTLY LIGHTED FOR THIS OCCASION.

There are twenty-three Trotters and two Pacers in the consignment, all bred at Aptos Ranch, comprising handsome roadsters and high-class racing prospects, all thoroughly broken and accustomed to the sight of steam and electric cars and automobiles. They were sired by

CUPID 2:18, sire of five trotters with records from 2:11½ to 2:16½, own brother to the great Sidney Dillon, sire of Lou Dillon 1:58½

DEXTER PRINCE, sire of Lisonjero 2:08½, Eleata 2:08½, James L. 2:09½ and 63 more with standard records.

ALTIVO 2:18 1-2, own brother to Palo Alto 2:08½ and sire of Albata 2:11½ and four more in the list.

APTOS WILKES, full brother to Hulda 2:08½.

The choicest lot of horses sent to an auction sale in San Francisco in years. Can be seen at stable, Saturday, April 7th. Catalogues now ready and will be mailed on application to

FRED H. CHASE & CO., 1728 Market St., San Francisco.

ALSO —
"DOWN EAST" AUCTION
BOSTON, MASS.
MAY 21-26, 1906.

THE "BLUE RIBBON" SALE

CLEVELAND, O. May 14-19
GREATEST OF SPRING SALES.

THE
EASTERN
MARKET.

At no time since "boom days" has the Eastern market been in better condition than at present. The demand for race prospects and promising youngsters far exceeds the supply, and trotters and pacers of merit are bringing more money today than at any time in years. The East cannot supply the demand, and California horsemen should take advantage of the situation and ship their horses to the "Blue Ribbon" sale. The results will be more than satisfactory.

THE
1906
"BLUE
RIBBON"

The coming sale promises to be one of the best ever held at Cleveland. We have enough sensational consignments to attract buyers from every section. If you want to sell in a great sale, in a great market, and when the demand is good, WRITE TODAY to

FASIG-TIPTON COMPANY
MADISON SQUARE GARDEN
NEW YORK CITY

A GOOD HOLSTEIN.

Albert Meister, the well known Sacramento dairyman, whose establishment is located just east of the city, is the owner of a cow that has a claim to more than ordinary distinction. For a matter of three weeks the animal has averaged a daily yield exceeding ten gallons of milk. Over and beyond this, the cow one day last week attained a record of ninety-seven pounds, which is over twelve gallons, or forty-eight quarts—sufficient in itself to supply a score of ordinary families.

Naturally Mr. Meister is somewhat

pleased with the performance of the animal, which is named Belle of Valley Mead and is a Holstein, six years old last June. In speaking of the cow's breeding and development recently Mr. Meister said:

"Belle of Valley Mead came into my possession about four years ago, in company with a dozen other heifers. She was bred by Karlen & Co., a firm in Wisconsin famous for developing fine Holsteins. I am not in the thoroughbred business, nor am I a breeder, but I take great interest in the development of thoroughbreds.

"The performance of Belle of Valley Mead is not an official test, but it establishes to my own satisfaction the value of breeding to line. The most desirable quality in a cow of late has become the percentage of butter fat. In this case the average is 3.2 per cent.

"The animal has been given no special care, but has been turned out with the rest of the herd. She has been fed, as the others are, with hay, bran and middlings, and allowed to eat as much as she would. She has been milked three times a day.

"Belle of Valley Mead is very large and strong looking even for a Holstein, has never been sick a day and has never gone dry since she came into my possession.

"Her breeding is perfect, and her pedigree, which is in my possession, shows a long line of ancestors remarkable for the quantity of milk they yielded. The dam of her sire gave as much as 112 pounds of milk, but this was not an official test.

"Mechthilde's Carame Colantha, her sire, sold for \$3000. Her dam was Elgin Belle VII. I expect that Belle of Valley Mead will keep up this average for two or three weeks before dropping back."—Sacramento Union.

BIG BRONZE GOBBLERS.

In a recent published statement by

G. M. McKeown regarding turkeys and turkey management at the Wagga experimental farm, New South Wales, attention is directed to the importance of bronze blood in improving common stock.

"The pure (bronze) gobblers are remarkably prepotent and will rapidly improve the quality of any flock into which they are introduced. The appearance of the young stock is greatly improved, they mature earlier, and the weight, quality and flavor of the flesh are strongly influenced for the better by the introduction of bronze blood. For some years many gobblers six months old have weighed alive from twenty-three to twenty-five pounds, while some at nine months have reached twenty-eight to thirty-one pounds. Pullets have been bred to weigh sixteen pounds at eight months, and gobblers, which have been sold from the farm, have been reported by their buyers as weighing thirty-nine and forty pounds before they were two years of age."

Good Roadster For Sale

Five years old, sired by Nutwood Wilkes; dam Merle M. Pacer, well broken. Plenty of speed. A high-class roadster in every respect. Address or apply to

CHAS DE RYDER,

Pleasanton, Cal.

Or W. M. SHELDON,
61 Chronicle Bldg., San Francisco.

DO YOU WANT TO RENT A STALL OR A WHOLE RACE TRACK?

The owners of the MOUNT DIABLO RACE TRACK, located near Concord, Cal., are constructing 50 new and up-to-date stalls. After April 1st they will be prepared to rent stalls to trainers and others as may be required. Also they will entertain propositions for the lease of the track and grounds as a whole for a term of one or more years. Improvements now in course of construction, to cost about \$4000 will result in making this track one of the very best all-the-year-round tracks on the Coast.

For particulars address
IRA B. KILGORE,
Concord, Cal.

READVILLE

GRAND CIRCUIT MEETING

Entries Close Tuesday, April 10, 1906

ALL CLASSES WILL BE EVENTS OF THREE RACES OF ONE MILE.

EARLY CLOSING PURSES.

No. 1—The Blue Hill, 2:30 Class Trotting.....\$4500

Divided: \$1050 to first, \$300 to second, \$150 to third—each race.

No. 2—The Massachusetts, 2:14 Class Trotting.....\$9000

Divided: \$2100 to first, \$600 to second, \$300 to third—each race.

No. 3—The Ponkapoag, 2:10 Class Trotting.....\$4500

Divided: \$1050 to first, \$300 to second, \$150 to third—each race.

No. 4—The Readville, 2:08 Class Trotting.....\$3000

Divided: \$700 to first, \$200 to second, \$100 to third—each race.

No. 5—The Norfolk, 2:08 Class Pacing.....\$3000

Divided: \$700 to first, \$200 to second, \$100 to third—each race.

No. 6—The Neponset, 2:06 Class Pacing.....\$3000

Divided: \$700 to first, \$200 to second, \$100 to third—each race.

In all classes horses must be named at the time of the closing of entries.

The Entrance Fee will be Five Per Cent of the Purse with Nothing Deducted from the Winners of Any Part of the Purse.

More than one horse, if trained in the same stable, may be entered in a class, and one per cent of purse additional will be charged for each horse so named; but only one horse in the same ownership will be allowed to start. Any horses of a plural entry which may be separated from the stable from which they were named will be eligible to start by paying a sum, in addition to that already paid on the horse, which will equal the full five per cent entrance fee.

CONDITIONS The rules of the National Trotting Association (of which this Association is a member) will govern, except that horses not finishing within one hundred yards of the winner in any race will be ruled out of further competition in the event. Racing will begin at 2:30 p. m.

The positions of certain horses will be drawn for the first race of every event, but in the second they will start as they finished in the first, and in the third as they finished in the second.

Forfeits will be due in amounts and on dates as follows:

	APRIL 10.	MAY 10.	JUNE 9.	JULY 10.	AUGUST 7
Classes No. 1 and 3.....	\$20	\$30	\$45	\$60	\$70
Each additional horse.....	9	9	9	9	9
Class No. 2.....	50	70	90	110	130
Each additional horse.....	18	18	18	18	18
Classes Nos. 4, 5 and 6.....	10	20	30	40	50
Each additional horse.....	6	6	6	6	6

Nominators will not be held liable for forfeits falling due after they have declared out in writing. The American Horse Breeder Futurities—\$7000 for Three-year-old Trotters, \$1000 for Three-year-old Pacers and \$3000 for Two-year-old Trotters—will be raced at this meeting.

All entries, requests for information, etc., to be made to the Secretary.

JOHN M. JOHNSON, President. C. M. JEWETT, Secretary, READVILLE, MASS.

Stakes for Two-Year-Olds

Offered by the California State Agricultural Society to be given at the

CALIFORNIA STATE FAIR, 1906

ENTRIES CLOSE MAY 1, 1906

The A. B. SPRECKELS STAKE for Two-Year-Old Trotters.....\$1000

The BEN RUSH STAKE for Two-Year-Old Pacers.....1000

ENTRANCE PAYABLE AS FOLLOWS: \$20 on May 1, 1906; \$20 additional if not declared out on or before June 1, 1906, and \$10 additional if not declared out on or before July 1, 1906. Declarations (to declare out) must be mailed to the Secretary and will not be accepted unless accompanied by the amount due at time declaration is made.

CONDITIONS.

Distance to be one hundred yards. Right reserved to reject any or all entries.

Five per cent of the amount of the Stake will be deducted from each money won.

The Board of Directors reserve the right to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided 66 2/3 per cent to the first and 33 1/3 per cent to the second. A horse distancing the field shall only be entitled to first and fourth moneys, but in no other case will a horse be entitled to more than one money.

The Board of Directors reserve the right to start any heat after the fourth score, regardless of the position of the horses.

When there is more than one entry to any Stake by any one person or in one interest, the horse to be started must be named by 5 o'clock p. m. on the day preceding the race.

Otherwise than as herein specified in these conditions, Rules of the National Trotting Association (of which this Association is a member) to govern.

For Entry Blanks and further information address the Secretary.

LYNWOOD W. 32853

RECORD AS A 2-YEAR-OLD 2:20 1-2

Sired by GUY WILKES; dam, the great brood mare LINDALE by Sultan Jr. 12771.

LYNWOOD W. was a sensational colt trotter and is fast proving himself to be a great sire, although he never covered but eight standard bred mares prior to 1905. Still he has to his credit Dumont S. 2:20, Clipper W. 2:24 1/4, Sonoma Queen 2:25, Sonoma May 2:29 1/4, all trotters with records made in 1905. The following are the only colts that ever had any training. They have worked as follows: R. W. P. 2:12 1/4, Charles Belden 2:13 1/4, Sonoma Girl 2:15, Sly B. (3) 2:16 1/4, Dumont S. 2:17, Ayeress 2:18, Sonoma May 2:19 1/4, Jim V. 2:25, Ella V. (3) 2:21, Clipper W. 2:23, Sonoma Queen (3) 2:22, Sonoma Star (3) 2:27 1/4, Dennis 2:30, Frank G. (2) 2:30.

Will make the Season of 1906 at Santa Rosa.

SERVICE FEE \$25.

H. A. CARLTON, Owner, Santa Rosa, Cal.

KINNEY LOU IN THE LEAD

HAWTHORNE 2:06 1-4

BILLY BUCK 2:07 1-4

KINNEY LOU 2:07 3-4

KINNEY LOU 2:07³/₄ THE FASTEST TROTTING SON OF THE CHAMPION SIRE. . . .

Will make the Season of 1906, commencing February 1st, ending July 1st, at

AGRICULTURAL PARK, SAN JOSE, CAL.

TERMS \$100. \$50 due when mare is bred and \$50 payable when mare is known to be in foal.

For further information, pedigree and description address
PHONE: JOHN 2481.

BUDD DOBLE, San Jose, Cal.

MENDOCINO 22607

RECORD (THREE-YEAR-OLD) 2:19¹/₄

Sire of Monte Carlo 2:07¹/₄ (to wagon 2:08¹/₄); Idolita (2 y. o.) 2:21¹/₄, (3 y. o.) 2:12, (a) 2:09¹/₄, Leonora 2:12¹/₄, Polka Dot 2:14¹/₄, etc. Bay Stallion, 15.3¹/₄ hands; weight 1190 pounds; hind feet and ankles white; foaled April 24, 1889. Bred at Palo Alto Stock Farm.

Sire, **ELECTIONEER** 125, son of Hambletonian 10. First dam, **MANO** (dam of MENDOCINO) (3) 2:19¹/₄, Electant 2:19¹/₄, Morocco (3 y. o. trial 2:22) by Piedmont 904, 2:17¹/₄; second dam, Mamie (dam of Mamie W. (3) 2:17¹/₄, Hyperion 2:21¹/₄, Memento 2:25¹/₄, Mithra (p) 2:14¹/₄) by Hambletonian Jr. 1882; third dam, Gilda (thoroughbred) by Imp. Mango.

MENDOCINO is one of Electioneer's youngest and best sons. With very limited opportunities in the stud he has proven his worth by producing such racehorses as Monte Carlo and Idolita. Three new additions to his 2:30 list were made last season, and he now has ten standard performers. His foals are good size, fine lookers, bold and pure gaited and easily developed.

SERVICE FEE for Season of 1906, \$75; usual return privilege.

MCKENA 39460

Brown Stallion; 16.2 hands; weight 1350 pounds; foaled April 11, 1900. Bred at Palo Alto Stock Farm.

Sire, **McKINNEY** 8818 (record 2:11¹/₄). First dam, **HELENA** 2:11¹/₄ (dam of Wildnutting 2:11¹/₄; Dobbelt 2:32, Hyita (trial 2:12) by Electioneer 125; second dam, Lady Ellen 2:29¹/₄ (dam of six in list, including Helena 2:11¹/₄, Ellen Wood 2:14¹/₄) by Mambrino 1789; third dam, Ida May Jr. by Owen Dale; fourth dam, Ida May by Belmont (Williamson's).

MCKENA has proven a remarkably sure foal getter. He should make a great sire as he is a fine individual and bred right. His sire, McKinney, a game and fast racehorse and sire of game and fast racehorses. His dam, Helena, one of the fastest and gamest daughters of Electioneer, the greatest sire of trotters the world has yet known. His second dam, Lady Ellen, was one of the best of her day, and as well as her daughter Helena is a great broodmare.

SERVICE FEE for Season of 1906, \$40; usual return privilege.

MENDOCINO and MCKENA will make the season at **PALO ALTO STOCK FARM**. Mares may run on pasture at \$5 per month. No responsibility assumed by the Palo Alto Stock Farm for injury or escapes. Address all communications to

PALO ALTO STOCK FARM,
Stanford University, Santa Clara Co., Cal.

McKINNEY, 2:11¹/₄

World's Leading Sire of Extreme Race Horse Speed.

FEE, \$500.00

¶ Fees are invariably payable before mares leave the farm. No return privilege, but fee returned if mare fails to produce a foal. Keep, \$2. per week. Our terms are rigidly adhered to in all cases, and we cannot deviate from them.

McKinney is now located at the farm, 10 miles from Cuba.

Mention this journal
when writing.

The Empire City Farms, CUBA, NEW YORK.

McKINNEY.....DIRECTOR.....NUTWOOD

THE STANDARD-BRED TROTTING STALLION

UNIMAK 40936

y **McKINNEY** 2:11¹/₄; dam **TWENTY-THIRD** by Director 2:17; second dam Nettie Nutwood (dam of Hillsdale 2:15¹/₄) by Nutwood 600.

Will Make the Season of 1906 at **PALO ALTO, Cal.**

Usual return privileges or money refunded at the option of the owner of the mare.

Terms, \$40 for the Season.

To Close June 1st

Address or apply to

Excellent Pasturage at Reasonable Rates. No barbed wire. Best of care taken of Mares, in any manner Owners may desire.

CAPT. C. H. WILLIAMS,
Box 151, PALO ALTO, CAL.

WAYLAND W. 22516. Record 2:12¹/₄.

ONE OF THE LEADING Sires OF 2:10 PERFORMERS OF 1905.

Sire of Bolivar 2:06¹/₄, leading money earning pacer of season 1905. Sire of Morisco 2:12, highest class trotter on California circuit in 1904. Wayland W. is by Arthur Wilkes 2:28, dam Lettie (dam of Wayland W. 2:12¹/₄, Welcome 2:10¹/₄, Maud Singleton 2:28) by Wayland Forrest. Although Wayland W. has never been mated with mares by Electioneer, Director, Nutwood, Sultan, Stamboul, Anteeo or any of our great sires, he is the sire of Bolivar 2:06¹/₄, Nellie R. 2:10, Arthur W. 2:11¹/₄, Morisco 2:12, John A. 2:12¹/₄, Forrest W. 2:14¹/₄, Leland W. 2:16, Al Sandy 2:19¹/₄, Maud Sears 2:21, Bonita Wilkes 2:26¹/₄. Wayland W. will make the Season of 1906 at **SANTA ROSA, at McGregor & Hockins' Stables.**

Terms \$40 for the Season. Pasture \$3.00 per month.

W. C. HELMAN, Owner.

MONTEREY 2:09 1-4

Reg. No.
31706

(Sire of IRISH 2:08¹/₄, Fastest Four-Year-Old Pacer of 1904).

By **SIDNEY** (grand sire of Lou Dillon 1:58¹/₄); dam, **HATTIE** (also dam of Montana 2:16) by Commodore Belmont 4340. **MONTEREY** 2:09¹/₄ stands 15.3 hands, weighs 1200 lbs. and is one of the finest individuals on this Coast. **FEE, \$50 for the Season.**

YOSEMITE By MONTEREY 2:09¹/₄.

Dam, **LEAF YEAR** 2:36 (full sister to Iago 2:11) by Tempest 1881

son of Almont 33.

YOSEMITE is a very high-class young trotter, and as he will be trained this year he will be allowed to serve only six choice bred mares. **FEE, \$25 for the Season.**

Will make the Season at **SAN LORENZO and ALAMEDA.**

I have leased a fine, roomy barn with 14 large box stalls on Sherman street, four blocks from the race track, Alameda, and am prepared to do public training. Would like to get two good trotters and a promising three-year-old to prepare for the races this season.

Timed in a Race.....2:10½

WINNER OF HARTFORD FUTURITY (\$8500) FOR 1905.

BON VOYAGE (3) 2:12½ is by Expedition 2:15½ by Electioneer 125; dam Bon Mot by Erin 2:24½; second dam Farco 2:29½ by Princeps 536; third dam Roma by Goldust 150. For breeding, individuality and racing qualities he is unsurpassed. He is a rich bay in color with black points, stands 15.3 hands and when matured will weigh 1200 pounds.

Season of 1906 at PLEASANTON RACE TRACK.

where he will be limited to twenty outside mares.

\$50 for the Season. USUAL RETURN PRIVILEGES, or money refunded should mare not prove in foal. A rare chance to breed good mares to an exceptionally high-class and highly bred young stallion.

Highland

TRIAL 2:12

(at Four Years Old)

Bred at Highland Stock Farm, Dubuque, Iowa

By EXPRESSO 29199 (half brother to Expressive (3) 2:12½) by Advertiser 2:15½, son of Electioneer 125; dam ALPHA 2:23½ (dam of Aegon 2:18½, sire of Aegon Star 2:11½, etc.) by Alcantara by George Wilkes 2:22; second dam Jessie Pepper (dam of 2 in list and 3 producing sons and 7 producing daughters) by Mambrino Chief 11, etc.

Terms for the Season.....\$25

HIGHLAND is a grand looking young stallion, seven years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed, and has trotted a quarter in 31 seconds over the Pleasanton race track.

HIGHLAND is a coal black horse with one white hind ankle, stands 16.1 hands high and weighs close to 1200 pounds.

Address all communications to

TED HAYES, Manager, Pleasanton, Cal.

ZOMBRO 2:11

GREATEST SON
OF
McKINNEY 2:11

Will make the Season of 1906

At LOS ANGELES, CAL.

Fee, \$50 for the Season.

With usual return privilege provided I still own the horse and mare does not change ownership. Money due at time of service, or all bills paid before mare is taken away.

ZOMBRO is the sire of eleven standard performers as follows: Zephyr 2:07½, timed separately in a race in 2:03½; Charley T. 2:13½, trial 2:10½; Italia 2:14½, over half-mile track, trial 2:08½; Bellemont, three years old, record 2:15½, trial 2:11½; Zombowette 2:16½, trial 2:14½; Zenobia 2:19, trial half in 1:05½; Tee Dee Cee 2:19½, trial 2:13½; Lady Zombro 2:24, trial 2:10; Lord Kitchener 2:34½, trial 2:19½; Zealous 2:36½, trial 2:20; Nina Bonita 2:27.

ZOMBRO has won more first prizes in the show ring than any California stallion, and his get have sold for more money during the past three years. He is the only horse living or dead that ever won forty heats in standard time as a three-year-old. His get are all large, beautifully formed and endowed with great natural speed. The choicest pasture for mares. Address

GEO. T. BECKERS, 3949 Figueroa St., Los Angeles, Cal.

NEAREST 35562

(RECORD 2:22½)—Sire of Alone (4) 2:09½ (trial 2:06½) Just It (3) 2:19½ (trial 2:12½), High Fly (2) 2:24½ (trial 2:12½, last half in 1:00½), and full brother to the great John A. McKerron 2:04½, the second fastest stallion in the world.

By NUTWOOD WILKES 2:16½, sire of John A. McKerron 2:04½ (second fastest stallion in the world), Tidal Wave 2:09, Miss Idaho 2:09½, Who Is It 2:10½, Stanton Wilkes 2:10½, Cresco Wilkes (4) 2:10½, George B. 2:12½, North Star (3) 2:13½, winner Pacific Breeders Futurity Stakes \$6000 Guaranteed of 1905, and 32 in 2:30 list; dam INGAR, the greatest producing daughter of Director; second dam Annie Titus by Echo 463; third dam Tiffany mare (dam of Gibraltar 2:22½) by Owen Dale, son of Williamson's Belmont. NEAREST is a dark bay, 15.3 hands and weighs 1200 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Will make the Season of 1906 at San Jose, with return privilege in case horse remains in California. For terms and extended pedigree address

Phone: Red 1431.

THE STANDARD TROTTER STALLION

Murray M. 2:14

(WINNER OF THE BREEDERS FUTURITY, \$6000, IN 1904)

Will make the Season of 1906 at the

Race Track, University Station,
LOS ANGELES, CAL.

Terms, \$40 for the Season, with usual return privileges.

MURRAY M. 2:14 is by Hambletonian Wilkes 1679 (sire of Phoebe Wilkes 2:08½, Phoebe W. 2:08½, Robert I. 2:08½ and RAY M. 2:14 and La Belle (2) 2:16) by Dawn, sire of 5 in 2:30 list and dams of 8

MURRAY M. 2:14 is a handsome five-year-old bay stallion with small star and black points. In his three-year-old form he stood 16 hands, and weighed 1125 lbs., and is a natural, square-gaited trotter. He is a horse of grand finish plenty of substance, excellent disposition. He has a stout back, strong loins and stifles good feet and legs. His breeding is excellent, and with his individuality he presents a popular and speed-producing combination of the kind that gets money on the race course and prizes in the show ring.

Excellent pasturage at reasonable rates. For further particulars address

PROF H B FREEMAN, University Station, Los Angeles, Cal.

KINNEY WILKES

Sired by McKINNEY 2:11½, sire of Sweet Marie 2:04½, Kinney Lou 2:07½, Charley Mac 2:07½, Hazel Kinney 2:09½, The Roman 2:09½, Dr. Book 2:10, Coney 2:02, China Maid 2:05½, Zolock 2:05½, You Bet 2:07, Jennie Mac 2:09, etc.

First Dam, HAZEL WILKES 2:11½, a great race mare by Guy Wilkes 2:15½, sire of F. ed Kobi 2:07½, Hulda 2:08½, Lesa Wilkes 2:09, Seymour Wilkes 2:08½, etc., and dams of Antezilla 2:10½, Katherine A. 2:11½, etc., etc., and grand sire of John A. McKerron 2:04½; second dam, Blanche (dam of Hazel Wilkes 2:11½, Una Wilkes 2:15, Guyson 2:21, Native Son 2:26½ and Silver Spray 2:28) by Arthurton 365; third dam, Nancy by Gen Taylor, champion 30-mile trotter of the world.

KINNEY WILKES is a very handsome, well made bay stallion, standing 15.3 and weighing 1100 pounds. He is one of the best bred of the McKinneys.

Will make the Season at

LEONARD STATION, Santa Cruz County.

Fee \$25.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED

NUTWOOD WILKES 2:16¹/₂

Sire GUY WILKES 2:15¹/₂

Dam LIDA W 2:18¹/₂

by NUTWOOD 2:18¹/₂

NUTWOOD WILKES 2:11¹/₂ is the only stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12¹/₂ respectively. Who is it? 12, ex-champion three-year-old gelding of the world, reduced his record to 2:10¹/₂. John A. McKerron 2:04¹/₂ (2:12¹/₂ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES is the sire of John A. McKerron 2:04¹/₂ (sire 3 two-year-olds in 2:30 list), Tidal Wave 2:09¹/₂, Miss Idaho 2:09¹/₂, Who Is It 2:10¹/₂, Stanton 2:10¹/₂, Cresco Wilkes (4) 2:10¹/₂, George B. 2:12¹/₂, Claudius (4) 2:13¹/₂, North Star (3) 2:13¹/₂, Bob Ingersoll (4) 2:14¹/₂, and 32 in 2:30 list.

His sons Nearest and Stanton Wilkes have sired Alone (4) 2:09¹/₂ and Cavaliero 2:09¹/₂.

His daughters produced Miss George 2:10¹/₂, Mona Wilkes (3) 2:11¹/₂, Lady Mowry (4) 2:12¹/₂, Caroline L. 2:14¹/₂, Iloilo 2:15, and Miss Winn 2:15¹/₂.

NUTWOOD WILKES will make the Season of 1906 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee \$50 FOR THE SEASON, with the usual return privileges if horse remains my property. Good pasturage at \$3 per month. Bills payable before removal of mare. Stock well cared for, but no responsibility assumed for accidents or escapes.

Young Stock by NUTWOOD WILKES for sale.

Send for Tabulated Pedigree. For further particulars apply or address

Grandam, LOU MILTON (dam of LOU DILLON 1:58¹/₂, Redwood 2:21¹/₂, Ethel Mack 2:25 and Alleen 2:26¹/₂) by Milton Medium 2:25¹/₂ (sire of 2 and dams of 5) by Happy Medium 2:32¹/₂, sire of Nancy Hanks 2:04, etc.

GRECO is a handsome black stallion and a natural and fast trotter. He won his only race as a colt, and has shown miles in 2:20 since in his work, and is a sure 2:10 trotter. He will be permitted to serve a limited number of mares at \$100 THIS SEASON. Correspondence solicited. Address 1

CHAS. De RYDER, Manager, Pleasanton, Cal.

IRAN ALTO 24586 Sire, PALO ALTO 2:08 3-4 Rec. 2:12¹/₂ Dam, ELAINE (4) 2:20

IRAN ALTO'S sire and dam have both held champion trotting records and his dam and granddam both produced a colt that was a world's record breaker, and his grandsire has sired several trotters that broke world's records. No other horse with a record as fast as IRAN ALTO'S can claim this. At nine years he had sired ten colts, four of them with records as follows: Dr. Frasse 2:12¹/₂, Thom R. 2:15, Vendome 2:17, Dr. Frasse's Sister 2:25—all at four years old. Who can name a horse whose first ten colts can beat that?

Will Make the Season of 1906 at WOODLAND, CAL.

FEE \$40

\$30 due when mare is bred and
\$20 payable when mare is known to be in foal.

ITHACA GUNS

THIS illustration shows the double thick nitro breech and narrow skeleton rib of an ITHACA No. 7 \$300 list gun. This feature, together with the reinforced frame, reinforced stock and double bolt, makes the ITHACA the strongest and safest gun for Nitro powder. We build everything from a featherweight 5½-pound 20-gauge gun to a 10½-pound 10-gauge duck, fox and goose gun. Send for Art Catalogue describing 17 grades 10, 12, 16 and 20 gauge guns ranging in price from \$17.75 to \$300.

GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising, the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c; 1 LB. BOX, \$1.00.

25 HIGH CLASS YOUNG HORSES 25

From the Celebrated APTOS RANCH

PROPERTY OF MR. A. B. SPRECKELS

To Be Sold **TUESDAY EVENING, APRIL 10, 1906**
At Auction

By FRED. H. CHASE & CO., Live Stock Auctioneers,

AT ST. LAWRENCE STABLES, 423 POST STREET

SPECIALLY FITTED UP, COMFORTABLY SEATED AND BRILLIANTLY LIGHTED FOR THIS OCCASION.

There are twenty-three Trotters and two Pacers in the consignment, all bred at Aptos Ranch, comprising handsome roadsters and high-class racing prospects, all thoroughly broken and accustomed to the sight of steam and electric cars and automobiles. They were sired by

CUPID 2:18, sire of five trotters with records from 2:11½ to 2:16½, own brother to the great Sidney Dillon, sire of Lou Dillon 1:58½

DEXTER PRINCE, sire of Lisonjero 2:08½, Eleata 2:08½, James L. 2:09½ and 63 more with standard records.

ALTIVO 2:18 1-2, own brother to Palo Alto 2:08½ and sire of Albuta 2:11½ and four more in the list.

APTOS WILKES, full brother to Hulda 2:08½.

The choicest lot of horses sent to an auction sale in San Francisco in years. Can be seen at stables, Saturday, April 7th. Catalogues now ready and will be mailed on application to

FRED H. CHASE & CO., 1728 Market St., San Francisco.

THE "BLUE RIBBON" SALE

CLEVELAND, O. May 14-19

GREATEST OF SPRING SALES.

THE
EASTERN
MARKET.

At no time since "boom days" has the Eastern market been in better condition than at present. The demand for race prospects and promising youngsters far exceeds the supply, and trotters and pacers of merit are bringing more money today than at any time in years. The East cannot supply the demand, and California horsemen should take advantage of the situation and ship their horses to the "Blue Ribbon" sale. The results will be more than satisfactory.

—ALSO—
"DOWN EAST" AUCTION

GENERAL CONDITIONS for Butte, Bozeman, Livingston, Billings, Big Timber, Great Falls and Missoula.

All harness races shall be on the Three Heat plan. Money divided at the end of each heat unless otherwise specified on programs. Money divided 50, 25, 25. Entrance 5%, payable as follows: 1% April 10, when entries close; 1% May 1; 1% June 1; 1% July 1, and last payment August 1, when horse must be named; and unless otherwise specified 5% additional will be deducted from the first and second money winners only in each heat. Horse distancing the field entitled to first and fourth money. Horses not finishing within 100 yards of the winner in any heat will be barred from further competition in the event. American Trotting Association Rules to govern, except hoppers not barred on horses over three years old.

NOTICE—Each member of the Circuit has good track, plenty of stable accommodation and good hotels, and every assistance will be given horsemen to get the best of shipping accommodations. The Circuit is arranged with no dates conflicting, and no long jumps or doubling over road. Each member reserves the right to declare off or reopen as a purse any stake not filling satisfactorily by refunding entrance money, and to postpone or call off races in case of bad weather. Books, auctions and mutuels will be used. For further particulars and Entry Blanks address the local Secretaries or the Circuit Secretary.

California Stake Payments Due in 1906.

Pacific Breeders' Futurity Stakes.

(Payments should be made to F. W. Kelley, secretary, 36 Geary street, San Francisco.)

Stake No. 3, \$6000, foals of 1903—\$10 due April 1, 1906, and starting payment of \$50 on three-year-old trotters and \$35 on three-year-old pacers ten days before the meeting.

Stake No. 4, \$6000, foals of 1904—Starting payment of \$35 on two-year-old trotters and \$25 on two-year-old pacers ten days before the meeting.

Stake No. 6, \$7000, foals of 1906—\$5 due May 1, 1906, and \$5 due October 1, 1906.

Stanford Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Stanford Stake of 1906, foals of 1903—\$10 due June 1, 1906, and starting payment of \$20 ten days before State Fair opens.

Stanford Stake of 1907, foals of 1904—\$10 due June 1, 1906.

Occident Stake.

(Payments should be made to Albert Lindley, secretary, Sacramento.)

Occident Stake of 1906, foals of 1903—Starting payment of \$50 due 30 days before the race

THE GRAND CIRCUIT FOR 1906.

Detroit, Mich., July 23-Aug. 4.
Buffalo, N. Y., Aug. 6-11.
Poughkeepsie, N. Y., Aug. 13-18.
Readville, Mass., Aug. 20-25.
Providence, R. I., Aug. 27-Sept. 1.
Syracuse, N. Y., Sept. 10-15.
Columbus, O., Sept. 17-22.
Cincinnati, O., Sept. 24-29.

FORTY-TWO THREE-YEAR-OLDS had the payment of \$10 made on them April 2d in the Pacific Breeders' \$6000 Futurity to be trotted and paced this year, and it is possible that all the returns are not in yet, as a few of the far distant points in Washington and Southern California have not been heard from. The full list of eligibles will be printed in the Breeder and Sportsman next week and will show a big field of very highly bred colts and fillies. The three-year-old stakes are the feature of harness racing on this Coast, the Breeders' Futurity, the Occident and Stanford Stakes being of such value that a great deal of interest is taken in them, not only by the breeders and owners, but by the general public. Last year North Star by Nutwood Wilkes won all these stakes and placed over \$5000 to the credit of his owner, Mr. J. B. Iverson of Salinas. If California could have a big stake for trotters—not less than \$5000—still greater interest would be aroused in the breeding, training and racing of harness horses. The \$2000 stakes given by the Breeders' Association and the Oregon State Fair are the principal inducements to racing aged horses on this Coast, and, were there a couple of \$5000 stakes, one for trotters and another for pacers, the probability is that neither would cost the association giving them any money at all, as the entries would pay the purses.

ENTRIES CLOSE ON TUESDAY NEXT for the big stakes of the Hartford Grand Circuit meeting at Charter Oak Park. The Charter Oak \$10,000, first won by Director 2:17, is for 2:09 class trotters this year. There is a \$2000 stake for 2:30 class trotters, \$2000 each for 2:08 class and 2:20 class pacers. Horses must be named in all these events at the time of entry. Look at the new and novel conditions of these stakes, fully set forth in the advertisement in this issue. Note the Welch plan of handicap entrance to the Charter Oak. If your horse has a record of 2:08½ to 2:09 you must pay an entrance fee of \$500 in this race, in installments, which is the usual 5 per cent and no more. But if your horse has no record or one slower than 2:12 you will only have to pay 1½ per cent entrance. It looks like a good plan and one that will be popular. Don't forget that Tuesday next, April 10th, is the date of closing entries.

READVILLE'S ENTRIES will close Tuesday next, April 10th. There are six stakes with an aggregate of \$27,000, and all are to be on the three heat plan, every heat a race. The divisions of the money are all stated in the advertisement which appears in our business columns this week, and horsemen who own trotters or pacers they intend racing over east or sending to the Blue Ribbon sale should enter them in these stakes. The entrance fee is five per cent and there will be nothing additional deducted from money winners.

VOLUME TWENTY-ONE of the Year Book has been in almost constant use in this office since it arrived from Chicago a week ago, and is so much superior to any previous volume that the writer wants to thank the compilers for the many improvements. If anything ever filled a long felt want it is this volume.

MR. A. E. ASHBROOK, manager of the Los Angeles Horse Show, is in San Francisco interesting horse owners in the show and securing entries to the various classes. Mr. Ashbrook was formerly proprietor of the Horse Show Monthly, published at Kansas City, but is now owner of Bit and Spur, a very handsome and well edited monthly published at Chicago.

READY FOR THE AUCTIONEER.

APTOS FARM HORSES, twenty-five in number, will be sold at auction in this city at 423 Post street, by Fred H. Chase & Co., on Tuesday evening next. This is the most important sale of trotting bred horses held in this city for some time, and as they are all four and five-year-olds, in good order, thoroughly broken and ready to work, there should be a lively demand for them. No better bred or better looking lot of horses has been seen in a salesring on this Coast. Their breeding is up to date. Eleven of them are by Cupid 2:18, own brother to Sidney Dillon, the sire of the world's champion. Cupid was a good race horse—one of the gamest ever seen. In the stud he has had no access to outside mares, and as Aptos Farm has not raced any horses for years, the Cupids have had little opportunity. However, five of his get have started in races and all have been winners and secured records below 2:17. They are the trotters Venus II 2:11½, Zambia 2:14½, Psyche 2:16½, Lottie Parks 2:16½ and the pacer Belle Dawson 2:16½.

Among those by Cupid in this sale there are some very high class prospects. A sister to Venus II 2:11½ is one of them; a picture of her is to be seen on the front page of this paper. Another is a gelding, a full brother to Psyche 2:16½, whose picture is given

BAY GELDING, BROTHER TO PSYCHE 2:16½

herewith. Another is a mare out of Princess Louise by Dexter Prince. A very toppy animal is the four-year-old mare by Cupid out of Lady Ashcat by Aptos Wilkes. This is a great bred one. A five-year-old full sister to the last mentioned is well turned and very level headed with a splendid disposition. She is worth \$500 as a family mare, but will develop into a fast trotter. The Dexter Princes are nine in number. All horse breeders know of Dexter Prince, one of the best stallions ever used at Palo Alto Farm, and a horse that added great value to the trotting stock of this State. He has been dead two years, and breeders who obtain fillies by him will secure great brood mares as sure as they put them to breeding. Three of the get of Dexter Prince in the sale are shown on the title page, and here is another one out of Lady

BAY MARE BY DEXTER PRINCE-LADY APTOS

Aptos that is a high-class trotting mare. The sister to Harold D. 2:11½ is faster than the latter was with the same work. Mr. Dunlap, who purchased Harold D. for \$260 at the last Aptos sale, sold him for \$3200 last fall in Philadelphia, and the horse is expected to beat 2:05 this year.

Three head in this sale are by Aptos Wilkes, the very handsome brother to Hulda 2:08½, and two are by Altivo 2:18½, own brother to Palo Alto 2:08½.

The twenty-five head catalogued to be sold have not been trained to show great speed, but as is the custom at Aptos Farm, are simply broken thoroughly and gaited. A dozen of them could be taken to a good mile track and driven to standard records tomorrow and there are several that could beat 2:20. There are seven or eight great prospects in the consignment, and buyers who want good, sound animals to drive on the road or to race on the tracks, east or west, well bred enough to grace any stock farm in America, should attend this sale on Tuesday evening next, at the St. Lawrence Stables, 423 Post street. The horses will be there today and can be looked over.

EARLY CLOSING STAKES AT WOODLAND.

The Woodland Trotting Meeting, to be held the week ending August 18th, has announced four early closing stakes as follows:

\$1000 for trotters eligible to 2:24 class.
\$1000 for pacers eligible to 2:20 class.
\$500 for three-year-old trotters of 2:30 class.
\$500 for three-year-old pacers of 2:25 class.
Entrance 3 per cent May 1st, 1 per cent June 1st, and 1 per cent July 1st.

The advertisement with full conditions was received too late for this issue but will appear next week.

Woodland will have one of the biggest and best meetings in the history of the track. C. A. Spencer is secretary.

NOTES AND NEWS.

Mr. James Coffin's mare Carrie Malone, dam of Cassiar 2:22 and Carrie B. 2:18, and own sister to Klatawah 2:05½, Chas. Derby 2:20, etc., by Steinway, foaled a strong robust filly by Kinney Lou 2:07½ on the 22d of last month.

Horsemen who visit the State Fair track at Sacramento are unanimous in the praise of it as a winter track, and say that it is every bit as good as the Pleasanton track for winter training, and dries off as quickly after heavy rains. As it is a much wider track and better appointed it should get to be a very popular training track, as the Pleasanton track is generally over-crowded all winter.

During the year 1905, there were 947 trotters added to the list of standard performers. Of these 161 were out of mares with standard records, while the remaining 786 were from mares that have never succeeded in getting their names among the list of heat winners where the time was 2:30 or better.

The chestnut stallion, The Hangman 2:26½, full brother to Cresceus 2:02¼, is now at the Ketcham Farm, Toledo. For the past two years he has been doing stud service as the property of Louis Winans of Brighton, England.

Hawthorne 2:06½ foaled a dead filly by McKinney 2:11¼ recently. The foal was carried twenty days over the usual time. An offer of \$2500 had been made for this filly at weaning time.

Daniel 2:00¼, holder of the world's record for pacing mares has been shipped to Minnesota from Rochester, N. Y. to be bred to Dan Patch 1:55¼.

It is reported that the sensational filly, Sadie Fogg, that trotted a trial at Lexington last fall in 2:09¾, will be laid over until 1907 and not raced as a four-year-old.

Mr. Joseph Markey, who for the past five years has been a member of the Horse Review staff, has severed his connection with that journal in order to accept a position with Mr. E. E. Gray, of Hinsdale, Ill., the well-known broker and dealer in light-harness horses.

J. R. Dimmick of Salem, Oregon, owns a two-year-old trotter by Diablo 2:09¼ that is an excellent prospect. The colt is being trained by J. T. Wallace.

Mary Lou 2:17, the dam of Budd Dobbie's great stallion Kinney Lou 2:05¾, was mated with Chimes last month.

Had D, the son of Brown Hal, owned by Homer Davenport and T. L. Davidson, was burned to death near Salem, Oregon, March 26th, together with five fine brood mares. Mr. Davenport's Arabian stallion was the only horse saved from the fire.

L. B. Lindsay reached Salem last week with Mr. S. S. Bailey's stallion Tidal Wave 2:09 and Ama A 2:10½ and Vinnie Mann 2:11½. Tidal Wave, who is a magnificent son of Nutwood Wilkes out of an own sister to Coney 2:02 by McKinney, will make the season at Salem.

In a business letter to the Breeder and Sportsman Mr. Geo. W. Ford of Santa Ana writes: "We have been having the greatest rainy season seen in this county for years. The feed is simply fine, and we will surely have fat horses this season. If Los Angeles has a spring or fall meeting, Santa Ana will surely be in line for a three days' meeting the week before. Our track is kept in the best condition although there is no regular trainer on the track and has not been for some time, but the farmer boys go down to the track once a week and work out their road horses in 2:25 to 2:30. They will give a meeting on May 1st. At present over twenty horses are entered in the different classes. This will be a record meeting and as there are many horses now in training in Southern California which cannot go to the races, this meeting will give them an opportunity to get records. I don't know of any horses here that will be campaigned this season, and this is because there is no trainer here to shape them up. There never was a better opening for a first class trainer than Santa Ana affords today, but the horse owners want someone that has done something in life to show he is a trainer."

Mr. William Clayton of Coronado was in San Francisco last week and placed an order with Shreve & Co., the leading silversmiths and jewelers of the Pacific Coast, for the most valuable polo trophy ever offered in the world. The trophy is to cost \$2500, and will be put up for competition at the polo games next season at Coronado. It is probable that teams from Australia and India may compete for this splendid trophy, the design for which will be ready soon.

Don't overlook the Electioneer blood. It nicks with that of the Wilkes families so successfully that breeders cannot afford to overlook the fact. Alta Vela 2:11¼, the fastest son of Electioneer in California, is making the season of 1906 in this city in charge of Hans Frelson on Twenty-fourth avenue and Fulton street, near the Casino. Breed a good mare to Alta Vela and you will surely get a good colt.

One of the best made geldings in California is the full brother to Psyche 2:16¼ that will be sold at the Spreckels sale of horses from Aptos Ranch. He is by Cupid 2:18 out of Emma S. by Speculation, second dam Jenny, the dam of Hulda 2:08½. He is a square trotter and fast for the work he has had.

Here is a royally bred mare, four years old, and one that is fast enough to train for the races. After her racing days are over she is well enough bred to mate with the highest priced stallion in America. She was sired by Cupid 2:18, own brother to Sidney Dillon. Her dam is Princess Louise (trial 2:17 as a three-year-old) by Dexter Prince, second dam by Echo, sire of the dam of Direct 2:05½, and third dam a full sister to Venus, the dam of Sidney Dillon.

The four-year-old pacing mare by Dexter Prince out of Sunrise II by Gossiper Jr., that is No. 10 in the Aptos Ranch catalogue, is an own sister to Harold D. 2:11¼, the pacer that Henry Dunlap marked last year over East, sold for \$3400 and has gone back to train and drive this year. The filly is faster than her brother with the same work.

Seven weeks of continuous racing on the North Pacific Circuit this year. There are ten purses of \$1000 each, two of \$2000 each and a large number of \$500 each for harness horses. See circuit advertisement in this issue. Entries close May 15th.

Animals, as a rule, should not be offered on the market for sale until they are five years old. Many a small breeder who has a three-year-old filly will find it more profitable to send her to a good stallion, raise a foal from her when she is four, then after the foal is weaned take her up and fit her for sale as a five-year-old, than he will to let her go barren and sell her when she is but four years old. The foal should pay the cost of service fee and keep of the animal and she will generally bring from \$50 to \$100 more as a five-year-old than she would in her four-year-old form.

The stallion number of the American Horse Breeder is a very handsome edition of this excellent journal. It was issued March 27th.

H. B. Freeman of Sacramento, has returned from Los Angeles, where he has been spending the winter, and is making up a string of horses to train on the State Agricultural Society's track.

The chestnut gelding by Dexter Prince out of Galata, dam of Zambia 2:14¾, by Stamboul, to be sold at the Aptos Ranch sale, is a high class horse, and a fine trotting prospect. He is No. 3 in the catalogue.

The Kentucky Futurity for the foals of mares bred this year has had 1200 mares nominated. This puts \$6000 into the stake for a starter.

The date set for Butchers' Day this year is Wednesday, May 23d. The program of races will soon be announced. Knights of the cleaver are scouring the country for trotters and pacers to win with.

Now that the weather is good and the roads dry Alameda county breeders should drive over to the Alameda track and take a look at Geo. Algeo's stallion T. C. 2:30 by Nutwood Wilkes. He is one of the best bred ones standing for service in California.

Mose Hart has three horses at work at Pleasanton. They are Vic Schillar 2:11¼ and a full brother and sister, three and four years old respectively, by Nutwood Wilkes out of a mare by Gaviota, son of Electioneer. All these are trotters and the two youngsters look like great prospects, while Vic Schillar seems to be better than ever in his life.

Greco, son of McKinney out of a daughter of the dam of Lou Dillon, comes from champion families on both sides. He is trotting like a 2:10 performer for Chas. De Ryder, and those who wish to breed mares to him should apply right away, as it looks as if Greco would go to the races and get the money this year.

Two well bred and grand looking sons of McKinney 2:11¼ are in the stud at Vallejo this year. They are Constructor and Gen. J. B. Frisbie, full brothers. Their first, second and third dams are all great brood mares.

The blood of Nutwood Wilkes is renowned the world over. Two mares have been sent from Russia to Ohio to be bred to John A. McKerron 2:04½, son of Nutwood Wilkes.

Brown Hal, the sire of Star Pointer 1:59¼ and ten more with records of 2:10 or better, is enjoying life, although 27 years of age, and is still used in the stud at Cleburne Farm, Spring Hill, Tennessee.

There has been no rain since last Sunday and the horses are burning up the tracks in all parts of the State.

Mrs. L. E. Bonfield, Los Angeles, Cal., has entered the brood mare Atherine 2:16¼ by Patron 2:14¼, dam Athane (dam of Aroon 2:27½) by Harold; second dam Minerva, a producer by Pilot, Jr., in the Kentucky Stock Farm stake, with foal by Nutwood Wilkes 2:16½. Atherine was bred at Forest City Farm by Mr. Emery. She took her record in 1900 at Stockton, Cal.

One of the most successful stallions in California has been Chas. Derby 2:20, sire of Don Derby 2:04¼, Much Better 2:07¼, Derby Princess 2:08½, Diablo 2:09¼ and fourteen more in the 2:15 list. Chas. Derby gets fine large, well turned horses that look well and act well in races or on the road. They are extra good value for the money they cost the breeder. Chas. Derby is the premier at Oakwood Park Stock Farm, Danville, Cal., a farm that has produced a long line of champions.

The book of Bon Voyage 2:12¼ is very nearly filled—only two or three additional can be received. This shows that California breeders know a good thing when they see it, and that they have taken advantage of the opportunity to breed to this champion colt trotter. Every visitor to Pleasanton returns with enthusiastic praise of Bon Voyage as an individual.

The fastest three-year-old pacer of last season was Bonalet 2:09¼ by Bonnie Direct 2:05½. She is a very handsome filly and the same adjective will truthfully describe all of the get of this horse. The Bonnie Directs nearly all trot fast and there will be several of them enter the list this year. He is one of the best bred stallions living and his get are "worth the money." Bonnie Direct is making the season at Pleasanton.

Mr. Geo. A. Kelly, owner of the fast trotter Bonnie McK., son of McKinney 2:11¼, intends racing him through the East this year, and those desiring to breed to this royally bred young horse should apply for bookings before May 1st, as Bonnie McK. will only be allowed to serve a limited number of mares.

Pat Foley, who has the McKinney stallion Montesol and quite a string of horses at the Alameda track, advertises two mares for sale. Both are well bred and thoroughly broken and are for sale at bargain prices. See the advertisement.

With the exception of the two \$2000 stakes at the Oregon State Fair, all the early closing stakes on the North Pacific Circuit will be best two heats in three.

The Mendocino mare Leonora 2:12½ is said to be the boss of the snow brigade at Providence, Rhode Island, where she is now owned.

Dr. H. C. Kions, Columbus, O., reports that his brood mare Hannah Hudson by Ducoin has a yearling filly by Zombro 2:11 that is hard to beat for beauty or as a fast, natural trotter.

Mary Gage 2:11¼, by Oro Wilkes, owned by Chisholm Farm, Ohio, foaled a colt by McKinney 2:11¼ last month. McKinney served a very high class lot of mares last year.

Zolock 2:05¼ is taking his work at the trot so far this year, and trotted a quarter in 38 seconds the other day.

Ben Davis writes that Delilah 2:14¼ as a three-year-old is looking and doing well and will pace in 2:05 this year, barring accidents. She is by Zolock 2:05¼ out of Gypsy, the granddam of Zolock, and dam of Gazelle 2:11¼, dam of Zephyr 2:07¼. Delilah has a full brother at Pleasanton in the stud in Henry Delaney's charge. This is the young horse Izalco advertised in this journal.

Easter S., a very handsome brown gelding, the first foal of Sadie Moor 2:26, came down from Eureka on the Pomona last Tuesday. Easter S. is by Santellus, an inbred Electioneer horse and was consigned to Rev. W. J. Speers, pastor of the Congregational Church of Rocklin, Cal. Mr. Speers, who formerly owned the dam of this gelding, bought this fellow unsight and unseen because he was a foal of the little old mare that could beat most anybody's horse on the road and was as gentle as a kitten. Mr. Speers will peddle the Gospel to the horsemen of Placer county and others with Easter S., and the new purchase will probably get his sweatouts at funerals.

Columbus says: Years of observation have taught us that not all the 'working' or 'grafting' in the training business can be laid at the door of the public trainer. Some trainers insist upon buying too many boots, blankets, etc. On the other hand, some owners insist upon buying nothing. A right good pacer in our stable, a few years since, wore the stable halter, the stable blankets, the stable boots the stable hoppers and, in order to keep him in shape through the season, we furnish leg wash and cotton, which the owner would not stand for. He even grumbled at paying the usual monthly training bill, and this in the face of the fact that his horse won more than expenses that season. The horse that goes into Bascomb's stable after this will be well supplied with everything needed in developing speed before his name is tacked over the door of the stall. If fast enough to race, he will be supplied with everything needful during a campaign. No more using the bike, the harness, the hoppers, the blankets, boots and other necessary parts of a race horse's wardrobe belonging to this stable, except with animals bearing Bascomb's brand.

Ed. Coe of Rocklin purchased the Direct mare advertised in these columns by M. C. Delano, paying the advertised price, \$200, and selling her the next day to B. N. Scribner of Rocklin for \$285. Mr. Scribner will use her as a road mare.

THE NORTH PACIFIC CIRCUIT.

Owners and trainers of trotters and pacers should feel very kindly disposed to the officials of the North Pacific Circuit. That organization has life in it, and although it is located in a part of the country that does not enjoy a "winter training climate," it recognizes the fact that horsemen like to know early when and where the racing is to be held during the summer, and what purses and stakes are offered, so it meets early and announces its stakes and advertises them to the world. In this issue of the Breeder and Sportsman will be found an advertisement setting forth the early closing stakes, the dates of the meetings and the order in which the circuit has been arranged. It starts at Everett, Washington, August 27, moves the following week to Seattle, and hence to Salem, Oregon, where the Oregon State Fair is to be held, and where many rich stakes for trotters and pacers are offered. From Salem the circuit followers will go to North Yakima, where the Washington State Fair is held, and thence to Spokane, where the big inter-State Fair opens September 24th. Walla Walla will be the next point on the circuit and from there the jump will be to Lewiston, Idaho, where the circuit will close October 13th. This will give seven weeks of continuous racing with two or more harness races each day and with stakes worth from \$500 to \$2000. California horsemen will find that they can take in the California circuit, winding up at the State Fair at Sacramento and then have a week in which to ship to the Oregon State Fair and from there follow the North Pacific Circuit to its finish. The \$1000 purses offered at the northern meetings make the trip worth while as a horse that can win in his classes there can earn enough to pay all the expenses of the trip and something over. Mr. M. D. Wisdom is secretary of the North Pacific Circuit and as he will visit the horsemen in California during this month to solicit their entries, we bespeak for him a cordial reception and a big list of entries.

AN OGDEN PACER.

Mr. J. G. Read, of the firm of Read Bros., harness dealers, of Ogden, Utah has been in San Francisco during the past week and will probably take a roadster or two home with him when he leaves to-day. Mr. Read is an enthusiastic road driver and says the Ogden horsemen have had a month of splendid sleighing this winter and they made the most of it. His favorite roadster is a black pacing gelding called Nigger Boy that took a record of 2:20½ at Salt Lake last October over the half mile track there. Mr. Read has owned Nigger Boy eleven years buying him when the horse was five years old and has raced him every year since he bought him, and reduced his record every season. Nigger Boy was sired by a grade Norman horse, his dam being a little pony mare bred on the range. This combination of Norman and pony blood could hardly be expected to produce a game race horse, but Nigger Boy is as game as they make them. The race in which he earned his record was a six-heat affair, the time of the heats being 2:25, 2:20½, 2:21¼, 2:23¼, 2:27 and 2:21. Nigger Boy won the second, third and sixth heats, the fastest of the race, and had all the others "all in" at the end of five heats. A sixth heat in 2:21 flat on a half-mile track would not be bad for a pedigreed horse to accomplish, and when one of Nigger Boy's breeding does such a thing it is pretty safe to say that his "unknown" crosses probably contain some very warm blood.

PLEASED HORSEMEN AT PLEASANTON.

A gentleman who visited Pleasanton this week tells us that he noticed a very large number of trainers that seemed to be particularly well pleased with the horses in their charge and that this is a good omen for fast time and plenty of racing this year. Dr. Boucher, he says, is very pleased with Ramona, a trotting mare by Stam B. out of an Albert W. mare owned by Tuttle Bros. of Rocklin. The doctor drove her a mile in 2:28 with the last half in 1:10. Dan Misner also wore a smile that wouldn't come off as he drove Nazin by Nazote out of a sister to Palo Alto. This is a beautiful bay trotter 15.3 hands high owned by Tim Judge of San Francisco. A quarter in 35 seconds was easy in this case. Millard Sanders was another of the pleased ones. He had just driven Carrie Dillon, daughter of Sidney Dillon and Biscari by Director. She is more like Lou Dillon than any of the twenty-five he is handling. They made a pacer of her last year, but Millard hooked her up just as he did Lou Dillon, no check, and let her trot. She has already trotted a quarter in 35 seconds. Millard is also pleased with the two-year-old Stam B. colt owned by S. Christenson of this city. A mile in 2:36 with the last quarter in 35½ second is enough to make any one pleased.

T. W. Barstow will not leave San Jose because the track is closed up. He don't have to. He owns a fine piece of property near the track where he keeps his great stallion Nearest 2:22, own brother to John A. McKerron 2:04½ and sire of Alone 2:09¼, etc., and has plenty of pasture for brood mares. The roads around there are good enough to jog on and almost good enough to train on. So Mr. Barstow will remain at his address at San Jose, and wise people who want to raise fine, large horses that have racing speed will send their mares to him as usual.

James A. Brown of Healdsburg, Cal., recently returned from a trip to Lincoln, Nebraska, where he purchased five Belgian stallions.

THE MATTER OF LADIES' SADDLES.

The first side saddle of which there is any mention in history was designed and made for Anne of Bohemia, first wife of Richard II, of England, in 1388. It is a matter of history, more or less legendary, that Anne, who was a sister of Wenceslaus, the German emperor, through whom Jan Hus, and Wyclif became associated, and formulated what afterwards became the Protestant bible, was slightly deformed, and could not travel on horseback after the custom of the day, unless she chose to ride on a pillion, or pad behind a man. Being a woman of spirit, and fond of hawking and other sports of the fields she demanded and got a sort of saddle on which she could sit otherwise, yet manage her own palfrey with safety, yet manage her own palfrey with safety. Prior to that, women who rode on a horse without a man in front, to whose belt they could cling, used the cross saddle, which was very different from the "pig skin" of the present generation. Joan of Arc rode astride, in full coat armor, and so did numerous other maids and dames of those times of blood and iron and without exciting more comment than an Indian squaw does when she straddles a pony.

Some historians contend that the adoption of the side saddle was an outcome of crinoline and hoop skirts, and possibly this is the case. A woman with hoop skirts riding a cross saddle would be diverting but not elevating except to the hoops. It is more likely, however, that as years rolled on and women were compelled to remain more closely in their castles than they could in the middle ages, and only strong men were safe afield, that they rarely rode abroad except on a pillion behind a man, and in consequence gradually got out of the way of riding astride.

The first saddle with a tree came into use in the fourth century, and it was 300 years later before stirrups were invented. The evolution of the saddle has been almost the same in all countries and among all nations. The horseman in the beginning neither knew nor appreciated the benefits of a saddle for both the horse and the rider. Probably his first makeshift of that character was a robe which served as a blanket in camp as well as a cushion by day. As the practice of wearing armor and other accoutrements of war grew, however, the stirrup was naturally evolved, as a means of assisting the rider to mount the steed which was increasing in height while the rider was adding to his personal impediments.

As to whether the cross saddle for women is destined to become more popular than the side saddle, the writer would not like to express an opinion. That it is better for the horse there can be no doubt. But whether it is safer, or more comfortable for the rider is a question that the best women riders will probably decide for themselves and their less expert sisters. If the writer were required to name the two greatest women riders he has ever seen he would be compelled to select an example from each school—the side saddle and the cross saddle. There is probably no doubt that Madame Marantette is peerless as an equestrienne in the side saddle. She established a high-jumping record with Old Filemaker before Heatherbloom made all the other timbertainers look small, and she always scorned a cross saddle. True, she is an exceptional woman rider, but there have been and are today many horsewomen who can sit a jumper as well as the best man. And so far as the matter of the side saddle is concerned, a noted male instructor of riding made the public announcement several years ago that he found it safer to ride a vicious horse with a side saddle than with the regulation cross saddle. To be sure he meant the English hunting saddle on which the average rough rider would hardly feel safe with a bucking broncho under it, but aside from that point there is reason to believe that it would be at least as difficult to unseat a muscular rider from a three horned side saddle as from a Mexican tree with stirrups hobbled, provided the girths did not slip. On the other hand Miss Lucile Mulhall the premier cowgirl, rides nothing but a cross saddle of cowboy shape, and it is hard to believe that any horse could shake her off. She and her sisters, who all ride astride, are graceful, well-formed girls, and there is nothing that a man can do on horseback that they can not duplicate.

Women of the writer's acquaintance who have become accustomed to the cross saddle, declare that it is safer and more convenient than the method which was until the last few years regarded as conventional while the adherents of the other school are just as first in their opinion that the lady should keep both feet on one side of the horse. Probably both are right.

The matter of modesty is not to be considered in the discussion, for both the cross and the side saddle are modest.

From a hygienic standpoint, there seems to be little to choose between the two modes of riding, but that little is in favor of the cross saddle. Any physician who has given the matter any consideration will testify that serious structural defects have accrued to young girls who have been permitted to ride side saddles that were too large for them. The same might also result from a cross saddle that did not fit the rider, but the difficulty here can be in a large measure obviated by the use of the stirrups.

To sum up the matter, the writer would suggest that the ladies will ultimately decide which they wish to use and they will use it whether it be the side saddle or the cross saddle. It is largely a question of style.—Darmstadt in Horse Show Monthly.

Lou Dillon 1:58½ was bred to John A. McKerron 2:04½, March 23d. A Cleveland paper says that in all probability the champion trotter will never be trained again. Let us all hope that she produces a foal from this mating that will trot as fast as she has done. Sire and dam are the fastest trotters of their sex ever bred in California.

THE OLD, OLD STORY.

It has developed that the fight against the existing equitable and beneficial racing law in New York State, as has nearly always been the case in a fight against equitable racing laws, is waged by a powerful city pool room clique of big gamblers, whose nefarious shops of iniquity are closed by a law which was enacted for the legitimate purpose of encouraging horse breeding and aiding county, district and State Fair Associations. The New York law provides for restricted pool selling at the tracks of regularly organized and licensed racing and fair associations during the actual progress of a meeting, but prohibits, as we understand it, city pool rooms, and hence stops that form of gambling on races, which is so widespread in its range of demoralization and devastation. Not once in a whole year is a case heard of in connection with race track speculation, especially with trotting track speculation, in which a business man, office or store clerk goes to the bad, goes broke, deserts his family or embezzles on account of race track speculation. But with city pool room speculation the situation and results are very different. Clerks of all classes, business, salaried men, with positions of trust, and people from various other walks of life, and of small financial means, steal away to the city pool room for a few moments, or place "commissions" with designing persons, lose their money, and "go wrong." But the city pool room is "rich picking" for the professional gamblers who operate them, and this class prefers to take chances with ordinary statute law, prohibiting all speculation, rather than with special and specific law against their nefarious business. It is unfortunate for turf sport, both trotting and running, that city pool rooms should ever have had even a remote connection therewith. But what is still more unfortunate is that city pool rooms have become a part and parcel of the running turf, the connection being so close that the running turf is largely predominated over by this interest, and herein comes the great impediment to the enactment and stability of equitable and decorous racing laws. No State Legislature can have the temerity to enact laws favorable to city pool rooms, and hence favorable, as so considered by this element, to the running turf, and thus special legislation favoring and encouraging legitimate racing is opposed, practically, by all—at least the predominating running turf interests. The better element of the running turf, the respectable element, as with the leading running turf promoters of New York State, are content with reasonable, equitable and for the "good-of-the-order" racing laws; but the other element, the right-down graft and gamble element, is so large and powerful in about every State, and equitable laws so infringe on their "business," that, by the assistance of blind reformers and religious fanatics, the enactment and perpetuity of equitable racing laws is just about impossible. There is no getting rid of these elements and their fomenting influences, and on this account, more than on any other one factor, The Western Horseman is not favorable to the idea of fostering a condition which will make the trotting turf dependent on legalized and universal speculation for the possibility of its existence and prosperity. The disturbing element is abroad in the land, it always will be, and we had as well build our house on a foundation which cannot be undermined by the combined forces of the city pool room crowd and the ever-present pious fanatics. One other way, probably, is for the trotting turf interest to absolutely divorce itself from the running turf and its outlaw, vitality-sapping city pool room attachment, and make the fight lone-handed for equitable legislation. There ought to be a community of interest and action between the trotting turf and the running turf, but the regrettable condition into which the running turf has fallen makes this impossible. Running turf interests will not allow it to be so. In many States equitable racing laws have been proposed and enacted, but a law can not and never will be enacted which is "wide open" enough to satisfy the ruling spirit in running turf circles, hence if equitable racing laws are proposed they are opposed by this element, and if they become laws a war for repeal is soon started, backed by a union of the forces of the outlaw spirit and religious fanaticism, as is now at work in New York State.—Western Horseman.

SIDNEY DILLON HAS A GRANDSON.

Frank S. Turner, proprietor of the Santa Rosa Stock Farm, is the only man in the world who owns a grandson of the great Sidney Dillon. His mare Stamboulita 2:27 foaled a bay colt last week that is a swell looker, and sired by Guy Dillon, four year-old-son of Sidney Dillon and by Guy by Guy Wilkes. The dam of Stamboulita is the famous producing mare Biscari, dam of six in the list, by Director 2:17, second dam Biscari, dam of six in the list by Harold. By Guy, the dam of Guy Dillon, is out of the \$10 000 mare By By by Nutwood 600. This first grandson of the first two minute sire is therefore a royally bred fellow and here's hoping he may add to the reputation of his relatives for possessing and producing great speed.

Yolo county breeders have the opportunity to patronize a fast race horse, a successful sire and a stallion of royal breeding in Iran Alto 2:12¼, the trotter that H. S. Hogoboom has at the Wodland track. Iran Alto got his record in a race; he has sired two race trotters in the 2:15 list, and was himself sired by the great race horse Palo Alto 2:08¾, dam Elaine 2:20 by Messenger Duroc, second dam Green Mountain Maid, dam of Electioneer and nine trotters with standard records. Write to Mr. Hogoboom for a card containing pedigree and other particulars about this stallion.

KINNEY LOU 2:07¾ AT LAWRENCE STOCK FARM.

A Son of McKinney that will be Raced East this Year

BIG MONEY FOR TROTTERS AND PACERS.

The amount of money hung up on the other side of the Rocky Mountains for harness horses this year promises to surpass anything in the history of the trotting turf. The futurity events include the Kentucky \$14,000 stake, the Hartford \$15,000, the Horse Review \$10,000, the Kentucky Stock Farm \$7,500, and the American Horse Breeder \$10,000. In addition to these big futurity events early closing stake races have been announced by several of the larger meetings that will amount to an enormous sum. In the West, Hamline will have two \$5,000 stakes, Milwaukee probably three \$5,000, and Libertyville two of a like amount, while the state fairs of Nebraska, Kansas, Missouri, Illinois, and Indiana, will have a great number of \$1,000 purses.

The State Fair Association of New York has just announced its early closing stakes amounting to a total of \$18,000, to be raced for at the grand circuit meeting to be held during the week of September 10 as follows:

The Empire State, \$10,000, 2:14 class trotting.
The Chamber of Commerce, \$2,000, 2:09 class trotting.
The Syracuse, \$2,000, 2:08 class pacing.
The Lakeside, \$2,000, 2:11 class pacing.
The Onondaga, \$2,000, 2:17 class pacing.

The change of the name of the \$10,000 stake was due to the fact that this year it is appropriated by the State instead of by the citizens of Syracuse, when it was known as the Syracuse Driving Club stake.

Secretary Bentley of Buffalo announces for the annual grand circuit meeting: The Preparation, \$1,000, for three-year-old trotters; the Lafayette Hotel, \$2,000, for 2:16 trotters; the Queen City, \$2,000, for 2:07 trotters; the Empire State, \$10,000, for 2:10 trotters; the Introduction, \$1,000, for three-year-old pacers; the Iroquois Hotel, \$2,000, for 2:16 pacers; the Liquid Veneer, \$2,000, for 2:04 pacers, and the Dominion of Canada, \$5,000, for 2:08 pacers.

Poughkeepsie follows Buffalo the week of August 13-17 with a much stronger card than that of 1905. The capital prize is \$3,500, the Oakland Baron, for 2:10 trotters. Next in value is the Nelson, \$2,000, for 2:08 pacers; then \$1,500 for 2:15 and 2:18 trotters, 2:18 and 2:11 pacers, and \$1,000 for three-year-old trotters of the 2:30 class.

At Readville the next week the following great list of stakes is presented:

The Blue Hill, 2:30 class, trotting, \$4,500.
The Massachusetts, 2:14 class, trotting, \$9,000.
The Ponkapoag, 2:10 class, trotting, \$4,500.
The Readville, 2:08 class, trotting, \$3,000.
The Norfolk, 2:08 class, pacing, \$3,000.
The Neponset, 2:06 class, pacing, \$3,000.

For the Columbus grand circuit meeting \$10,000 is offered for the 2:18 trotters, \$5,000 for the 2:15 pacers, and \$3,000 each for 2:09 trotters and 2:07 pacers.

While matters are yet in rather an indefinite shape at Cincinnati and Detroit, the \$10,000 Ohio stake for 2:09 trotters and the \$10,000 M. and M. for 2:24 trotters will undoubtedly be given as usual.

At Cleveland there is some doubt as to whether a meeting will be given, but an effort is being made to secure a subscription from the citizens large enough to insure the promoters against loss—as no betting can be done there.

About \$18,000 is rung up in purses and stakes for the three weeks' Overland Park (Denver, Colo.) meeting, scheduled for June 16 to July 7. These are the 2:20 trot, purse \$2,000; three-year-old pace, \$500; 2:20 pace, \$2,000; 2:09 pace, \$1,000; 2:24 trot, \$3,000; three-year-old trot, \$500; 2:13 pace, \$1,500, and 2:30 trot, \$1,000.

The Montana Fair racing circuit hangs up \$125,000 in stakes and purses, while the good little half-mile circuit known as the Cedar Valley, in Iowa, will hang up \$30,000.

The North Pacific Circuit, comprising tracks in Oregon, Washington and Idaho, has advertised \$50,000 worth of purses.

The California circuit is expected to be of about six or seven weeks' duration with at least \$30,000 to trot and pace for, and perhaps more.

Altogether it looks as if there will be plenty of opportunities for harness horsemen to make a little money this season, judging by these rich purses, and these are not all, by any means, being simply a hastily prepared summary of the earlier closing events already announced.

HOBBLES NOT BARRED AT READVILLE.

At the last congress of the National Trotting Association the rule barring hobbled horses from competition in races was repealed, hence the Readville Association omitted from its conditions the usual clause stating that the hobble rule would not be enforced. Hobbled horses will not be barred at Readville or elsewhere, this year.

H. A. WATTERSON,
Contractor.
Cleveland, Ohio.

Troy Chemical Co., Binghamton, N. Y.
Dear Sirs: Your "Save-the-Horse" is the best thing I ever used. I had a trotter, and the best talent in the country pronounced him worthless. He had two bone spavins, so sore and lame it was impossible to trot a mile. I used Save-the-Horse according to directions, and drove him every day.

He afterwards took a matinee record of 2:13½ and was a very consistent race horse; his legs did not seem to bother him in the least. I got \$400 more for the horse than I paid. Respectfully yours,
H. A. WATTERSON.

Monterey 2:09½, sire of Irish 2:08½, will have one or two more 2:10 performers this year if they start. We hear of several by this son of Sidney that are trotting like future money winners. Monterey is standing at the moderate fee of \$50 for the season and his time is divided between San Lorenzo and Alameda. Write to P. J. Williams, his owner, at San Lorenzo, for pedigree.

SENSIBLE FEEDING OF HORSES.

On this topic in reply to a query, the Michigan Farmer has the following sensible suggestions:

It is impossible to lay down any hard and fast rule about the feeding of horses, since it is a kind of work which requires a vast amount of skill on the part of the feeder. It is a well-known fact that given the same amount of feed and the same amount of work to accomplish with a team, one groom will have his horses fat and sleek, while those used by another will look only ordinary or even positively bad.

Other things being equal, however, the kind and amount of feed makes a difference in the results, and in the growing of horses, the results depend very largely upon the proper nutrition of the foal from the time it is dropped until maturity is reached. Of course the work which the brood mare is required to do and the condition which she is in enter into the problem of feeding her during the period of gestation. Touching the problems as a whole, Professor Henry says:

"While in foal the mare does not necessarily require food different in quality from that fed at other times, but the quantity should be somewhat larger, all conditions being equal. Those used for breeding purposes only will do well without grain when on nutritious pasture, but if the grass is insufficient, some additional feed in the shape of grain should be given. Working mares are more sure of bringing good foals than those idle in pasture, providing judgment is used in handling and feeding. They should be worked with regularity, the labor never being severe or taxing, nor should the nature of the work ever be such as to make long intervals between feeds, for then great hunger may be followed by surfeiting. Idleness is the bane of horses' rearing and should be avoided whenever possible. To place the mare in a box-stall and confine her there without suitable exercise, while supplied an abundance of feed, is to adopt a practice only too common and one carrying large risk. Abundance of exercise must always go with liberal feeding.

"As to the kind of feed for the mare in foal, oats lead, yet shorts and bran may be fed with economy and beneficial results; mashes can be given occasionally, and where possible cooked feed may be supplied at night, three times a week. Through the use of proper foods the bowels will be kept in a natural condition, and should be a little loose rather than otherwise at times of parturition."

While it is important to feed the mare well enough to insure a maximum flow of milk for the foal, yet it is important that the foal be kept growing to his limit by the feeding of some supplementary ration if necessary. When this practice is resorted to in the pasture, the method described by Splan, who is an authority on the care and development of trotting bred horses, is as good as any and is given as follows:

"With the colts all out to grass and doing well, it is time to separate the oldest of them from the youngest and commence feeding them grain, which is done in this way: Build a pen in some suitable place, which is the most convenient, making it high enough so that the mares will not try to jump it, and have the space from the ground to the bottom rail or board sufficient to allow the foal to pass under. Put in a handy gate or bars, then an ample feed trough. Lead your mares and foals singly into this enclosure and let them eat together two or three times and they will soon learn where the food is. Take out the mares, shut up the gate, leave the colts in. Keep a good supply of oats there, and you will find the foals there regularly, running in and out, getting their rations. To induce the dam to loiter about this place, keep a large lump of rock salt near it and occasionally a mess of oats, and there is no further trouble. In this way, at weaning time, which is at the age of five months, the colts have learned to eat, and the result is that when they are taken away from their dams they do not miss them so much.

"Now we put on the halters and keep them on, leading the foals more or less while weaning them. Leave them in their boxes, two or three together, several days, and have the boxes open into a nice grass paddock. Let them run out and in, give them oats mixed with bran and sorghum cut up fine, and in a few days more turn them out in the fields, away from their dams, where there is plenty of grass and water, and a large trough with feed in it constantly. They have been in the habit of taking milk a great many times a day, and they need food just as often. The best way is to keep plenty of mixed food for them, using cracked corn and oats, also unthrashed oats run through a cutting-box, then mixed with bran and water enough to moisten it to make the bran adhere to the oats.

"A fair allowance of grain for the colt, measured in oats, is as follows:

"Up to one year of age, from 2 to 3 lbs.
"From one to two years of age, 4 to 5 lbs.
"From two to three years of age, 7 to 8 lbs.

"While an ample allowance of such roughage as hay, straw and stover should be supplied, it should always be less than the animal would eat had it free access to this provender. The colt, like the mature horse, should not be allowed all the roughage it can consume, for such oversupply tends to gorge the digestive tract with inert matter, and may work lasting injury.

"Liberal feeding must be counterbalanced by an abundance of outdoor exercise. In no other way can colts be ruined so surely and so permanently as by liberal feeding and close confinement. Each day from three to ten hours should be spent in the open air, according to the conditions of the weather and other circumstances."

Crescent Route 2:08½, by Cresceus, has been sent to Harrie Jones, the Rushville, Ind., trainer.

CARE OF THE FOAL.

The instant the foal has been delivered see that the membranes, by which it is enveloped, are broken, so that the youngster can breathe, then if the dam is disposed to give it proper attention leave the foal to her care but have an attendant near by; watch them closely, unobserved by the mare, until the foal gets on its feet or makes an effort to do so, says the Horse Breeder. If the foal be strong and healthy it will soon attempt to take nourishment, but the first efforts will probably be extremely awkward and unsuccessful. In some cases the assistance of one or two attendants may be required to enable the foal to get its first meal.

The next important matter is to see that the bowels (or rectum) are evacuated. Should there be symptoms of constipation inject, per rectum, by means of a family rubber bulb syringe, a gill of luke-warm water with which two great spoonfuls of glycerine or sweet oil has been mixed. Glycerine mixes more readily with water than does sweet oil, but either is good. If neither oil nor glycerine is at hand, clear water alone will answer. In giving the injection use only sufficient pressure on the bulb to throw the liquid up to the obstruction, which will require but little force. Should the first injection not produce the desired result in one hour, give another, using a half pint of water and continue doing so at intervals of one hour until the desired result is obtained. See that the mare has the best quality of food, and it is also advisable to 'take the chill' from her drinking water for a day or two.

ALL OFF WITH GLENVILLE TRACK.

The racing bill having been defeated in the Ohio Legislature, there will be no racing at the famous Glenville track at Cleveland this year.

Vice-President W. G. Pollock, of the Cleveland Driving Club, in an interview after the defeat of the bill, said: "The defeat of the pool selling bill ends racing for Cleveland. At our annual meeting in April we will wind up the affairs of the company and make the necessary arrangements to cut the park up into building lots. I can't think of any other use it can be put to. I don't see how the matinees can be expected to support the track, so everything in the fast horse line in Cleveland will be called off."

H. K. Devereux's comment was: "It means the end of the track, and also an end to matinee racing. It is an impossibility to keep such a valuable plant in operation without some revenue coming in, and it is equally impossible to hold a race meeting unless pools can be sold. It is all off with the Glenville track, and the place where the kings and queens of the harness world once held sway will soon be dotted over with dwellings."

ANSWERS TO CORRESPONDENTS.

SOUTHERN OREGONIAN—Queen Wilkes, the dam of Dexter Princess 2:24½, was by Mambrino Wilkes 6083, out of the Stowe mare by Ned.

D. S. M., Ryde, Cal.—Hattie W., bay mare, 16 hands, foaled 1883, is by Alaska 14,429, son of Electioneer. Her dam is Sallie Coward by May Boy, son of John Nelson, second dam Young Mollie by Young Lodi, son of Lodi, third dam Old Mollie by St. Clair. The dam of Alaska was Lucy by Washington, son of Geo. M. Patchen Jr. 31.

N. D. Dutcher, Santa Cruz.—Bay Frank 2:20 was bred by D. Grover of Santa Cruz. His sire was Tornado 2417, son of Index, he by Keokuk 546. The dam of Tornado was said to be by Black Warrior.

John Quinn of Santa Rosa has quite a large string of horses at Pleasanton track, but like all the rest of the trainers has not been able to do much fast work owing to the long continued rainy spell. In his string are Nellie R. 2:10, owned by Long Bros.; a two-year-old Sidney Dillon, owned by Dr. Summerfield, who has already trotted a quarter in 40 seconds; Dr. J. W. Jesse's pacing filly that can pace better than a 2:20 gait; R. W. Peterson's trotter, R. W. P., that has worked a mile in 2:13, and is a promise as a money getter the coming season; H. B. Smith's mare, Ayeress, another green trotter, who can show a two-minute gait; Robert Duncan's green pacer, that has shown a mile in 2:16; a pacer and trotter owned by Dr. Felt, that will be raced this year.

There are thirteen classes for trotters at the Boston Horse Show, with the first prize in each \$100.

The veteran trainer Charles Marvin has eighteen head of horses in his stables at Lexington, Ky.

TRY DR. CRAFT'S REMEDY.

It is a matter of good judgment and good business to be able to handle promptly and effectively the various ailments of stock. It is particularly important to be able to treat the class of infectious and catarrhal diseases which include distemper, colds, cough, epizootic, grippe, pinkeye, etc. No class of stock diseases causes greater trouble or loss.

Dr. Craft's Distemper and Cough Cure, which is advertised regularly in this journal, has for years been put out under a positive guarantee to prevent and cure these diseases—to prevent them if used early enough, to promptly cure in any case. It has been sold so long and used so widely as to leave no doubt as to its merit. It will pay to have on hand for emergency. If you will drop a card to the proprietors, they will send you free their valuable pamphlet, "Veterinary Pointers." Address Wells Medicine Co., 13 Third St., Lafayette, Ind.

On a hot day drink Jackson's Napa Soda lemonades and be refreshed.

SECRETARY FILCHER HAS IDEAS.

Mr. J. A. Filcher, the new secretary of the California State Agricultural Society, was interviewed last week and asked as to what his policy in the office would be and replied as follows:

"My idea is that the first thing to do is to leave the very efficient assistant secretary in the office to attend to its affairs and start out on a campaign of the whole State to present to the commercial and agricultural and all affiliated interests the claims of the State Fair, to induce the people, from San Diego to the extreme north, to awake to realization that the State Fair is theirs; to get them to make exhibits and to attend the fair—people always follow their exhibits. I would have every section make exhibits of those things peculiarly representative of them, from mining to stock-raising, from mechanics to forestry, from dairying to commerce, and so on.

"I believe that the fair should be presented to them delocalized and as an institution of the State as valuable to the people as it should be of interest and information to the visitors to the State. Even if there were none of the latter, still I claim the fair is of inestimable value to the people as a means of acquaintance with the resources of the State, concerning which there is not that full understanding and mutuality of concern that there should be.

"I would have the people understand that the fair is to enter upon a new era, all the past mistakes and failures being wiped out, so to speak, and a new beginning made. If one county can be interested deeply by such a pilgrimage, another can, and so on until a sense of pride and a spirit of honest emulation is enkindled all over the State.

"Then after the fair I would seek to find out what is being done in advance in experiment and in discovery and publish it in a monthly bulletin to be issued under authority of the society, and through the press sent among the people. Thus, if a man has succeeded in a particular branch of culture of twenty acres, the facts and conditions under which he attained the end should be given to all the people in such bulletins. Then I would have the statistics required to be gathered, collated, and with fair deductions published fully throughout the State. I would want to have the society come into close touch with the educational institutions, and especially the State University, in its relation to agriculture and all its affiliated industries and developments.

"In this brief way my idea may be outlined, though it needs greater elaboration. I realize that it is a heroic task I undertake, but it can be accomplished. I will have a great deal to learn about the business, I know, but feel that I can grasp it.

"The board meets on the 11th of April, and then I shall lay the plans I have in view before it, and if they meet the views of the board I will go to work. I shall, of course, subject my ideas to modifications or amplifications which the board may see fit to suggest. In the meantime I will go over the affairs of the society, familiarize myself with them, and probably will receive much enlightenment that may prove of higher practical value than the views I now entertain."

GRANDAM OF JAY BIRD.

During my many years' experience with horses I have met with some very pronounced cases of wonderful intelligence, some of them very interesting. One of the most interesting cases was that of the old roan mare Lady Franklin, grandam of Jay Bird, sire of Allerton 2:09½. She was the most intelligent and one of the most peculiar horses I ever came across. Her full history was published in the Breeder some five or six years ago, yet there are some facts connected with the mare that have never been published.

Lady Franklin was sired by Esty's Black Hawk, he by Vermont Black Hawk, her dam being Lady Ellen by Sherman's Black Hawk. She commenced her career on the turf on Long Island in 1854, trotting races against Flora Temple, Miller's Damsel, Chicago Jack and other first class horses. All her races trotted previous to 1863 and after 1864 are reported in Chester's Trotting Manual. Some five or six races which she trotted in the South during the Civil War are not reported in that work.

I purchased the mare of Charles Logan, at Columbia, S. C., the spring of 1863, and took her to Montgomery, Ala., where I was engaged in business connected with stage and transfer lines. The mare was then sixteen years old. From the first I found that she was a very peculiar mare in many ways. She often reminded me of a natural "old maid." She had some of the most singular traits that I ever saw in a horse. She was like a regular recluse. She would never tolerate a stranger around her, yet a female or child could do anything with her. My little boy three years old was missed one day. He could not be found high or low. After a long search one of the men passing the mare's stall saw the little fellow lying asleep in the corner. The old mare would allow no one to go into the stall to get the child until I came after him. Although the mare was in South Carolina, a slave state, and was raised in New Hampshire, a free-soil state, a negro couldn't get within six feet of her. She would drive a darkey out of her stall with teeth and toe nails. I was always obliged to have a white man care for her. With a strange man behind her for a driver she would sulk and make a "cub-cub."

In all her twenty-five or thirty years she was driven by only two drivers. Hiram Woodruff and myself. She trotted her last race before I purchased her on Long Island in 1868. She was never on a track from that time until 1893, when I took her to the track in Montgomery to prepare her for her two-mile race. As soon as she struck the track she became

nervous and got off her feed. For four days she wouldn't eat three quarts of grain a day. She knew there was to be a race for her, and it upset her. Three days before the race I took her into her box in town, stripped off all the blankets and turned her loose. At once she cooled down and commenced eating like a dog, thinking the race was over. I never took her to the track or gave her any track work until the day she was to trot her race.

Her two-mile race at Montgomery, Ala., October, 1863, was one of the most remarkable races trotted in those days, forty-three years ago. She won the first heat by a throat-latch in 5:06. The second heat the two mares were head and head during the whole two miles, the heat being a dead one in 5:05½. The third heat was a perfect fac-simile of the second until twenty yards from the wire, when with a supreme effort the grand old mare stuck her nose over the core, a throat-latch ahead, in 5:05.

I took the old mare to Cincinnati, where I trotted her in five or six races. Having no home for her, it was with reluctance that I parted with her to Charles Tagget, who had a fine stock farm at Glendale, Ohio, with the written understanding that she should never have another strap of harness on her as long as she lived. She had a good home. Lady Franklin was bred to Mambrino Star, he by Mambrino Chief, and she produced three foals, Cottage Girl 2:28, trial 2:14; Glendale Maid, never trained, and Lady Frank, dam of Jay Bird, sire of Allerton 2:09½. Lady Frank was foaled May, 1874. I parted with Lady Franklin, November, 1864. Eight years after, 1872, I went to Glendale for the express purpose of seeing the old mare once more. When I reached the place I was informed that old Lady Franklin had gone blind; that she would tolerate no one around excepting her regular attendant, and that she had become very vicious. I went to her box, opened the door. She was standing over in a far corner of her stall. I called her by her pet name, "Carrie." In a flash the poor old mare pricked up her ears and felt her way to me, and rubbed her nose on my face, and as plainly as any animal could say it said, "I know you, old friend." She knew me after a separation of eight years. What wonder the tears ran down my cheeks like rain at sight of the old mare, yet she had as good a home and as good care as I could give her.

Lady Franklin died May, 1875. I visited her grave in 1877, and I broke her daughter, Lady Frank, dam of Jay Bird, that spring, and drove her in a three-year-old race at Hamilton County Fair, October, 1877. Seven horses started in that race, among the number being Maud S. 2:08¾. It was the first race that the latter started in. She won the race in 2:37½, 2:37.

All of Lady Franklin's foals inherited her characteristics, not one of the characteristics of their sire, Mambrino Star, being transmitted to them. Lady Frank was a perfect image of her dam in conformation, color, and she inherited all the good qualities and these qualities she transmitted to her son Jay Bird and he transmitted his good qualities to his progeny. Three-fourths of his get were roans. Allerton inherits the characteristics of his sire Jay Bird, and has his formation, excepting his color, which is brown.

I had a headstone placed over Lady Franklin's last resting place with the inscription:

Lady Franklin,
Foaled 1848,
Died 1875.

A Faithful Servant and Friend.

—G. P. Floyd in Horse Breeder.

THE RUSSIAN ORLOFFS.

It has become quite customary in America to speak of all Russian horses as of the Orloff breed. Of course this is an error. Russian horses are of several strains, and bred for a variety of purposes. The Orloff strain owes its popularity and general excellence to the untiring efforts of Count Alexis Orloff-Tschestmensky. The Count was a remarkable man and came of a noble family. His mental power and energy were tremendous. He was a successful general and statesman and did much to promote the interests of his country. His especial delight was the improvement of horses and dogs. He picked every horse in his stud personally, wrote their pedigrees in his own hand, and by the most careful system of mating produced a race of horses which have become famous the world over for endurance and distinctive character.

The Count recognized the Arab as ideal, but bred from it to adapt the progeny to the requirements of European life, increasing the size of body, strengthening its muscles and increasing its coat so that it could withstand the rigorous climate of Russia. His idea was to retain its general beauty, nobleness and energy. He first mated the pure bred Arab Smetanka with a large-boned Danish mare, thus producing the horse Polkan Ist, of larger frame than its sire. This Polkan was mated with a large Dutch mare, which breed at that time was celebrated for its trotting qualities, and the product of this cross was Barass Ist, an elegant trotter from which the whole Orloff breed originated. The Count then introduced English thoroughbred blood, producing light and heavy trotters. These combinations of blood were only decided upon after prolonged experimenting with rich material the Count had in his stud from as far back as 1772, three years before he owned Smetanka. In his complete stud were Arabs, Persians, Turkish horses, Armenians, Bulgarians, Caucasian, English, Dutch, Danish, Mecklenburg, Spanish, Neapolitan, Polish, Ukraine and Crimean horses.

The Russian horse of the Orloff type includes the well turned saddle class, the Orloff race horse and the Russo-Arab horse. The Russian light draft horse, or Bitlug, is produced in the provinces of Tambov and Vorenej, near the river Bitlug. Its origin dates

back to 1712 in the time of the Emperor Peter the Great, who was struck by the excellence of the mares and sent Dutch stallions into that locality. Since then the breed has been perpetuated most carefully so that true types are now the rule. The village of Shukavka, where these horses are bred, is right in the center of Count Orloff's property at Khrenovoy.

Count Orloff's fast trotters were trained by short brushes—four turns over a course of 1400 feet, the turning about being done at a walk, then the horse sent into a stride quickly. To develop endurance the horses were generally driven by the Count himself to Ostrov, a village twelve miles from Moscow. In front of his Moscow mansion the Count had built a race course, a little over a quarter of a mile, the ends of which were marked by four jawbones of whales. Old-timers allege that the Count's trotters used to make this distance in less than thirty seconds, and they remember that a servant used to hold up a timepiece the size of a soup plate. Horse after horse was raced along this short stretch to sleigh or drosky.

A COMMENDABLE LAW.

A bill intended to abolish the cruel trade in broken down horses has been signed by the Governor of Massachusetts and is now a law, going into effect April 21. Its provisions are as follows:

Section 1. It shall be unlawful for any person holding an auctioneer's license to receive or offer for sale or to sell at public auction any horse which by reason of debility, disease or lameness, or for other cause, could not be worked in this Commonwealth without violating the laws against cruelty to animals.

Section 2. It shall be unlawful for any person to lead, ride or drive on any public way, for any purpose except that of conveying the animal to a proper place for its humane keeping or killing, or for medical or surgical treatment, any horse which, by reason of debility, disease or lameness, or for other cause, could not be worked in this commonwealth without violating the laws against cruelty to animals.

Section 3. Any licensed auctioneer violating any provision of this act shall forfeit his license, and any person violating any provision of this act shall be punished by a fine of not less than five nor more than one hundred dollars, or by imprisonment for not less than six months.

A similar law in every State would be a boon to the horses which, through one cause or another, fall into the hands of the "hawkers" of horses commonly called "plugs."

WELCH'S PLAN.

Andy Welch, says a Cincinnati paper, came West on several missions. One was to renew the lease of the grounds at Oakley Park to the Losantville Golf Club, and another was to get a trainer for his five-year-old trotting stallion Vice Commodore. He secured George Hayes of Lexington to do this, and the well-bred horse will be campaigned this fall. Mr. Welch thinks that this will be a great year for harness racing sport. "I expect a big entry list to the Charter Oak \$10,000 Stake, and many owners will take a chance at the handicap entrance fee," he said. "I expect sixty entries to the stake, and it will take that number to break even, as no percentage will be taken from the winners. The plan of three heats, each of a mile, has won out, and it will be used at Readville and Providence, and, of course, at Hartford. It was abandoned last year, as the horsemen insisted on having uniform racing. As to the stakes for the Oakley meeting, that is a matter that has not been decided. We will wait and see how the owners take to the Charter Oak plan. I have made arrangements to get the Oakley track in shape beginning on the first of the month, as many trainers have applied for stable room there and intend to do all their training there. A matinee club will also hold races there once a month. We will secure a good man to take charge of the track."

COLORADO CIRCUIT.

The Fort Collins, Colo., horsemen entertained representatives of the Northern Colorado Racing Circuit, ten in number, at The Northern, March 19, at which time officers were elected as follows for the Northern Colorado Circuit:

President—W. J. Gallegan, Loveland.

Vice-President—A. L. Camp, Jr., Greeley.

Secretary and Treasurer—H. A. Galbraith, Fort Collins.

Dates were arranged as follows: Greeley, August 23, 24, 25; Longmont, August 30, 31; Loveland, September 3, 4, 5; Fort Collins, September 12, 13, 14; Brighton, October 2, 3, 4, with Laramie and Douglas, of Wyoming, filling out the last two weeks of September, making seven weeks racing in all.

This was a very interesting circuit last year, and, with the addition of the Wyoming meetings mentioned, will be a strong one this year.

READVILLE'S GRAND CIRCUIT, AUG. 20-25.

By some inadvertence the dates of the Readville Grand Circuit Meeting was omitted from the advertisement now appearing in this paper. Most people would know anyway, but for the benefit of any who may not, we will state that the big Readville Meet begins on Monday, August 20 and continues through five days.

The Dexter Prince mare owned by Jos. Columbet of San Jose, foaled a colt a few days since by Galindo, the son of McKinney 2:11½ shipped to New Mexico last week. This is Galindo's first colt and is a fine, strong, lusty fellow, a natural trotter, and a credit to his young sire.

THOROUGHBRED DEPARTMENT.

By RALPH H. TOZER.

The best horses of Barney Schreiber, including the wonderful Dr. Gardner, were sent to Memphis late last week, and if they ship safely the Doctor will almost surely win the Tennessee Derby and the other big two-year-old fixtures at the Tennessee metropolis. Schreiber says St. Louis is growing so rapidly that it is only the question of a few years when his Woodland's farm at Bridgeton will be so valuable he will probably realize an immense sum for the domain of 800 acres in the beautiful Florissant Valley (one of the loveliest spots in the world). He will then take Horace Greeley's advice, "Go West, young man, and grow up with the country," though his western trip will be only into the interior of Missouri, perhaps twenty-five or fifty miles, where the blue grass is as plentiful as in Kentucky's most famed region. The genial Don Bernardo expects to race on a large scale every season in California, and annually leaves in California those horses not considered good enough for the Eastern campaign and also the cripples of the stable, therefore it is possible he will lease or buy a farm not far from San Francisco for this purpose, but he is a firm believer in Missouri's excellence as a breeding ground, and would not exchange for a farm in Kentucky, nor for one in this State. In Bannockburn Schreiber has a young stallion that threatens to become America's premier sire within the next three years, judging by the phenomenal performances of Dr. Gardner and Horace E., undoubtedly in the first flight of horses three and two years of age respectively. Bannockburn "figures" to be a great sire. He is in the first place a magnificent individual of good size, he had speed and lung and heart power that enabled him to win at the longer distances run in his day as well as at the shorter. His sire, Hayden Edwards, was perhaps the most successful of Prince Charlie's sons at the stud in America, opportunity considered. I am counting those bred in America when I make this assertion, for Hayden Edwards hardly surpassed imp. Pirate of Penzance or imp. Wagner as a getter of superior performers, though he was better than Salvator or Autocrat. The dam of Bannockburn was Bettie Blaise, by imp. St. Blaise, whose sons and daughters have won something like \$1,100,000 on the American turf, and St. Blaise, a Derby-winner, was premier sire of this country once or twice. On the sire's side Bannockburn traces straightaway to the unbeaten Eclipse without a break in the success chain as follows: Hayden Edwards, Prince Charlie Blair Athol, Stockwell, The Baron, Irish Birdcatcher, Sir Hercules, Whalebone, Waxy, Pot-8-os, Eclipse. Hayden Edwards' dam was Nannie Bay, by imp. Glenelg, who was premier sire of America twice, if memory serves, and would have been famous had he begotten but Firenze and Los Angeles. Glenelg was by the good sire Citadel, son of Stockwell, thence traces to Eclipse without a flaw in the chain. Nannie Bay's dam was by the premier sire, Lexington, greatest of all American bred stallions of all time, while her dam was Tokay, an extra good producer by the top-notch sire, imp. Yorkshire, next dam the famous Miss Martin, by Garrison's Zingane. On the dam's side Bannockburn is bred on just as successful lines. Bettie Blaise, his mother, is spoken of above. She was by St. Blaise, Derby-winner, he by Hermit, Derby-winner and several times England's leading sire, with a stallion service fee as high as \$3,000 at one time. Hermit was by Newminster, several times England's premier stallion, he by another premier, Touchstone, then the great sires and racers, Camel, Whalebone, Waxy, Pot-8-os, Eclipse. St. Blaise's dam was by Marsyas (sire of the Derby-winner, George Frederick, and of Albert Victor as well), he by Orlando (many times premier sire of England and close to the top longer than any horse in stud history). Then come crosses in St. Blaise of Gladiator (second in the Derby and sire of Queen Mary and Sweetmeat in England as well as a host of winners in France). Bettie M., second dam of Bannockburn, was by imp. Saunterer, a horse that lived but a short time in this country, I believe, and had but few to represent him on the track or in the stud. He was a son of the great cup horse Saunterer and a grandson of Irish Birdcatcher, while imp. Saunterer's dam was Tested, by Touchstone. The third dam of Schreiber's great stallion was Lida Gaines, by War Dance, the greatest sire of good racing and producing mares of his time in this country, as was his sire, Lexington, before him. Then comes Gossip, by Lightning (another son of Lexington) and Gossamer, by imp. Glencoe, a premier sire in this country. The beauty about the pedigree of Bannockburn is the large number of successful sires that figure in the tabulation in the first five removes, while his first twelve or thirteen dams were producers of great note. In short, Bannockburn is bred on as nearly perfect lines, according to my theory, as a horse could be, is a magnificent individual, and was a race horse of rare speed and plenty of stamina. I am writing a book on breeding that will set forth all my views on this subject, and while it may, like the Lowe plan, be called "a system," it will be nothing like as hard to understand as is the work of the late Australian.

The Emeryville stewards have done some good work of late and I feel pleased over it, because attention was called to the zigzaggy running of the animals (Ralbert and Briers) in this journal on more than one occasion. Their entries have been refused on account of inconsistent running. Saturday action was taken in the Ralbert case and Monday it was decided to

refuse Briers' entry in future. The owners of these animals can consider themselves extremely lucky that they were not ruled off the turf for the running of late of Ralbert and Briers has never been beaten for inconsistency.

Jockey Robinson has a great following these days and the prices on horses he rides is materially lessened when compared with the prices when ridden by other boys. W. Miller is doing the best riding at Benning, as he did at Los Angeles. Last Monday he piloted three winners. John Schorr, the Memphis brewer, has offered J. O. Keene \$20,000 for his contract on Radtke, but this did not tempt the Kentucky turfman, and the best he can hope for is first call on the clever Chicago lad's services. This is one season when no "phenom" has been developed in the riding line in this part of the world. Last season W. Davis made his mark and previous to that E. Welch, W. Knapp, Buchanan, Eugene Hildebrand, Redfern, Jay Ransch, Bullman, J. Martin, Piggott, Jenkins Tod Sloan, Spencer, "Skeets" Martin and Clawson made their first great "reputations" in the land by the sunset sea, further enhancing them at the East and in foreign lands. "Patsy" Duffy and Cy. Holloway, many years ago, made the beginning of their great fame in California, while Isaac Murphy, Hamilton and Eddie West, famous colored pilots all, helped their "reps" materially through riding the Baldwin and Haggin horses in the Middle West and far East.

Weber and Co. shipped their strings to New York last Monday afternoon. It includes the grand looking Sombrero colt, George S. Davis, for which they paid \$5,000 to Harry Storer. The Himyar stallion. Himself, a great horse a few seasons ago, was left behind, and I am commissioned to sell him to any breeder desiring a horse of royal breeding coupled with excellent conformation and first-class racing reputation. He ran six furlongs in 1:12½, a mile in 1:39 and one mile and a quarter miles in 2:06, defeated the best horses in training in this country, and was intended for Rancho del Paso Stud, John Mackey being in love with the horse and last summer getting the Japanese government's representatives (which had purchased him) to take a half-brother to Dick and Ort Wells in exchange for Himself. Domino, Plaudit and Faraday, sons of Himyar, all greatly distinguished themselves at the stud, and doubtless Himself will also, if the opportunity presents itself. This is the best line of Touchstone in America, in fact except through St. Blaise and his sons it is about the only line of it in this country. The very speediest animals in America came from the Himyar, Alarm, imp. Eclipse brand of the Touchstone family.

There arrived last week at Bakersfield from the Del Paso ranch at Sacramento thirteen carloads of blooded horses, which were unloaded at Kern and taken at once to the Stockdale ranch. The shipment was made directly under the supervision of Superintendent Jastro, and included many of the finest horses on the famous northern breeding farm. In the thirteen cars there were 137 mares and colts, 151 colts and fillies and three stallions. The shipment to Kern county means that blooded horses will be raised at the company's Stockdale ranch on a more extensive scale than before.—Bakersfield Californian.

ADD THOROUGHBRED DEPT

Eureka is in line to have a running meet, with plenty of horses, good sized purses, regular bookmakers and all the rest of the accessories. It will take place about the Fourth of July and will be under the auspices of the Stablemen's Union. The union, at its own expense, recently sent one of its members, John Haddican, to San Francisco, to see what could be done in the matter of inducing the owners of horses to send the animals to Eureka. The greatest kind of encouragement was received, and after receiving the report of Mr. Haddican it is the plan of the Stablemen's Union to pull off a meet during the week of July Fourth. There will be four days of racing.

WHAT SOUNDNESS MEANS.

A satisfactory definition of sound or soundness is not easily given. There is no other word that conveys quite the same meaning. A person is said to have a sound body, or an organ is said to be sound when it is healthy. The term as it applies to the horse includes a little more. The horse is sound when he is healthy, and when his conformation is such that he has not had and is not likely to have any tendency to any particular disease. The term "sound" as used by veterinarians and dealers is often loosely construed. It may mean anything from freedom from lameness or not windbroken; to an apparently healthy condition at the time of examination. There is no fixed technical or legal definition that is uniformly recognized. The English definition of unsoundness, while defective in that it is wholly based upon the usefulness of the animal, is one worthy of being repeated, and is as follows: "Any disease, or alteration of structure from disease or accident, which does interfere or may in its ordinary course interfere with the animal's usefulness is unsoundness, and furthermore, slightness of disease or facility of cure, is no qualification as regards such unsoundness."

An animal which may have had diseases that have been cured, or may have some disease at the time of examination that does not interfere with his usefulness for some purposes, is then said to be "serviceably sound." In some places "serviceably sound" refers only to wind.

A vice is not necessarily unsoundness, but some of them lead to unsoundness, and may therefore be considered as part of the examination in the selection of an animal. Vices are such traits of character or such

habits as have the tendency to produce disease, or to lessen the usefulness, mar the appearance, interfere with or make dangerous the handling, or cause the destruction of property. Before examining the horse, the purchaser should decide upon the character of the service for which the animal is intended, whether for slow draft, heavy or light harness, saddle or combination. The class or type, size, age, gait, sex and color should be approximately settled. Ample time should be taken in the selection of a horse. This can usually be done when the animal is obtained from the dealer or producer, but seldom allowable at public sales or sales stables. At a public sale the horse is sold as sound, "serviceably sound," or at the "end of the halter." When the horse is sold as sound, the purchaser has the privilege of returning the animal if found to be otherwise within a day or two. If sold as "serviceably sound," the term applies merely to wind and the ability to do work. In some cases the special disability is mentioned. If sold at the "end of the halter," the purchaser takes all the chances on the number and character of the diseases that may be present.

SMATHERS FILES HIS ANSWER.

New York, March 26.—Elmer E. Smathers has, through his attorney, John J. Adams, served an answer to the charges that he did not win the Memphis Gold Cup in an honorable manner.

In the answer the allegations in the complaint are denied, and for a further, separate and distinct defense Mr. Smathers sets up the following:

"That the Memphis Gold Cup, mentioned and referred to in the plaintiff's complaint, was offered as a prize or trophy for free-for-all trotters to wagon, driven by amateur drivers, at the Memphis Trotting Track, near Memphis, Tenn., in 1902. That the said cup was offered upon certain terms and conditions, made and published, and, among others, the condition that it was to be annually contested for at the annual meeting of the Memphis Trotting Association until twice won by the same driving club, and when so to become the property of such club.

"That in the annual contest therefor in the year 1902, defendant, representing the New York Driving Club, won with Lord Derby. That in 1903 C. K. G. Billings, representing, or pretending to represent the Memphis Driving Club, and driving the mare Lou Dillon, won the said contest. That in the year 1904 the defendant, driving the horse Major Delmar, and representing the New York Driving Club, again fairly and honestly won and was entitled, as representative of the said New York Driving Club, to receive the cup, and the same was thereupon presented to him as the representative of the said New York Driving Club."

The answer states that the defendant turned the cup over to his driving club, and that the club afterward presented the cup to Mr. Smathers, and that he is now the lawful owner of the cup.

For a second defense to the action, Mr. Smathers, on information and belief, says in his answer that the action is not brought or instituted, or is not maintained or prosecuted by the Memphis Trotting Association, the plaintiff named in the action, but on the contrary, the same is brought and is being maintained by Murray Howe, claiming to be the secretary of the Memphis Trotting Association. It is further claimed that the Memphis Trotting Association never authorized Murray Howe, by resolution of its board of directors, or otherwise, to bring, institute, maintain or prosecute the action.

In the closing paragraph of the answer Mr. Smathers demands that the complaint be dismissed and the costs and disbursements of the action be awarded to him.

GEERS HAS A GOOD TROTTER.

The bay stallion Pulsus, now in Ed. Geers' stable, made a remarkable campaign on the Southern tracks last season, starting in ten races and winning all of them, says Chicago Horseman. He first appeared at Murfreesboro, Tenn., on August 30, winning the 3:00 trot, taking a record of 2:20. His next appearance was at Shelbyville, Tenn., September 7, when he won the 3:00 class; best time 2:29½, and two days later he annexed the free-for-all, stepping a heat in 2:23. The following week found him at Columbia where he started three times within five days, winning the 3:00, 2:40 and free-for-all, trotting a heat in the latter race in 2:20¼. He next turned up at Florence, Ala., September 20, in the 2:45 trot, which he won, as he did the 2:25 class three days later. His victorious career for the season was terminated at Birmingham, Ala., where he won the 2:15 class, on October 24, and three days later took the 2:18 trotters into camp, taking his record of 2:15¼ in the final heat.

Pulsus is a bay stallion foaled 1901, by Egotist, 5018, dam Dame Prudence, by Hinder Wilkes 8685; second dam Dunlora, dam of Kingward 2:25, by King Rene, 1278. He was bred at Clover Bottom Farm, Donelson, Tenn. Geers is confident that the son of Egotist is one of the best trotters in sight and he will be liberally entered in the Grand Circuit early closing events.

The largest mare ever raised in Oregon was the one bred and raised by Sol King of Corvallis, and exhibited by him at the Portland Fair last year. The mare was four years old when exhibited and weighed 2670 pounds. She died while on exhibition at the Fair. The day before she died, her owner, Mr. Todd, was offered \$4,000 for her. He refused the offer because he had her on exhibition in a tent and at 10 cents a sight was taking in \$200 to \$300 per day. She died very suddenly and from unknown causes.

Jackson's Napa Soda does not tangle the feet.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

GAME BIRDS FOR MARKET.

A question that has been touched upon by several State tribunals in recent years and one that has evoked opinions leaning to the doctrine that the spirit of the State game laws were to be construed as against any so-called private ownership of fish or game, was disposed of by Attorney General Atkinson of Washington State last week.

In an interesting opinion, addressed to the State Auditor, he lays down the dictum that there is nothing in the Washington game law to prevent the raising of game birds in captivity and selling them in open market. What pertains to game may be equally applicable to fish. The opinion in full is as follows:

In reply to your inquiry of March 24, submitting a letter from Charles A. Kinnear, the same having been referred to you as the officer who issues State hunting licenses, which letter reads as follows:

"Price lists and information concerning the raising in confinement of pheasants and quail for their plumage, for the market and for bench show purposes, have been sent to me from pheasant farms in Illinois, Indiana, New York and Toronto, Canada. The information they give shows that the raising of certain varieties of pheasants for the market, and especially for their plumage (which is purchased by the millinery headquarters) is enormously profitable.

"While I have no thoughts of entering into the business of raising pheasants for the market myself, the subject upon investigation is very interesting, and I have had inquiries from individuals, farmers and poultry raisers in various parts of Eastern Washington, for the names of Eastern firms who can supply pheasants, and information concerning the raising of the same, and also if there is anything in the laws of Washington which prohibits the offering for sale upon the open market of pheasants which have been hatched and reared by a hen in captivity.

"I, therefore, in behalf of several farmers and other individuals of the State who desire to raise in captivity pheasants, grouse or quail for the market and for bench show purposes, ask the following question:

"In your opinion is there anything in the laws of the State of Washington prohibitory to the offering for sale in the open market of grouse, pheasants or quail that have been hatched and reared by a hen in captivity?"

I have to advise you that the statutes regulating the hunting, killing and selling of wild animals and wild birds in this State relate and depend, specifically in title and body, on the word "game." In the construction of these laws it then becomes necessary in this instance to know the proper definition of that term. The English and American Encyclopedia of Law, volume 14, page 654, gives the following definition, viz:

"Game has been defined as birds and beasts of a wild nature, obtained by fowling and hunting. Game is a general term for animals or birds of a wild nature usually pursued or sought by sportsmen for amusement."

Relating to the definition, see also *Gunn vs. State*, 89 Georgia, 341; and *People vs. O'Neal*, 71 Michigan, 385. Relating to the same, volume 2 (A. & E. Enc. of Law) records that such wild fowls or birds as wild geese, which have been brought into captivity and have become domesticated and have lost their power or disposition to get away, are the property of the person who tames them, and are not considered as game.

The same authority indicates that pheasants which have been reared by a hen (chicken), having never been wild, are objects of property and are to be construed as domestic fowls rather than game. (See *Amory vs. Flynn*, 10 Johns, (N. Y.) 102; also *Reg. vs. Garnham*, 8 Cox C. C. 451, 2 F. & F. 374; *Reg. vs. Corey* 10 Cox, C. C. 23.)

It is a well-known principle of law, in States generally, that wild birds or animals which have been kept in captivity and have become more or less domesticated, when reclaimed by the art and power of man, are the subject of qualified property and are, as a general rule, under the protection of the law the same as any other property, and are at the disposal of the owner for using or selling as he desires. This seems to have been the law for thousands of years in civilized countries, and it would seem to have been the sensible principle to follow; for without doubt all animals and birds were once wild in *ferae naturae* state, and by the application of this principle all people have tamed and acquired domesticity in animals and fowls from the game state from elephants and horses and cattle down to chickens and canary birds.

It is my opinion that our laws in this State covering the subject were intended by the Legislatures to relate strictly to game, meaning animals and birds in their wild, free, roving state, and these statutes were not intended in any manner to limit or prevent any probable or possible occupation or industrial development relating to the growing and raising and domesticating of any kinds of birds or animals for food products and the general use of the people.

I therefore conclude that there is nothing in our State game laws as they stand at present, that will prohibit private raising of grouse, pheasants, quail and similar birds when they have been hatched and reared in captivity, nor is there anything to prohibit their sale in the open market.

It may be argued that this construction of the law will complicate and make difficult the work of game wardens to enforce the protection of regular game. If

this should prove to be true, it may be argued that future legislatures should be able to establish additional laws to assist in distinguishing the sale on the market of these domesticated, or semi-domesticated birds, from those of real game. It would seem that the raising of domesticated pheasants, quail, etc., should largely accommodate and make plentiful general markets for the use of the people who are not specially of the hunting class, and should, therefore, be advantageous to the protection and growth of real game, and be entirely pleasing and satisfactory to all concerned.

Bob Whites in the South.

The melodious call of the famed Eastern "pa't-ridge," "Bob-bob-white! bob-white!" has recently stirred up a number of Hollywood citizens who were familiar with the cheery piping of the little brown fellows.

What did it mean? Surely there were no bob white quail in that section of the state. Some imitator of the calls of wild birds must be in the hills practicing his art was the explanation offered by a citizen of the Los Angeles suburb to a group of people who had gathered on Franklin boulevard, between Vine and Gower streets, and were trying to solve the mystery of the sounds so well known to most every person from way "back east."

The calls were again heard during the evening. It seemed incredible that the beautiful notes were genuine, but genuine they were, and to the eastern people who heard them it was indeed a rare treat.

Probably this is the first bob white call that has ever been heard in that part of the state, and in view of this fact several people who heard the musical notes of the Eastern quail were in a quandry to find a solution to the mystery.

It was cleared up later on, however, when it was ascertained that A. G. Bartlett of Vista del Mar, who has just completed an aviary on his beautiful estate, where he will endeavor to propagate the different species of quail, received a shipment of two dozen bob white quail a few days ago from the East.

In transferring the little brown beauties from the shipping crate to the aviary about a dozen escaped and flew to the hills back of his estate, where it is hoped they will multiply and stock the hills in that vicinity.

It is also hoped that any chance hunter who may come upon these little strangers from the east while roaming the hills in Hollywood will not mistake them for the California valley quail and shoot them during the open quail season. Should he do so he would be liable to a heavy fine, for bob whites are so scarce in this state that it is against the law to destroy them at any season of the year.

Partridges and Grouse Domesticated.

For over 400 years the turkey has held the record of being the bird most recently domesticated, but through the efforts of Dr. Hodge of Clark University, Worcester, Mass., another bird now lays claim to the distinction. For nearly two years Dr. Hodge has been busy with the task of domesticating the partridge or ruffed grouse, until he is now certain that they can be made tamer than barnyard fowls. His dream is that in ten years they may be a common sight on big estates such as those along the Hudson river, in public parks, and even in the woods adjoining cities. Of the 300,000 animals and birds described in the textbooks, only 100 have been domesticated, and most of this work was done before the dawn of authentic history. The dog, it is said, was the first animal tamed, and Dr. Hodge believes that children had much to do with this, as he also believes that today they may play a large part in the domestication of wild animals and birds. Dr. Hodge has demonstrated by his experiments that it is as easy to raise partridges as chickens, and says they are about as tame. He began his experiment with 12 eggs, which he took from nests 60 miles apart, in order to avoid close interbreeding in case the birds reached maturity. Cochins bantam hens were used to mother the eggs, and every one was hatched. Five chicks died of pneumonia within the first ten days, one was killed in the nest the first day, and two were killed by cats. The other four lived to become vigorous, healthy birds, beautiful and tamer than the ordinary barnyard hen. Two wild birds which had flown against the windows in the city were added to the stock, and the six birds grew up together, the wild birds rapidly becoming as tame as those reared in captivity. The food given the partridges was as near as possible like what they would find in the woods. For the first few weeks they got insect food. Then he gave them "partridge custard," a dish composed of eggs and milk beaten together and baked solid, but although the birds liked it, it brought on septic fever and was cut out of their diet. The eagerness of the birds for insects convinced him of the practical value of taming them. When allowed free run of the lawn and garden, they were more efficient than careful gardeners in getting rid of insect pests. The birds ate also fresh chickweed, dandelion seeds, and all kinds of fruits, with the exception of peaches and pears.

Last week Marysville sportsmen had excellent sport snipe shooting in the nearby marshes where the birds were very plentiful.

The close season on English snipe began on the 1st inst, and prevails until October 15th.

PROTECTION FOR STRIPED BASS.

The California Anglers' Association propose to induce the legislature to put a close season on striped bass. This will be a move in the right direction. These fish are of secondary importance to the salmon as a commercial proposition and under existing circumstances it is but a mere question of time, and a short time at that, before they will become, for commercial purposes, exterminated. The shipment of striped bass from San Francisco to all principal Coast, Western, Eastern and Southern points, and in fact across the Atlantic, too, in cold storage, to European ports, is a draft that no waters, however prolific of fish, can stand. In these shipments total weight and not minimum size is the desideratum.

Another good move contemplated by the association is an effort to induce the location and fitting up of a striped bass hatchery. This is a new departure, we believe, in fish propagation, but considering the almost phenomenal egg capacity of the female bass and the rapid hatching of the young—within about 48 hours after spawning, the project seems a feasible one.

Marysville Fly-Casting Club.

The Marysville Club is now fully organized with a full quota of officers, a large membership and a constitution and by-laws.

A casting platform and other essential aids to the sport will be located in Ellis lake and a series of fly-casting contests will take place, the initial meeting being scheduled for April 22.

Santa Clara Hatchery.

A number of the Santa Clara Supervisors and members of the Santa Clara Fish and Game Protective Association made their first visit to the fish hatchery maintained by the county at Brookdale recently. The party was headed by Dr. A. M. Barker of San Jose, president of the association. The visitors were shown the latest methods of stripping eggs from steelhead, and the young fry in various stages of development. They were entertained at dinner by Judge Logan, who donated the site for the hatchery, and has offered the Santa Clara Association a site for the clubhouse it proposes to build at Brookdale. A concerted effort is to be made by the counties of Santa Cruz, Santa Clara and Monterey to increase the facilities of the hatchery and populate Monterey bay and mountain streams with fish.

FISH LINES.

In spite of the unpropitious weather conditions preceding the opening of the trout season on Sunday last many local anglers—the knowing fellows, made good catches and enjoyed the first thoroughly, as they were entitled to for the orthodox observation of this most important day in the calendar of sportsmen.

Reports from Marin county are many and various, it would be far easier to enumerate the stay-at-homes than to list only a fair proportion of those who went forth equipped with rod and reel and that in the teeth of a north wind.

On the Lagunitas some nice catches of fair sized trout were made, as is usually the case on the opening day.

A well known local angler, who hails from William street, was caught on neutral territory and run off. Shortly afterwards he met a couple of anglers—both in the jewelry business. He warned the two going up stream, they made a detour and fished way above the obstruction. They had eighty fish in their baskets when they came back to the city. But all this is poaching.

The Tamalpais Club members who went out were: W. W. Richards, John Seibe, Billy Berg and T. W. Osborn. George Walker tried the Paper Mill near Camp Taylor and caught a number of fine fish.

Jas. Lynch and Jas. Thomson fished Schell creek and landed 18 fair sized fish. That they are skilled bait fishers is shown by the fact that those who went after them on that water, save W. Hucks, who caught one 10-inch fish, all returned unrewarded.

Frank Marcus, Bert Harwood, Paul Wick and Ed Conlon fished the creek in Green valley, above White Horse lake. They caught a lot of nice fish. About 50 Vallejoites and others were also in that section, everybody catching fish. The water was very clear.

From San Jose the reports are meager. From this point, usually, an army of anglers journey to the many streams in the Santa Clara valley. Many were out last Sunday, in keeping with past traditions, but judging from the following account in the Mercury results were rather disappointing:

"The wise old fishermen who know that it is impossible to secure a basket of trout when the streams are so high, and who were too knowing to take advantage of the removal of the law's ban yesterday, will read with chagrin the success of one fishing party.

Four well-known local rod wielders, Fred Robbins, Gil Robbins, S. Bertucci and J. Yanko, secured 120 trout in the upper part of the Guadalupe creek. They averaged between 6 and 8½ inches in length. They report the stream very high, but that the fish are numerous and bite freely.

Other fishing parties who have returned are not boasting of their catches, so it is understood that very few were as successful as the Robbins party.

The present opening of the trout season is unprecedented in late years in the height of the streams. Fly casters usually remain at home when the streams are so roily, but some fishermen make medium catches with bait."

The Guadalupe was reported to be a trifle lower than the Los Gatos Sunday morning. The Coyote was booming and very muddy. Nearly all fishing trips planned for Sunday were canceled. Some left for Hotel Santa Ysabel at Smith's creek and a num-

ber for the streams near Monterey. As long as the streams are muddy, the fishing will not be good. The last rains carried more food to the streams and the trout will not bite when such is the case.

Three men who fished on Sunday near Tocaloma landed 115 fish.

Chas. Breidenstein, Sam Wells, and Jos. Dober fished from Tocaloma down stream with but fair results. The dinner they cooked on the banks of the stream that afternoon made all amends for lack of fish.

Wildcat creek, over in Alameda county, redeemed its good early reputation of past years by furnishing a fine basket of fish to a wise angler who tried it once more for luck.

Small trout were the rule in the San Gregorio and other San Mateo waters.

The weather the past week has been of glorious portent for the angling fraternity and tomorrow will be a lively day for the fishes for there will be a turnout that will cause a procession on some nearby waters.

For several weeks there will be more or less resort to spoons and spinners. The Wilson, La Forge, Emeric and Stewart patterns, either in copper or copper and silver, each have staunch advocates. They are all good killers, and the all-round favorite size is the No. 0, with either a single or treble hook.

For early stream fishing some anglers use a small spinner at the end of a six-foot gut leader and one or two dropper flies. Other enthusiasts place a worm-baited hook on the point of the leader and use one or two stretcher flies.

The homely but every popular angleworm will without doubt be the most effective lure during the early days of the season. And while some anglers affect to look down on the "barnyard" product, bait fishing for trout is acknowledged to be an art in itself, and the expert bait fisher rarely fails, conditions being favorable, to fill his creel with speckled beauties.

For early fly fishing the following lures are suggested by F. M. Haught: Klamath region, Shovel creek and near-by small streams—Coch-y-bondhu, hare lug, red spinner, coachman, cowdun. Upper Sacramento—Blue bottle female. March brown, royal coachman (red and black ants in July and August). Truckee—Coch-y-bondhu, royal coachman, improved spinner, professor, blue rail, and in May the gran-nom fly. The above flies should be on No. 10 and 12 sproat hooks, the smaller hook being the better for late afternoon and evening fishing.

For the Paper Mill, and, in fact, all coast streams, a general assortment of small dark flies tied on Nos. 12 and 14 hooks are suggested by Chas. H. Kewell as follows: Wells fancy (a combination of two or three good flies, originally intended for the Truckee, but found to be an all-round killer), professor, stone flies, oak, governor, Point Reyes (a solid black fly), brown hackle (red tail), black gnat, red ant, red and blue uprights and gray hackle.

For the Big Meadows, the favorites, tied on Nos. 8 and 10 sproat hooks, are: Light and dark caddis, improved governor, Kamloops, Wells' fancy, black prince, black ant (with a double hackle, the idea of a local angler), and grant fly.

For Eel river, lighter flies are found to work best. The blue rail, however, a creation of John Benn. is most effective on this river.

Today and tomorrow are the scheduled dates for the San Francisco Fly-Casting Club's No. 4 contests of the classification series.

Weather indications are extremely favorable for the cherished devotion of rodwork on a stream, and this, coupled with the unsatisfactory conditions which prevailed on the first day of the open season, lead us to believe that a number of the Stow lake enthusiasts will rely on a re-entry score later on.

The trout season in Washington also opened on the 1st inst. Conditions up north were apparently a little better for Tacoma anglers than prevailed here, and such being the case the following from the Tacoma Ledger argues that the anglers of that section are singularly blessed by St. Walton:

Tacoma is peculiarly fortunate in having many streams in the immediate neighborhood, where trout can be caught. No city is more favorably situated in this respect.

Probably the best known streams are Chambers creek, below and above, although most Tacoma anglers make for the lower part of Chambers near Stellacoom. This creek, with Muck creek, near Roy, will attract the most fishermen Sunday, as both are known to be well supplied with fish and both are convenient for a day's outing. These streams are always good at the opening of the season.

Other good streams include Deschutes river, about thirty miles south of Tacoma, near Rainier. Then there are Clear and Clark creeks, between Tacoma and Puyallup, four and seven miles respectively out. Green river above Auburn is usually a favorite resort.

There are many streams accessible by water, such as Olalla, reached by the west passage; Allyn creek, running into North bay, and Lake Debro, a mile from Auburn, also are well known, although the latter is private property. Coulter creek on North bay is another good trout resort.

On the Interurban line near Milton are several small lakes that abound in trout. There are other bodies of water that anglers know of, but on the first day the creeks between here and Stellacoom will probably draw the largest number.

Among the streams good later in the season is the Skykomish river, which is at its best in July and August. The Tacoma Eastern offers attractions to the angler. In the neighborhood of Ashcroft are several desirable streams. Maschelle lake also has a reputation for gamey trout.

Not a few streams in this neighborhood belong to private parties, who have placed signs and fences to warn off intruders. Old-time fishermen state that a true sportsman will never ignore the rights of a property owner and will never trespass.

AT THE TRAPS.

The Empire Gun Club regular monthly shoot will take place on the club grounds at Alameda junction tomorrow. This being the only local trap attraction for the day a large attendance of shooters is expected.

The California Wing Club regular shoot for April had an entry of 17 guns in the club race in the forenoon. Weather conditions, while boisterous outside of the tree-enclosed grounds, were agreeable to the shooters and a number of good scores resulted.

In the club purse race eight men scored straight, among whom were Harry Golcher, Dr. Derby, Otto Feudner, T. Prior, W. E. Murdock, J. K. Prior, Jr., Dr. McConnell, and W. L. Nielsen. Harry Golcher's absence from the live bird traps dates back for about three years, but with his favorite Clabrough trap gun he showed his old time form and was in the money. The eight straights divided the club purse. Five men were in the eleven hole. Schultz and Walsh were unlucky with "dead out" birds. Shields was allowed another bird for his fourth pigeon which was chased out by the dog. The episode was, in result, a balk and proved inequitable for he scored a clean miss. Shields shot straight in a back score to even up with.

Five men, Nauman, Feudner, McConnell, E. Schultz and Webb, had clean scores when the medal race in the afternoon was concluded.

Following the two regular events 7-bird shoots were in order. "Billy" Wattles, shooting for birds only, scored two straights.

The winners were: Nauman, Green and Prior and also Walsh and Prior. The scores were as follows:

Club match, 12 pigeons, distance handicap, \$75 purse added, 1 money for each three entries, high guns—

Goldcher, H. C.	29 yds.	1 2 2 2 2 2 2 2 2 2 2 2	12
Derby, Dr. A. T.	28 yds.	1 1 1 1 1 1 1 2 2 2 1 1	12
Feudner, M. O.	28 yds.	2 2 1 2 1 2 1 2 2 1 2 2	12
Prior, T.	28 yds.	1 2 1 1 2 1 1 1 1 1 2 2	12
Murdock, W. E.	26 yds.	1 1 2 2 2 2 2 1 1 1 1 1	12
Prior, J. K., Jr.	24 yds.	1 1 2 2 1 1 2 1 2 1 2 2	12
McConnell, Dr.	28 yds.	2 1 1 1 1 2 2 2 1 2 2 2	12
Nielsen, W. L.	25 yds.	2 1 2 2 1 2 1 2 1 2 1 1	12
Walsh, P. J.	30 yds.	1 1 1 1 2 2 1 1 1 1 1 1	11
Nauman, C. C.	30 yds.	2 2 0 1 2 1 2 2 2 1 1 1	11
Shields, A. M.	27 yds.	1 1 2 0 1 1 1 1 1 2 1 2	11
Fano, E. A.	24 yds.	2 0 2 1 2 2 1 2 2 2 2 1	11
Schultz, E.	28 yds.	2 2 2 1 1 1 1 1 2 1 2 1	11
Webb, A. J.	28 yds.	1 1 1 1 0 1 1 1 1 1 2 10	10
Wreen, W. E.	28 yds.	1 2 1 1 2 1 0 0 1 0 1 2	9
Klevesahl, E.	25 yds.	0 0 1 2 1 1 0 2 1 1 1 2	9
Golcher, W. J.	29 yds.	1 0 0 1 2 1 1 1 2 1 2 0	8

Back scores:

Shields	27 yds.	1 1 2 2 1 2 2 2 1 1 1 2	12
Derby	28 yds.	2 2 0 1 1 1 1 2 1 2 1 2	11
McConnell	28 yds.	0 1 2 0 1 1 1 2 1 1 1 10	10
Golcher, W. J.	29 yds.	2 0 1 2 1 0 1 1 1 1 1 2	10
Green	28 yds.	1 0 0 1 0 1 0 1 1 2 1 7	7

Club medal and prize match, 12 pigeons, 30 yards rise, four and six high guns for season:

Nauman	2 1 2 1 1 2 1 1 2 1 2 2	12
Feudner	1 2 2 1 1 2 1 2 2 2 2 2	12
McConnell	1 2 2 2 2 2 2 2 2 2 1 2	12
Schultz, E.	2 1 2 1 2 1 2 1 2 1 2 1	12
Webb	2 2 2 2 2 2 2 2 2 2 2 2	12
Prior, T.	1 1 1 1 1 1 2 2 1 2 1 1	11
Derby	2 0 2 1 2 1 2 1 2 2 2 11	11
Golcher, W. J.	1 2 0 1 2 1 0 1 2 2 2 10	10
Walsh	1 1 1 1 3 2 1 0 2 2 2 10	10
Fano	1 2 0 0 2 0 1 1 1 2 1 9	9
Green	1 0 2 0 1 1 2 1 1 1 1 9	9
Skelly, J. T.	2 0 w	

Pool race, 7 pigeons, high guns—

Wattles	1 2 1 1 2 1 2 7
Nauman	1 1 2 1 2 2 7
Prior	1 1 1 1 1 2 7
Green	2 1 2 2 2 7
Walsh	0 1 1 1 2 1 6
Fano	2 1 1 0 2 1 5

Pool race, 7 pigeons, high guns—

Wattles	2 1 2 1 1 2 7
Walsh	1 2 1 1 2 2 7
Prior	2 2 1 1 1 2 7
Nauman	2 1 2 1 1 0 6
Fano	0 2 1 2 2 1 6
Green	2 1 1 0 2 1 5

At Fresno, March 25, at the Fresno Gun Club shoot, rain stopped the game in the afternoon before the program could be shot out.

The best record of the day was made by J. Ed. Vaughan, who broke 93 targets out of a possible 100. Following are the scores:

Ten targets—Weinberg 6, High 8, Lewald 6, Slim 7, O'Neill 7, Myers 8, Stone 10.

Twenty targets—Vaughan 20, 16, 10, 19, 19; Holdscraw 14, 17, 16, 13, 17, 18, 18, 17; Weinberg 9, 8, 11; Thompson 11, 14, 10, 12; Ickes 13, 16; Armenia 16, 18, 12; High 14; F. Hart 8, 6; H. Martin 10; Crawford 10; Dumas 5; Lewald 11, 12; Adams 16, 17, 10, 14; Slim 12, 16, 19, 17, 18, 14; French 9; Carter 15, 18, 15, 19, 15; Schleuter 13, 7, 15, 14; O'Neill 11, 17; Myers 12, 14, 16, 18; George Stone 16, 17, 19.

Twenty-five targets—Slim 22, Carter 21, O'Neill 19.

The annual tournament of the Fresno Gun Club will take place today under the management of Messrs. Lewald and Schlueter.

The program calls for 100 targets (divided into 4 events) per man, entrance \$1.50, targets \$2.50 extra, re-entries permitted, merchandise prizes. A large attendance of San Joaquin Valley shooters is expected.

The Eureka Gun Club held the annual meeting for the election of officers and also its first regular shoot of the season March 25th. The officers elected were J. H. Holmes, president; Wiley Parker vice-

president, and Dr. W. L. Perrott, secretary. Owing to the threatening and disagreeable weather of that day the attendance at the initial shoot was rather small, but in the trap shoot between those present the club trophies changed hands, Wiley Parker capturing the diamond medal of the first class, Holmes the gold medal of the second class, and Wilson getting the leather prize. Following were the scores: Holmes 17 out of 25 targets, Dungan 10, Perrott 16, Clanton 13, Everding 14, Wilson 8, Loufbourrow 13.

At the Seattle Gun Club shoot, March 25th, low scores were the rule at the Interbay traps, when the first half of the medal contest was shot off. Garrett and Black made the good score of 23 out of a possible 25, however. The second half of the medal shoot took place April 1st. The scores follow:

Medal shoot, 25 targets—Moore 5, Reed 5, Gardner 11, Taft 16, Eagleson 11, Eddy 8, Garrett 23, Willis 16, Green 17, Ford 20, Beattie 15, Lau 21, Matt 17, Hardy 15, Dunn 16, Boyker 14, Junker 15, Sutherland 13, Black 23, "Kanuck" 14, Hall 16, Giffin 16, Bleitz 16.

Event No. 2, 15 targets—Eddy 2, Garrett 10, Willis 7, Green 12, Ford 7, Hardy 9, Dunn 10, Boyker 8, Junker 12, Sutherland 5.

Event No. 3, 10 targets—Moore 4, Sutherland 5, Gardner 6, Taft 3, Eagleson 4, Eddy 4, Garrett 5, Hardy 6, Dunn 8, Boyker 2, Junker 9, Ellis 10, Gardner 6, Kenuck 8, Kanuck 8, Griffin 9, Stewart 6, Hall 8, Matt 6, Moore 4, Beattie 5.

Event No. 4, 20 targets—Taft 11, Moore 10, Eddy 9, Garrett 15, Dunn 11, Junker 12, Boyker 12, Black 17, Kanuck 11, Stewart 16.

Event No. 5, 25 targets—Kanuck 6, Junker 18, Stewart 18, Dunn 14, Garrett 19, Law 18, Beattie 13, Junker 16, Stewart 18, Dunn 11.

Trap shooting is a sport that has a strong following in far away Manila, P. I.

The Manila Gun Club held a tournament on February 2nd, a large gathering of sportsmen taking part, some excellent scores resulting.

Commissioner Dean C. Worcester won the first prize, a silver cup, in the first event, breaking 13 birds in succession, and for which straight run he was presented with a silver medal in addition to the regular prize. Four members were tied for second place and on a miss and out shoot off 11 breaks was high, Senor Tanjoco winning second place and a silver medal. The score for the first event was: Dean C. Worcester 24 out of 25, Tanjoco 21, M. Prieto 21, A. Feliciano 21, and Ponce de Leon 21.

In the second event Senor Olegario won first place and Senor Lopez second place, the latter shooting off a tie for second place with Senor Tuason. The third event was won by Sr. Ponce de Leon, Sr. Tuason taking second prize.

After the prizes were distributed, the members drank to the health of the victors and a collation followed. Among those present at the contest was Brigadier General Tasker H. Bliss. Commissioner Worcester, who won first prize, is one of the honorary vice-presidents of the Manila Gun Club.

The Richmond Gun Club shoots are becoming popular with the shotgun devotees of that section. Most of the shooters of the oil refining town are trap novices, their duck and shore bird shooting practice, however, stands well in hand and material for good trap shoots is not scarce by any means.

In the championship of Point Richmond shoot between James Arnold and W. F. Belding, Jr., March 25th, the former won out, breaking 23 out of 25 targets shot at, while the latter was a close second in the race, getting 22 birds out of 25. Not so bad.

Sunday, March 18th, about a dozen members of the Hercules Club faced the traps for the first shoot of the season, and some fair scores were made by some of the shooters, though all showed a lack of practice. The question of pump versus double guns, as usual, came up but "Billy" Hanson, Boysen, Annis and Varni managed to save the day for the double tubes.

The Manhattan Gun Club was recently organized at Manhattan, Mont. It is intended to get together a crack team consisting of the best shots in that town, who hope before long to challenge the different trap teams throughout the State for a series of shoots.

The officers elected are as follows: Henry Altenbrand, Jr., president; Ernest A. Sanborn, vice-president; George E. White, treasurer; Louis De Crignis, secretary.

The club has arranged for three electric pull traps, and the grounds are now being laid out.

Rainy weather rather dampened the ardor of Davisville sportsmen at the Blue Rock Gun Club shoot two weeks ago. The regular program was postponed and practice shooting took place.

The following scores were made in the order named in 10, 15, 10 and 15 bird races: F. P. Smith broke 7, 9, 9, 11; Geo. Hoag 10, 12, 9, 11; Ed. Flissel 7, 13, 8, 13; Elmo Montgomery 9, 10, 5, 12; Fred Poehler 6, 10, 8, 10; C. Snider and Poor Bill 12 double bird race, Snider 3 and Poor Bill 6.

Some miscreant visited Murphy lake on the San Joaquin, near Lone Tree, in San Benito county, within the last ten days and exploded dynamite there. The result was to kill nearly all the fish in the lake. The fish were black bass, which had been procured from the State Fish Commissioners. Outrageous acts like this are subject to a heavy penalty, and it is to the interest of every genuine lover of outdoor life to aid in the apprehension of the guilty party. Murphy lake contains water the year around, and the bass spawning there were intended to stock other places in the county.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemon.

THE IRISH WATER SPANIEL.

Doubtless several of our Coast sportsmen could say as much for Irish Water Spaniels that they own and work but the following by C. E. Wright in the English Shooting Times is a bit too good to pass by, giving as it does, concisely, some facts concerning the breed as a working dog. It seems from what the writer states that there is an apathy towards these dogs on the other side corresponding to that which prevails in the East. Taking it all together, it strikes me that before long the Coast breeders will be looked to for Irish Water Spaniels, for in the past decade we have had some good ones here and they have left descendants, some individuals equally good, and many promising sons and daughters. Mr. Wright states:

It has often struck me how seldom one meets with a good working Irish Water Spaniel; as a matter of fact, I have not seen one in the field beyond my own for twenty years, and a typical specimen is practically unknown to shooting men in England. This is a great pity, as after having shot over a team of workers for many years, I am strongly of the opinion that for all purposes they cannot be equalled for work.

I have carefully watched the breed as benched in England during the last ten years, and what the old breeders would say to the specimens that have been shown I do not know, as they are not only far from typical, but, worse than all, are deficient of points and quality which go to make a dog for work.

The standard as laid down by the Irish Water Spaniel Club is a very fair one, and should not be departed from, and, as the points of the breed are such as to fit him for rough, hard work, a dog should be judged accordingly; but a working dog stands no chance of winning in the ring. Take color of coat—a point all judges go for. I have no hesitation in saying that a coat such as you see on a bench winner cannot be kept on if a dog is worked and exercised, in and out of the season, as constant exposure to the weather will very soon take the color out of any coat, leaving it a brownish shade over the exterior, instead of a dark liver.

Texture of coat is another point that is overlooked, and a novice can judge by simply passing his fingers through the coat of an Irish Water Spaniel whether the coat is one that is going to resist the weather on such a day as we so often get during a shooting season—a fine wetting rain all day. Leg-feathering is a very fine point when you can keep it on; but where would the leg-feathering be on any of our bench dogs after a week or two at work in some of our hedgerows in Hampshire? Being solely interested with this good old breed for working purposes, although all my dogs have done their share of winning under such judges as Messrs. Gresham, Daintree, Raper, and Nicholls, I cannot say more than this—that, after having shot over all breeds, I have for the last five years discarded all others and used the Irish Water Spaniel for all work.

I have had a lot of shooting on the East Coast, and, no matter whether we were partridge shooting or at flight for duck, my Irish Water Spaniel was always equal to the occasion, and helped to swell my bag, especially on the marshes after duck. For three years I rented nine miles of water shooting; this was the hardest shooting for dogs that I ever had. Our bag was never a heavy one, but what we did secure we thoroughly earned. This shooting consisted of narrow strips of rough cover along an old canal—a rare place to test a dog's working qualities. After a few turns at it, I was delighted to find the amount of real sport that we were to have off this shoot, and my dogs soon learned which way to turn their quarry to push it out to the gun. I tried a brace of Cocker over this shoot, thinking that, as they were smaller, the work would be easier to them; but they could not stand it. During the hard weather, it was a sight to see a dog leap half-way across the canal after a duck and force its way back through the ice.

I well remember being out after odd cock pheasants one very rough day in January. We were shooting a wood near a large lake. A cock went away downwind badly hit, and fell some sixty yards out in the water. The keepers between them had three brace of Retrievers, but not one of these dogs would face the ice and water. To my astonishment they were going to launch a boat out; but I worked an Irish Water Spaniel bitch that was with me; she went straight out and retrieved the bird, which was ocular demonstration of what a good dog could do.

An Irish Water Spaniel, to my way of thinking, is par excellence the one-man dog. When out for a rough day, he is all there, and seems to take a delight in doing all the rough, dirty work. I often wonder he is not used more by single-handed sportsmen and keepers. I always break my dogs to work as Spaniels, return to heel at shot, drop to hand, and steady to heel. When driving, a good dog of the correct type can retrieve a hare or a bird out of rough places with ease, and his coat is such that thorns and brambles do not touch him, with the result that he always takes the shortest cut in and out to retrieve his game, and does not waste time by looking for a soft place.

L. G. Bennett of Dawson recently became the owner of an Irish Water Spaniel bitch puppy out of Wm. Bay's Ch. Rowdy Girl by Wm. Watson's Ch. Dennis C. This puppy is one of the best bred Spaniels on the Coast and is teeming with promise of becoming a high class specimen of the breed.

Our Eastern contemporaries seem to have some little bother in getting Coast dates right.

James Cole will be a very busy man on the Coast circuit this year.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

DOINGS IN DOGDOM.

Los Angeles Show.

Entries for the Los Angeles show closed on Tuesday with a list in excess, by a good margin, of last year's entry. A number of recent arrivals will be benched and the competition in Bostons, Collies, Fox Terriers and Bull Terriers promises to be keen. In Collies George Albers is credited with having a young dog that "will take a lot of beating" to down. Setters will be well represented, one or two entries coming from as far north as the Puget Sound region. A number of dogs have been entered from this city and San Jose, as well as other points. Without being in receipt of exact data, before going to press, we are inclined to believe the show will be a four point one, for which, if such be the case, the Los Angelesos are to be congratulated. Enthusiasm and co-operative work to bring off a successful show are factors that will win in the long run and can not but redound to the general benefit of Coast dogdom. The elimination of any consideration of the bench show "parasites" is another factor that should be an example for all Coast clubs to follow.

There is enumerated in the premium list no less than 57 cups as special prizes, most of them substantial trophies and with but few exceptions for open competition to be won outright. These prizes have been donated by some of the principal business houses in Los Angeles and vicinity.

There is a full classification in St. Bernards (rough), Pointers, English Setters, Irish Setters, Cocker, Collies, Bulldogs, Bull Terriers, Bostons, Fox Terriers and English Toy Spaniels.

Field Spaniels, Dalmatians, French Bulldogs, Scotch, Black and Tan, Airedale Terriers, Dachshundes, Pugs, Poodles, Pomeranians, Yorkshire and Maltese Terriers, Chow Chows, Chihuahuas (rough and smooth) Greyhounds, St. Bernards (smooth), Mastiffs, Bloodhounds, Foxhounds, Gordon Setters and Chesapeake Bay Dogs have but one class—open for both sexes.

Great Danes, Irish Terriers, Toy Poodles and Japs have a mixed classification.

We regret to note that so valuable a breed as the Irish Water Spaniel has been overlooked entirely. There are enough good ones on the Coast to have induced some recognition of the breed by the southern club.

The same might also be said of Gordons—just one class and no specials for this breed is not very encouraging to the few breeders and fanciers who have been sending their Gordons to different shows and would, we know in several instances, have sent entries to Los Angeles.

The officers of the club are: Paul Piepers, president; W. K. Peasley, vice-president; Ed. Greenfield, vice-president; Kingsley M. Stevens, vice-president; Geo. R. Albers, secretary; Wm. Kennedy, treasurer.

Bench show committee: Wm. J. Morris, chairman; Jas. Ewins, H. F. Anthony, Ed. Greenfield, Wm. Kennedy and R. C. Halsted.

San Jose Show.

The dates announced for the Santa Clara Kennel Club show are May 10th, 11th and 12th.

James Cole of Kansas City will judge all breeds.

At a meeting of the club held recently an arrangement of trophies to be awarded was made. Some 51 silver and cut glass trophies have already been donated by fanciers of San Jose and vicinity, while splendid prizes have been given by the Santa Cruz, San Mateo and San Francisco Kennel Clubs. To this list the Santa Clara Country Club has added 15 trophies, making a total of 69 prizes. The prizes have been confined to silver, gold and cut glass only, merchandise prizes being barred.

The bench show committee is composed of W. H. Carmichael, M. Perry, Phil C. Meyer and Harry Doble. J. C. Berrett will superintend the show. This means much for smooth sailing and a big show in the Garden City, for the gentlemen named are sportsmen and enthusiastic fanciers and have had a show experience, both as exhibitors and officials, that will count.

Among the San Jose dogs that will be sent to Los Angeles, it is reported, will be seen several young Bulldogs bred by Chas. Harker, O. J. Albee's Collies, the good black Cocker Bobby R., owned by Val Ruh, and Norman J. Stewart's Airedale Terriers.

In connection with the bench show there will also be a cat show.

Premium lists were promised for this week.

Good News.

Mr. Harry Lacey, of the American Stock-Keeper, is now well on the way to full recovery from a recent illness, we are pleased to inform our readers. Mr. Lacey, who is personally known to many of the Coast fanciers, is too good a sportsman and of too much value to dogdom at large to be away from the helm of our Boston contemporary for any great length of time. Mr. Lacey's ailment was an affection of the eyes that made necessary an operation. All's well that ends well, and congratulations are now in order.

American Fox Terrier Club.

The above named club has recently issued the American Fox Terrier Club Book for 1906—a little work full of interesting information to the Fox Terrier fancy.

It contains data concerning the club's trophies and stakes, a list of winners going back to 1887, rules and the club standard and a list of members. The compilation is a credit to the club and the author.

Bull Terrier Club Show.

The club officials are working hard for a strong list of entries and will no doubt bring out a representative showing of the breed. The list of specials is a tempting one and comprises a number of handsome cups. Entries close April 21st.

Show Club Incorporated.

The Portland Kennel Club was incorporated last month, for the "purpose of holding bench shows." The capital stock is \$600 and the incorporators were: J. Wesley Ladd, E. F. Tucker, Henry Ladd Corbett, Frank E. Watkins, J. C. Zan and Henry Berger, Jr.

Advices from Silkwood Bull Terrier Kennels state that Silkwood Peggy recently whelped to Croydon Czar a litter of seven (four dogs). Silkwood Kit is taking care of five puppies (or what is now left of the litter) by Silkwood Duke. Silkwood Belle is heavy in whelp to C. Czar.

Among the recent purchasers of Silkwood Bull Terriers are Miss Jennie Crocker, who now owns a handsome Silkwood Jean pup; Edward Cross has a bitch puppy from the same litter; A. Meyer of Oroville and Commander Holcomb of the Independence each have young bitches from the litter.

A. S. Rosenberg lost recently by theft, it is believed, a fine young dog by Czar out of Jean.

COMING EVENTS.

Rod.

Jan. 1 June 1—Closed season for black bass.
April 1-Feb 1—Open season for steelhead.
April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Nov. 1—Trout season open.
April 1-Nov. 1—Open season for taking steelhead above tide water.
April 7—San Francisco Fly-Casting Club. Saturday Classification Contest No. 4. Stow lake 2:30 p. m.
April 8—San Francisco Fly-Casting Club. Sunday Classification Contest No. 4. Stow lake, 10 a. m.

Excellent pasturage for mares at reasonable rates. Send to the undersigned for card containing tabulated pedigree and other information. I will take a few horses to train for road or track.

GEORGE T. ALGER, 1207 Eagle Ave., Alameda, Cal.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, spint, spavin or other like lurch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he is cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deep and cause less pain than any blister ever used. Thought it my duty to the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who have used Quinn's Ointment a trial. For cures, sprains, spavins, wind-ups, and all, brush it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.

Mr. S. E. Newell

Dear Sir

Replying to your letter in regard to Save the Horse will say I have used it with much success. The running horse Col. Roosevelt that had broken down in training for two or three years past is now in good shape & will certainly be able to race as well as ever before. Have also used Save the Horse on the horse Greyfield with ~~good~~ satisfactory results. Will also add that I have seen "Save the Horse" remove a deep seated ring bone from a director trotting horse in Monroe Salisbury's stable. I am pleased to be able to recommend "Save the Horse" from actual experience.

Yours truly

G. A. Davis

\$5.00 PER BOTTLE. Written guarantee with every bottle, constructed solely to satisfy and protect you fully. Need of second bottle is improbable, except in rarest cases. Copy of guarantee, book and letters on every kind of case sent upon application. All druggists and dealers, or express paid.

"SAVE-THE-HORSE" permanently cures Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Broken Down Injured Tendons, and all lameness without scar or loss of hair. Horse may work as usual.

The Dairy Handbook of The California Promotion Committee's handbook series is just from the press and contains much valuable information for those who are contemplating going into that industry. While the handbook is not a complete text book on the subject of dairying, it gives the salient points in connection with the industry and contains much information as the inquirer desires to know when considering a investment. The care of stock, houses and feed are treated under separate sub-heads, together with much other data which will be found especially valuable. These handbooks of The California Promotion Committee are most desirable little brochures, and can be obtained from the Committee at a cost of 5 cents each, which merely covers the cost of production. Other handbooks of the Committee are Tree Planting and Poultry Raising.

IN GOLD, FREE
Buy a bottle of "3-in-One" the famous household oil—read the booklet giving present uses—then experiment till you find a brand new good use—not medicinal—send us that use and if yours is the best we'll send you \$50 in gold. G. W. COLE CO., 113 Washington Life Bldg., New York City. Generous sample and booklet sent on request—no cost. Write to-day.

DO YOU WANT TO RENT A STALL

—OR—

A WHOLE RACE TRACK?

The owners of the MOUNT DIABLO RACE TRACK, located near Concord, Cal., are constructing 50 new and up-to-date stalls.

After April 1st they will be prepared to rent stalls to trainers and others as may be required. Also they will entertain propositions for the lease of the track and grounds as a whole for a term of one or more years.

Improvements now in course of construction, to cost about \$4600 will result in making this track one of the very best all-the-year-round tracks on the Coast.

Stakes for Two-Year-Olds

Offered by the California State Agricultural Society to be given at the

CALIFORNIA STATE FAIR, 1906

ENTRIES CLOSE MAY 1, 1906

The A. B. SPRECKELS STAKE for Two-Year-Old Trotters.....\$1000

The BEN RUSH STAKE for Two-Year-Old Pacers..... 1000

ENTRANCE PAYABLE AS FOLLOWS: \$20 on May 1, 1906; \$20 additional if not declared out on or before June 1, 1906, and \$10 additional if not declared out on or before July 1, 1906. Declarations (to declare out) must be mailed to the Secretary and will not be accepted unless accompanied by the amount due at time declaration is made.

CONDITIONS.

Distance to be one hundred yards. Right reserved to reject any or all entries.

Five per cent of the amount of the Stake will be deducted from each money won.

The Board of Directors reserve the right to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided 66 2/3 per cent to the first and 33 1/3 per cent to the second. A horse distancing the field shall only be entitled to first and fourth moneys, but in no other case will a horse be entitled to more than one money.

The Board of Directors reserve the right to start any heat after the fourth score, regardless of the position of the horses.

When there is more than one entry to any Stake by any one person or in one interest, the horse to be started must be named by 5 o'clock p. m. on the day preceding the race.

Otherwise than as herein specified in these conditions, Rules of the National Trotting Association (of which this Association is a member) to govern.

For Entry Blanks and further information address the Secretary.

READVILLE**GRAND CIRCUIT MEETING**

AUGUST 20, 21, 22, 23, 24.

Entries Close Tuesday, April 10, 1906

ALL CLASSES WILL BE EVENTS OF THREE RACES OF ONE MILE.

EARLY CLOSING PURSES.

No. 1—The Blue Hill, 2:30 Class Trotting.....\$4500

Divided: \$1050 to first, \$300 to second, \$150 to third—each race.

No. 2—The Massachusetts, 2:14 Class Trotting.....\$9000

Divided: \$2100 to first, \$600 to second, \$300 to third—each race.

No. 3—The Ponkapog, 2:10 Class Trotting.....\$4500

Divided: \$1050 to first, \$300 to second, \$150 to third—each race.

No. 4—The Readville, 2:08 Class Trotting.....\$3000

Divided: \$700 to first, \$200 to second, \$100 to third—each race.

No. 5—The Norfolk, 2:08 Class Pacing.....\$3000

Divided: \$700 to first, \$200 to second, \$100 to third—each race.

No. 6—The Nipmasset, 2:06 Class Pacing.....\$3000

Divided: \$700 to first, \$200 to second, \$100 to third—each race.

In all classes horses must be named at the time of the closing of entries.

The Entrance Fee will be Five Per Cent of the Purse with Nothing Deducted from the Winners of Any Part of the Purse.

More than one horse, if trained in the same stable, may be entered in a class, and one per cent of purse additional will be charged for each horse so named; but only one horse in the same ownership will be allowed to start. Any horses of a plural entry which may be separated from the stable from which they were named will be eligible to start by paying a sum, in addition to that already paid on the horse, which will equal the full five per cent entrance fee.

The rules of the National Trotting Association (of which this Association is a member) will govern, except that horses not finishing within one hundred yards of the winner in any race will be ruled out of further competition in the event. Racing will begin at 2:30 p. m.

The conditions of entry will be made known for the first race of every event, but in the second and third races they will be made known for the first and second races of every event.

Forfeits will be due in amounts and on dates as follows:

	APRIL 10.	MAY 10.	JUNE 9.	JULY 10.	AUGUST 7
Classes No. 1 and 3.....	\$20	\$30	\$45	\$60	\$70
Each additional horse.....	9	9	9	9	9
Class No. 2.....	50	70	90	110	130
Each additional horse.....	18	18	18	18	18
Classes Nos. 4, 5 and 6.....	10	20	30	40	50
Each additional horse.....	6	6	6	6	6

Nominators will not be held liable for forfeits falling due after they have declared out in writing. The American Horse Breeder Futurities—\$7000 for Three-year-old Trotters, \$1000 for Three-year-old Pacers and \$2000 for Two-year-old Trotters—will be raced at this meeting.

All entries, requests for information, etc., to be made to the Secretary.

JOHN M. JOHNSON, President.

CRABBET ARABIAN STUD

CRABBET PARK, THREE BRIDGES,
and
NEWBUILDINGS, SOUTHWATER, } SUSSEX, ENGLAND.

The largest breeding stud of Arabian horses in the world. The conditions under which these horses are bred at Newbuildings produce a type unrivalled for quality and hardiness. The unique knowledge of the breed gained by the owners in Arabia enables them to guarantee purity of blood of the choicest strains, some of which are now extinct in the East. Stallions and mares constantly supplied to breeders throughout the Colonies and on the Continent. A few mares suitable for polo, hacks and quiet in harness generally for sale. For further particulars address

GUY CARLETON, Manager, Carpenters, Southwater, Sussex, England.

BUDD DOBLE, San Jose, Cal.

MENDOCINO 22607

RECORD (THREE-YEAR-OLD) 2:19¹/₄

Sire of Monte Carlo 2:07¹/₄ (to wagon 2:08¹/₄); Idolita (3 y. o.) 2:21¹/₄. (3 y. o.) 2:12. (a) 2:09¹/₄. Leonora 2:12¹/₄. Polka Dot 2:14¹/₄. etc. Bay Stallion, 15.3¹/₄ hands; weight 1190 pounds; hind feet and ankles white; foaled April 24, 1889. Bred at Palo Alto Stock Farm.

Sire, **ELECTIONEER** 125, son of Hambletonian 10. First dam, **MANO** (dam of MENDOCINO) (3) 2:19¹/₄. Electant 2:19¹/₄. Morocco (3 y. o. trial 2:22) by Piedmont 904, 2:17¹/₄; second dam, Mamie (dam of Mamie W (3) 2:17¹/₄. Hyperion 2:21¹/₄. Memento 2:25¹/₄. Mithra (p) 2:14¹/₄) by Hambletonian Jr 1882; third dam, Gilda (thoroughbred) by Imp Mango.

MENDOCINO is one of Electioneer's youngest and best sons. With very limited opportunities in the stud he has proven his worth by producing such racehorses as Monte Carlo and Idolita. Three new additions to his 2:30 list were made last season, and he now has ten standard performers. His foals are good size, fine lookers, bold and pure gaited and easily developed.

SERVICE FEE for Season of 1906, \$75; usual return privilege.

MCKENA 39460

Brown Stallion; 16.2 hands; weight 1350 pounds; foaled April 11, 1900. Bred at Palo Alto Stock Farm. Sire, **MCKINNEY** 8818 (record 2:11¹/₄). First dam, **HELENA** 2:11¹/₄ (dam of Wildnuttling 2:11¹/₄; Dobbelt 2:22. Hyita (trial 2:12) by Electioneer 125; second dam, Lady Ellen 2:29¹/₄ (dam of six in list, including Helena 2:11¹/₄, Ellen Wood 2:14¹/₄) by Mambrino 1789; third dam, Ida May Jr. by Owen Dale; fourth dam, Ida May by Belmont (Williamson's).

MCKENA has proven a remarkably sure foal getter. He should make a great sire as he is a fine individual and bred right. His sire, McKinney, a game and fast racehorse and sire of game and fast racehorses. His dam, Helena, one of the fastest and gamest daughters of Electioneer, the greatest sire of trotters the world has yet known. His second dam, Lady Ellen, was one of the best of her day, and as well as her daughter Helena is a great broodmare.

SERVICE FEE for Season of 1906, \$40; usual return privilege.

MENDOCINO and MCKENA will make the season at **PALO ALTO STOCK FARM**. Mares may run on pasture at \$5 per month. No responsibility assumed by the Palo Alto Stock Farm for injury or escapes. Address all communications to

PALO ALTO STOCK FARM,
Stanford University, Santa Clara Co., Cal.

LYNWOOD W. 32853

RECORD AS A 2-YEAR-OLD 2:20 1-2

Sired by GUY WILKES; dam, the great brood mare LINDALE by Sultan Jr. 12771

LYNWOOD W. was a sensational colt trotter and is fast proving himself to be a great sire, although he never covered but eight standard bred mares prior to 1905. Still he has to his credit Dumont S. 2:20, Clipper W. 2:24¹/₄, Sonoma Queen 2:25, Sonoma May 2:29¹/₄, all trotters with records made in 1905. The following are the only colts that ever had any training. They have worked as follows: R W P 2:12¹/₄, Charles Belden 2:13¹/₄, Sonoma Girl 2:15, Sly B. (3) 2:16¹/₄, Dumont S. 2:17, Ayeress 2:18, Sonoma May 2:19¹/₄, Jim V. 2:25, Ella V. (3) 2:21, Clipper W. 2:22, Sonoma Queen (3) 2:22, Sonoma Star (3) 2:27¹/₄, Dennis 2:30, Frank G. (3) 2:30.

Will make the Season of 1906 at Santa Rosa.

SERVICE FEE \$25.

H. A. CARLTON, Owner, Santa Rosa, Cal.

MONTEREY 2:09 1-4 Reg. No. 31706

(Sire of IRISH 2:08¹/₄. Fastest Four-Year-Old Pacer of 1904).

By SIDNEY (grand sire of Lou Dillon 1:58¹/₄); dam, **HATTIE** (also dam of Montana 2:16) by Commodore Belmont 440. MONTEREY 2:09¹/₄ stands 15.3 hands, weighs 1200 lbs. and is one of the finest individuals on this Coast. FEE, \$50 for the Season.

By MONTEREY 2:09¹/₄
Dam, **LEAP YEAR** 2:26 (full sister to Iago 2:11) by Tempest 1881
son of Almont 33

YOSEMITE is a very high-class young trotter, and as he will be trained this year he will be allowed to serve only six choice bred mares FEE, \$25 for the Season.

Will make the Season at SAN LORENZO and ALAMEDA.

I have leased a fine, roomy barn with 14 large box stalls on Sherman street, four blocks from the race track, Alameda, and am prepared to do public training. Would like to get two good trotters and a promising three-year-old to prepare for the races this season.

For particulars call or address

PETER J. WILLIAMS, San Lorenzo, Cal.

Highland

TRIAL 2:12

(at Four Years Old)

Bred at Highland Stock Farm, Dubuque, Iowa

By EXPRESSO 29199 (half brother to Expressive (3) 2:12½) by Advertiser 2:15½, son of Electioneer 125; dam AL-HA 2:23½ (dam of Aegon 2:18½, sire of Aegon Star 2:11½, etc.) by Alcantara by George Wilkes 2:32; second dam Jessie Pepper (dam of 2 in list and 3 producing sons and 7 producing daughters) by Mambrino Chief 11, etc.

Terms for the Season.....\$25

HIGHLAND is a grand looking young stallion, seven years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed, and has trotted a quarter in 31 seconds over the Pleasanton race track.

HIGHLAND is a coal black horse with one white hind ankle, stands 16.1 hands high and weighs close to 1200 pounds.

Address all communications to

TED HAYES, Manager, Pleasanton, Cal.

ZOMBRO 2:11 GREATEST SON OF McKINNEY 2:11

Will make the Season of 1906

At LOS ANGELES, CAL.

Fee, \$50 for the Season.

With usual return privilege provided I still own the horse and mare does not change ownership. Money due at time of service, or all bills paid before mare is taken away.

ZOMBRO is the sire of eleven standard performers as follows: Zephyr 2:07½, timed separately in a race in 2:06½; Charley T. 2:13½, trial 2:10½; Italia 2:14½, over half-mile track, trial 2:08½; Belmont, three years old, record 2:15½, trial 2:11½; Zombowette 2:16½, trial 2:14½; Zenobia 2:19, trial half in 1:05½; Tee Dee Coo 2:19½, trial 2:13½; Lady Zombro 2:24, trial 2:10; Lord Kitchener 2:34½, trial 2:19½; Zealous 2:26½, trial 2:20; Nina Bow tie 2:27.

ZOMBRO has won more first prizes in the show ring than any California stallion, and his get have sold for more money during the past three years. He is the only horse living or dead that ever won forty heats in standard time as a three-year-old. His get are all large, beautifully formed and endowed with great natural speed. The choicest pasture for mares. Address

GEO. T. BECKERS, 3949 Figueroa St., Los Angeles, Cal.

NEAREST 35562

(RECORD 2:22½)—Sire of Alone (4) 2:09½ (trial 2:06¾), Just It (3) 2:10½ (trial 2:12½), High Fly (2) 2:24½ (trial 2:12½, last half in 1:00½), and full brother to the great John A. McKerron 2:04½, the second fastest stallion in the world.

By NUTWOOD WILKES 2:16½, sire of John A. McKerron 2:04½ (second fastest stallion in the world), Tidal Wave 2:09, Miss Idaho 2:09½, Who Is It 2:10½, Stanton Wilkes 2:10½, Cresco Wilkes (4) 2:10½, George B. 2:12½, North Star (3) 2:13½, winner Pacific Breeders Futurity Stakes \$6000 Guaranteed of 1905 and 32 in 2:30 list; dam INGAR, the greatest producing daughter of Director; second dam Annie Titus by Echo 462; third dam Tiffany mare (dam of Gibraltar 2:22½) by Owen Dale, son of Williamson's Belmont. NEAREST is a dark bay, 15.3 hands and weighs 1200 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Will make the Season of 1906 at San Jose, with return privilege in case horse remains in California. For terms and extended pedigree address
Phone: Red 1431. T. W. BARSTOW, San Jose, Cal.

THE STANDARD TROTting STALLION

Murray M. 2:14

(WINNER OF THE BREEDERS FUTURITY, \$6000, IN 1904)

Will make the Season of 1906 at the

Race Track, University Station,
LOS ANGELES, CAL.

Terms, \$40 for the Season, with usual return privileges.

MURRAY M. 2:14 is by Hambletonian Wilkes 1679 (sire of Phoebe Wilkes 2:08½, Phoebe W. 2:18½, Robert I. 2:08½ and RAY M. 2:14 and La Belle (2) 2:16) by Dawn, sire of 5 in 2:30 list and dams of 8

MURRAY M. 2:14 is a handsome five-year-old bay stallion with small star and black points. In his three-year-old form he stood 16 hands and weighed 1125 lbs., and is a natural, square-gaited trotter. He is a horse of grand finish plenty of substance, excellent disposition. He has a stout back, strong loins and stifles good feet and legs. His breeding is excellent, and with his individuality he presents a popular and speed-producing combination of the kind that gets money on the race course and prizes in the show ring.

Excellent pasturage at reasonable rates. For further particulars address

PROF. H. B. FREEMAN University Station, Los Angeles, Cal.

KINNEY WILKES

Sired by McKINNEY 2:11½, sire of Sweet Marie 2:04½, Kinney Lou 2:07½, Charley Mac 2:07½, Hazel Kinney 2:09½, The Roman 2:09½, Dr. Book 2:10, Coney 2:02, China Maid 2:05½, Zoelook 2:05½, You Bet 2:07, Jennie Mac 2:09 etc.

First dam, HAZEL WILKES 2:11½, a great race mare by Guy Wilkes 2:15½, sire of F. ed Kohl 2:07½, Hulda 2:08½, Lesa Wilkes 2:09, Seymour Wilkes 2:08½, etc., and dams of Antezella 2:10½, Katherine A. 2:11½, etc., etc., and grand-dam of John A. McKerron 2:04½; second dam, Blanche (dam of Hazel Wilkes 2:11½, Una Wilkes 2:15, Guyson 2:21, Native Son 2:26½ and Silver Spray 2:28) by Arthurton 365; third dam, Nancy by Gen Taylor, champion 30-mile trotter of the world.

KINNEY WILKES is a very handsome, well made bay stallion, standing 15.3 and weighing 1100 pounds. He is one of the best br.d of the McKinneys.

Will make the Season at

LEONARD STATION, Santa Cruz County.

Fee \$25.

For cards containing tabulated pedigree, etc., address

GRECO

BLACK COLT, FOALED 1900. Sire, McKINNEY 2:11 1/4, sire of SWEET MARIE 2:04 1/4, Kinney Lou 2:07 1/4, Charley Mac 2:07 1/4, Hazel Kinney 2:09 1/4, The Roman 2:09 1/4, Dr. Hook 2:10, Cones 2:08, China Maid 2:06 1/4, You Bet 2:07, Jennie Mac 2:09, Zolock 2:05 1/4, Dam, AILEEN 2:26 1/4 (dam of Mowitza 2:20 1/4, Sister 2:20 and GRECO 2:33, trial 2:20) by Anteeo 2:16 1/4, sire of dams of Directum Kelly 2:08 1/4, Grey Gem 2:09 1/4, W. Wood 2:07, etc.

Grandam, LOU MILTON (dam of LOU DILLON 1:58 1/4, Redwood 2:21 1/4, Ethel Mack 2:25 and Aileen 2:26 1/4) by Milton Medium 2:25 1/4 (sire of 2 and dams of 5) by Happy Medium 2:32 1/4, sire of Nancy Hanks 2:04, etc.

GRECO is a handsome black stallion and a natural and fast trotter. He won his only race as a colt, and has shown miles in 2:20 since in his work, and is a sure 2:10 trotter. He will be permitted to serve a limited number of mares at \$100 THIS SEASON. Correspondence solicited. Address

CHAS. De RYDER, Manager, Pleasanton, Cal.

IRAN ALTO

24586

Rec. 2:12 1/4

Sire, PALO ALTO 2:08 1/4-4

Dam, ELAINE (4) 2:20

IRAN ALTO'S sire and dam have both held champion trotting records and his dam and granddam both produced a colt that was a world's record breaker, and his grandsire has sired several trotters that broke world's records. No other horse with a record as fast as IRAN ALTO'S can claim this. At nine years he had sired ten colts, four of them with records as follows: Dr. Frasse 2:12 1/4, Thomas R. 2:15, Vendome 2:17, Dr. Frasse's Sister 2:25—all at four years old. Who can name a horse whose first ten colts can beat that?

Will Make the Season of 1906 at WOODLAND, CAL.

FEE \$40

\$20 due when mare is bred and \$20 payable when mare is known to be in foal.

For further particulars address

H. S. HOGBOOM,
Woodland, Cal.

ITHACA GUNS

THIS illustration shows the double thick nitro breech and narrow skeleton rib of an ITHACA No. 7 \$300 list gun. This feature, together with the reinforced frame, reinforced stock and double bolt, makes the ITHACA the strongest and safest gun for Nitro powder. We build everything from a featherweight 5½-pound 20-gauge gun to a 10½-pound 10-gauge duck, fox and goose gun. Send for Art Catalogue describing 17 grades 10, 12, 16 and 20 gauge guns ranging in price from \$17.75 to \$300.

Troy Chemical Co.

Binghamton

N.Y.

Dear Sirs:-

Replying to yours of the 11th inst. About two years ago a very fine, well bred mare I own got what seemed to be a bad sprain of the off fore fetlock which made her very lame, I blistered her and let her run out for about four months, when I took her up she was better but still lame and got worse when worked, I then tried another kind of blister with about the same results.

Last Spring I bought a bottle of your Save-the-Horse from your agent in this city Mr. Newell, after treating the mare with this for about two weeks I gave her some slow driving, she improved very much and by the time I had used up the bottle I was able to drive her twenty or thirty miles without any apparent bad effects, she now goes sound; I also with the same bottle removed two wind galls from her hind legs.

Hoping that this will be of some benefit to you

I am, dear Sirs

Yours truly,

Martin Cornell

Do not give up any case of Spavin, Ringbone, Thoroughpin, Curb, Splint, Capped Hock, Wind Puff, broken down, bowed or strained tendon, or any case of lameness until you read our booklet and letters.

The fire iron is uncertain, blistering is less effective, and both necessitate laying up the horse from weeks to several months; Mercurial and poisonous compounds produce irreparable injury. "Save-the-Horse" eliminates all these factors.

Horse can be worked as usual and with boots, as no harm will result from scalding of limb or destruction of hair.

per bottle. Written guarantee with every bottle constructed solely to satisfy and protect you fully. Need of second bottle is improbable, except in rarest cases. Copy of guarantee, book and letters on every kind of case sent upon application. At all druggists and dealers, or sent express prepaid.

\$5.00

Quinn's Ointment

Will Make A Horse Over;

will put sound legs under him and will save him from the cheap hawker and trader. It is the standard cure for Spavins, Curls, Splints, Windpuffs and all the various lumps and bunches of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughpin and did it for good. My horse's leg is as smooth as ever."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars, testimonials, etc.

OAKWOOD PARK STOCK FARM has been sold.

This great nursery of trotters and pacers, located at the foot of Mount Diablo, three miles from Danville, Contra Costa county, the home for so many years of Steinway and one of the greatest bands of brood mares ever got together on one breeding farm, has passed to a new owner, and the grandly bred horses and blooded cattle will be sold. The new purchaser, Mrs. Lena Humphrey of Bolton, Cass county, Mo., may transform it into a pleasure resort, to be run in connection with the new electric railroad, which is planned to scale Mount Diablo. The lands of Oakwood Park Stock Farm extends over hill and valley for 5000 acres of some of the richest land in Contra Costa county. The purchase price is not stated in the dispatch announcing this sale but it is in the neighborhood of \$400,000. This farm was founded by the late Daniel Cook, and at his death was continued by his brother, Seth Cook, at whose demise it passed to Mr. and Mrs. John F. Boyd, Mrs. Boyd being a sister to Mr. Cook. The stallion Steinway was purchased in Kentucky by Samuel Gamble as the premier sire for the founder of the ranch and at the same time and afterwards many fine brood mares were purchased in the East and elsewhere to mate with him. Steinway proved a great sire, and at his death last year was the sire of 14 trotters and 25 pacers in the list, among them such champions as Klatawah 2:05½ at three years, W. Wood 2:07, Agitato 2:09, Cricket 2:10, etc. Seven of Steinway's sons have sired standard speed and his grandsons are proving that his blood breeds on. Among the sons of Steinway that are known to fame are Chas. Derby 2:20 (sire of Don Derby 2:04¾, Much Better 2:07¾, Diablo 2:09¾, Derby Princess 2:08½, etc.); Saraway (sire of Winfield Stratton 2:05¾); Strathway 2:19 (sire of John Caldwell 2:08½ and Toggles 2:08½), and many others that we have not space to mention. The daughters of Steinway are also proving great producers and have given to the turf such record holders as Stanley Dillon 2:07¾, Tuna 2:08½, Ben F. 2:07¾, Confianza 2:12¾, William Harold 2:13¾, sire of Janice 2:08¾, etc., etc. At the farm now Chas. Derby is the premier, and he is a worthy successor to a noble sire. There is also a great young horse by him out of Bertha, therefore a full brother to Diablo and Don Derby. This horse is called Stillwell, and at the ranch they consider him the best of all Bertha's foals. The list of brood mares is a long one, and the proportion of speed producers among them is large. Space will not permit their mention here. There are also a number of thoroughbreds and Cleveland bays on the Oakwood Park Stock Farm, and two or three hundred head of pedigreed cattle—mostly Devons and Shorthorns. Oakwood Park Farm is one of the largest, best appointed and most beautiful country seats and breeding farms on the coast. From it have come some of the greatest trotters and pacers this State has produced, and the dispersal of the horses will be a matter of regret to every admirer of the light harness horse in California. At the same time it will give small breeders the opportunity of a lifetime, and if the stock is offered for sale they will be ready to pick up the many good ones that will be offered.

PROGRAMS SHOULD BE ANNOUNCED for the different meetings to be held on the California Circuit this year. Los Angeles, Fresno, Salinas, Santa Rosa and the State Fair should get their programs ready and publish them early. Entries need not close early, but the programs should be out so that horsemen may know what to train and when to get ready. So far nothing has been announced but the early closing stakes of the Breeders and the Woodland associations, and a couple of colt stakes for the State Fair. Trainers would like to know what classes are to be given. There is no use training a horse with a record of 2:12 if no faster classes than 2:14 are to be offered. We hope the secretaries in places that intend to give meetings will see the force of this argument and announce their programs.

THE NEW SPEED TRACK now building in Golden Gate Park is beginning to show the immense amount of work that has been done on it, and is assuming shape. Superintendent McLaren thinks it will be completed to hold matinee racing over by July 4th and while that date may be a little too close to have everything ready, the fact that the track will be ready to speed over this summer has made many a horseman begin looking around for a trotter or pacer that is fast enough to beat some of the others. When completed the new track will be one of the most popular pleasure resorts of our beautiful park.

TRACK AND ROAD.

W. H. Lumsden of Santa Rosa will again send his two Bonnie Direct fillies Bonalet 2:09¾ and Bonnie Me over to Ed Benyon to race this year.

Dr. Shanks of Susanville has received his 1906 model McMurray sulky, the first of the new year's sulkies to be received in California. Kenney, of 531 Valencia street, coast agent for the McMurray vehicles, says this is "just what the doctor ordered."

The Houghton Sulky Company advertises its vehicles in this issue of the Breeder and Sportsman, having established an agency with the San Francisco Wheel and Novelty Company at Sixteenth and Valencia streets, this city. This company makes the Houghton sulky, one of the new things for 1906; the Flower City sulky, that has been drawn by so many record breakers and race winners; the Houghton training cart especially desirable for matinee racing; and one of the same name called the No. 6 that has the much desired low seat—sit down, swing around, and you're in; besides many more styles too numerous to mention. Go out and see these vehicles. They are all new and up to date.

April 10th Kinney Lou 2:07¾ had been bred to twenty-four mares this year. Of that number Grace Lowry by Diablo 2:09¾, Athene by Dexter Prince, Central Girl 2:22½ by Nutwood Wilkes 2:16½, Patti by Prince Nutwood 2:12½, and Stella Marvin by Don Marvin 2:22½, were bred last week. The mares Minnie C. by Mendocino 2:19¾, dam Ororose by Oro Wilkes 2:11, and Lady Estelle by Athadon (1) 2:27 owned by S. Christenson, and a roan mare by Athadon, dam Flora P. 2:16 by Dexter Prince, owned by J. O. Scribner, have been sent to be bred to the greatest son of the great McKinney. All these three last mentioned mares will soon have foals by Strathway 2:19.

Prince Direct 2:07¾, or Freddie C., as he was called when racing out here on the Coast, is now owned by George Amsden of Richmond, Indiana, and is doing stud duty at his owner's farm.

Helen Keyes, the Sidney Dillon mare that went east last year in the Salisbury string, will be taken over again about May 1st by Millard Sanders. This mare is a phenomenally fast trotter and will get a very low mark some day.

Barbed Wire, who broke the world's record on the ice at Concord, N. H., last winter by stepping a quarter in 30 seconds on a carefully measured course, has a history equal to that of Little Gyp, formerly owned by Hon. Warren F. Daniel, of Franklin. When a young colt in the pasture Barbed Wire was missing for several days and was finally found in a maimed condition between a stone wall and barbed wire fence with one of his feet badly cut by the wire. From loss of blood, lack of food and exposure Barbed Wire was in a condition which required careful nursing for weeks. At the end of this time he was thought to be of no special use and was swapped by his owner for a calf. His new owner soon came to the conclusion that his bargain was a poor one and gave Barbed Wire to his doctor in payment of a bill. He was traded around, swapped back and forth until twelve years old, without ever being harnessed. Finally one of his owners broke him to harness and found he had remarkable speed, and he has since appeared in many races. He is owned by F. L. Muzzey, of Pittsfield, and is used in the summer as a road horse and is one of the best in that section for the purpose. Barbed Wire is 22 years old and is of Morgan blood.—Trotter and Pacer.

Mr. P. W. Bellingall, who bred two fine mares by Secretary to Kinney Lou 2:07¾ last year, reports that both have dropped brown fillies that are splendid specimens and natural trotters. Mr. Bellingall keeps these mares at his home place in Oakland and drove them on the road up to within a few weeks of foaling. The one driven the most and fastest has the strongest and largest foal.

The Cone Ranch Company, Red Bluff, recently sent to Budd Doble to be trained the three-year-old colt Diamond Mac, by Kinney Lou 2:07¾, dam Kitty Marvin by Don Marvin. This colt is a credit to his sire, and bears a strong resemblance to him, and is certainly a trotter and a high class prospect. Mr. Doble is more than pleased with him.

Prof. W. L. Carlyle, dean of the Colorado Agricultural College, has been commissioned by the Government to journey to Europe and spend four months in France, Germany, England and Belgium studying horse breeding methods. Prof. Carlyle intends to start on his peregrinations about June 1.

The next regular meeting of the Board of Appeals of the American Trotting Association will be held at the Auditorium Hotel, Chicago, May 1, 1906, at 10 o'clock a. m. for the transaction of such business as may properly be presented to the board for its consideration. All new applications and written evidence must be received at the office of Secretary W. H. Knight, Chicago, not later than April 15.

Hermis, one of the greatest thoroughbreds in the country and winner of many important races in recent seasons, has been exercised in harness during the past winter. The object was, of course, to keep the strain as much as possible off his legs, and it is said the great stallion has developed into a very good tempered pleasant driver.

NOTES AND NEWS.

Another track that will probably be cut up into town lots is the one at Willows, Glenn county.

Daniel 2:00 $\frac{1}{4}$ has been bred to Dan Patch 1:55 $\frac{3}{4}$. The foal will hold the world's record for speed in—

Frank S. Turner, proprietor of the Santa Rosa Stock Farm, and lessee of the Santa Rosa Race track, desires the Breeder and Sportsman to state that there is no probability of that track going the way of the San Jose track and being cut up into town lots. Such a rumor is said to have been going the rounds in San Francisco last week, but if so it had no foundation in fact. Mr. Turner has a lease of the track for five years, and any sale of the property by the Estate of Henry Pierce, will be subject to that lease. The track is now in first class shape for training and will be kept so this summer. There are excellent accommodations for horsemen.

The first of the Bonnie Directs to put in an appearance this year is a very handsome bay filly, foaled the last day of March by Mr. M. Henry's mare Hulda by Guide.

It is quite probable that a race meet will be held in Marysville soon after the one which will take place at Colusa during the latter part of this month. The Yuba and Sutter Driving Club gave a very successful and enjoyable meet last year and an endeavor will be made to repeat it, or have even a better one some time in May. There are a number of fast horses in that vicinity and their owners are quite anxious to have another opportunity to pit their animals against others. There is also considerable talk of some match races for large purses and side bets, and should some of these be pulled off they will add interest to the meet. A committee from the driving club consisting of Colonel E. A. Forbes, Jake Marcuse, R. R. Raish, M. Gomez and G. H. Magruder has been appointed to canvass for funds and arrange as far as possible for a three or four days' race meet.

A Denver paper says: The trotting horse Swift B., sold last year to J. Williams of Boston by J. A. Richardson of this city, will bear watching even if he was a sore disappointment last year. He had poor feet all season and it was not until late in September that he began to come on. At Cincinnati he raced three heats in 2:08 and looked as good a trotter that day as there was in training. This spring his feet are to all appearances perfect and he is likely to make good the claim of his former owner that he is a 2:05 trotter.

Sentiment is the very backbone of breeding and racing the trotter, says an eastern exchange. If it were not for the support of the men who love the horse for himself both would fall to the level of a commercial venture pure and simple. Too much emphasis cannot be put upon sentiment in considering means to elevate the tone of the sport. The men who give the sport of racing a tone are not the men who are looking to make money out of it, but who regard it as a sport which they are willing to pay for if necessary. Of course every man who races horses is anxious to win; and if he is able to make ends meet by his winnings so much the better. There are many men engaged in breeding who have entered into it, not with the idea of making a fortune out of it, but with the hope some day of breeding an animal that may win distinction on the track, and many such breeders, too, hope to contribute something to the improvement of the breed.

A mare belonging to Martin Castro of Gonzales recently foaled a three legged colt that is a lively and otherwise well developed freak of nature. The left front leg of the colt is absent, and there is only a small lump of skin extending from the shoulder about two inches in length. The colt is strong and manages to hop about on its three legs with apparent ease. It can lie down and get up alone and is a rare curiosity. Those who have seen it say that when the colt moves about the muscles of the left shoulder work as though there was a fourth leg.

Pat Barry of Portland, Oregon, has sold his McKinney stallion Nehalem, dam Nada by Gossiper 2:14 $\frac{1}{2}$, to J. Crouch & Son, the well known horse dealers of Lafayette, Indiana. His new owners have changed the horse's name to Kinney Gossip.

Mr. C. X. Larrabee of Brook-Nook Ranch, Montana, has purchased the Morgan stallion Spokane 10,505 to breed to his mares by the Morgan stallion Jubilee de Jarnette. Spokane is 15.2, weighs 1130 pounds and is a handsome seal brown.

The May Day races at Dixon will draw a big crowd this year if the weather is favorable. Last year rain fell during the entire afternoon, yet very close to a thousand dollars was taken in at the gate at 25 cents admission. Three races have filled, as follows: The entries for the two-year-old trotting race are: T. C. Horgan's Ringlight, Alex Brown's Prince Lot, M. C. Keefer's The Bloom and Rush & Halle's Anibell. The three-year-old trot has the following horses entered: Alex Brown's Red Blossom, Tom Kilkenny's Dr. Douglass Hyde and J. J. Kilkenny's O'Riley. The two-year-old pace will be represented by Rush & Halle's Edna Earl, H. B. Robben's Diablo Maid and E. D. Duldley's Dr. Millar. One or two additional races will probably be given during the afternoon.

On more than one occasion this winter the Breeder and Sportsman has made reference to Mr. M. Henry's horses in training at Pleasanton. Some of the "wise guys" of the eastern turf press have copied these items but changed the trainer's name to Myron McHenry, probably thinking the former driver of Dan Patch was in California, and the wild and woolly west did not know how to spell his name. It is M. Henry of Haywards, if you please.

The Blair-Baker sale at Indianapolis, which closed March 28th, was a complete success. Grace A. 2:12 $\frac{1}{2}$, chestnut mare by Anderson Wilkes, sold for \$5000; Missal, brown gelding by Directum Kelly, sold for \$4001. The Hermit, a five-year-old by Adbell, brought \$1250, and Direct Aim, a six-year-old green trotter by the Director General, sold for \$2000. These were the highest priced animals of the sale.

The stallion Allendorf, son of Onward and the great brood mare Alma Mater, died March 29th at Haw Patch Farm, Columbus, Ohio, aged 23 years. Allendorf sired thirty-two standard performers, including Dick Hubbard 2:09 $\frac{1}{2}$, Emma E. 2:09, Strong Boy 2:11 $\frac{1}{2}$, Celaya 2:11 $\frac{1}{2}$, Knott Allan 2:13 $\frac{1}{2}$, Hugh Wynne 2:13 $\frac{1}{2}$. His daughters produced Much Better 2:07 $\frac{1}{2}$, Christobel 2:11 $\frac{1}{2}$, Little Better 2:11 $\frac{1}{2}$, Thornway 2:12 $\frac{1}{2}$. He has thirteen sons represented among the successful sires, they having sired forty-seven performers, among them Dr. Strong 2:05 $\frac{1}{2}$, Allanwood 2:09 $\frac{1}{2}$, Aileen 2:11 $\frac{1}{2}$, Goldust Maid 2:09 $\frac{1}{2}$, Kirkwood 2:10, Maggie Hubbard 2:11 $\frac{1}{2}$ and others.

The accompanying picture is of the Mendocino stallion advertised for sale in this issue at the low price of \$500. The picture does not do the horse justice, but he can be seen at Oakland, and we advise buyers in search of a good animal to look him over. He

has trotted in 2:18 $\frac{1}{2}$ in his work, but a slight injury prevents his standing training to race. On the road he never shows any lameness, and he is well enough bred to head a stock farm, as his dam is a double producer by Nutwood. Read the advertisement.

Californians made twenty-three nominations in the Kentucky Futurity for foals of 1906. There was a total of 1200 mares nominated by 447 nominators. The stake was not advertised in this State to any extent, or the representation of California mares would have been larger. There were forty-five mares bred to McKinney and twenty bred to Sidney Dillon nominated.

Daedalion is working so nicely for James Thompson that a lowering of his record of 2:08 $\frac{1}{2}$ is being predicted.

The three-year-old colt Cochato by Todd 2:14 $\frac{1}{2}$, dam Castanea 2:19 $\frac{1}{2}$ by Pistachio, has been sold by Col. A. C. Drinkwater of Boston to a syndicate of Boston horsemen for \$10,000. He is entered in all the big stakes and will be trained especially to win the Kentucky Futurity. He started in the American Horse Breeders' Futurity last year and got third money.

Pique, the dam of Chain Shot 2:06 $\frac{1}{2}$, Brash 2:14 $\frac{1}{2}$ and two others, and grandam of Red Tell 2:08 $\frac{1}{2}$, has a colt by Sidney Dillon. She is owned by Sterling R. Holt, owner of the stallion.

The six-year-old mare Maggie N., own sister to Robert I. 2:08 $\frac{1}{2}$ and Murray M. 2:14, is offered for sale for \$300. Write to D. V. Truax, owner, 1126 Park avenue, Alameda.

Mr. W. A. Clark Jr. recently bought a pacer that is expected to be right up in the money winning row this season. The horse is Spill 2:12 $\frac{1}{2}$ over a half mile track last year. J. O. Gerrity went over to Omaha last month and purchased the horse for Mr. Clark, paying \$3000 for him. Al Thomas will train him until Gerrity goes east with the Clark string. Spill started green in 1904 and took a record of 2:15 $\frac{1}{2}$. He started thirteen times last year and won ten races, being second in the other three. He is a six-year-old bay gelding by Wawan, dam Achsa Wilkes by Garnet Wilkes, son of Onward 2:25 $\frac{1}{2}$; second dam Richmond's Ivy by Indianapolis 2:21; third dam Matie Munger by Nomad, son of Almont; fourth dam Adelaide by Black Donald, son of Mambrino Chief; fifth dam by Captain Beard, thoroughbred; sixth dam Alida, thoroughbred, by Buford, etc. Wawan, sire of Spill, is by Woodline 2:19, dam Lavish by Cornelian, son of Princeps; second dam Laviana by Stoner Boy, son of Strathmore; third dam Lorena by Volunteer; fourth dam Hawkin's Messenger mare.

Sterling R. Holt has purchased a well bred daughter of Arion 2:07 $\frac{1}{2}$ to breed to Sidney Dillon.

Hans Frellson is driving a very handsome black mare by Del Norte 2:08 out of a mare by Antrim, sire of Anzella 2:06 $\frac{1}{2}$, that is an excellent prospect. Hans says he will drive her a mile in 2:15 this summer. She is a trotter.

Jos. Cuicello drove his pacer Ring Rose a mile in 2:11 $\frac{1}{2}$ last Monday, with the last half in 1:04 $\frac{1}{2}$. This looks like the Falrose gelding is getting ready to win money this year.

Cavel Rodriguez has moved Mr. C. H. Wideman's horses from the home place at Gonzales to the Salinas track, where he will get them ready for the California circuit.

Several Pleasanton trainers who will race on the Grand Circuit would like to hear from some of the Western mile tracks within a radius of three or four hundred miles of Chicago that will give early meetings this year. They will go east in May or June and would like to get a few races on mile tracks before the Grand Circuit opens. There are some very fast horses to go that would prove an attraction at any meeting. For instance there are John Caldwell and Tuna, both trotters, and Daedalion, a pacer, all with records of 2:08 $\frac{1}{2}$, and their trainers would like to start them a time or two before hitting the record breakers of the big ring. They don't want to race on half-mile tracks, however, preferring the mile rings. Any mile track circuit in the Middle West that will be racing before the Grand Circuit opens should send a few entry blanks to Pleasanton.

The Dexter Princes averaged more than the Cupids at the Aptos Ranch sale, but a Cupid brought the highest price.

An owner in California, in advertising his "Imported German Coach stallion" states that "for orchard purposes, action and general make-up this horse is unsurpassed." That's going some.

Some preliminary races will be held this afternoon at Pleasanton under the auspices of the new Matinee Club, and on Saturday, April 28th, a regular program will be given. There'll be some fast miles and the fun will be worth seeing.

Second payment of \$5 each is due on each entry in Breeders' Futurity No. 6, for foals of 1906. This stake is worth \$7000. If you keep your mare in and she dies or the foal dies you can substitute another or sell your nomination up to January 2, 1907.

I Direct 2:12 $\frac{1}{2}$ arrived at his new home in Ogden in first class shape after being aboard the cars 110 hours on the way from San Francisco. Like nearly all horses with good, level heads, he is a splendid traveler on the cars and takes matters philosophically, no matter what happens. His new owner, Mr. A. G. Fell, is highly pleased with him.

Nearly forty mares have been booked to Star Point and up to last week he had served 25.

John A. McKerron, at 251-257 Golden Gate avenue, is very busy these days filling orders for high class harness and horse boots. Mr. McKerron made a rule when he started in business many years ago that all work leaving his establishment should not only be what the customer ordered, but be made of the best material and in the best possible manner. That is the secret of his great success and the reason why the McKerron goods, no matter how well others are made, are always the best in the market. Ask any trainer or horseman who had had experience what goods are the best and he will tell you "McKerron's."

WILLIAM HAROLD 2:13 $\frac{1}{4}$ AT STUD.

A stallion with a fast record, whose sire had a fast record and is grandsire of the world's champion trotter, whose dam has a record of 2:10 and has produced four in the list, is worth breeding to, especially when the stallion is a good individual and has proven himself a sire of speed by having one of his daughters trot to a race record of 2:08 $\frac{1}{2}$ and a son get a pacing record of 2:15. For a stallion that has the limited opportunities of William Harold this we consider a great showing and when his services can be had for a fee of \$25 the season, he should not lack patronage, and he will not. Mr. H. W. Meek, owner of this stallion, desires that he should have a better opportunity in the stud than heretofore, consequently he has put his fee at this very low figure.

William Harold 2:13 $\frac{1}{4}$ is by Sidney 2:19 $\frac{1}{2}$, sire of 19 in the 2:15 list, 104 in the 2:30 list, and whose sons have sired 90 in the list, including Lou Dillon 1:58 $\frac{1}{2}$, and whose daughters have produced 23 in the list, including seven with records below 2:14.

His dam is Cricket 2:10 by Steinway 2:25 $\frac{1}{2}$. She has produced four in the 2:20 list—William Harold 2:13 $\frac{1}{4}$, Hopper 2:14 $\frac{1}{2}$, Isobel 2:19, and Cricri 2:20, and has two more that will enter the list this year. She was a great race mare herself and is proving one of the greatest brood mares in California.

With this breeding William Harold would naturally be expected to sire speed, and the fact is that his daughter Janice took a trotting race record of 2:08 $\frac{1}{2}$, which she would have reduced materially had she lived, as it was not the limit of her speed by any means. In fact, Millard Sanders, who gave her her record, confidentially believed her capable of lowering her record five seconds.

William Harold will be in the stud at San Lorenzo, where excellent pasturage for mares will be furnished at \$4 per month. For further particulars address Mr. H. W. Meek at the above named postoffice.

Jackson's Napa Soda does not tangle the feet.

THREE-YEAR-OLDS IN FUTURITY.

When all returns were in for payments made on three-year-old colts and fillies named in the \$6000 Pacific Breeders' Futurity for foals of 1903, it was found that just forty-one had payments made on them April 2d. While it will not be known until the starting payments are made on these youngsters just what proportion are trotters and what pacers, the probability is that a large majority of them are trotters. Among those on which payments were made are Mr. E. D. Dudley's chestnut colt McFadyen, that won the two-year-old pacing division last year and took a record of 2:15*, and Judge Brent's filly Magladi, that was second to him. Also F. Gommel's bay colt Prince McKinney, that won the two-year-old trot in 2:33½, and Mr. J. N. Anderson's bay filly Della Derby, that was the only other contestant in that division. The complete list of those on which payments were made April 2d:

J. N. Anderson's b. f. Della Derby by Chas. Derby, dam Norah D. by Del Sur.

N. P. Batchelder's s. f. by Meridian, dam Corinne Neilson by Clarence Wilkes.

Mrs. S. V. Barstow's br. c. Nearest McKinney by McKinney, dam Maud J. by Nearest.

Joseph H. Bohon's br. f. Zona B. by Zolock, dam Hytu by Happy Prince.

Dr. I. L. Bowman's b. c. Diablo B. by Diablo, dam Black Baby by Mirza.

Alex Brown's b. f. Red Blossom by Nushagak, dam Redflower by Alfred.

Thomas H. Brent's b. f. Magladi by Del Norte, dam Laurelia by Caution.

Martin Carter's br. f. by Stam B., dam Lida W. by Nutwood.

C. L. Crellin's ch. f. Bernice by Owyhee, dam Bertha by Alcantara.

Cone Ranch Company's b. c. by Kinney Lou, dam Kitty Marvin by Don Marvin.

Herbert Coil's s. c. Renown by Diablo, dam Goldenrose by Falrose.

James Coffin's b. c. Fairhills by Mendocino, dam Mary Osborne by Azmoor.

James Coffin's b. f. En Cima by McKinney, dam Lucyneer by Electioneer.

Henry Delaney's ch. f. Louise Carter by T. C., dam Ingar by Director.

T. J. Drais' b. c. Drais McKinney by Guy McKinney, dam Blanch Ward by Onward.

E. D. Dudley's ch. c. McFadyen by Diablo, dam Bee by Sterling.

Dr. R. Felt's br. c. Bonnie Sain by Bonnie Direct, dam Sain Filly by imp. Sain.

F. N. Frary's ch. c. Roy Dillon by Sidney Dillon, dam Lizette by Abdallah Wilkes.

Patrick Foley's br. c. Major Montesol by Montesol, dam Lady Galindo by Abbottsford Jr.

Russell Gray's b. c. Walter G. by Nutwood Wilkes, dam Bessie C. by Cal. Nutwood.

F. Gommel's br. c. Prince McKinney by McKinney, dam Zorella by Dexter Prince.

Griffith & McConnell's b. f. by Bonnie Direct, dam Ginger by Steinway.

M. G. Gill's br. c. Kinney G. by Kinney Lou, dam Mattie G. by Dictatus.

G. W. Hayes' ch. c. Joe Bowers by Silver Bee, dam Bessie by Cornelius Jr.

J. B. Iverson's blk. c. Robineer by Robin, dam Ivoneer by Eugeneer.

F. J. Kilpatrick's b. f. Belle of Washington by Wash. McKinney, dam Dalia by Daly.

F. J. Kilpatrick's b. f. Lady McKinney by Wash. McKinney, dam Danville Maid by Daly.

Mrs. Eva G. Moore's gr. c. Alto Moore by Iran Alto, dam May by Black Eagle.

William Morgan's b. c. Crisis by Zombro, dam Nellie K. by Gen. Grant.

George P. Machado's b. f. Little Dot by Wm. Harold, dam Columbia by Clipper.

George C. Need's b. c. Golden Baron by Barondale, dam Mary B. by Wilkes Boy.

A. L. Reed's ch. f. Louise Reed by Jim Rea, dam Catinka by Abbottsford.

James W. Rea's b. f. Mrs. Weller by McKinney, dam Much Better.

James W. Rea's b. c. Alto Kenney by McKinney, dam Irantillo by Iran Alto.

Santa Rosa Stock Farm's b. c. Bravo Dillon by Sidney Dillon, dam Russie Russell by Bay Rose.

Charles F. Silva's b. c. Flyaway by Azmoor, dam Swiftbird by Waldstein.

Thomas Smith's ch. c. Prof. Heald by Nutwood Wilkes, dam Daisy S. by McDonald Chief.

L. H. Todhunter's b. c. Silver Hunter by Zombro, dam The Silver Bell by Silver Bow.

L. H. Todhunter's b. c. Gerald G. by Zombro, dam Itella by Sidney.

Ed Wright's b. f. Salva by Dictatus Medium, dam Aunt Sally by Benton Boy.

George L. Warlow's blk. c. Stanford McKinney by McKinney, dam Avena by Palo Alto.

RED McKINNEY AND HIS DAM ARE ELIGIBLE.

The question having been asked if the stallion Red McKinney, by McKinney, dam Bonnie Red by Red Wilkes 1749, second dam Bonnie Belle by Almont, can be registered, we will state that he can. He is one of the best bred McKinneys living and we understand his owner, Mr. W. R. Murphy, will have him registered immediately. His grandam, Bonnie Belle by Almont 33, is a registered mare and is in the great brood mare list. His dam Bonnie Red was bred by W. T. Withers of Lexington, Ky., and is eligible to registration under rule 1. When she is registered, Red McKinney can be registered under rule 1.

California favorite hot weather drink—Jackson's Napa Soda.

APTOS RANCH HORSES SELL WELL.

One of the best sales of trotting bred horses in San Francisco in years was held at the St. Lawrence Stables, 423 Post street, last Tuesday evening. Mr. A. B. Spreckels had sent up from Aptos Ranch twenty-five head of mares and geldings by Cupid 2:18 (own brother to Sidney Dillon), Dexter Prince, Altivo 2:18½ and Aptos Wilkes, and a nicer, more uniform lot of horses has seldom been led into a salesring in California. Their ages ranged from four to six years, and all were well bred and good individuals. These horses had not been developed for speed, but were broken to work single and double, made familiar with the usual road sights, such as steam and electric cars and automobiles, and were in good condition. The well-known trainer, Sandy Smith, shaped them up for the sale, and had put a lot of work on them during the past three or four months. The compliments he received on all sides for the splendid condition of the horses were fully deserved. There was a large crowd present, and it was the general remark that the audience had more "class" to it than any that has assembled at a horse sale in San Francisco in years. Fred H. Chase & Co., who had the management of the sale, had fitted up the spacious floor of the stables by making a big sawdust ring for the horses, surrounded by comfortable chairs for the spectators, and although a thousand chairs were in use, as many persons had to stand during the sale.

W. H. Hord acted as auctioneer and in his usual felicitous manner called for bids and kept the audience in good humor. "Sandy" told the "story" of each horse as it was led out, and impressed everyone with the fact that he was telling the truth and acting fairly with the public and the owner.

For the class of horses hold the prices were excellent. It must be taken into consideration that these animals, while well bred, good individuals and sound, were not horses in training by any means. The majority of buyers present wanted road horses for every day use, and not to drive on the speedway. While there were a half dozen or so racing prospects among them, they were not advertised or touted as speed wonders, and the fastest quarter claimed for any one of the consignment was a quarter in 35 seconds, a 2:20 gait. The twenty-five head averaged very close to \$336 per head, an excellent showing. The bidding was lively and the sale was all over shortly after 10 o'clock, although the first horse was not led into the ring until 8:30. The highest price bid during the evening was \$725, which Mr. L. A. Rogers of Fresno paid for the very handsome mare by Cupid out of Lilly S. by Speculation. This mare is a promising trotter and is a full sister to Venus II 2:11¼. She has shown a quarter in 35 seconds at the Aptos Ranch track. The complete record of the sale is here given:

Brown gelding, 1901, by Aptos Wilkes, dam Christina by Chris Smith, to A. L. Dowler for \$200.

Brown gelding, 1901, by Aptos Wilkes, dam Niniche by Eros, to A. Ottinger for \$250.

Chestnut gelding, 1902, by Dexter Prince, dam Galata by Stamboul, to C. C. McCafferty for \$510.

Brown gelding, 1902, by Cupid, dam Emma S. by Speculation, to J. McCormack for \$230.

Bay gelding, 1902, by Dexter Prince, dam Psyche 2:16½ by Cupid, to M. F. Tarpey for \$650.

Bay gelding, 1902, by Aptos Wilkes, dam Livingston Mare by Dexter Prince, to D. L. Randolph for \$280.

Bay mare, 1902, by Cupid, dam Princess Louise by Dexter Prince, to G. H. Shafer for \$315.

Bay mare, 1902, by Cupid, dam Lady Ashcat by Aptos Wilkes, to J. McCormack for \$190.

Bay mare, 1902, by Dexter Prince, dam Lady Aptos by Aptos Wilkes, to A. J. Martin for \$330.

Bay mare, 1902, by Dexter Prince, dam Sunrise II by Gossiper, Jr., to D. A. Ross for \$500.

Bay mare, 1900, by Cupid, dam Lady Ashcat by Aptos Wilkes, to T. Lunstedt for \$280.

Bay mare, 1900, by Altivo 2:18½, dam Princess Louise by Dexter Prince, to F. Gommel for \$305.

Brown gelding, 1900, by Altivo 2:18½, dam Satella by Aptos Wilkes, to C. Graves for \$285.

Chestnut mare, 1901, by Cupid, dam Livingston mare by Dexter Prince, to Geo. Gray for \$360.

Bay mare, 1901, by Dexter Prince, dam Susie Wilkes by Aptos Wilkes, to S. A. Holmes for \$305.

Bay gelding, 1901, by Cupid, dam Erosine by Eros, to D. L. Randolph for \$215.

Chestnut mare, 1901, by Cupid, dam Countess by McKinney, to J. B. Hoyt for \$325.

Bay mare, 1901, by Cupid, dam Lilly S. by Speculator, to L. A. Rogers for \$725.

Bay mare, 1901, by Dexter Prince, dam Satilla by Aptos Wilkes, to M. MacMahan for \$420.

Chestnut mare, 1901, by Dexter Prince, dam Neonta by Steinway, to D. L. Randolph for \$265.

Brown mare, 1902, by Dexter Prince, dam Erosine by Eros, to T. Barnett for \$280.

Chestnut mare, 1902, by Dexter Prince, dam Christina by Chris Smith, to Mrs. D. H. Bibb for \$250.

Bay gelding, 1902, by Cupid, dam Sen Sen by Dexter Prince, to G. H. Shafer for \$415.

Bay gelding, 1902, by Cupid, dam Satilla by Aptos Wilkes, to F. Daunet for \$175.

Brown mare, 1902, by Cupid, dam Countess by McKinney, to Dr. H. M. Berthiaume, for \$330.

Total for 25 head.....\$8,390.00

Average for 25 head.....335.60

Average for 9 head by Dexter Prince.....390.00

Average for 11 head by Cupid.....323.70

Average for 2 head by Altivo.....290.00

Average for 3 head by Aptos Wilkes.....243.33

The big McKinney trotter out of a Guy Wilkes mare, owned by Thos. Murphy of Russia, worked a nice mile at Pleasanton last Saturday, trotting the distance in 2:17½. He begins to look like a money getter.

PLEASANTON HAS A MATINEE CLUB.

An enthusiastic meeting of the newly organized Matinee Club was held in the Pleasanton Town Hall, Tuesday evening of last week, at which were present a large number of prominent horsemen and citizens of the town, says the Times of last week.

The meeting was called to order by Lee Wells, who stated that the first order of business would be the election of a board of directors consisting of five members. A number of nominations were made and when the votes were counted it was found that the following gentlemen had been elected to look after the destinies of the club: A. F. Schweer, C. L. Crellin, J. C. Kirkpatrick, W. H. Donahue, R. C. Peach. The directors then elected A. F. Schweer president, C. L. Crellin vice-president, and W. H. Donahue secretary and treasurer.

Mr. Schweer took the chair and declared the matter of giving race meetings to be the most important question before the club and called for an expression of opinion from the members. After a lively and interesting discussion it was decided to hold a preliminary race meeting April 14th and a regular matinee on April 28th.

In the meantime a speed committee will be appointed whose duty it will be to classify the horses and so arrange the horses that a contest will be assured in each of the three or four races which will be given at each meeting. There will be no admission to the track, no betting and no money prizes. Ribbons will be given the winners and it is proposed to offer several cups during the season. There is talk of a valuable cup to be offered which must be won three times before it becomes the property of the holder. No records or bars will be incurred at these matinee meetings as they will be held strictly in accordance with section 4 of rule 44 of the American and National Trotting Association which reads as follows:

"Records cannot be made or bars incurred in trials of speed where there is no pool selling, bookmaking or other public betting on the event, no money competed for, no entrance charged or collected from competing horses, no admission fee charged to the gate or grand stand, and no privileges of any kind sold. Such performances shall not be considered public races."

HORSE SHOW AND SALES BUILDING.

The Board of Supervisors of San Francisco has granted permission to Fred H. Chase (successor to Killip & Co., the pioneer live stock auctioneers) to erect in the centre of the block bounded by Valencia, Fifteenth and Sixteenth streets and Albion avenue a structure to be called an Exhibition Tattersall, to be used for the purpose of holding horse shows, exhibitions and auction sales of high grade live stock. The main portion of this building is to be 250 feet long by 125 in width and is to contain a show ring 80x175 feet, and seats to accommodate 2000 people. There will be 60 box stalls and 90 single stalls and the entire structure is designed to comply with all the health, fire and police regulations of the city of San Francisco. The entrance will be on Valencia street.

The erection of this building, which will be completed within a few weeks, will fill a long felt want in San Francisco. There has never been a building here that was a fit place to hold a high class auction sale, and the enterprise of Chase & Co. will be appreciated by owners who consign first class stock to the salesring. The plans which Mr. Chase has had drawn up, provide for a building that will be a credit to the city and one where sales can be held in any sort of weather with as much comfort to the audience as though they were seated in a first class theatre.

Mr. Chase will begin work on the new building immediately, the contract having already been let.

HERE THEY ARE AGAIN.

Not a month passes that some one does not write to this office asking how to lay out a half mile or a mile track. We have published the directions many times, but here they are again, for the benefit of two "anxious inquirers" this week:

Half Mile.—For a half-mile track draw two parallel lines, 600 feet long and 452 feet, and 5 inches apart. Half way between the extreme ends of the two parallel lines drive a stake; then loop a wire around the stake long enough to reach to either side. Then make a true curve with the wire, putting down a stake as often as a fence post is needed. When this operation is finished at both ends of the 600-foot parallel lines, the track is laid out. The inside fence will rest exactly on the line of the above driven stakes. The turns should be thrown up an inch or an inch and an eighth to the foot. The stretches may be anywhere from forty-five to sixty feet wide.

One Mile.—For a mile track draw a line through an oblong center 400 yards in length, setting a stake at each end. Then draw a line on either side of the first line, exactly parallel with and 417 feet and 2 inches from it, setting a stake at either end of them. You will then have an oblong square 440 yards long and 834 feet 4 inches wide. Now fasten a cord or wire 417 feet and 2 inches long to the center stake of your parallelogram and describe a half circle, driving stakes as often as you wish to set a fence post. When the circle is made at both ends of your parallelogram you will have two straight sides and two half circles, which, measured three feet from the fence, will be exactly a mile. The turn should be thrown up an inch or an inch and an eighth to the foot.

Centereye, Mr. J. O'Keeffe's fast mare by On Stanley, is improving all the time at Pleasanton. He drove her a mile in 2:11 last week, the fastest mile on the track up to that time this season. She should shade 2:10 before the month is over.

PLEASANTON TRACK JOTTINGS.

Monroe Salisbury, who is getting the East View Farm horses ready to ship east about the first of May, has fully recovered from the severe cold he took early in the winter and looks like himself again. A representative of the Breeder and Sportsman carrying a camera approached the veteran's headquarters at Pleasanton track the other day when Mr. Salisbury said: "Do you want to take a picture of the best three-year-old in the country?" The picture was taken and will be found on the front page of this issue. The youngster is not large, but is one of the best formed and best headed trotters ever seen anywhere. He is by Directwell out of a mare by Simmons that has a record around 2:12 but whose name could not be recalled. The colt is much handsomer than his picture, so the reader will know the "king maker" had reasons for his flattering opinion of the youngster.

Those Simmons mares are great for producing good looks as well as speed. Mr. Salisbury said to Mr. C. L. Griffith the other day: "You have the satisfaction of knowing you have the handsomest two stallions at the track." He referred to Bonnie Direct 2:05½ and Bonnie Steinway, who are half brothers out of Bon Bon 2:26 by Simmons. Bonnie Steinway's picture on the front page gives some idea of his looks. He is a deep chestnut and a better formed stallion would be hard to find anywhere. He is the best green pacer in California in the opinion of a great many horsemen and will be raced in the East this year. He turned the track at Pleasanton in 2:08½ last year, but has not been asked to show any fast miles this year as yet. Ted Bunch, who by the way is being talked about as one of the coming trainers, worked him a mile in 2:24 last Saturday and let him step through the stretch in 30 seconds flat. The son of Steinway seemed to be going very easily, and he certainly looks like a very high class prospect. Bonnie Steinway was worked several weeks last fall and seemed to thrive on it, as he took on flesh all the time.

Col. J. C. Kirkpatrick bought a new pacer last week from Mr. Cook of Irvington, and Trainer James Thompson thinks he has a high class race horse that will do to enter in some of the big pacing stakes. The pacer is a son of Nutwood Wilkes 2:16½, first dam Belle Nora by Belnor 5225, son of Strathmore, second dam by Ulster Chief, son of Hambletonian 10, third dam by Black Hawk 767. He was bred by R. Volmer of Alameda county, who sold him to Mr. Cook, who developed him and drove him a mile in 2:15. The day Mr. Kirkpatrick bought the horse Thompson drove him a quarter better than 30 seconds very handily. Mr. Cook received \$1500 cash and the Waldstein pacer in the Kirkpatrick string for his horse.

Millard Sanders likes Carrie Dillon better every time he drives her and sees something additional to remind him of Lou Dillon whenever he lets her step. The picture of her printed this week shows the remarkable similarity of the two mares. Carrie will look more like her famous relative when she has filled out a little more. She has not the extreme nervous temperament that Lou has, but she has a wonderful amount of nerve force nevertheless.

Ted Hayes is rapidly getting a bunch of Highlands that are just about the prettiest and liveliest family of foals one would wish to see. Christobel 2:11½ was the first to foal, and now She 2:12½, Pattie D. 2:12½ and Ruth Mary by Directum 2:05½ all have foals at foot. The one out of She is built like a cart horse. Highland's foals seem to be a very lusty lot. Ted says they are on their feet and looking for breakfast as soon as they arrive, and the strongest little fellows he has ever seen. Mr. Clark has a very promising sire in Highland.

Bon Voyage 2:12½ is the most admired horse at the track and Billy Forbes pulls his blanket off many times a day to show him to visitors. A friend of mine who came from "way down in Maine," and is about as good a judge of "hoss flesh" as the next one, looked him over carefully from head to heels Saturday and then remarked: "That's about the most perfect horse I ever saw." Bon Voyage's book is full for 1906. After the season is over, Mr. Clark proposes having him trained and along in the fall will start him to lower his three-year-old record. Next year he will be raced through the Grand Circuit.

Ted Hayes has some speed in his string and worked a two-year-old Stam B. filly a mile in 2:35 last Saturday with the last half in 1:16. The filly is one of the nicest gaited trotters, and one of the most business like movers on the track. She will bear watching. Tertius, the McKinney trotter out of She 2:12½, is trotting like a race horse.

Josh Albertson, who trained and developed George 2:05½, has some pretty good ones in his string at Pleasanton. He worked a pacer by Hambletonian 10 out of an Altamont mare a half in 1:07½ with the last quarter in 32 seconds, and says he can beat this away off. Mr. I. L. Borden of San Francisco owns this pacer. Mr. Borden has some very choicely bred trotters and pacers, and takes as much pleasure in seeing them go as the next man. He has bred and raced several with fast records. Another good prospect in Albertson's string is a trotter owned by Lawyer D. Cosgrove of Fresno. It is by Athadown, son of Athadon, out of the dam of Cuckoo 2:13 by Milton R. This mare is a handsome bay and has shown a

mile in 2:35 with very little training, the last eighth in 16 seconds. Albertson says he likes her better than anything he has driven since he held the lines over George G.

Dan Misner has a big three-year-old pacer by Zolock in his string that is beginning to fill out and is learning how to step. Dan traded for this fellow last fall in San Bernardino. He belongs to Horace O'Rear of this city and when Misner gets him gaited the owner will drive him on the road. Zolo, as they call him, paced a quarter in 48 seconds the other day, and as he is only just broken, he looks like a pretty good prospect. Some of the boys say he is a second Zolock. Misner has a new one that belongs to Tim Judge of San Francisco. This is a mare by Nazote, brother to Azote 2:04½, out of a mare by Palo Alto 2:08½. She was bred at Palo Alto and Mr. Judge picked her up at Chico recently. She looks like a good prospect for a fast trotter.

Chas. DeRyder gets more pleased every day with the Hamilton stallion by Meridian. He has a world of speed, is one of the best actors on the track and seems to thrive on work. The Fresno "buckskin mare" by Athadon that worked a mile last year in 2:08½ has been put into DeRyder's hands by Mr. Graham of San Jose, who has her under lease, and DeRyder likes her very much. She certainly has the racing conformation and looks stout and rugged besides.

Jack Curry behind the East View Farm pacing mare Daphne Direct and Ben Walker driving the same farm's trotting mare Mamie R. 2:15½, worked a mile together at Pleasanton last Saturday. They went to the quarter in 33 seconds, to the half in 1:07, to the three-quarters in 1:40 and came through the stretch like race horses, but Mamie R. went to a break about one hundred yards from the wire and Daphne Direct finished alone in 2:12½ going easily. The other mare's time was 2:15. Monroe Salisbury looked on approvingly and expects both these mares to be good in their classes this year.

J. C. Kirkpatrick purchased this week from the San Francisco Wheel & Novelty Company a long shaft low seat Flower City speed cart, weighing 45 pounds, that is the talk of the Pleasanton track. It is one of the neatest, most comfortable to ride in, and best made carts ever seen at the horse centre.

RACING AT PLEASANTON TODAY.

The Pleasanton Matinee Club will hold its first meeting today, beginning at 1:30. There will be three races as follows:

Free-for-all pace—Mr. Helwig's Byron Lace, Mr. McLaughlin's Ring Rose, Mr. Colestock's Peggy, and Mr. Perry's Mike.

Trotting, 2:45 class—Mr. Perry's Billy Moore, Mr. McLaughlin's Yonge, Mr. Kirkpatrick's Elden Bells, Mr. Wells' Major.

Mixed, 2:30 class—Mr. McLaughlin's Kelly, Mr. Goulard's Hal Welcome, Mr. Peach's Roan Dick, Mr. Ronan's Anguine, Mr. Kirkpatrick's Charley D.

During the afternoon Mr. John O'Keefe will drive his fast pacing mare Centereye an exhibition mile.

The track at Lawrence Stock Farm, where Kinney Lou 2:07½ now has his home, is rapidly being put into shape since Mr. Doble took possession of the place April 2d. Teams have been working early and late harrowing, grading and widening, and the track is now greatly improved over its original condition. It is the belief of all at the farm that in a very short time it will be a first class track to train on. Everything necessary for taking care of the track is on the place, including an abundance of water which flows from artesian wells into tanks ten feet above the ground. An immense barn, 80x150 feet, contains twenty large box stalls, and plenty of room for large quantities of hay and straw, sulkies, carts, etc. In good weather or bad horses can be walked and cooled out inside the barn, out of the rain and wind, and protected from the blazing rays of a summer sun. Excellent paddocks with water and shed in each are appreciated by those who have been located on a run-down and neglected race track, where there was no place to turn out a horse, mare or colt.

John Howell, the New York trainer, who trained and raced successfully A. B. Gwathmey's fast gelding, Tiverton, and that he gave a race record of 2:04½, this dividing honors for the race record for geldings with Wentworth, has shipped his string to the Hudson River Driving Park. Mr. Howell has wintered Tiverton, along with a number of others, at Mr. Gwathmey's palatial stables at 141st street, in New York. Another member of Mr. Gwathmey's string that Howell will train is the fast horse, Senator Mills 2:12½, who has shown his ability on a number of occasions to beat 2:10 in a race. Howell will also take along with the Gwathmey pair three fast green ones, all owned by different parties.

Those who think that Thomas W. Lawson has lost his interest in horses are mistaken, says a Boston writer. He has consigned sixty-five head to the May sale of the Fasig-Tipton Co., at Readville, simply to make room for this year's foals at Dreamworld. All told, Mr. Lawson's horse possessions foot up very close to three hundred head.

Twenty dollars is the price of a ticket entitling the holder to train horses over Belmont Park track, Philadelphia, this season.

STATE FARM LOCATED IN YOLO.

The State Farm Commission made its selection April 5th of a site for the State Farm and has chosen a tract of land situated in Yolo county, near Davisville, and containing 778 acres of fine land.

Professor E. J. Wickson makes the following statement in regard to Davisville site:

"The selection of the Davisville site for the University farm is eminently wise. At the close of my first examination of the farms offered, I considered it as the most available, because of convenience of access, means of frequent communication, prominence through proximity to main overland and local railway lines and because it so fully answered the requirements of the law in the character of the soil, ample and established irrigation facilities and because it is so thoroughly representative of wide interior valley conditions. There can be no question that the law passed by the last Legislature contemplates just such a situation, and in its action the commission has directly carried out the law.

"In my report to the commission I took into account some other considerations which led me to commend other sites as alternative with that at Davisville. One of the other Yolo county sites near Woodland seems to me to stand first because so many excellent buildings would be acquired with the land and the utilization of those would save time and money in opening instructional work on the land. Another site which was commended, chiefly because of proximity to the university, was the tract near Walnut Creek, but it is was for the commission to decide just what weight should be attached to proximity. It is possible that the confusion of interests in Contra Costa county may have obscured the claims of that site.

"The fact remains, however, that Davisville is chosen as the most available from all points of view and most thoroughly representative of irrigated interior valley conditions which the law contemplated. It is fortunate that a decision has been reached and that the university can proceed with the equipment and utilization of this the most important single contribution which the State has ever made to the development of agricultural education. It is fortunate also that the commission has answered what seemed the clear, popular demand that the location be representative of the great open area of the State, rather than convenient for the university. Convenience to the university is in fact a matter which should not be too narrowly considered. The university is, and should be, at home everywhere in the State. A grand institution which is studying stars from the top of Mount Hamilton, studying marine life at Pacific Grove and San Diego bay, studying trees at Chico and Santa Monica, studying plant diseases in the Sacramento valley and at Whittier, studying fertilizers by use of land at half a dozen widely separated places in Southern California, studying plants and the use of them everywhere that the university investigators can find places to grow them, killing insects at Visalia, San Jose, Concord and Watsonville, and studying the growth of grapes and the making of wine in San Joaquin and Fresno counties—surely an institution thus localized and distributed in its work can find a home for one of its activities in such a central and accessible district as southern Yolo county. The University of California should not be centralized. It should do everything it can for the people in the place where it can be best done and such a course will make it solid with the people. The commission has reached a decision for which everyone should be thankful."

ANSWERS TO CORRESPONDENTS.

Inquirer, Pleasanton.—The race in which Agitato started at Holton, Kansas, in 1897, was the free for all pace, purse \$600. There were five starters. King of Diamonds by Velocity won the first heat in 2:07½, was fourth the next heat and distanced in the third. Agitato was third the first heat, and won the next two and the race. Bob Riley by Riley Medium was 2-2-3, and got second money; Badge by Silas Wright was 4-3-2 and got third money. Kansas by Karatus was outside the flag the first heat. The time of Agitato's winning heats was 2:13½ and 2:09.

S. G., Cousins, Cucamonga.—Newlands Hambletonian was by Speculation 928, son of Hambletonian 10. The sire of Hambletonian 725 (Whipples) was Guy Miller a son of Hambletonian 10. The sire of The Moor 870 was Clay Pilot 93. Abdallah 15 was known as Alexander's Abdallah.

W. L. Vance, Marysville.—Elisa C. cannot be registered as her sire is not registered.

Hettie Case, by Simmons 2:28, dam Rosa Sprague (dam of McKinney 2:11½), by Gov. Sprague 2:20½, has foaled a bay colt by Moko, the youngster being therefore a full brother to Fereno 2:05½.

The only yearling in Kentucky by the fast pacing stallion Searchlight 2:03½, is owned by W. W. Evans of Lexington. It is a filly out of Pearl Onward 2:06½, and Mr. Evans has named her Pearl Light. Her dam and sire are both fast pacers, but the filly indicates an inclination to the trotting gait.

The death is announced, on March 22, of Thomas D. Dewey, a pioneer of Owosso, Mich., and a horseman of wide prominence for thirty years. He formerly owned Louis Napoleon and Jerome Eddy 2:16½, famous sires in their day, and sold the latter to C. J. Hamlin for \$25,000, a record breaking price for the time.

THE AGE OF SIRES.

In view of the interest that has been aroused by Professor Redfield's articles on the influence of age on sires the following from the London Live Stock Journal will be interesting reading:

There has been a disposition to set aside old horses in favor of young ones, but the arguments are self-demonstrated by facts. The small amount of purchasing by our own government for India has been restricted from four-year-olds to six. Other countries have followed the same rule, but the policy is really chance all round. The horses, as a matter of course, have not been bred from in time to show any produce, and in buying four-year-olds there has been little opportunity for ascertaining what merits they possess. Of the class such as the buyers of cheap horses go in for, the four-year-old cast off from the racing stables is generally a very poor plater, or otherwise a horse that has never been in training at all, possibly never is sound enough to stand such an ordeal, and, in a practical sense, not fit to breed from. It is very much the same with regard to other breeds. Foreign governments are for ever wanting to deal with the younger horses, and set aside the matured horses on the score of age. Yet in all breeds it is seen that not more than one in twenty has very great success. In the highest class of thoroughbreds the failures surpass the successes by a very large majority, and in lower degrees it is still more manifest. How many cheap, moderate horses go to the stud and are never heard of again? Sometimes they are even impotent. A Lincolnshire Handicap winner was found to be no use whatever after his arrival in South Africa. It is far better policy, and one to be recommended to the Japanese and our own colonies forming studs, to have no age restrictions, like the French in their earlier haras schemes. They bought, it is true, three, four, and five-year-olds that had won good races, but very much oftener the selections were from the 10 and 12-year-old divisions that had both won races and been bred from in England. Gladiator, for whom 2000 guineas was paid, was bred in 1833, was put to the stud as a four-year-old in 1837, and sold to the French Government in 1846. That made him 13 years old when purchased, and in his eight years of haras life he as good as made the French turf. The Prime Warden, a very famous buy for France, was bred in 1834, and purchased in 1847, so he was also 13. He had left his mark in England as the sire of Clothworker, the hardest horse of his day, and of Bassihaw, the subsequent great-grandam of Isonomy, and in France he was the sire of Light, sire of Sornette, winner of the Grand Prix de Paris, and the best mare of her day. The Flying Dutchman was 12 when the French bought him, and he lasted 10 years, to get much better stock in the land of his adoption than in the land of his birth. Lanecost was bred in 1835, won every sort of long-distance race and cup until he was seven, was then at the English stud for eight years, in which time, amongst others, he got the St. Leger winner, Von Tromp, and at 16 he was sold to the French to sire extraordinarily good stock, including the speediest and probably the best steeplechase horse of his day, Cosmopolite, Magenta, another great steeplechaser, and Gustave, winner of the French Two Thousand. He was sold cheap at 16 (£450), 3000 guineas being offered and refused for him four years previously. Ion was bred in the same year as Lanecost, was second in both the Derby and St. Leger, and was sold to the French in 1851, so he was 16. He got some wonderfully good stock, including Lion, winner of the French Derby, and through a daughter of his came Salvator, winner of the French Derby and Grand Prix, and thought to have been the best horse of his time. Ion was in French haras service for seven years, and in England he had got the Derby winner, Wild Dayrell, but that honor was unknown at the time of his purchase, as Ellen Middleton was in foal to him during the year he left England. Fifty others could be mentioned of good mature ages when the French agents selected them, and it could be also shown that the older horses did very much better than the younger ones chosen.

It can be seen in our own country, though, that horses have got their best stock when at 12 and over. A very great horse was Harkaway on the turf, but with the very best opportunities he was scarcely a great success until 1850 (then 16), when he got King Tom. Irish Birdcatcher, a very good runner, was foaled in 1833, and lived until he was 27, his death being recorded in 1860. Nearly all his best stud results were obtained after he was well in his teens. He got Daniel O'Rourke, his Derby winner, in 1848 (i. e., 15 years old), and Saunterer, decidedly his best stayer, in 1851, so was 18 years old. Voltaire ran second in the St. Leger in 1829; got his first St. Leger winner, Charles XII., in 1836 (10 years old), and his second St. Leger hero, Voltigeur, in 1847 (20 years old). Lord Lyon had his best son, Minting, when he was 20; and Stockwell got Doncaster when he was 21.

It can be seen, then, that the very best horses and the very best lines in the Stud Book would have been lost if breeders had been afraid of sires being too old. I expect it could be so proved in the breeding of all kinds of animals. The survival of the fittest is a very apt saying, but the fittest may survive a long time. The old horse on the prairies or moors will keep off the young ones for a very extended period, so will the old game cock against the aspirations of youth. It is perhaps a breeding problem that Professor Ewart might explain better than anyone; but there are these facts to consider, that only a few reproduce their own goodness, and that very often they are in very full maturity when they do so. It teaches a lesson, therefore, that it is safer to try proved material than to experiment on what one knows nothing about. The foreign agent may think himself very clever when purchasing a horse for £60, with nothing more than his pedigree and his looks to recommend him, but, on the average of even useful ones of a low class, it is 20 to 1 against the animal

being of any use at all. This is the danger foreign buyers are running into, and it would be much safer for the mto do as the French did years ago, to have no particular age restriction, and pay their attention specially to the tried horses. Turf performances might have something to do with it, but there are special advantages now to get horses that have been passed sound for King's premiums with their performances taken note of, and in most cases by the time they are nine years old there is produce in the districts located to them to show value as reproducers. In the higher classes for sires wanted to get racehorses there is no doubt about it, and 12 and upwards would be nearer the mark than nine.

People I know have said that many adult horses will not stand changes of climate, but that is refuted by a good many examples. Morello was 12 when started of for South Africa; he is doing very well, and the same may be said of Damocles, nine years old, and Corlekempe, eight, and winning races in the country of his adoption. The horse is an animal that is very adjustable to climate and difference of management, a wondrous instance of that being Diomed, winner of the first Derby. He was at the stud in England from the time he was six until he was 22. Then he was sold to the United States, where he got a good deal of stock, and was said to have founded the trotting breed, and reports differ as to whether he died at 29 or 30. History does not say what price was given for Diomed, but it was £1,000; he was a far better bargain than the unknowns all put together when judging results. The Americans have mostly gone in for tried adult horses. They bought Leamington in 1865, and he was bred in 1853. From that purchase they won the English Derby with Iroquoise, who was got by Leamington when the latter was 25 years old, so really another Diomed. Australia also has gone in for old seasoned horses that have done much on the Turf and something at the stud, as instanced by Tim Whiffler, The Marquis, and Fisherman. The first of these won the Chester Cup in 1862, as a three-year-old, ran a dead heat for the Ascot Cup as a four-year-old, and after Lord Coventry had used him for three or four years as a hunting sire, he was sold to an Australian gentleman in 1871, his age then being 12. The Marquis had won the St. Leger of 1862, served in England for two or three years, and got the useful mare Lady Geraldine, when the Australians bought him, also at 12 years old. Old Fisherman had been standing in England for good eight years before he retired to stud. Then he had a year or two at the Swancliffe Paddocks, Oxfordshire, and was shipped to the land of the Southern Cross when he was 11.

Breeders of foxhounds will entertain the same views about their favorites. The best are invariably got by old seasoned dogs, and certainly not more than one in twenty is considered good enough to breed from. They must be tried in field merit, and when there is an extra good one it is thought preferable to go on with him than to experiment with a younger generation. Lord Coventry's Rambler was in great request at 11 and even 12 years old. The Brockles by Rallywood was 10 when "Will" Goodall sent out fifty couples of puppies by him, and thereby, it is said, made the Belvoir. Lord Bathurst has had still greater experience with an old one, as his lordship's Crusty was thought vigorous at 12, and was alive this year, when 15 years old, a very remarkable age for a hound. New and young blood may be all very well, but practical knowledge of animals will always suggest that the old ones must not be neglected.

SUPPRESS SPECTACULAR PLUNGING.

Reports from New York indicate that the Cassidy-Lansing anti-racing bill has been virtually killed by the Senate Code Committee. All who have at heart the welfare of thoroughbred breeding and racing interests will hope that such is the case, and that racing may be allowed to continue in New York State, as it has for the last ten years, under the operation of the Percy-Gray act. At the time that law was passed the racing interests of the East were in desperate straits. The avarice of certain track owners and the dominating influence of the book-making element had combined to bring about a condition of affairs in New Jersey which had caused strong adverse sentiment to racing throughout America. Instead of a sport it had become merely a gambling machine, and, whenever the elements of sportsmanship which are supposed to control it are removed, racing can no longer hope to receive the support, financial or moral, of the masses of the people, nor should it. Unless it can be kept a sport it deserves to die.

Those in position to realize the significance of the situation have agreed in the opinion that had it not been for the wise action of the Jockey Club last summer in divorcing all tracks under its control from any connection with the bookmakers, even at the cost of a very large daily revenue, the opponents of racing would have been able to have stopped it altogether. At the time this action was effected we took occasion to heartily commend its wisdom, and we are now glad to see the announced intention of the part of the Jockey Club to suppress to the greatest possible extent the heavy, spectacular gambling which has been indulged in of recent years by certain so-called plungers. Some of these men have really made wagers of gigantic proportions. But they have not been as a rule those men about whose betting operations there has been the greatest amount of talk. There are others who seem to have an exaggerated, unnatural desire for newspaper notoriety, who have secured it by having published stories of their tremendous wagers, whether with or without foundation. The wide circulation of such stories has certainly done racing no good in the public mind, and in many instances has served to arouse opposition in

influential quarters.

We have no desire to deal in personalities nor to unduly censure any man, but in justice to the welfare of a sport in the continued success of which we have a deep interest, we feel called upon to express the opinion that John W. Gates, John A. Drake and certain others of their kind have done racing more real harm than almost any other men connected with it of recent years.

Both Gates and Drake are wealthy men. Both of them are primarily gamblers in stocks, and they have carried to the race course the same methods used in their deals on the stock exchange. Both of them are supposed to be gentlemen and to associate with gentlemen, and yet against each certain charges have been brought that if made against men with less influence would have resulted in their permanent expulsion from the turf. We know nothing of the truth of these charges, nor do we attempt to judge of the guilt or innocence of the men involved, but we do know that there have been a number of suspicious looking transactions with which the Gates-Drake combination has been more or less intimately connected. We know, further, that the stories of their heavy plungings have been a real detriment to the sport of racing, whether or not these stories were grossly exaggerated, and we know still further that if Messrs. Drake and Gates had desired to keep their betting operations a secret they could have done so to large extent.

We sincerely hope the announced purpose of the Jockey Club to frown upon plunging and to suppress heavy betting may be carried out to the fullest extent. Let it be carried out without respect to whom it may affect. Let the work of regulation be very thorough, and let it include just as many as deserve to come within the regulation and enforcement of the Jockey Club's rules.—Kentucky Stock Farm.

LINDLEY CRITICISES THE BOARD.

Sacramento, April 11.—In his final report to the State Board of Agriculture today Albert Lindley, the retiring secretary, took several severe raps at the policy which he asserted has controlled the recent management of the annual State Fair. He remarked that the executive, finance and building committees of the society are made up entirely of Sacramento directors, with full power to act, and believed such a policy has a tendency to make everything connected with the fair subservient to local interests. He ascribed the decline in horse racing to the ascendancy of the gambling element, and severely criticised the society for giving encouragement to this element. He said it was expected such sport would be conducted in a sportsmanlike manner by this State, but instead it has been entirely subservient to the gambling interests.

"A syndicate book," said Lindley, "run on a 75 to 90 per cent basis, such as we have had at our State Fairs of late, is not gambling, but robbery. It would not be tolerated a day on the track of a professional jockey club."

Lindley then made a sarcastic reference to the act of the society in putting up a building outside the grounds where liquor and pools were sold, the society in this manner violating the spirit of the law, if not its letter.

A STORY BY COLUMBUS.

One of the leading lights among trainers and race drivers in the short-grass country died and started on that long journey leading to the gate at which St. Peter presides. A multitude of other pilgrims were similarly gathered before the gate, and the prospect of gaining admittance appeared distant to the short-grass trainer. At length St. Peter spied the fellow, and, pointing at him, said:

"Come forth, my man."

"You surely don't mean me, good St. Peter," the man replied. "It must be the other fellow, as I never came fourth, fifth money being as good as I ever won."

Every once in a while some Eastern turf writer makes the statement when discoursing on the arbitrary rules governing the registration of trotting horses that even the trotting queen Lou Dillon 1:53½ is not eligible to registration under the present rules. Why not? Rule 1 states that the progeny of a registered horse and registered mare is eligible. Both Sidney Dillon and Lou Milton are registered, so Lou Dillon is eligible under Rule 1. Rule 2 applies to stallions only. She could not be registered under Rule 3 as the breeding of her grandam is unknown. If Lou Milton were not registered she could be under Rule 4, which states that a mare sired by a registered standard trotting horse can be registered, provided she is the dam of two trotters with standard records. Lou Milton has four standard trotters in the list. So her registration would entitle her champion daughter to registration. Lou Dillon is standard under Rule 1 and that is enough.

Frank Bower, of Philadelphia, is the recipient of a novelty in a horseshoe that is imbedded in a solid block of walnut cut from a tree that was over fifty years old. James Ogleby of Kansas City, former owner of Directly 2:03¼, presented the shoe to Mr. Bower, but can give no idea how the shoe got into the wood.

A well bred brood mare with a Hal B. colt at foot is offered for sale.

Sober up on Jackson's Napa Soda.

A GREAT STATE FAIR MEETING.

The Minnesota State Fair Association has been breaking ground for many of the older associations of the Middle States and the East, in the matter of conditions governing harness races. This was almost the first association in the country to establish the rule that all races ended with the fifth heat. This year there is a clause providing for a consolation heat in each class where there are over twelve starters for the first heat. The association announces that it will add 10 per cent of the purse as a consolation for non-winners, whether distanced or not, to be contested for at the close of the race, one heat only and no additional entrance fee. In one pacing event at the last State Fair, seventeen pacers scored down for the word in the first heat. Of course this meant that the association had received more money for entrance fees than it was paying out in the purse. On the spur of the moment the speed committee decided to offer non-winners \$500 to be divided 50, 30 and 20 per cent for a mile dash at the close of the race. Such was the enthusiasm of the horsemen over this action that subsequent discussion decided the management to make this a feature of the entire program for 1906. Secretary Randall is to be congratulated upon this particular condition, and it will not be surprising if it becomes as popular as his "no race longer than five heats." There were plenty of trainers who did not like the five-heat proposition at the start any more than they did the condition that horses not standing for money at the end of the third heat should remain in the barn. The latter proposition has also become very popular, as some trainers found that they still secured a portion of the purse without competing when any horse higher up in the summary was distanced or ruled out in the fourth or fifth heat. Very justly, the Minnesota State Fair stands at the head of all associations of its kind in the country. It has been ever ready to lead the way among associations of its kind when there was work of empirical nature to be accomplished. It has found some of its attempts in this line barren of results, and again has met with far greater success than anticipated. In harness racing in particular, Hamline has come to be synonymous with the highest class trotting and pacing races outside of the Grand Circuit.—Horseman.

LAST BIG ROUND-UP.

Stockmen all over eastern Oregon are interested in the last big round-up of wild horses in the United States which will take place in Douglas county, Washington, April 26 and 27.

There are between 15,000 and 20,000 wild horses to catch, and about 400 cowboys and about twice as many persons from different parts of the State will participate in the round-up. A party from Tacoma, headed by John A. Parker and Newton H. Peer, will take part in the sport.

"There is a section of country located in Douglas county and bordered on the east by Moses lake, on the west by the Columbia river and on the south by Crab creek and on the north by the Great Northern railroad, in which there are something like 18,000 wild horses," said Mr. Parker to the Oregon Daily Journal. "The area of this tract is about 40 miles square, containing over 1,000,000 acres of land that is principally sage brush, with here and there low-lying sand hills. The horses are of the class known as mustang ponies. They have been put in that country during the past thirty years by horsemen from all portions of the West, who wanted range for their herds.

"The round-up will start from Euphrata, and take a course to the eastward, circling around Moses lake. The line of horsemen will there gradually spread out, proceeding southward to Crab creek. When the line of cowboys has been stretched from Euphrata to the creek it will begin to advance across the country to the Columbia river. Immense corrals will be prepared in the vicinity of Euphrata, into which the ponies will be driven.

"Many of the horses are branded with the marks of their owners, but there are thousands and thousands representing the natural increase of the herds that have not been branded and are as wild as horses ever get. These unbranded ones will be divided among the members of the expedition."

IN THE FUTURE.

That the near future will furnish a class of trotters and pacers infinitely superior to any that have thus far been seen is indicated by the number of superior race mares which have been retired to the stud and mated with stallions of extraordinary merit, writes "Hawley" in the Stock Farm. There have been during the past two or three years at least a dozen mares retired to the breeding ranks who were not only very fast, extremely well gaited, but excellent individuals, and from among these there must surely come greater results than have ever been attained in the past. As an example, the roan mare Hawthorne, one of the fastest and gamest trotters of recent years, has been retired and mated with McKinney, and the result is not unlikely to be a trotter of more than ordinary capacity. Several of the very fast mares who have been active members of the stable of Mr. C. K. G. Billings have been mated with John A. McKerron, and as these mares are, many of them, extremely good individuals, faultlessly gaited, and possessed of extreme speed, it is reasonable to expect great things from their produce. It is from just such breeding as is represented by these mares, just such methods of mating as are represented in the cases of Hawthorne, Lucile, Lou Dillon and others that could be mentioned, that very great trotters will be produced, for these mares, or many of them, were not only tremendously high class when in active training, but are royal individuals and extremely well gaited. Haw-

thorne is one of the best looking mares I know of, having in addition to much substance, abundant quality, and the result of her mating with McKinney is very likely to be a tremendous success. If Lou Dillon has not been injured by the training which has been given her and by the fast miles she has trotted, she is almost sure to produce some day a very high-class trotter, not because she is the world's champion, but because of her temperament, her conformation, the purity of her gait, and the tremendous dynamic force she possesses. The success of Nancy Hanks as a brood mare indicates very clearly that great trotting mares or royal breeding can be depended upon to produce great results, always provided that when in training they were not overdone. Nancy Hanks is the dam of one of the fastest, if not the very fastest, trotter the world has ever seen in Admiral Dewey, and while it may be too much to say that the stallion has the wonderful flight of speed possessed by Lou Dillon, there are many men who have reason to believe that he is very little her inferior in this respect. Any mare of good conformation who is properly constructed anatomically, whose speed is natural and of a very high order, and whose breeding justifies the belief that her speed is the result of heredity and not an accident, will, all else being equal, produce a higher type of trotter than a mare of little or no speed, who is an inferior individual and lacking in nervous energy. If this were not true, breeding would not be a scientific problem, for surely a trotting mare who has something to transmit and who comes honestly by her speed is more likely to give to her offspring the qualities so essential in a great trotter than one lacking in every respect. For while it is true that the foal is likely to inherit from a remote ancestor, he is also likely to inherit the deficiencies of his own dam, consequently, the more good qualities possessed by a brood mare the more likely she is to produce great results.

THE CRAZE FOR SPEED.

It is not the intention of the writer to discuss with any degree or particularity the curious, if not edifying mania of the automobile people to place the motor car in the projectile, rather than in the vehicle class, although the recent races in Florida, when two miles were made in less than one minute, might well be provocative of comment with the inevitable resultant suggestion that the brain colleges of the country have not yet come into their full inheritance. On the contrary, I would point out that the automobile people are not the only pebbles on the speed-mania beach. A fairly large percentage of the horse owners and horse breeders are possessed with the idea that speed is the first and only requisite in a horse. One large breeding establishment has announced that it will mate only mares and stallions that have accepted records of 2:10 or better. Other breeders are proceeding along the same lines, and the buyers are even more desirous of getting speed. Of course it can and will be urged that the breeder is not to blame, as he must produce what is demanded by the dealers, and the dealers can only dispose of what the buyers want. But there is something to be said in opposition to this apparently logical argument. The breeder who goes in for speed as the sole requisite of the useful and fashionable horse will eventually find that he has overreached himself. The horse cannot hope to compete with the motor car in the matter of swiftness, and besides there is really little opportunity off of a race track or speedway to send a horse faster than three minutes. Indeed for all practical purposes in cities the nag that can travel eight miles an hour and keep it up all day is a far better animal than one that can go at 2:10. Where in any city can a horse be driven as fast as twenty miles an hour without a violation of the law? Of course better time than this is frequently made on the boulevards, but even then it is not only hazardous to the public and the driver, but is wearing on the horse.

The demand for high speed in carriage horses is especially unreasonable. No family carriage for town use can safely traverse the streets at a faster gait than ten miles an hour, even on the less crowded thoroughfares and in the parks, and few women care to travel faster than that. Yet in selecting carriage pairs, the average buyer insists that they have the ability to show better than three minutes. To be sure, speed is a desirable attribute, and it may prove extremely valuable in an emergency, such as catching a train or fetching a doctor, but such emergencies are rare, and in seeking speed as the sine qua non the buyer frequently overlooks or condones structural faults that would instantly condemn a horse with less ground-covering capacity.

Veterinary surgeons of the writer's acquaintance, men who know and esteem and appreciate a horse of quality, and are scrupulously careful to have what they regard as the best types in their stables, pay little attention to the matter of speed when selecting a horse for their own use.

"I don't know how fast she can trot," said one who recently purchased a standard mare that was bred in the purple, "and I don't expect to find out. I never have occasion to drive faster than a four-minute gait in the city, or even in the country, and it would not be safe to exceed that in any event. What a man wants is not a horse that can sprint, but one that is sound and handsome and has the staying qualities. I have no doubt that this mare of mine could show a very pretty turn of speed, but I never expect to urge her, or even let her do her best. I have another in my stables that might have been a racer, and while I have had her I don't suppose she ever went faster than four minutes. The result is that while she is nearly fifteen years old she hasn't a blemish on her and I can drive her fifty miles in seven hours without tiring her. Speed is all right, but endurance, soundness and style are better."—Exchange.

EXIT THE HORSE.

A rather popular cry which has echoed down the years of late with about as much truth and actual coherence as most of the rancous modern cries possesses.

We have heard it when the railroad and the steamboat superseded the equine for traveling purposes. We heard it still louder when the surface car in cities replaced the old lumbering omnibuses and the bicycle swooped down in the exact inverse ratio of a rocket, and sputtered out along similar lines. We now hear it again at the advent of the automobile, and the yell from the airship contingent is already shaping at the base of their throats.

As a matter of fact the horse is still pre-eminent, and, apparently, is likely to so continue. Taking the government reports of the United States, in 1905 the equine census gave 17,057,702 horses in the country, as contrasted with 14,213,337 in 1890, the increase being steadily demonstrated year by year.

These figures are not properly appreciated until one looks round a city like New York, makes a mental calculation of the horses withdrawn when power succeeded the horses on the surface car, and in the many freight wagons, omnibuses, etc. This item alone is estimated to amount to 15,000 horses displaced in this one city. Multiply it by the figure representing all other cities, and, grasping this, again look at the steady increase in the number of horses in this country, and realize that "Exit the Horse" is still farther away than it was ten or even twenty years ago.

Of course the auto has not yet reached its full antagonism, it has yet to be produced at a popular price, with many other changes, and there is little doubt that its use will be multiplied many times over. Step by step with its development will come the ever increasing army of the horse, not only of utility, but of pleasure, for today there are over ten thousand high-class horses for pleasure maintained in New York alone, with hundreds yearly joining the band.

The horse demand is far greater than the supply; prices are sky high, the export price being now averaged at \$308.99, as against \$174.50 in 1892. It should be remembered that the horse ownership of Canada, pro rata to the population, is nearly double that of the United States, and here is where there is a tremendous field yet to be filled and grown up to in this country. Recent sales of general utility horses show phenomenal prices for all types of horses, and, when a European power wants remounts, there is no other country in the world to turn to for a supply but the United States. No other country has the area, or the raw material, to supply more than a single emergency army corps.

Thus the cry of "Exit the Horse" may be left to the sensationalists, who would use it at stated intervals even though the above facts were burned into their brain, and staring them in the eye. Truth, fact, common sense, or the self respect which should clothe the utterances of a writer or an editor, have no place in the modern sensational newspaper office, but fortunately that type of journal has cried "wolf" so often not the slightest attention is paid it, except by those more ignorant still. These, by slow process, become educated in due course.—Sports of the Times.

DRIVING CLUB FOR PASADENA.

Pasadena is to have a driving club if the efforts of C. H. King and others are successful. The plan is to organize a gentlemen's driving club in which the owners shall be the drivers and if the organization is successfully launched it will probably promote numerous good natured speed brushes between the best horses of Pasadena.

It is even possible that an effort will be made to have some street like South Orange Grove avenue set apart for speed contests, if there should not be too much objection. Of course, it would not be the desire to have any thoroughfare closed for any length of time but it is often the case in the East that a well macadamized roadway will be placed at the disposal of the owners of fast roadsters for a couple of hours, some afternoon in the week, for tryouts.

Mr. King has been busy for some short time in getting the names of those who own fine horses and in enlisting their support for the proposed driving club. While the list has not been announced, it is understood that quite a large number of people have signified their intention to become members of the organization, in case the club is started.—Pasadena Star.

AGAIN CHANGES OWNERSHIP.

The Valensin Farm, near Pleasanton, has again changed hands, Mr. Frank H. Jermyn, who recently purchased it from James Butler of New York, selling it to W. A. Donahue, the well known attorney of Pleasanton. Mr. Jermyn purchased the place but a few months ago and had begun many improvements, including the remodeling and building an addition to the residence, re-flooring the stalls, building new and repairing old fences, etc., and in fact intended making it an ideal country residence. The death of Mr. Jermyn's mother in New York a few weeks ago changed his plans, and when he offered the place to Mr. Donahue the latter accepted without hesitation, and no one knows the value of property in and about Pleasanton better than he. A portion of the land will be rented to the growers of sugar beets, but the track and several paddocks will be retained for the use of horsemen. The stalls are splendidly constructed and in fine order. Millard Sanders now has about twenty young Sidney Dillons there, but will go East with them about May 1st. Mr. Donahue paid Mr. Jermyn \$31,000 for the property, the same price Mr. J. paid for it.

THOROUGHBRED DEPARTMENT.

By RALPH H. TOZER.

The long racing season is fast nearing its finish, and there will be a scattering of the forces to the north and east. Petalumas two weeks' session follows on the heels of the Emeryville meet, and June 16th a meeting begins in Seattle, which is to run to September 1st. Denver will have some good racing, beginning late in June, and a hundred or more horses now engaged here will take part in the running at the Colorado metropolis. Montana has a goodly circuit with "mixed meetings" the attraction. The long meeting across the bay has been fraught with sad recollections for form-players. There have been many instances of Biblical running that the daily papers might have chronicled, as well as more zig-zaggy running than was credited to the runners at Iron Hill or Alexander Island in the palmy days of the turf buccaneers. Finally, the clamor grew so strong that the stewards decided to refuse the entries of the two champion Z-cutters, Ralbert and Briers, but it was not until these horses, by their in-and-out running, had disgusted everyone knowing anything of "form." The action was certainly long delayed, and the stewards ought to have taken similar action in many other cases of inconsistent racing that might have been mentioned. Of late, since the track has been labeled "fast" or "good" by the racing experts, there has been some show of "true form," hence it can be inferred that track conditions had much to do with the queer showing made by many racers hereabouts. However, most race-goers are convinced that the stewards were entirely too lenient and less lynx-eyed than they ought to be if racing is to be kept clean and forceful; in short, there should be a reorganization of the board without delay, and men placed thereon who can distinguish "true form" from rank "in-and-out running" and not allow more than one case of Biblical galloping to pass before they let fall the official axe.

It is claimed by "Boots" Durnell's friends that he has been made the victim of the fury of a discharged employe, and that there was nothing irregular in the plating of the gallopers of the young Kentucky turfman. One thing is certain, and that is the Durnell horses ran more consistently and well than those of almost any man racing in California, if, indeed, he did not excel all others in the line of consistency. This should be the principal matter for the stewards to weigh when they are meting out justice, and the testimony of a discharged employe should not carry much weight in a case of this sort, especially if it be shown that he bet heavily when the horses lost and practically nothing when they won, as seems to be the case with Durnell, who was declared by the Ascot stewards in the first trial, not guilty of the charges against the showing of Alderman Batt and New Mown Hay. The decision ruling Durnell off for life by the stewards of the Pacific Jockey Club must have come like lightning out of a clear sky, so confident of setting himself right and being thoroughly exonerated was the trainer of the Gates horses. By the way, speaking of Mr. Gates reminds me that he thinks much of Durnell, and that he will stand idly by and not retaliate in some manner is not said to be like the iron-willed multimillionaire of the past.

Barney Schreiber leaves for the Memphis meeting this evening much lighter of heart and heavier of bank account than when he came to California last November. He left with the satisfaction of having bred and sent to the post the champion two-year-old of the season in Horace E. and by many thought to be the champion three-year-old, Dr. Gardner, winner of his last eight races. In money-winnings the Schreiber horses have overtopped their nearest rivals by more than fifty per cent, which is additional cause for congratulation, aside from the joys that the "yellow boys" bring to their possessor. In his booking operations Schreiber is also reported "to the good," and altogether the outlook is a most cheerful one for Missouri's big breeder who beneath his broad black hat has more than a fair share of gray matter as well as a winning smile and an overwhelming desire to "josh."

The Himyar stallion Himself will spend the summer in a grassy paddock at E. S. Paddock's farm, Concord, Contra Costa county, Cal. Mr. P. will mate him with four good mares of which he is the possessor, and in all likelihood will like the horse so much that he will desire to be more than a lessee.

Robinson now heads the jockeys' list at Emeryville, and has a great following these days.

A telegram from the East states it is believed Jockey Eugene Hildebrand has eloped with Mrs. May Yeager, wife of the famous "plunger."

Superintendent George Berry of Napa Stock Farm writes that nearly all his mares have been mated and are considered safely in foal to the farm's good sires.

According to a dispatch from London last Wednesday, August Belmont of New York purchased the stallion Rock Sand of Sir J. Miller for \$125,000. This is the second largest price ever paid for a thorough-

bred by an American, W. O'B. Macdonough heading the list with \$150,000 for Ormonde. Rock Sand won the triple crown of 1903 in England (the Derby, 2000 Guineas, and St. Leger), and besides annexed The Jockey Club Stakes and other rich stakes, his winnings footing up \$237,590, and making him third on the list of money-winners in all turf history, Singlass (\$280,675) and Donovan (\$278,770) alone eclipsing Rock Sand's record in this respect. He is a fine looking big horse, according to the pictures I have of him, a brown in color and by Sainfoin (winner of the Derby) out of Roguebrune, by the unbeaten St. Simon. He stood at the Hamilton Stud Farm, Newmarket, and as the greatest turf celebrity of the past eight or ten years, should prove worth the price paid, large as it is. Rock Sand's stud fee was 200 guineas, and his book was full at that figure.

Prince Andre Poniatowski, who as president of the San Francisco Jockey Club did as much as any one man to elevate the standard of racing in California, and who bred some very good winners, including The Fog and The Mist, is back in America after two or three years' absence in France, where he is a banker connected with the August Belmont institution of New York.

Memphis, Tenn., April 11.—The biggest deal of the present turf season was completed to-day, when John W. May, acting for Paul Rainey, the Ohio owner of anathracite interests, completed negotiations for the purchase of Jockey Herman Radtke's contract and the colt Horace E., the latter the property of Barney Schreiber of St. Louis, breeder and bookmaker. Twenty-five thousand dollars was the price paid by May to J. O. and J. H. Keene for Radtke's contract. Horace E. brought \$17,500. Radtke will ride the Rainey candidate for the Carter Handicap at Aqueduct next Monday. Horace E. proved the king pin among California two-year-olds, winning six of eight starts, including several stakes and purses amounting to \$8850. Mr. Rainey owned the great colt Yankee Consul that died at Lexington, Ky., last fall, after proving to be a speed marvel.

It is claimed that in Joe Carey (by Bannockburn-Miss Marion) and Jack Atkin (by imp. Sain-El Salado) Schreiber has two colts superior to Horace E.

Imp. Sain heads the "winning stallions" list of 1906 thus far, with over \$23,000 to his credit. He will finish close to the top this season. Bannockburn's get have won over \$17,000.

Jockeys Kunz and Rice were last Wednesday suspended at Emeryville for the balance of the season, though Rice will be allowed to ride the horses of Wm. Eagan, his employer. The stewards did not like Kunz's showing on Critical and Sir Edward or Rice's riding of Hector, when he was beaten by Boloman, Lisario and Elevation. In the case of Kunz it looks as if the stewards acted rather hastily, for it was Critical's first start on a dry track and Sir Edward had up a lot of weight and was running against a couple of speed marvels.

BIG POLO TOURNAMENT.

Coronado, April 10.—Great enthusiasm has been developed over the successful polo games that were recently played on the field of the Coronado Country Club that the club is to have the honor of presenting for competition the most valuable polo trophy that has ever been presented anywhere. To William Clayton, president of the club, belongs the credit of securing the trophy, the competition for which is to be international in character.

The cup is to cost \$2500—and the competition for this handsome prize will be held on the tournament field of the Coronado Country Club. Beyond this, no details have been made, not even the name of the cup having been decided, but the order has been placed.

In deference to the wishes of F. J. Carolan and other poloists of California, the conditions governing the competition for the trophy will not be framed until the arrival of F. J. Mackey from England late this month. Mr. Mackey is justly considered the father of international polo, and as he is in touch with the game in Europe his advice will be invaluable. He has brought several teams from England which have competed on the fields at Burlingame and in Southern California.

The attention of the world's poloists will be attracted to California next winter. In addition to the practice and tournament field of Coronado there will be four fields in San Mateo county, several more in Southern California, and a new field in Golden Gate Park, San Francisco. A schedule of handicap and match games will be prepared and sent to the polo clubs in this country and Europe. It is expected that George J. Gould, of Lakewood, N. J., and other eastern polo enthusiasts, who have been promising to come West for several years, will come. Honolulu has also promised a team for the competition.

First in importance, of course, will be the big tournament to be held on the Coronado field. The recent tournament was acknowledged to be the most successful ever held on the Pacific Coast and one of the best that has ever been held in the United States. The coming tournament will be held during the first week of September.

The prizes to be offered at the Coronado tournament have never been equaled in this country, at least, and it is doubtful if such a fine list of cups and trophies has ever been competed for at any polo tournament and polo racing meet. In addition to the new cup, there is also the magnificent John D. Spreckels' trophy, for polo teams, and the A. B. Spreckels' trophy for the racing ponies. Many other prizes and purses will be offered.

DUTIES OF STEWARDS AND STARTER.

At a meeting of the board of directors of the American Trotting Association, held at the office of the association in Chicago on Thursday, April 5, the following regulations were passed, under authority of the by-laws and ordered placed in force until the meeting of the Congress of the American Trotting Association in December, 1906:

Circuit and Board of Stewards.

"A regularly organized circuit shall be composed of not less than five nor more than fifteen associated tracks in membership with the National or American Trotting Association. It may annually recommend for appointment a number of persons from which five shall be appointed (three of which shall constitute a quorum), by the board of appeals, or president, pending the action of the board of appeals, to constitute a board of stewards whose powers and duties are defined in Rule 161, as follows:

"All decisions and rulings of the judges of any race and of the several associations and proprietors belonging to the American Trotting Association may be appealed to the board of appeals, or board of stewards of a regularly organized circuit, and shall be subject to review by the board appealed to, upon facts and questions involving the proper interpretation and application of these rules, provided that parties to be affected thereby shall be notified as the board shall direct, of a time and place where such appeal may be acted on; and provided further, if the appeal relate to the decision of a race, immediate notice shall have been given to the judges of the race of the intention to so appeal. Findings of a Board of Stewards shall be subject to appeal to the board of appeals so far as relates to points involving these rules."

Starter and His Duties.

"No person shall be permitted to start a race or a time performance on a track in membership with the American Trotting Association unless he holds a license from said association as starter.

"Upon sufficient information as to the good character, knowledge of trotting rules and ability to do the work, a license shall be issued by the board of appeals and in vacation by order of the president to a sufficient number of applicants to do the work.

"Said starter shall perform his duty according to rules and shall give information as to the rules to track officers and employees when called on, and always endeavor to have racing and time performances conducted according to rule and shall especially warn officials against misrepresentations of correct time, and in all cases where time is suppressed or any other material thing done in violation of the rules, report the same to the American Trotting Association with names of guilty parties and witnesses. Upon his failure or refusal to perform his duties his license shall be revoked by the president of the association.

"Time made in a race or a performance against time shall be a bar unless the starting shall have been done by a licensed starter.

"The starter shall be paid by the member for his services."

And Rule 53 of the American Trotting Association was amended so as to read:

"None but the judges of the race in question, the starter, the clerk of the course, or secretary, and three timers shall be allowed in the judges' stand during the pendency of a heat. Any association convicted of violating this rule shall be fined any sum, not to exceed \$100."

HAS A GOOD PROSPECT.

'Breeder and Sportsman: Presuming you are interested in promising prospects in the way of additions to the class of light harness youngsters, I write to tell you that I have one of the best bred fillies in California, now a little over two months old. She is entered in the Futurity Stake, and is a great prospect for that much coveted prize. Her sire is Montezol by McKinney 2:11¼; Montezol's dam is Igo by Antevolo 2:19; second dam Daisy May by Nutwood 2:18, the world's champion mare sire; third dam the Ralston mare by Abdallah 15; fourth dam by Lexington. The filly's dam is Marcelle, sire Fay Wilkes, he by Guy Wilkes 2:15, from Lady Fay by Anteeo; second dam by Alexander, sire of Alec Button 2:26, by Geo. M. Patchen Jr. Marcelle's dam, Mountain Hare by Young Venture; second dam Rose Clark by Nigger Baby, son of Lance by Eclipse; third dam daughter of imp. Trustee.

I believe in this filly we have all the best breeding in the trotting family, backed up by such great horses as Eclipse, Herod and Matchem, as you doubtless know the three latter mentioned animals are the foundation of the present great race horses.

It was with much regret that I heard of the great McKinney being purchased and sent East, but since seeing Montezol and several of his get, I am convinced that he, McKinney, has left behind him a most fit representative.

Enclosed please find my check for \$3 as my subscription for one year for your paper, which please send to my above address. Yours very truly,

MARTIN BURNELL.

FAIR DATES CLAIMED.

At the meeting of the North Pacific Fair Association held last week at Portland the following dates were agreed upon:

Seattle	Sept. 3 to 8
Salem	Sept. 10 to 15
North Yakima	Sept. 17 to 22
Spokane	Sept. 24 to 29
Walla Walla	Oct. 1 to 6
Lewiston	Oct. 8 to 13

Everett was given the privilege to select such dates as they may decide on.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

PHEASANT RAISING.

Pheasant raising on the small farms in the section tributary to Seattle and on the logged-off lands of the state is an idea which has suggested itself to Mr. Charles A. Kinnear, a Seattle attorney, as a means of largely increasing the incomes of struggling farmers and poultry breeders. Mr. Kinnear, being a lawyer, is fully aware that the construction which the wardens of the state put upon the game laws presenting the sale of such birds on the open market would, if carried out, prevent the introduction of this new industry in the state. As a lawyer, however, he contends that the game laws really do not make any provision against the sale of pheasants, grouse or kindred birds raised in captivity. In this, he declares, he has the support of the attorney general of the state, backed by the common law definition of "game" birds and the interpretation placed thereon in other states of the Union.

As showing the possibilities of the industry he points out that the value of the various plumage pheasants runs all the way from \$5 to \$28 per pair; that they are less difficult and no more expensive to raise than chickens, and that the market, both for the plumage and the flesh of the birds, is practically inexhaustible.

"I first had my attention drawn to this matter a few months ago," stated Mr. Kinnear, "by receiving from the East some literature on the subject of pheasant raising. I don't know how they got hold of my name, but that is not material. I got the literature, read through some of it, and became interested.

"I find that in Illinois, Indiana, New York and some of the other Eastern states the raising of pheasants, quail, grouse and other birds of that nature is becoming an important industry, and that many fortunes have been made in it, with the possibility for many more; and I wondered why it was not possible for the struggling poultry breeder in our own state, these small farmers over at Colby and Manchester and the western shores of the Sound, who are supporting a family and sending their children to school on the product of three and a half acres of land, to annex this new source of income.

"I have noted a few examples of the possibilities of the industry. Wallace Evans, a 19-year-old boy, residing in the suburbs of Chicago, now owns about 7609 of these English and other plumed pheasants, giving him the largest pheasantry in the world. It is only a few years since he started out with a single pair. The first year he had seventy-five birds, and the increase has been phenomenal. For his Lady Amherst pheasants he is getting \$28 a pair and cannot begin to supply the demand. Silver pheasants are bringing \$17 a pair, Golden \$15 to \$22, and Mongolian (or English) pheasants, \$5 to \$7 per pair. The latter variety is the most scarce in the woods and the best able to take care of itself. It also lays more eggs than any other.

"Ferd Sudow, a pheasant farmer of Poughkeepsie, N. Y., who is the second largest producer in the world, says he is two thousand birds and two thousand eggs behind his orders. He is selling his birds for \$19 a pair and offering \$19 a hatch for the eggs the first season.

"These birds are hardy and can be raised on the logged-off lands of the state, among the stumps and small trees. They are much better able to take care of themselves than chickens. They cost hardly as much to raise. While chicken meat sells for 15 cents, pheasant brings from \$1 to \$2 per pound. Chicken feathers sell for 25 cents a pound, while those of pheasants bring as much as 30 cents each feather for fly fish hook and millinery purposes. Amherst, Silver and Reeve pheasants bring as much as \$15 each for mounting purposes, and taxidermists handle all the available supply and clamor for more.

"To any one who has ever seen the various breeds of pheasants, it would be needless to dilate on their merits and the great beauty of their plumage. Ladies who think they are wearing bird-of-paradise feathers in their hats are really wearing pheasant plumes, while the plumage of the Hoochee pheasants resembles that of the ostrich. The pheasants are the turkeys of Asia, as the guineas are of Africa and the peacocks of Europe. They are all true turkeys.

"Now as to the legal phase of the matter. The crux of the question is, Are pheasants, grouse, quail and other like birds, raised in captivity, game birds? The state law refers to game birds, and to them only. Here is the definition of a 'game bird' from Bouvier's law dictionary, coincided in by Wharton:

"'Game,' applied to birds, is any bird fit for food taken from the wild by enfowling or hunting.' In this connection the law of various states holds that when the game pheasant is put into a coop that bird is still game; but its progeny, the hatch, raised in captivity, are domestic and may be sold in the market the same as may chickens.

"It is held that pheasants hatched by a hen are domestic (10 Cox C. C. 23; F. and F., 347; 1 F. and F., 350; L. R. I. C. C., 158).

"While in Olympia last week in connection with other matters I took this matter up with Attorney General Atkinson, and he gave it to me as his opinion—though not officially—that there is nothing in our state law relating to game birds to prohibit farmers, or anyone, from selling these pheasants and kindred birds hatched and raised in captivity. Notice that the law says, 'any grouse, any pheasant, any quail, found hanging in the market is prima facie evidence that the owner of that market has been guilty of a misdemeanor.' 'Prima facie,' however, means simply 'on its face,' leaving the matter open for proof that the birds are domestic.

"If the game wardens of the state insist that these birds, raised in captivity, are still game, they may, with equal reason, class horses and cattle as game animals and prevent their sale in the markets.

"Some of the wardens have suggested that a bill be introduced in the legislature empowering citizens to sell these birds raised in captivity, provided they paid a license and tagged the birds they sold. We contend, however, that there is no necessity of people's paying license to do what they have the right to do without such payment, which right is given them by the present law of the state.

"In Indiana, New York and Illinois, where the farmers have the right to sell these birds, raised in captivity, the game laws are as strict as ours, and as silent regarding the sale of domestic birds.

"The game wardens may say, 'Wait and give us a chance to get a start before making the game laws any harder of enforcement.' We believe, however, that there is much more game here now than there is in the states I have mentioned, where the people enjoy the privilege of hatching and rearing these birds in captivity, and at will placing the same for sale upon the open market.

"I believe this offers a promising field for the poultry raisers of this section, and from the wording of the law and from my conversation with the attorney general, the people undoubtedly have the right to engage in this business."

Tarpon Fishing.

Catching "race horses" with a rod and line, as one of our local anglers has dubbed tarpon fishing, is evidently a means of great sport to fishermen at Tampico, Mexico, judging from the following excerpts from the Monterey News of March 5th:

The tarpon fishermen are having good luck just now, one man having had twenty strikes yesterday, out of which, however, he only succeeded in landing one fish. Another fisherman was playing a good sized jack fish, which was displaying unusual energy, when a shark nearly cut the fish in two just below the gills. This occurred near Tamos about twenty miles from the sea, and shows that the sharks penetrate well up stream.

After a very successful fishing trip here, the party of tourists with Mr. A. Rice of New York left here this morning on their way to their northern homes. The special train left here at noon today for Tamos, where it will await the arrival of the steamer Bertha and the small boats containing the members of the party. At Tamos the party will board the train and continue on their way.

With about twenty fishing boats and outfits, the catches of the party are probably the largest ever recorded here. They all had extraordinary luck, and the conditions could not have been better. Doubtless the experience of the party here will result in bringing many more fishermen to these waters next winter.

Mr. Rice of New York was the host of the entire party, and it is safe to say that, seldom is such entertainment furnished. He chartered the river steamer Bertha and secured every available row boat and fishing outfit to be had for his guests.

In the matter of sending down Eastern sportsmen to this country for their winter fishing, Mr. Rice might be called the patron saint of Tampico. He secured the space in the New York Sportsmen's Show for Tampico, and has personally been responsible for the coming here of many a fisherman. Many of the fish caught here by him and his party will be stuffed and sent to the United States, where they will make excellent ornaments for dining rooms, smoking rooms and so on.

A party of people from Chicago arrived at Tampico three weeks ago to remain a few days fishing for tarpon. They will then proceed to Mexico City and other places of interest in the republic. The party consists of seven persons, all prominent in the Chicago business world, and among whom are H. H. Mallory and wife and E. H. Brown. Among the expert tarpon anglers who are there at present is Mr. F. T. Middleton of England. He is an enthusiast and expects to remain at Tampico for some little time. The tarpon fishing is now at its best in those waters. The size of the fish is also running upward, and every fisherman hopes to break the record of seven feet and three inches, established last year. Daniel Heaton of Wichita, Kas., who has been spending several weeks there tarpon fishing, will return by steamer to Galveston next week. This is his first trip to those waters after tarpon, and he is highly pleased and expresses the intention of returning next season. Mr. Heaton, in company with W. A. Jones of Chicago, who has also been at Tampico for some time, have fished for tarpon at all of the other resorts together, and they are unanimous in stating that Tampico offers by far the best sport and facilities.

SAN FRANCISCO FLY-CASTING CLUB.

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage (b) delicacy percentage; (c) net percentage. Event 4—Lure casting percentage.

The fractions in lure casting are 15ths.

Fish and Game Protection.

The Auburn Fish and Game Club was instituted about fourteen years ago by Deputy State Fish and Game Commissioner L. H. Joninon, Andrew Hartzel, now a prominent member of the Sacramento County Fish and Game Protective Association, and J. H. Willis. It has at present about twenty-five active members and is doing good work in enforcing the laws for the preservation of fish and game.

During its existence about 100,000 trout have been planted in Auburn Ravine, Willow, Clipper and Dry Creeks, as well as 3,000 black bass. Thirteen pheasants were also liberated on the C. F. Reed ranch ten years ago, but for some reason did not propagate successfully. This work has been done by the club at its own expense in the main.

New Southern California Gun Club.

Sportsmen in the citrus belt seem inclined to take full advantage of the limited opportunities still open for the acquiring of shooting ground. Possibly, hailing from Los Angeles and vicinity, there can be counted some fifty gun clubs at present.

Among the clubs already established can be found club quarters palatial in comfort and fitting up and as for convenience of location, there is probably nothing like it in the United States. A member can leave Los Angeles on an electric car and in an hour or two of comfortable riding he is landed at the club house door.

Apparently not satisfied with the number of gun clubs now in existence in that city and vicinity, a new one is in process of formation and will be ready for business in a few weeks, or as soon as the preliminaries are arranged. Naturally, there will not be much shooting over the new grounds this year, but everything will be in readiness by the time the ducks begin to fly next fall.

No name has been agreed upon for the new organization as yet, but names are unimportant things anyway. The grounds cover a good-sized territory, for there are no less than 287 acres in the piece and the location is next to the Newport and Pacific Gun clubs, about two miles southeast of Huntington Beach. About 150 acres of the land is marsh, which promises good duck and snipe ground and the dozen men who will make up the membership list are anticipating good sport when they are ready for it.

E. W. Murphy is president and some of the other sportsmen who are interested with him in the venture are J. A. Anderson, Bernard Potter and W. H. Anderson. They have paid something over \$150 per acre for the land and this indicates that they have sufficient capital to carry their plans to completion. They will erect a big clubhouse this summer and intend to have it fitted with every appointment for the convenience of the members.

Reno Getting Into Line.

The sportsmen of Reno and vicinity are aroused to the necessity of immediate action for the protection of fish and the perpetuation of the sport of angling in the Truckee River with the result that a Fish and Game Protective Association that is intended to cover the entire western section of Nevada is being projected by sportsmen of that city. The Association will have a local membership of 500 in Reno, and the towns of Sparks, Verdi, Carson and Virginia will be asked to form similar organizations. The object of the association will be to guard the mountain streams to prevent fishing out of season, to stop the use of grab hooks and seines and to secure the passage of laws preventing the sale of fish to the markets. It is claimed that unless this is done the native fish will soon be exterminated.

CLUB FISHING PRESERVES.

The recent purchase by the San Francisco Fly Casting Club of land along both banks of the Truckee river and the contemplated location of a fishing preserve on Waddell creek by the California Anglers' Association has evoked from the press of Truckee and Santa Cruz criticisms of rather a peppery flavor. The Truckee Republican has taken, after reflection, a sensible view of the matter. The Santa Cruz papers have apparently aroused the whole community of that section against the proposed action of the California Anglers' Association. The Santa Cruz Surf calls it "Exasperating Impudence of the Amalgamated Organization of Game Hogs" and alludes in no unmeasured terms to "the gradual closing of the fishing waters of the state, despite the fact that the Federal and State governments have been for thirty years stocking the streams and the bays with game fishes, at public expense, for the benefit of the public at large."

All this is very fine, in a way, but in the event of a club, or an individual, acquiring title or lease to ground where shooting or fishing may be indulged in, the owner or lessee has the legal right to enforce the law against trespassers and enjoy all of the rights he is entitled to, either under lease or complete ownership.

We sympathize with the "movement" of those interested in keeping Santa Cruz county open, but the rather caustic arguments appearing in the pages of the press of that section, we do not believe, are conducive to an amicable settlement of the questions involved.

It is true, that for the benefit of the county at large it would be far better, and in fact for sportsmen at large a boon, if the 32 trout streams—and the good hunting territory as well—were open to all and open under conservative and reasonable ordinances that would be satisfactory to all fair minded devotees of rod and gun, and for fish and game protection as well.

The sentiment of the majority of the Santa Cruz sportsmen is one of fairness to every interest involved. The recent institution of the successful Brookdale hatchery and its enthusiastic support is a strong evidence of that spirit.

Instead of kicking up a row through the medium of revolutionary articles, we would suggest, in all candor, to the oceanside scribes, whom we know are royal good fellows at heart, an argument devoid of harshness and calling names.

The Truckeites were red-hot in the beginning, about as choleric as the Santa Cruzans are now. In publishing an open letter from Mr. Thos. C. Kierulff, the editor of the Republican very gracefully and with practical common sense gave the following excellent advice to those most interested:

"In another column of the Republican is a letter written for the readers of this paper, composed by the secretary of the San Francisco Fly-Casting Club. This communication voices the sentiment of the club pertaining to the rumor which was going the rounds here to the effect that they would not allow anglers, not members of their club, to fish in that part of the river which flows through their tract of land. The letter plainly indicates that the Fly-Casting Club are not looking for dissension, but to the contrary, they want to join hands with the local association for the purpose of enforcing the laws that protect trout fishing in general. The communication conveys a very friendly spirit toward local fishermen, and in strong language condemns the law breaker. It is well for Truckee people to be somewhat far-sighted and welcome strangers with an open hand instead of asserting 'homestead rights' with prominent knuckles.

"About three weeks ago quite a sentiment was going the rounds here pertaining to certain restrictions that the San Francisco Fly-Casting Club intended to enforce when they took possession of a strip of land that they purchased last winter from Dr. Zimmer. This land was purchased for the purpose of creating a reserve for the San Francisco club. While this fish question was being argued pro and con among local anglers the Republican published an article which set forth the feeling of the Truckee fishermen toward the San Francisco association upon learning, what they supposed was a fact, of the exclusion from that part of the river of all people not members of their club. The article in the Republican voiced the sentiment of the people residing in this vicinity and the bit of news reached the club headquarters. The secretary of the association, Mr. T. C. Kierulff, sent the following communication to the Republican in answer to the article which appeared in its columns on March 7:

"Editor Republican:—In the issue of your paper of March 7th, 1906, is an article headed 'Truckee Fishermen Opposed to Fly-Casters' Association Monopolizing Certain Sections of River,' and a statement that a meeting of the Truckee River Fish and Game Protective Association will be called to protest against such a move, etc.

"My attention was particularly called to this article on account of the many mis-statements contained in the same. The San Francisco Fly-Casting Club was organized in 1893, and among the objects of the club are to cultivate the art of scientific angling, to assist in the protection of fish in California waters and to promote a true and sportsmanlike spirit among anglers in the catching of fish.

"The club has lately acquired the property known as the Zimmer property, lying between Martis and Prosser creeks and controls both sides of the Truckee river for a distance of about one mile. It proposes to erect a substantial club house upon its property to accommodate the members of the club, their families and friends.

"In the article in your paper the Truckee River Fish and Game Protective Association seems to be bitterly opposed to the acquisition of this property by the club or to the acquisition of any property by any

person or club, which would in any way curtail the fishing privileges heretofore enjoyed, and in many instances abused, by those who own no portion of the Truckee river and perhaps never paid a dollar in taxes for the benefit of the county of Nevada, or the state of California.

"Since when has it been impossible for any person or association to acquire land and water in Nevada county? No judicial decision is necessary at this late day to determine the rights one may have in, or on, his property, or that the right of the San Francisco Fly-Casting Club to the use of the land and river now owned by it, to the exclusion of any person, is as inviolate as is the right of a single individual, whether poor or rich, to own a home and to exclude all persons from it. I only mention this on account of the statement in your article that the Truckee River Fish and Game Protective Association are up in arms and are determined that no one shall take away from them the Truckee river, and that some of them have declared they will throw all the guards in the river if molested while fishing. This does not speak very well for the Truckee River association. Privileges are not granted by threats of force and violence.

"For a long time certain well known anglers and members of the San Francisco Fly Casting Club have endeavored to cause the enactment of laws to better the conditions of the streams of California and the Truckee river in particular, to abate all nuisances along the streams and rivers which interfere with or destroy the fish. I have not noted any action on the part of the Truckee River Association, or any one else in your locality, taken to protect the Truckee river fish, to enforce the laws relating to fish ladders or the dumping of refuse in the stream or in any way to improve the condition of the Truckee river.

"To the contrary I have noted with much concern that unless steps were taken by some person or association to preserve the waters of the Truckee river, or portions of it, within a few years there would be no fishing in this once famous river, and much of this is due entirely to the local fishermen and because many of them fish not for sport of fishing, nor for the keen pleasure of casting a fly upon the water with the constant hope of a strike that means a large fish and a game fight against light tackle, but who fish for a full creel without respect to size or method of fishing and whose only regard is quantity and to whom all fish are money.

"Men who fish for the market, who fish with bait and at night, and in many instances fish before the season opens and before the fish are through spawning will have no privileges from the San Francisco Fly-Casting Club.

"In the issue of the Truckee Republican of March 10th is a statement to the effect that many anglers can now be seen trodding along the banks of the river, casting their lines in the waters presumably for white fish, and in the same article the Truckee River Fish and Game Protective Association is called upon to redeem itself by causing the enforcement of the law prohibiting the catching of trout before the first of April.

"Let the Truckee River Association join hands with us in an effort to extend the closed season to the first of May hereafter, when the fish are through spawning, and see that the law is made effective, stop all bait, night and market fishing, and I am sure the man or woman who wishes to cast a fly upon any portion of the Truckee River will have no cause to complain of any restrictions that are imposed by the San Francisco Fly Casting Club over its preserve. Yours truly, T. C. KIERULFF, Secretary."

There is lots of good medicine in the foregoing that may be taken inwardly and digested and with benefit to any pessimistic angler or scribe in need of a spring tonic.

THE LOST FISH.

[Dedicated to George Walker.]

Strolling alone by the Paper Mill,
Enjoying the evening breeze,
I saw a fisher play a fish
Under the willow trees.
I knew not what he was playing,
But he lost it I could see;
And his voice broke the hush of twilight
With the sound of a big, big D.

It fell with deliberate slowness,
With a touch of infinite grief;
He rattled it off like a volley,
But it brought him no relief.
I felt for his loss sincerely,
And his rod was broken in twain;
I proffered some good Hayden spirit.
'Twas not offered in vain.

It soothed his ruffled feelings,
He dried up the welling tears.
'I saw it,' he sighed, 'I saw it,
I shall see it in coming years.
I have sought all my life, but vainly,
One monster trout to take.
Hard fate! In the moment of triumph,
My rod (and my heart) should break.'

It may be that he believed it;
It may be he was bereft
Of a trout that weighed full twenty pounds.
(He said so before he left).
It may be he'll hook another,
The largest are lost away:
It may be that beyond Jordan
He'll catch that trout some day.

—C. H. B.

Strike—if they don't give you Jackson's Napa Soda when you ask for it.

TO PROTECT BLACK BASS.

What is said concerning the depletion of the striped bass will in a short time be repeated in reference to the black bass. This latter game fish thrives splendidly in the Sacramento and Yolo basin waters. Bass weighing over ten pounds are frequently caught by anglers.

The plenitude of black bass in those waters has attracted the attention of the net fishermen, and these latter gentry are after the fish for keeps, as they have been and are after the striped bass.

Both varieties of these game fish are shipped, in large quantities, daily in cold storage to many points on the Coast, to eastern, middle west and southern cities. Striped bass and possibly black bass are sent across the continent in refrigerator cars, transferred to cold storage compartments in ocean liners and taken across the Atlantic to European ports.

With this unlawful and persistent draft on the resources of our waters, no matter how prolific, final extermination of two valuable food fishes is but a short way off.

The conditions up the river under which black bass are being hauled from the river in wholesale quantities and in violation of the statutes, have prompted energetic action by many public-spirited citizens near the zone of fish depletion.

The anglers of Sacramento have decided to declare war against the Greek and Italian fishermen who come in their fishing smacks from San Francisco on forays against the black bass in the sloughs around Rio Vista, and to effect this they have decided to form a Black Bass Association, with headquarters in the Capital City. The association will have a membership of 1000 to start with, and will include the farmers and ranch hands all along the Sacramento river, from Rio Vista to Colusa. Each member of the association will be pledged to give testimony in the courts against any violation of the state fishery laws which may come under his observation, and to protect and stand by any other member of the association who may be called on to testify in case he be threatened by the fishermen—a method of coercion in vogue with these foreign fish cormorants.

The intention of the association is to establish a thorough system of espionage over the inland waters that will prevent a wholesale killing and extermination of black bass by means of the net. Such cases will be followed by a severe prosecution in the courts of all violators of the law. This step is necessitated through the fact that the penalty now outlined by the law is but little detriment to the fishermen, namely, a fine of \$200, as last year fishermen who were convicted of taking black bass with a net and fined \$200, openly boasted that they took \$400 worth of black bass the day following the imposition of the fine.

The new association has learned of instances where 1800 pounds of black bass have been taken in one drag of a 1500-foot net, and has also learned that the fishermen puncture the mouths of the bass with an awl to represent a hook wound. As the fish command 25 cents a pound in the market, they can afford a \$200 fine and then make good money. The system of surveillance now being established will be absolute. Every violation of the fish laws will be immediately reported to the executive committee, who will notify the State Fish Commission and the violators will be prosecuted (?) to the full extent of the law. Game Warden George Neal of Sacramento county is thoroughly in sympathy with the movement, and claims that it will make the waters of the Sacramento river an anglers' paradise within three years. He states that if the kind of fishing that now exists in the Big Lake country, south of that city, were known in the East hundreds of wealthy tourists who enjoy the sport would come here from all the large Eastern cities on fishing trips.

Committees have been appointed on membership and by-laws, and a mass meeting is to be held in Sacramento a week hence, when full arrangements will be completed.

Santa Cruz Declares Closed Ports.

A press dispatch during the week states that in Santa Cruz County, a movement looking to the abolition of private fishing grounds on the streams of the county was started when Dr. C. W. Hibbard, representing the Southern Pacific Company; W. W. Richards of San Francisco, and representatives of the local Board of Trade appeared before the Santa Cruz Supervisors and asked their support to that end. Strong speeches were made in favor of keeping the streams open to the public, especially since the county and Southern Pacific Company have expended thousands of dollars on the Brookdale fish hatchery, which has stocked the streams with fish as never before. The Supervisors passed a resolution in favor of the movement and the Board of Trade and game protectionists of the county will at once start petitions pledging the property owners not to lease fishing privileges.

If it is believed that it is to the best interests of all concerned to keep the county open and discourage the establishment of private or club preserves, the methods above stated will be far more conducive to the general satisfaction of all concerned than revolutionary tactics and calling names. In fact this is about the only solution of the question—a unification of action for the general good of the county.

Shooting Song Birds.

Pasadena, Cal., April 2.—Song birds about Pasadena are being shot in great numbers, especially by Japanese, who kill them for food with noiseless blowguns. The local Audubon Society will have warning notices printed in Japanese and circulated so that no Jap may plead ignorance of the protective laws if arrests are necessary to protect the songsters. District game wardens are keeping watch on men and boys from Los Angeles who shoot about this city.

AT THE TRAPS.

The Union Gun Club regular monthly shoot is the blue rock event for Ingleside tomorrow.

The 19th semi-annual tournament of the Los Angeles Gun Club will be held today and tomorrow on the Sherman grounds.

All events are open races save the medal and trophy contests for which only resident shooters of Southern California are eligible. They are:

Two men team championship—For Los Angeles Gun Club's "E. C." Smokeless Powder Co. cup, 25 birds a man, entrance \$2 a team, birds extra. Cup to be contested for at the semi-annual tournaments of the Los Angeles Gun Club. Same conditions to govern. Entrance money, less price of birds, goes to holders of trophy. Trophy goes to team making highest score. Second team, entrance money back, less price of birds.

Five men team championship—For Los Angeles Gun Club's trophy, 25 birds each; entrance \$7.50 a team, birds included. Trophy to be contested for at the semi-annual tournaments of the Los Angeles Gun Club. Same conditions to govern. Entrance money, less price of birds, goes to holders of trophy. Trophy goes to team making highest score.

Individual championship—For Los Angeles Gun Club's diamond medal, 50 birds each; entrance \$1.00, birds extra. Medal to be contested for at the semi-annual tournaments of the Los Angeles Gun Club. Same conditions to govern. Entrance money, less price of birds, goes to holder of medal. Medal goes to shooter making highest score. Shooter making second highest score \$2.50.

Tuft-Lyon Arms Co. challenge medal—Fifty birds each; entrance \$1.00, birds extra. Medal goes to shooter making highest score. Medal subject to challenge under original conditions. Medal subject to competition at any regular gun club shoot, winner getting \$10 from club offering same for competition.

The temptations of the trout streams probably caused the limited attendance at the Empire Gun Club shoot last Sunday; but 12 shooters were on the firing line. Among those present was General Fred Funston, who has acquired a decided liking for the sport of trap shooting. The scores in four events were as follows:

Club championship race, members only, 25 targets—General Funston 18, W. O. Cullen 17, Con Roman 9, H. P. Jacobsen 19, J. B. Hauer 20, Bert Patrick 18, Tom Lewis 18, Knick 15, J. Peltier 19, Jansen 13, Cunha 16, Dr. A. J. Sylvester 20, Gower 10, Potter 16, L. H. Allen 18, Dr. Gere 7.

Money event, members only, 25 targets (15 singles, 10 doubles), distance handicap, class shooting:

First class.	Yards.	Singles.	Doubles.	Total.
Hauer	20	11	6	17
Sylvester	20	12	5	17
Second class.				
Cullen	18	8	4	12
Jacobsen	18	12	8	20
Allen	18	6	7	13
Gen. Funston	18	6	3	9
Patrick	18	7	7	14
Peltier	18	9	8	12
Third class.				
Knick	16	10	6	16
Cunha	16	11	5	16
Janssen	14	11	5	16
Fourth class.				
Roman	14	5	2	7

High guns won the club added money in each class. Special handicap cash prize race, open to all, 15 targets, distance handicap—Cullen, 18 yards, 8; Jansen, 18, 9; Jacobsen, 18, 11; Patrick, 18, 11; Allen, 18, 10; Knick, 18, 9; Sylvester, 18, 10; Cunha, 14, 5; Peltier, 16, 10.

H. P. Jacobsen was high gun with 10 breaks in the Sweeney medal race.

A meeting of the Capital Gun Club was held recently at the office of Messrs. Lenfesty & Pichon, Victoria, B. C., when the following officers were elected for the ensuing year: President, Dr. E. C. Hart; vice-president, S. Sea, Jr.; secretary-treasurer, W. N. Lenfesty; captain, F. W. Stevenson. It was decided that the first shoot for the Dominion Cartridge Co. medal and the Willows cup would take place on April 7th.

The Vallejo Gun Club held a special meeting April 3d to perfect arrangements for the first regular club shoot which will be held at the new range between the Three and Four Mile Houses on next Sunday. M. A. Clarke, who had been appointed to confer with Manager L. J. Perry of the Vallejo, Benicia & Napa Valley Electric Railroad Company, stated that the railroad official had kindly consented to make a 10-cent fare from this city and to build a platform for the convenience of the club.—Good News.

Arthur W. du Bray, a sportsman known all over this country and Canada, is on a brief visit to this city, stopping over whilst on a trip covering the coast cities for Parker Bros. of Meridian, Conn. Mr. du Bray was here last about six years ago. Prior to that time he had met many of the local and coast sportsmen at the traps. Mr. du Bray is one of the leading live bird shots in this country. He is most enjoyably known to many sportsmen under the nom de plume of "Guacho," which name has been signed to numerous interesting articles in various sportsmen's publications for many years past.

Single trigger guns are becoming quite a fad with the trap shooting devotees. Among the latest converts to the one-trigger arrangement is Dr. A. T. Derby, who has sent his L. C. Smith to Fulton, N. Y., to be refitted with the single trigger mechanism.

DOINGS IN DOGDOM.

Santa Clara County Kennel Club.

Advance sheets of the San Jose show premium lists were delayed in the mails too long for detailed notice this week prior to our departure for Los Angeles.

Intending exhibitors are referred to Secretary Chas. H. Harker, San Jose, for entries, blanks, etc.

The club announces in the premium list that 55 cups and trophies are already donated for special prizes "and more to hear from." We are pleased to note that San Jose fanciers have outgrown the provincial habit of merchandise prizes for specials—no merchandise prizes will be given this year.

The show will use the San Mateo Kennel Club benching, which will be loaned for the occasion through the courtesy of directors of the latter club.

The entry fee will be \$2.00 and \$1.00 for each additional entry. For a comparatively small show the bench show committee, we believe, is wise in this respect.

Given that the entry fee were reduced to \$1.00 there is no question but what there would be more entries than if a \$5 entry fee and a \$10 cash prize for first were the conditions.

The aim of the Coast kennel clubs should be, among other objective points, to make NEW fanciers. With many clubs, low entry fees will induce new recruits. Get the new people interested and they will continue to show. They will come back the following year with new dogs. Induce new people to exhibit at the bench shows each year and there is the chance to send them off on the right lines. Will cash prizes or low entry fees achieve this result? The cash prizes will go, invariably, to the professionals and veteran breeders—these two classes can and will take care of themselves at any stage and invariably do so. Frequently with the result that promising future supporters of the fancy are soured at the start.

Low entry fees and ribbon prizes are the bete noir of the bench show parasites. Bench shows, however, are supposed to be for the general benefit of the fancy and not for individual profit.

The San Jose show will have a large entry from this city and also a string of, at least, 25 dogs from Los Angeles.

We note another departure from stereotyped lines and that is the dogs benched at San Jose will be fed with "Old Grist Mill Dog Biscuits." These dog biscuits are recommended by the leading "vets" in the United States and have been used with the utmost satisfaction by a number of the principal Eastern shows and are in strong favor with the practical management of all of the leading Eastern kennels. The dogs eat them without coaxing or forcing, the flesh of dead horses and refuse packing house scraps are not ingredients of Old Grist Mill dog biscuits.

A Popular Judge.

Mr. James Cole is booked for the all-round judge at Los Angeles, San Jose, Seattle, Milwaukee and St. Louis this spring. This selection gives him probably more shows (all breeds) this year than any other bench show judge in America.

Mr. Cole is a painstaking official in the ring. His previous engagements on the Coast have been sealed with the patent of general satisfaction, otherwise his services would not have been in request. That he knows a dog goes without saying. Personally, we have found him congenial and enthusiastic in doggy matters. Aside from his bench show career he is a staunch field trial devotee and has the happy distinction of having bred some corking good English Setters that have won on the bench and in the field. Further than that, and the desideratum of all consistent breeders, his Setters have also produced winners.

Bred in the Purple.

Mr. James G. Chesley has a most promising English Setter puppy, that is bred on high class lines. The puppy is by Mark out of Mars Princess. Mark is by Mercury out of Betsy Mark. Mars Princess by Mars out of Thiers' Ruby. Betsy Mark is sired by Ch. Gath's Mark; her dam is Lightfield Sophie. This cross has made a record on the Coast as a breeding that has been noted for the production of Setters that are prolific in quality and stamina. Peach Blossom, Peach Mark and Lady as high class performers and producers are noted in the annals of Coast Setters. Mars by Ch. Cincinnati ex Daphne, she by Toledo Blade out of Ch. Cambria. Toledo Blade by Roderigo-Lillian. Thiers' Ruby by Thiers-Princess Diana.

Chas. Heffernan, the genial secretary of the Stockton Kennel Club, has two English Setter puppies, a dog and a bitch, by J. M. Golbeck's Ch. Cato Jr., out of Gus Baraco's Lady Grace. Cato Jr. is by Cato-Maggie F. Cato by Merry Monarch out of Brown's Beauty. Lady Grace was sired by Danstone's Pride (Count Danstone-Fairland Queen); her dam is Mar's Princess. Fairland Queen by Cincinnati Pride ex. Brown's Queen Vic (Antonio-Nellie Bly).

Kennel Clubs Dropped.

The Oakland Kennel Club, the Pacific Sheep Dog Club and the Spokane Kennel Club have been dropped from membership in the A. K. C. for non-payment of dues for 1906.

The owner of a good Pomeranian stud dog is requested to send his address to Mr. Norman J. Stewart, San Jose.

COMING EVENTS.

Rod.

Jan. 1 June 1—Closed season for black bass.
April 1-Feb. 1—Open season for steelhead.
April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Nov. 1—Trout season open.
April 1-Nov. 1—Open season for taking steelhead above tide water.
April 28—San Francisco Fly-Casting Club. Saturday Classification Contest No. 5. Stow lake, 2:30 p. m.
April 29—San Francisco Fly-Casting Club. Sunday Classification Contest No. 5. Stow lake, 10 a. m.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Sept. 10-Oct. 16—Close season for salmon.
Sept. 15-April 1—Open season for lobsters and crawfish.
Oct. 16-Nov. 15—Close season for taking salmon above tide water.
Oct. 16-Feb. 1—Open season for steelhead in tidewater.
Nov. 1-Sept. 1—Open season for crabs.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

Feb. 15-July 1—Dove season closed.
Feb. 15-Sept. 1—Closed season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.
April 1-Oct. 15—Close season for English snipe.
April 14, 15—Los Angeles Gun Club. 18th semi annual tournament. \$500 added money.
April 15—Union Gun Club. Blue rocks. Ingleside.
April 15—Eureka Gun Club. Blue rocks. Eureka, Cal.
April 22—Golden Gate Gun Club. Blue rocks. Ingleside.
April 22—Capital City Blue Rock Club. Waikey Hill grounds, Sacramento.
April 24, 26—San Jacinto Gun Club. Blue rock tournament. San Jacinto, Riverside county.
May 6—California Wing Club. Live pigeons. Ingleside.
May 6—Blue Rock Gun Club. Grounds foot of High street, Alameda.
May 13—Empire Gun Club. Blue rocks. Alameda Junction.
May 13—Vallejo Gun Club. Blue rocks. Near Floden Station.
May 26, 27—Pacific Coast Trap Shooters Association. Third annual blue rock tournament. Vallejo Gun Club grounds, near Floden Station.
June 19, 22—Interstate Association. Grand American Handicap target tournament. \$1000 added money. Indianapolis, Ind. Elmer E. Shaner, Secretary-Manager, Pittsburg, Pa.
June 20, 21—Northwest Sportsmen's Association. Blue rocks and live birds. Walla Walla, Wash.
Sept. 7, 8, 9—Interstate Association shoot. Blue rocks. Ingleside. Elmer E. Shaner, Manager. Pacific Coast Handicap under auspices of S. F. Trapshooting Ass'n. A. M. Shields, secretary.
Oct. 15-Aug. 1—Deer season closed.

Bench Shows.

April 9, 10—St. Louis Collie Club. St. Louis, Mo. John A. Long, Secretary. Entries close —
April 11, 13—Atlantic City Kennel Club. Atlantic City, N. J. Thos. H. Terry, Secretary. Entries close —
April 11, 14—Southwestern Kennel Club. Los Angeles. George R. Albers Secretary. Entries close April 3.
April 13, 14—Merrimack Valley Kennel Club. Lawrence, Mass. Albert Mitchell, Secretary. Entries close —
April 19, 20—New Bedford Kennel Club. New Bedford, Mass. Geo. W. Parker, Secretary. Entries close —
April 25, 28—Mississippi Valley Kennel Club. St. Louis, Mo. Geo. Munson, Secretary. Entries close —
April 28—Bull Terrier Club. San Francisco. Entries close April 21. Dr. W. H. Watkins, Secretary, 1505 Stockton street, San Francisco.
May 9, 12—Vancouver Kennel Club. Vancouver, B. C. — Secretary. Entries close —. C. K. C. rules.
May 10, 12—Santa Clara Kennel Club. San Jose, Cal. Charles R. Harker, Secretary. Entries close —
May 16, 19—Victoria Kennel Club. Victoria B. C. — Secretary. Entries close —. C. K. C. rules.
May 19—Chester Kennel Club. Chester, Pa. S. Crozer Robinson, Secretary. Entries close —

June 6, 9—San Francisco Kennel Club. 10th annual bench show. Fred P. Butler, Secretary. Entries close —
June 9—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price, Secretary. Entries close —
Aug. 22, 23—Asbury Park Kennel Club. Asbury Park, N. J. A. F. Cottrell, Secretary. Entries close —
Sept. 3, 5—Miami Valley Kennel Club. Piqua, O. Edwin A. Hiatt, Secretary. Entries close —
Sept. 3, 6—Taunton Kennel Club. Taunton, Mass. A. J. Leo, Secretary. Entries close —
Sept. 8—Cedarhurst Kennel Club. Cedarhurst, L. I. Jno G. Bates, Secretary. Entries close —
Sept. 29—Bryn Mawr Kennel Club. Haverford Pa. Henry D. Riley, Secretary, Stafford. Pa. Entries close —

Field Trials.

Dec. 3—Continental Field Trial Club. Pleasant Garden or Lexington, N. C. John White, Secretary.
—American Field Futurity. Entries for second Futurity Stake close July 1, 1906. For Setter and Pointer puppies whelped on or after January 1, 1905. American Field Publishing Co., Chicago.

Another Collie Club.

A meeting was held in Seattle last week for the purpose of organizing a Collie club. Among those interested in the new specialty club are: Arthur Murphy, Dr. McIntosh, Phil Rummel, George Tinto, T. J. Stimson, A. J. Gill, Joseph Bates, A. L. Black, Al Giersch, Thomas Beacon, John Hill, Tom O'Connor, Louis Steen and James Tinto.

It is proposed to hold an open air show some time during the coming summer.

The club will also put up a breeders' cup at the Seattle show next month.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

LAKE TAHOE

Its adjoining lakes and connecting rivers, teeming with gamy fish, situated in the heart of the Sierras, is

The Angler's Paradise

There are ideal camping places, or, if you are otherwise inclined, first-class hotel accommodations on the border of the lake.

Every Team Owner

should be prepared for the common ailments and hurts. Wisest plan to have on hand the approved remedy, the one everybody knows and endorses,

Kendall's Spavin Cure

For Spavin, Curb, Splint, Ringbone, Cuts, Wounds, Sores, Sweeney, Galls, etc. No equal in the world.

Cured All Ailments.

Albany, N. Y. 77 Park Ave., March 8, 1905.

Dr. B. J. Kendall Co., Enosburg Falls, Vt.

Gentlemen—Please send me a copy of your "Treatise on the Horse and his Diseases." I find your Kendall's Spavin Cure all right. I am employed by W. M. Whitney & Co., of Albany and it has cured all ailments in our stables, Spavin, Curb, Ringbone and Hip Diseases, and other ailments.

WILLIE J. MAUGHTER, Coachman.

Price \$1; 6 for \$5. Greatest known liniment for family use. All druggists sell it. Accept no substitute. The great book, "A Treatise on the Horse," free from druggists or

DR. B. J. KENDALL CO., Enosburg Falls, Vermont.

FOR SALE--\$500.

A HIGHLY BRED, FINE LOOKING STALLION by Mendocino 2:19 1/4 (sire of Monte Carlo 2:07 3/4); dam the registered mare Princess (dam of Alcandri 2:15 3/4 and Jenny W. 2:24 3/4) by Nutwood; second dam, Queen by Skenandoah 926. This horse trotted a full mile in 2:18 1/2 this year with two months' work; but, owing to a slight injury, it is feared he will not stand training. Injury so slight as not to be noticeable and does not lame him though driven daily on the road. Horse is seven years old, handsome bay in color, and in the hands of any good man should earn from \$1500 to \$2500 a year in the stud. Is a fine road horse and a clean-gaited, level-headed trotter. Thoroughly city broke. Horse is at Oakland and can be seen by appointment. Apply to BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco.

FOR SALE.

MAGGIE N. CHESTNUT MARE
Sire, HAMBLETONIAN WILKES
Dam ANNA BELLE
Full sister to Robert I. 2:08 1/4 Price, \$300
Also new Bike Buggy, solid rubber tires and harness.
D V TRUAX,
1126 Park Ave., Alameda,
Park Street Station.

FOR SALE.

Will sell, on account of ill health, the following trotting bred stock, at private sale, at a reasonable price:
ORKNEY WILKES by Mambrino Wilkes dam by Speculation Orkney Wilkes is the sire of Swanhilda 2:13 1/4 mile 1:01. In third heat of race.
Two producing brood mares. MAUD S by Jim Mulvena, dam of Swanhilda; MAGGIE MC by Abbottsford Jr. dam by Speculation Maggie MC is the dam of Sid Abbot, 4 year-old trial 2:18.
Also colts by Orkney Wilkes, Sidmoor and Dictatus Two yearlings by Dictatus, perfect matches; one filly pacer from Maud S.; one horse colt from Maggie Mc. trotter.

THE SHROPSHIRE SHEEP.

The Shropshire sheep is unquestionably the most popular of all the breeds, if we may judge by the comparative numbers shown at the various exhibitions and equally by the flocks seen on the farms as one passes along the roads in such localities as sheep are usually kept. Practically it the farmer's sheep, for it is a hardy animal and bears a fleece which is the staple for the most popular of clothing materials. It is most commonly used by the range shepherds for the production of lambs and market sheep. It is the most ancient of the long-wool breeds, and was so highly considered as far back as three hundred years ago as to have been selected by the English government as the best return for some Merinos which were presented by the king of Spain to the king of England.

It well deserves its popularity, for it is a very excellent mutton sheep, and bears a kind of wool which is in permanent demand for the coarser kinds of manufactures, and was still more so at the time when cotton was unknown and linen was the material for making such goods as are now made of cotton. The wool of this breed furnishes the material for the greater part of the coarser clothing of men, and is largely mixed in with the finer wools for the manufacture of women's clothing.

The Shropshire has an excellent reputation as a prime mutton sheep, especially for its most desirable lambs for the Easter and Christmas market. Its home is in the best part of England where agriculture is most highly developed, and it stands at the head of that class of sheep commonly called the Downs breeds. The Downs are a part of Southern England, where the soil and climate combine with the skill and enterprise of the farmers to make their work the most profitable, and as a result of this the value of the farm lands is the highest, and consequently rents also.

Its qualifications as a farm sheep are various. It is hardy and prolific. One flock in England has been trained to produce two sets of lambs every year, so that the flock as to its original number really doubles annually; and as this sheep is very precocious, and if well cared for may be bred as lambs the second year, and increase in this same proportion, the flock is proportionately more profitable than one in which the lambs are only singles. The sheep of this breed are easily disciplined and are rarely troublesome on any ordinary farm, and thus may be considered as especially the farmer's sheep.

It is easily fed, and when three years old may easily be made to dress twenty pounds to the quarter. It is a prolific wool bearer. A prize ram had a live weight of over 300 pounds, and his fleece of that year, not quite a year's growth, made 17½ pounds. An excellent characteristic is that it improves the common sheep when bred to it by reason of its solidity of form and its strong natural vitality. This latter quality tends to the acquisition by the progeny of a pure-bred ram of the special points of the breed, so that a half-

not at all, to the ram itself.

The mutton of the Shropshire is next in quality to the noted Southdown, but its half-bred young lambs reared by the writer have brought as much as the thoroughbred Southdown, the half-bred ewes bringing as good lambs under the best of care as those of the pure-bred ewes, when coupled with a full-blooded ram—all the better if this is at least three years old.

This breed used to have a dark face, but of late this peculiarity has been lost to a considerable degree.—Henry Stewart, in Country Gentleman.

Succulent food increases the flow of milk, but does not materially increase the proportion of water in it. The relative proportions of fat and casein are changed in a marked manner by a change in the ration. An extra yield of butter will naturally follow the use of richer feed if the cow has been well selected.

It is no sacrifice to pay a big price for a cow if you are sure of getting big money back again. Where the loss comes in is in buying a poor cow just because she is cheap. The poorest thing a man can have on the farm is a poor cow.

Stakes for Two-Year-Olds

Offered by the California State Agricultural Society to be given at the

CALIFORNIA STATE FAIR, 1906

ENTRIES CLOSE MAY 1, 1906

The A. B. SPRECKELS STAKE for Two-Year-Old Trotters.....\$1000

The BEN RUSH STAKE for Two-Year-Old Pacers..... 1000

ENTRANCE PAYABLE AS FOLLOWS: \$20 on May 1, 1906; \$20 additional if not declared out on or before June 1, 1906, and \$10 additional if not declared out on or before July 1, 1906. Declarations (to declare out) must be mailed to the Secretary and will not be accepted unless accompanied by the amount due at time declaration is made

CONDITIONS.

Distance to be one hundred yards. Right reserved to reject any or all entries. Five per cent of the amount of the Stake will be deducted from each money won. The Board of Directors reserve the right to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided 66% per cent to the first and 33% per cent to the second. A horse distancing the field shall only be entitled to first and fourth moneys, but in no other case will a horse be entitled to more than one money.

The Board of Directors reserve the right to start any heat after the fourth score, regardless of the position of the horses.

When there is more than one entry to any Stake by any one person or in one interest, the horse to be started must be named by 5 o'clock p. m. on the day preceding the race.

Otherwise than as herein specified in these conditions, Rules of the National Trotting Association (of which this Association is a member) to govern.

For Entry Blanks and further information address the Secretary.

Sacramento Valley Stock Farm

STALLIONS, BROOD MARES, and Young Stock Suitable for Training.

CH. STALLION, FOALED 1902, "DILLCABA."—Sire Sidney Dillon; 1st dam, Guy-cara, 2:18 1/4, by Guy Wilkes, 2:15 1/4; 2nd dam, Biscara (dam of 5 in list, 4 below 2:20), by Director 2:17; 3rd dam, Biscara (dam of 6 in list, including the great stallion Pancoast and other producing sires and dams), by Harold 413 (sire of Maud S); 4th dam, Belle (dam of Belmont, sire of Nutwood, McCurdy's Hambletonian 2:26 1/2, and other producing sires and dams), by Mambrino Chief 11; 5th dam, Belle Lupe, by Bellfounder (Brown's), son of Imp. Bellfounder and Lady Allport by Mambrina, a son of Imp. Messenger, the next dam of Brown's Bellfounder being by Tippeco Sahib, son of Imp. Messenger, and the next dam by Imp. Messenger himself.

This young stallion's pedigree is unexcelled, his sire and the sires of his 1st, 2nd, 3rd and 4th dams having produced world-record holders, as well as many others the gamest and best of all times. In looks and make-up he is as great as his pedigree, unexcelled. Although never trained, his natural speed is phenomenal. For the production of world-record holders, he should excel his sire or the sire of his 1st, 2nd, 3rd or 4th dam, each of which enjoy fame in this respect. As a candidate himself for the record he is entitled to much consideration.

CH. STALLION, FOALED 1902, "FLOSSNUT."—Sire Nutwood Wilkes 2:16 1/4; 1st dam, Flossie, by Cornelius (11335), sire of Connelita 2:10 1/4, etc., by Nutwood; 2nd dam, sister to Ruth Ryan (thoroughbred), by Lodi, son of Imp. Yorkshire and Topaz by Imp. Glencoe; 3rd dam, Eva Bulwer by Bulwer, son of Grey Eagle; 4th dam, Emma Taylor by Imp. Glencoe; 5th dam, Lances 4th dam of Palo Alto and 5th dam of Alcyone, Alcantara, etc., by Lance.

The blood lines in this young stallion's pedigree represented the male line of Nutwood Wilkes laid upon two crosses of Nutwood, one of Echo, one of Geo. M. Patchen Jr., and a thoroughbred female line tracing to Lances, to which female line trace such great ones as Alcyone (sire of McKinney), Alcantara, Palo Alto, and many other great ones. The sires in the thoroughbred female line down to Lances have each produced the dams of trotters. The high degree of natural speed, strength and size, Nutwood type of conformation, and make-up of this young stallion make him worthy of use in the stud and worthy of the opportunity to earn a low record on the track.

BAY MARE, FOALED 1903, "FLOWERET BELLE."—Sire Monbells 2:23 1/2, son of Mendocino 2:19 1/2, by Electioneer and Beautiful Bells (world's greatest brood mare), by The Moor; 1st dam, Floweret (dam of 2 in list and full sister to Wildflower, Manzanita, etc.), by Electioneer; 2nd dam, Mayflower 2:30 1/2 (dam of Wildflower, Manzanita, etc.), by St. Clair 16675.

The sire of this filly represents Electioneer's most famous speed producing line, the Electioneer-Beautiful Bells cross. The dam of this filly represents a great performing and producing line that first made Electioneer famous through the great Wildflower, Manzanita, etc., the Electioneer-Mayflower cross. This filly was bred to Dillcara in 1905, and the pedigree of the produce will be composed almost exclusively of the greatest bloodlines of the greatest producers in the trotting world. Her produce from such mating will always rank of the highest value for breeding purposes, as well as for racing.

CH. MARE, GRISETTE, FOALED 1902.—Sire Marengo King 2:29 1/2, son of McKinney 2:11 1/4 and By By by Nutwood; 1st dam, Lisette by Abdallah Wilkes 7562 (sire of Wauco 2:14 1/4, etc.), son of Geo. Wilkes; 2nd dam, Musette by Startle 290 (sire of 11), son of Hambletonian 10; 3rd dam, Beckie Sharp by Billy Denton (sire of 2), son of Hambletonian 10; 4th dam, Kent Mare by Black Hawk 5.

In this filly's pedigree we have almost exclusively the producing male lines of Hambletonian 10. Her sire traces to that speed progenitor through McKinney, crosses of Nutwood and Dictator being thrown in. We get to Hambletonian 10 in the male lines of the sire of the 1st, 2nd and 3rd dams very quickly through only one or two generations of producing sires, something phenomenal for close up breeding to Hambletonian 10. This filly was bred to Dillcara in 1905, and the produce will probably have in its pedigree more crosses of Hambletonian 10 than any other horse, following the suggestion, "The way to breed trotters is to get all the blood of Hambletonian 10 that you can, and then get more." Stout and well formed as this filly is, her produce should be not only speedy but useful in the racing game. Not broken to drive.

CH. MARE, FOALED 1902, "BESSIE SWEET."—Sire Diablo 2:09 1/4; 1st dam, Bessie Roan by Hock Wilkes, son of Guy Wilkes; 2nd dam, Bessie by Ventura 2:27 1/4; 3rd dam, Lady Emma 2:39 1/4 by Paul's Abdallah, son of Hambletonian 10. The excellent brood mare sire Ventura 2:27 1/4, a thoroughbred, being the sire of the 2nd dam, a real good half-thoroughbred son of Guy Wilkes being the sire of the first dam, Diablo 2:09 1/4 being the sire of the filly herself, the 2nd and the 3rd dams having been about the best mares ever driven in San Francisco for speeding at the Park, should make this filly most valuable for breeding purposes, she being of large size and stout and blocky. Was never bred or broken.

CH. MARE, FOALED 1889, "FLOSSIE."—Sire Cornelius 11335 (sire Carmelita 2:10 1/4, etc.), son of Nutwood 2:18 1/4, and Jennie G. 2:26 1/4 by Echo, he by Hambletonian 10; 1st dam, sister to Ruth Ryan (thoroughbred), by Lodi, son of Imp. Yorkshire and Topaz by Imp. Glencoe; 2nd dam, Eva Bulwer by Bulwer, son of Grey Eagle; 3rd dam, Emma Taylor by Imp. Glencoe; 4th dam, Lances (to whom trace in female line Alcyone, sire of McKinney, Alcantara, Palo Alto, etc.), by Lance, son of American Eclipse. In this pedigree we have top crosses of Nutwood and Echo, great brood mare crosses, laid upon a thoroughbred female line going to Lances, the 4th dam of Alcyone (sire of McKinney), Alcantara, Palo Alto, etc., the sires in this female thoroughbred line being the most noted for producing the dams and grandams of trotters. Lodi, the sire of the 1st dam, produced the dam of Pedlar and others; Bulwer was by Grey Eagle, whose daughters and grand-daughters produced great trotting performers; Imp. Glencoe's grand-daughters produced several trotters. The dam of this filly was a sister to Ruth Ryan, who produced Strathern, sire of Plunkett 2:13 1/4. Sons of Flossie, by well bred stallions, should become great sires, as well as performers. She is a very large, stout mare, of the Nutwood type. Bred to Dillcara in 1905.

BAY MARE, FOALED 1894, "FLOSSIE HOCK."—Sire Hock Wilkes, son of Guy Wilkes and Eda (thoroughbred), by Hock Hocking; 1st dam, Flossie by Cornelius 11335, son of Nutwood and Jennie G. 2:26 1/4 by Echo. (See Flossie for continuation.) This pedigree represents a Guy Wilkes-Nutwood-Echo cross upon an excellent thoroughbred female line. Not bred in 1905. Never broken. A stout, well made mare. No living produce.

BAY MARE, FOALED 1894, "BESSIE HOCK."—Sire Hock Wilkes, son of Guy Wilkes and Eda (thoroughbred), by Hock Hocking; 1st dam, Bessie Roan; Ch. Mare, foaled 1898, "Bessie Babe"; three full sisters; Sire Hock Wilkes, son of Guy Wilkes 2:15 1/4, and Eda (thoroughbred) by Hock Hocking, son of Ringgold by Boston; 1st dam, Bessie by Ventura 2:27 1/4, thoroughbred son of Williamson's Belmont; 2nd dam, Lady Emma 2:39 1/4 to pole, by Paul's Abdallah, son of Hambletonian 10. These three mares, full sisters, are each stout, smooth turned, extra well formed; were never broken to drive or ride. Their sire, Hock Wilkes, was a very stout, speedy, though crippled, half-thoroughbred son of Guy Wilkes. Their 1st and 2nd dams were about the speediest and best road mares driven in San Francisco and speeded in the Park. In this pedigree we have a top cross of Guy Wilkes laid upon a female line with Ventura, a thoroughbred brood-mare sire, for the sire of the first dam, and a son of Hambletonian 10 for the sire of the second dam, extra stout bloodlines for the production of game trotting speed.

ALSO SOME TWO-YEAR-OLDS out of dams whose pedigree is given above, suitable for training and breeding purposes, and entered in Futurity Stakes. One grand 2-year-old stallion.

Polka Dot 2:14¹/₄. etc. Bay Stallion, 15.3¹/₄ hands; weight 1100 pounds; hind feet and ankles white; foaled April 24, 1889. Bred at Palo Alto Stock Farm.Sire, ELECTIONEER 125, son of Hambletonian 10. First dam, MANO (dam of MENDOCINO) (3) 2:19¹/₄. Electant 2:19¹/₄. Morocco (3 y. o. trial 2:22) by Piedmont 904, 2:17¹/₄; second dam, Mamie (dam of Mamie W (3) 2:17¹/₄. Hyperion 2:21¹/₄. Memento 2:25¹/₄. Mithra (p) 2:14¹/₄ by Hambletonian Jr 1882; third dam, Glida (thoroughbred) by Imp. Mango.

MENDOCINO is one of Electioneer's youngest and best sons. With very limited opportunities in the stud he has proven his worth by producing such racehorses as Monte Carlo and Idolita. Three new additions to his 2:30 list were made last season, and he now has ten standard performers. His foals are good size, fine lookers, bold and pure galloped and easily developed.

SERVICE FEE for Season of 1906, \$75; usual return privilege.

MCKENA 39460

Brown Stallion; 16.2 hands; weight 1350 pounds; foaled April 11, 1900. Bred at Palo Alto Stock Farm. Sire, MCKINNEY 8818 (record 2:11¹/₄). First dam, HELENA 2:11¹/₄ (dam of Wildcutting 2:11¹/₄; Dobbel 2:22, Hyta (trial 2:12) by Electioneer 125; second dam, Lady Ellen 2:29¹/₄ (dam of six in list, including Helena 2:11¹/₄, Ellen Wood 2:14¹/₄) by Mambrino 1789; third dam, Ida May Jr. by Owen Dale; fourth dam, Ida May by Belmont (Williamson's).

MCKENA has proven a remarkably sure foal getter. He should make a great sire as he is a fine individual and bred right. His sire, McKinney, a game and fast racehorse and sire of game and fast racehorses. His dam, Helena, one of the fastest and gamest daughters of Electioneer, the greatest sire of trotters the world has yet known. His second dam, Lady Ellen, was one of the best of her day, and as well as her daughter Helena is a great broodmare.

SERVICE FEE for Season of 1906, \$40; usual return privilege.

MENDOCINO and MCKENA will make the season at PALO ALTO STOCK FARM. Mares may run on pasture at \$5 per month. No responsibility assumed by the Palo Alto Stock Farm for injury or escapes. Address all communications to

PALO ALTO STOCK FARM,
Stanford University, Santa Clara Co., Cal.McKINNEY, 2:11¹/₄

World's Leading Sire of Extreme Race Horse Speed.

FEE, \$500.00

Fees are invariably payable before mares leave the farm. No return privilege, but fee returned if mare fails to produce a foal. Keep, \$2. per week. Our terms are rigidly adhered to in all cases, and we cannot deviate from them.

McKinney is now located at the farm, 10 miles from Cuba.

LYNWOOD W. 32853

RECORD AS A 2-YEAR-OLD 2:20 1-2

Sired by GUY WILKES; dam, the great brood mare LINDALE by Sultan Jr. 12771

LYNWOOD W. was a sensational colt trotter and is fast proving himself to be a great sire, although he never covered but eight standard bred mares prior to 1905. Still he has to his credit Damsen S. 2:30, Clipper W. 2:24¹/₄, Sonoma Queen 2:25, Sonoma May 2:29¹/₄, all trotters with records made in 1905. The following are the only colts that ever had any training. They have worked as follows: R. W. P. 2:13¹/₄, Charles Belden 2:13¹/₄, Sonoma Girl 2:15, Sly H. (3) 2:16¹/₄, Dumont S. 2:17, Ayer's 2:18, Sonoma May 2:19¹/₄, Jim V. 2:25, Ella V. (3) 2:21, Clipper W. 2:23, Sonoma Queen (3) 2:22, Sonoma Star (3) 2:27¹/₄, Dennis 2:30, Frank G. (2) 2:30.

Will make the Season of 1906 at Santa Rosa.

SERVICE FEE \$25. H. A. CARLTON, Owner, Santa Rosa, Cal.

For breeding, individuality and racing qualities he is unsurpassed. He is a rich bay in color with black points, stands 15.3 hands and when matured will weigh 1200 pounds.

Highland

TRIAL 2:12

(at Four Years Old)

Bred at Highland Stock Farm, Dubuque, Iowa

By EXPRESSO 29199 (half brother to Expressive (3) 2:12½) by Advertiser 2:15½, son of Electioneer 125; dam ALHA 2:23½ (dam of Aegon 2:18½, sire of Aegon Star 2:11½, etc.) by Alcantara by George Wilkes 2:22; second dam Jessie Pepper (dam of 2 in list and 3 producing sons and 7 producing daughters) by Mambrino Chief 11, etc.

Terms for the Season.....\$25

HIGHLAND is a grand looking young stallion, seven years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed, and has trotted a quarter in 31 seconds over the Pleasanton race track.

HIGHLAND is a coal black horse with one white hind ankle, stands 16.1 hands high and weighs close to 1200 pounds.

Address all communications to

TED HAYES, Manager, Pleasanton, Cal.

ZOMBRO 2:11 GREATEST SON OF MCKINNEY 2:11½

Will make the Season of 1906

At LOS ANGELES, CAL.

Fee, \$50 for the Season.

With usual return privilege provided I still own the horse and mare does not change ownership. Money due at time of service, or all bills paid before mare is taken away.

ZOMBRO is the sire of eleven standard performers as follows: Zephyr 2:07½, timed separately in a race in 2:03½; Charley T. 2:13½, trial 2:10½; Italia 2:14½, over half-mile track, trial 2:08½; Belmont, three years old, record 2:15½, trial 2:11½; Zombowette 2:16½, trial 2:14½; Zenobia 2:19, trial half in 1:05½; Tee Dee Cee 2:19½, trial 2:13½; Lady Zombro 2:24, trial 2:10; Lord Kitchener 2:24½, trial 2:19½; Zealous 2:26½, trial 2:20; Nina Bonita 2:27.

ZOMBRO has won more first prizes in the show ring than any California stallion, and his get have sold for more money during the past three years. He is the only horse living or dead that ever won forty heats in standard time as a three-year-old. His get are all large, beautifully formed and endowed with great natural speed. The choicest pasture for mares. Address

GEO. T. BECKERS, 3949 Figueroa St., Los Angeles, Cal.

NEAREST 35562

(RECORD 2:22½)—Sire of Alone (4) 2:09½ (trial 2:06½); Just It (3) 2:19½ (trial 2:12½); High Fly (2) 2:24½ (trial 2:12½ last half in 1:00½); and full brother to the great John A. McKerron 2:04½, the second fastest stallion in the world.

By NUTWOOD WILKES 2:16½, sire of John A. McKerron 2:04½ (second fastest stallion in the world); Tidal Wave 2:09, Mis-Idaho 2:09½, Who Is It 2:10½, Stanton Wilkes 2:10½, Cresco Wilkes (4) 2:10½, George B. 2:12½, North Star (3) 2:13½, winner Pacific Breeders Futurity Stakes \$6000. Guaranteed of 1905 and 32 in 2:30 list; dam INGAR, the greatest producing daughter of Director; second dam Annie Titus by Echo 462; third dam Tiffany mare (dam of G'braltar 2:22½) by Owen Dale, son of Williamson's Belmont. NEAREST is a dark bay, 15.3 hands and weighs 1200 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Will make the Season of 1906 at San Jose, with return privilege in case horse remains in California. For terms and extended pedigree address

Phone: Red 1431.

THE STANDARD TROTTER STALLION

Murray M. 2:14

(WINNER OF THE BREEDERS FUTURITY, \$6000, IN 1904)

Will make the Season of 1906 at the

Race Track, University Station,
LOS ANGELES, CAL.

Terms, \$40 for the Season, with usual return privileges.

MURRAY M. 2:14 is by Hambletonian Wilkes 1679 (sire of Phoebe Wilkes 2:08½, Phoebe W. 2:08½, Robert I. 2:08½ and RAY M. 2:14 and La Belle (2) 2:16) by Dawn, sire of 5 in 2:30 list and dams of 8.

MURRAY M. 2:14 is a handsome five-year-old bay stallion with small star and black points. In his three-year-old form he stood 16 hands and weighed 1125 lbs., and is a natural, square-gaited trotter. He is a horse of grand flesh, plenty of substance, excellent disposition. He has a stout back, strong loins and stifles, good feet and legs. His breeding is excellent, and with his individuality he presents a popular and speed-producing combination of the kind that gets money on the race course and prizes in the show ring.

Excellent pasturage at reasonable rates. For further particulars address

PROF. H. B. FREEMAN, University Station, Los Angeles, Cal.

KINNEY WILKES

Sired by MCKINNEY 2:11½, sire of Sweet Marie 2:04½, Kinney Lou 2:07½, Charley Mac 2:07½, Hazel Kinney 2:09½, The Roman 2:09½, Dr. Book 2:10, Coney 2:02, China Maid 2:05½, Zolook 2:05½, You Bet 2:07, Jennie Mac 2:09, etc.

First dam, HAZEL WILKES 2:11½, a great race mare by Guy Wilkes 2:15½, sire of Fred Kohl 2:07½, Hulda 2:08½, Lesa Wilkes 2:09, Seymour Wilkes 2:08½, etc., and dams of Antezella 2:10½, Katherine A. 2:11½, etc., etc., and grand-sire of John A. McKerron 2:04½; second dam, Blanche (dam of Hazel Wilkes 2:11½, Una Wilkes 2:15, Guyson 2:24, Native Son 2:26½ and Silver Spray 2:28) by Arthurton 363; third dam, Nancy by Gen. Taylor, champion 30-mile trotter of the world.

KINNEY WILKES is a very handsome, well made bay stallion, standing 15.3 and weighing 1100 pounds. He is one of the best bred of the McKinnys.

Will make the Season at

LEONARD STATION, Santa Cruz County.

Fee \$25.

For cards containing tabulated pedigree, etc., address

JAMES T. LEONARD,

Rural Delivery No. 3, Watsonville, Cal.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED

NUTWOOD WILKES 2:16½ { Sire GUY WILKES.....2:15½
Dam LIDA W.....2:18½
by NUTWOOD.....2:18½

NUTWOOD WILKES 22116 is the only stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12½ respectively. Who Is It 2:12, ex-champion three-year-old gelding of the world, reduced his record to 2:10½. John A. McKerron 2:04½ (2:12½ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES is the sire of John A. McKerron 2:04½ (sire 3 two-year-olds in 2:30 list), Tidal Wave 2:09, Miss Idaho 2:09½, Who Is It 2:10½, Stanton Wilkes 2:10½, Cresco Wilkes 2:10½, George B. 2:12½, Claudius 2:13½, North Star 2:13½, Bob Ingersoll 2:14½, and 32 in 2:30 list.

His sons Nearest and Stanton Wilkes have sired Alone 2:09½ and Cavaliero 2:09½.

His daughters produced Miss George 2:10½, Mona Wilkes 2:11½, Lady Mowry 2:12½, Caroline L. 2:14½, Tollo 2:15, and Miss Winn 2:15½.

NUTWOOD WILKES will make the Season of 1906 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee \$50 FOR THE SEASON, with the usual return privileges if horse remains my property. Good pasturage at \$3 per month. Bills payable before removal of mare. Stock well cared for, but no responsibility assumed for accidents or escapes.

Young Stock by NUTWOOD WILKES for sale.

Send for Tabulated Pedigree. For further particulars apply or address

Get the Blood that Produced the Champions, SWEET MARIE and LOU DILLON, by Breeding to

GRECO

BLACK COLT, FOALÉD 1900. Sire, McKINNEY 2:11½, sire of SWEET MARIE 2:04½, Kinney Lou 2:07½, Charley Mac 2:07½, Hazel Kinney 2:09½, The Roman 2:09½, Dr. Book 2:10, Coney 2:02, China Maid 2:06½, You Bet 2:07, Jennie Mac 2:09, Zolock 2:05¼, Dam, AILEEN 2:26½ (dam of Mowitz 2:20½, Sister 2:20 and GRECO 2:32, trial 2:20) by Anteeo 2:16½, sire of dams of Directum Kelly 2:08½, Grey Gem 2:09½, W. Wood 2:07, etc.

Grandam, LOU MILTON (dam of LOU DILLON 1:58½, Redwood 2:21½, Ethel Mack 2:25 and Aileen 2:28½) by Milton Medium 2:25½ (sire of 2 and dams of 5) by Happy Medium 2:32½, sire of Nancy Hanks 2:04, etc.

GRECO is a handsome black stallion and a natural and fast trotter. He won his only race as a colt, and has shown miles in 2:30 since in his work, and is a sure 2:10 trotter. He will be permitted to serve a limited number of mares at \$100 THIS SEASON. Correspondence solicited. Address

CHAS. De RYDER, Manager, Pleasanton, Cal.

IRAN ALTO 24586 Sire, PALO ALTO 2:08¾-3-4 Rec. 2:12¼ Dam, ELAINE (4) 2:20

IRAN ALTO'S sire and dam have both held champion trotting records and his dam and grandam both produced a colt that was a world's record breaker, and his grandsire has sired several trotters that broke world's records. No other horse with a record as fast as IRAN ALTO'S can claim this. At nine years he had sired ten colts, four of them with records as follows: Dr. Frasse 2:13½, Thomas R. 2:15, Vendome 2:17, Dr. Frasse's Sister 2:25—all at four years old. Who can name a horse whose first ten colts can beat that?

Will Make the Season of 1906 at WOODLAND, CAL.

FEE \$40

\$20 due when mare is bred and \$20 payable when mare is known to be in foal.

CAMPBELL'S

EMOLLIO
IODOFORM

GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISON SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising, the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Breeder and Sportsman

Vol. XLVII. Nos. 15, 16 and 17

SAN FRANCISCO, MAY 12, 1906

Subscription \$3.00 a Year

THE WEEKLY Breeder and Sportsman

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the
Pacific Coast

OFFICE: 709 VAN NESS AVENUE,
SAN FRANCISCO
P. O. Drawer 447

Terms—One Year \$3; Six Months \$1.75; Three
Months \$1

STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft
or letter addressed to F. W. KELLEY, P. O.
Drawer 447, San Francisco, California.

Communications must be accompanied by
the writer's name and address, not necessarily
for publication, but as a private guarantee of
good faith.

The earthquake of April 18th, and the fire which raged four days, destroying all the business and a great part of the residence section of San Francisco, has been heard of and read about the world over. There is nothing that the Breeder and Sportsman could relate about the fearful holocaust that would be new to our readers. A greater portion of our once beautiful city is now a mass of blackened ruins but from its ashes there is already rising a metropolis of the Pacific that will be greater, grander, more beautiful and in every way an improvement on the San Francisco that was. The spirit of the Argonauts is not dismayed and California is still the land of sunshine, fruits and flowers, the fairest and the best piece of God's footstool.

The office of the Breeder and Sportsman, like that of every other newspaper in the city, went up in the blaze.

It is a total loss. All the valuable record books, the files of the paper complete since its first issue, and our printing plant were burned. The only things saved were the lists of subscribers. All else was destroyed. There were many old records that were invaluable to us as they cannot be duplicated, but before the fire had ceased orders were sent east for the Registers, Stud books and Year Books, and within a few more days the Breeder and Sportsman will be as well equipped as ever for the transaction of business. This, the first issue since the fire is printed by the press of the San Rafael Independent. Our business office is still in San Francisco. At present it consist of nothing but Post Office drawer 447 but within a few days we hope to have a place to meet all our friends and patrons and many new ones and we now assure them that it is our aim to

make this (the only journal of its kind on the Coast) a better, larger and more interesting paper than ever. We desire to make an appeal to our readers at this time which we know they will geet with a quick and cheerful response. We want every person who possesses a stallion card, or an old catalogue of sale that he does not absolutely need to send them to us that we may in a measure restore our records of sales and breeding. There are complete files of the Breeder and Sportsman which we believe can be secured, but the stalilon cards and catalogues can only be gathered together by the generosity of our readers who have them. While the Breeder and Sportsman will necessarily be printed in an abbreviated form for a few weeks, we expect to have a plant of our own in a short time, and make numerous improvements in the paper. Many of our subscribers and advertisers had their business entirely destroyed and to these we extend our sympathy and offer them every assistance in our power. The duty of every man in California to-day lies in the future and not in the past. Every business that possibly can be resumed should be resumed in San Francisco. It is still the greatest city in the West.

Send us the horse news from your locality. Tell us how the colts are doing, what mares are being bred, whether there has been or is to be any harness racing in your locality, what sales have been made, and everything else in regard to trotting and pacing horses or their owners and trainers that is of interest to the public. It will be gladly received at this time.

Oregon State Fair

Dont forget that many stakes to be trotted and paced at the Oregon State Fair this year, close May 15th. There are six stakes ranging in value from \$700 to \$2000, two of them having the last named value. The \$2000 events are for the 2.17 class trotters and 2.15 class pacers. Read the list of good things spread before the horsemen by the Oregon State Fair. It is in our advertising columns.

Mr. E. C. Peart's meeting at Colusa was a big success. The full report will be printed next week.

California Meetings this Year

Entry blanks for the Stakes offered by the management of the Woodland race meeting and for the early closing events of the Pacific Coast Trotting Horse Breeders Association's fall meeting advertised to close May 1st, were ready to be sent out on the day of the earthquake and were destroyed by fire that afternoon. The P. C. T. H. B. A. will postpone the closing of their stakes to June 1st and will re-advertise them and send out entry blanks in ample time to reach nominators before the date of closing. The management of the Woodland meeting will be no less enterprising, and will give a meeting on the dates they have taken. A meeting of the Board of Directors of the Breeders Association will be called as soon as possible. All of the Members of the Board who have been interviewed express a desire to go ahead with the meeting at Fresno and also the fall meeting to take place the week preceding that of Woodland, as proposed. Los Angeles has been heard from since the earthquake and Mr. Pounder, one of the Directors and leading men in that Association, says that three meetings will be given in that part of the State this fall besides the summer meeting to take place the first of July, preceding the Breeders meeting at Fresno. Los Angeles is always to the front in harness horse affairs and can be depended upon to give high-class race meetings. In addition to the meetings above mentioned as being given by the Breeders Association, it will give meetings this year wherever a suitable mile track will be offered them and sufficient support from the town's people to warrant them in going ahead. The purses for these additional meetings will not be so large as those that have been advertised, but will be as liberal as possible under the circumstances. If the Association can give a number of meetings this year and at the end of the season come out financially anywhere near even they will be highly pleased. Notwithstanding no entry blanks were sent out and the date of closing of the stakes advertised came on the heels of the earthquake, a sufficient number of entries have ever received to show that when these stakes are reopened to close June 1st,

they will be filled. Many horses are in training at the different tracks and while some of them would have been raced will now be turned out, there will still be more than enough left to insure a number of good meetings in California, especially when the horsemen consider that after the meetings here and the State Fair, they can take their horses north and race at the larger meetings on the Washington and Oregon circuit. The action of the Breeder's Association, together with that of the Los Angeles Association, the Woodland Association and the State Agricultural Society, should be very encouraging to the horsemen of California.

Every track in Cailifornia should be the scene of a harness race meeting this summer. The burning of San Francisco has complell-ed many owners to turn out their horses that were in training, thus throwing many men out of employment. All these men can get work if a good circuit is organized and announced. Purses ranging from \$200 to \$500 will do. Every man that can hold on to his job now will make it that much easier to provide for those who are not so fortunate as to have one. Horsemen in towns that did not suffer by the earthquake should make an extra effort to get up meetings. Los Angeles, Santa Barbara, Santa Maria, San Bernardino, Santa Ana, San Diego and other towns should arrange a Southern Circuit. Bakersfield, Fresno, Tulare, Stockton, Hanford and other towns in the San Joaquin Valley should give meetings. Pleasanton, Concord, Hollister, Salinas, San Jose, Oakland, Petaluma, Ukiah and perhaps Santa Rosa, although she has suffered a great loss, can get in line. The State Fair, Woodland, Marysville, Colusa, Willows, Red Bluff and Redding could supply a good circuit for the northernpart of California. State Fair should close the racing season with the best program of harness racing seen at the State Capital in years. This is the year to show the world that California horsemen as well as their brothers in every other walk of life can rise to the occasion. Let us hear from every track in the State. Any town can give a three days meeting with \$300 purses and the horsemen will enter liberally everywhere this year,

Notes and News

See announcement of change in the California Horseman, on page 11

Get busy.

Forget the earthquake.

Dont think about the fire.

Make up your mind to win a stake this year.

See that a good harness meeting is held in your town this summer.

Dont kick about the automobiles. They filled a big place and filled it satisfactorily.

It is hoped the National Trotting Association will disinfect and fumigate the Memphis Cup. It should be filled with chloride of lime during the trial.

We have not met Kenney the bike man since the fire, but have been told that he was seen pulling a half dozen McMurrays to a place of safety and is probably in business again by this time with a full line of sulkies and carts. He will have an ad. in next week.

Later—Kenney has been heard from. He has the temporary headquarters of the San Francisco Wheel and Novelty Company at 3139 Seventeenth street. They have a large stock of sulkies and carts in stock and are ready for business. There are a few that were scratched up during the catastrophe will be sold at a sacrifice. These goods are all brand new and it offers a good chance for horsemen to get bargains. Kenney let the fleeing people have the carts and sulkies during the fire to take their clothes and beddings out to the hills and they made good. One 30 pound sulky was loaded with goods that weighed 500 pounds and it was not strained in the least. Four or five carts and sulkies that had not been taken from the crates were burned. Kenney does not propose to lose any time, but will have a bigger and better business than ever before long. His sign now reads, "Dont' worry; watch us grow." Kenney and his sulkies and carts will stand any strain.

Mr. F. Cornehl, who lost nearly all his household effects by the big fire, is settled in Oakland, at 1326 Chestnut street. He will race his string of horses that Dan Misner is training, through the Montana circuit this season. He has the fast pacing mare Mollie Button, and others and will probably take Gus Lindauer's old favorite Homeway 2.14 $\frac{3}{4}$ with them.

Lady Mowry 2.12 $\frac{1}{2}$ and her

own sister a year younger, are being trained for the eastern circuits by William Cecil at Pleasanton. Both mares look as if they could trot in 2.10 this year.

There will be racing at Rocklin on July 4th. Purses of \$100 to \$250 will be given.

Robert Duncan, District Attorney of Sonoma County, is the owner of a very likely green pacer that John Quinn is training at Pleasanton. He calls him Scheley B, and the gelding is a four year and by Lynwood W. As a three year old last season Schley B paced a mile in 2.16.

Among the trotters in John Quinn's string at Pleasanton that he thinks well of is the five year old brown mare Ayers, by Lynwood W., dam May Ayers 2.23 $\frac{1}{2}$. Ayers is an untried mare, but is level headed and game and has shown a mile in 2.17 $\frac{1}{2}$, so she can be called a good prospect.

Mr. Brown of Napa, who once owned that handsome trotter Forest W. 2.14 $\frac{3}{4}$ recently purchased from William Morris of Santa Rosa, a full sister to Sonoma Girl by Lynwood W. The price paid was \$1500 and it is said the mare can trot a mile in 2.15. John Quinn has her at Pleasanton.

Mr. S. Siljan of San Jose, has a very fine two year old filly by Iran Alto 2.12 $\frac{1}{4}$ out of Ida Belle and own sister to the famous brood mare Anna Belle, by Dawn.

Frank Jermyn of Pittsburg, who recently purchased and resold the Valensin Farm, went through the earthquake and fire, and got out with his life and the clothes on his back.

Mamie R. 2.15 $\frac{1}{2}$ worked some fast halves before going east. She trotted several miles below her record, and finished her last quarter in 31 seconds several times.

One of the best fillies foaled in America this year is at Nutwood Stock Farm. It is by Lord Alton, own brother to John A. McKerron 2.04 $\frac{1}{2}$, dam Excella, a young mare by Monbells 2.23, second dam the famous mare Expressive 2.12 $\frac{1}{2}$, by Electioneer that took the record as a three year old.

Martin Carter's young mare Record Searcher by Searchlight, dropped a filly last month by Nutwood Wilkes, and has been bred to Star Pointer.

Gus Lindauer, the well known San Francisco liveryman, will have a big bill against the city. During the fire nearly every horse of the 200 in his barn was appropriated by the the authorities for relief and rescue work, and not over half of them can be accounted for. Many other stable owners are in the same fix, but like Mr. Lindauer they are not kicking.

Trotters and pacers, ponies and draft horses, saddle horses and army mules all were engaged in saving life and property during the San Francisco fire, and are now helping haul away the debris and to build up the grandest and most beautiful city on the globe.

If it is true, as reported that Murray Howe has had Ed Sanders in California all winter under surveillance, and that both were in the Palace hotel at the time of the earthquake, then it is not unlikely that the case of the prosecution in the Lou Dillon scandal was somewhat shaken.

Entries to the Merchants and Manufacturers and the Chamber of Commerce stakes will close May 15th. Both are for horses of the 2.24 class and are worth \$10,000 and \$5000 respectively. The meeting will open July 23d. The three heat plan will prevail in these stakes, and it is possible for nine horses to win money in each race.

The Stanford Stake for foals of 1905 to be trotted in 1908, will close for entries June 1st as usual. Colts, fillies and geldings now yearlings are eligible. It only costs \$5.00 to nominate. Send the money to Secretary J. A. Filcher at Sacramento. See our advertising columns for full conditions.

The present address of Prof. E. P. Heald, proprietor of Heald's Business College is 1451 Franklin street, San Francisco. The College, which is one of the leading institutions of San Francisco will be located in a new building, erected especially for its accommodations and will be better fitted than ever for fitting young men for an active, practical business life. Prof. Heald, as President of the Pacific Coast Trotting Horse Breeder's Association is already at work making arrangements for the Association to give several meetings this year.

John A. McKerron's business address is now 218 Eureka street, San Francisco. Mr. McKerron's advertisement was placed in the first issue of the Breeder and Sportsman in 1882, and although it has been enlarged, and the address changed several times since, the

ad. still stands and Mr. McKerron is ready to take orders for high class track, road and carriage harness. Those that want the best will continue to order from John A. McKerron. Remember his new address is 218 Eureka street.

Mr. T. J. Crowley, one of the Directors of the Breeders Association, is one of the luckiest Irishmen in the whole city. He intended to retire from the active business of managing a busy horse shoeing shop on May 1st, and \$1000 will cover the loss of that. He sold his Larkin street property for \$50,000 some months ago and had just moved into a new house he had built and handsomely furnished near the Park. This was outside the burned district.

Martin O'Day, one of San Francisco's famous horseshoers, who has fitted the shoes of nearly all the trotting and pacing celebrities on the Coast thirty years ago, is still in business. He now occupies a brand new shop erected on the lot where Dr. Dalziel's headquarters are, near the corner of Van Ness and Golden Gate avenues. Mr. O'Day's son is the most active man of the firm now, but Martin himself is handling the hammer part of the time. 212 Locust avenue is the location and business address.

Frank Hazzard, who has given Mr. W. H. Lumsden's fillies Bonalet 2:09 $\frac{1}{4}$ and Bonnie Me, all their preliminary work this year and who did the same last year when they were three years old, has them in fine shape at Pleasanton. Hedrove Bonnie Me, the trotter, a nice mile in 2:15 $\frac{1}{2}$ the other day, while Bonalet has not been allowed to step a mile much better than 2:20. Hazzard will take both fillies over to Ed. Benyon to race on the Grand circuit, and if they land in as good shape as they are now in, Mr. Benyon cannot help being pleased.

Bert Logan, Dr. Boucher's pacer by Colbert out of Miss Logan 2:06 $\frac{1}{4}$, looks like great goods this year. He worked a very easy mile in 2:16 at Pleasanton last Saturday, the first time he was asked to beat 2:20 this year.

Mr. John Treadwell of Oakland, was in New York when the earthquake and fire occurred in San Francisco, but hastened home. He will send his trotters Charley T. 2:13 $\frac{1}{4}$, What Is It 2:11 and the green horse Sir John each to race on the Grand Circuit this year. They will be trained and driven by Jack Curry, who will

also race Mr. Montanya's mares Brilliant Girl and Tuna 2:08½. These five should win their share of the money.

Col. J. C. Kirkpatrick, of the Palace Hotel was at Pleasanton with his entire family when the earthquake occurred. Had it not been for the great fire the Palace would not have been damaged worth mentioning. The well known horseman S. Christensen, who has been connected with the Palace Bar so many years, says not a piece of glassware in the establishment was broken by the quake. Millard Sanders, who will not say he saw anything fall or break, says he believes the building turned over three or four times and then some.

Charley Mitchell pressed his Diablo pacer N. L. B. into service and hauled a load of flour out to his beach hotel with him after the fire.

Millard Sanders bought four more Sidney Dillons last week. He purchased them for Sterling Holt of Indianapolis, from Dr. McLaughlin of this city. They are the two year old filly Direct Dillion whose dam is by Direct 2:05½ and whose second dam is the great brood mare Lilly Stanley 2:17¼ by Whippleton; a yearling full brother to this filly that Mr. Holt purchased for a stallion; a two year old filly and a yearling filly. Mr. Sanders left Pleasanton this week with 30 head of Sidney Dillons. Before he left he had worked several of them pretty fast quarters and halves. May Dillon, a four year old pacer, he drove a mile in 2:20 with the last half in 1:02 and the last quarter in 29½ seconds; Kate Dillon, three years old, paced a mile in 2:18, last half in 1:05; Lottie Dillon a three year old trotter, had shown a mile in 2:34; Carrie Dillon, three year old trotter, worked a mile in 2:26; last half in 1:08 and quarter in 32½ seconds; Ruth Dillon, two year old trotter showed a quarter in 37 seconds; Sadie Dillon another two year old trotter, a quarter in 40 seconds. Among the yearlings which Mr. Sanders has been driving, the colt out of Adioo by Guy Wilkes trotted an eighth in 21 seconds, the filly out of By By by Nutwood trotted an eighth in 22 seconds, and five more had shown eighths at the trot in better than 25 seconds. They have only been broken five weeks, yet three or four of them can show better than a 2:40 gait. They are a grand lot of youngsters and the Hoosier horsemen will be highly pleased with them when they reach Indiana.

Tuttle Bros. of Rocklin, owners of Stam B. 2:11¼, were in Pleasanton last Saturday seeing Dr. Boucher work some of their Stam B. trotters and pacers. The mare Ramona B. trotted a mile in 2:18 and Hattie T., another daughter of Stam B.'s paced a mile in 2:19. She only weaned her colt ten weeks ago. The yearling bay filly by Bert Logan out of Hattie T. is certainly one of the handsomest fillies ever seen at the Pleasanton track.

Chas. DeRyder has two pacing mares in his string that he has driven halves this year in 1:01½. They are Swanhilda, owned by Mr. McDonald of Concord and Babbie, owned by Mr. H. W. Meek of San Lorenzo. The former is by Orkney Wilkes and the latter is an own sister to Cavalier 2:12½ by Welcome.

Little Branch, the six year old trotting mare by Nutwood Wilkes worked a half in 1:06 and repeated in 1:05½ at Pleasanton two weeks ago. She is owned by Martin Carter and is being trained by Chas. DeRyder.

Mr. J. B. Iverson of Salinas, has a full sister to his great colt North Star 2:13¼. She was foaled last month and is one of twins, the other being born but partly developed and dead.

Mr. S. K. Trefry of Pleasanton is slowly recovering from a very severe attack of rheumatism, and yet unable to work his horses. His four year old McKinney stallion Kenneth C. 2:17 as a three year old, is beyond all doubts one of the handsomest young horses in California and a very fast trotter. Those who breed mares to Kenneth C. are wise in their generation.

Monore Salisbury expects to ship the East View Farm horses east this week.

Claro, the chestnut gelding by Mendocino in the East View Farm string at Pleasanton, is proving quite a pacer. Ben Walker drove him a mile in 2:11¼ last Saturday. Claro is out of Clarion 2:25¼ by Ansel, and is well staked through the grand circuit.

Millard Sanders worked S. Christensen's Stam B colt Chas. F. Kapp a mile in 2:29¾ with the last half in 1:12½ before he went east. The colt, which is a two year old trotter, and entered in the Breeder's Futurity, has been turned over to Fred Chadborne. Millard says he is one of the best prospects for a very high class trotter he has ever seen.

The automobiles certainly made good when San Francisco burned. They were madly driven, but they saved much property and carried many people to a place of safety.

Joe Cuicello has leased the big McKinney gelding owned by Thomas Murphy for the races this year. He stepped him a mile in 2:16¼ the other day with the last quarter in 31¼ seconds. He will do for the green trotting class.

Joe Cuicello showed the Pleasanton horsemen last month that Mart Rollins gelding Charley Belden by Lynwood W. is a real trotter. He worked him five heats the day of the big earthquake as follows 2.30, 2.25, 2.20, 2.12¼, and 2.13¼. The last half of the last mile was in 1.05 and the last quarter in 31½ seconds, showing he was not a bit tired.

There are 79 entries in the \$10,000 Charter Oak stake.

The \$9000 Massachusetts purse has 45 entries.

Conseula S. and Judge Green are both in training and are expected to be good this year.

All the purses closed thus far by the Grand Circuit tracks have big lists of entries. Nearly every purse advertised has more than enough entries to pay it and leave a big balance.

Mr. A. B. Gwathway of New York has kindly sent us very fine photographs of his two trotters Tiverton and Senator Mills, both of which horses will be campaigned this year.

Frank Irvington and a lot of his colts were sold at auction at Washington, Ohio, and brought very good prices. Frank Irvington is by Nutwood Wilkes 2:16½ and was bred by Martin Carter.

Anzella 2:06¾ has been sold to Russia. She won over \$25,000 during her career and beat the best in the free for all class. She was bred by Thos. Ronan, but raised by Geo. A. Kelly, now of Pleasanton, who campaigned her two years and then sold her to the Santa Rosa stock farm. Millard Sanders trained and drove for the farm the year Anzella raced on the Grand Circuit and won nearly \$27,000 with her. She has started in 31 races, of which she won 20, and was unplaced but once. She was bred to John A. McKerron 2:4½ in 1904 but failed to get in foal. She will be bred to him again before she is shipped to Europe.

Sir Albert S. is brushing a two minute clip on the New York Speedway, and is going sound.

A saddle horse sold for \$2500 at auction in New York week before last.

Dr. McCoy will try to lower the record of Admiral Dewey 2.04 again this year.

Col. J. C. Kilpatrick intends putting several horses in the hands of E. E. Gray, the speed merchant of Hinsdale, Illinois, for sale.

John Minneley of Meadville, Pa., who bred Morning Star 2.04 by Star Pointer owns a three year old sister and a yearling brother to him. The filly is very fast and the colt showed speed as soon as he was hitched up. John Heard who developed Star Pointer and Morning Star says the filly looks faster to him than either did both with the same work.

The Hillsdale, Michigan, annual fair is a hummer. Harness races are the chief attraction and enabled the fair to make a profit of \$2500 last year. And the ladies of the churches who ran the dining rooms and lunch counters on the grounds during the fair made over \$5,000.

Mr. Geo. A. Ryan, formerly editor-in-chief of the Chicago Horseman is now one of the editors of that excellent publication, The Western Horseman of Indianapolis.

There is nearly \$20,000 in the vaults of San Francisco banks that belongs to the Pacific Breeders' Futurity Stakes. It is safe and is still drawing interest. The stake book was saved and the stakes will be trotted. Cheer up, boys, purses will soon be ripe.

It will take a much harder quake than the one of April 18th to shake our confidence in the future of California and the American trotting horse.

The Breeder and Sportsman is a little disfigured but it is still in the ring.

The Grand Circuit For 1906

Detroit, Mich., July 23-Aug. 4
Buffalo N. Y. Aug. 6-11
Poughkeepsie N. Y. Aug. 13-18
Readville, Mass. Aug. 20-25
Providence R. I. Aug. 27-Sept. 1
Syracuse N. Y. Sept. 10-15
Columbus O. Spet. 17-22
Cincinnati O. Spet. 24-29

Adam G. Goes to Pleasanton

J. W. Zibbell took five of his horses to Pleasanton last Tuesday and will train them there for the races this season. He came over from San Francisco driving Adam G, 2.11 $\frac{1}{4}$ to pole with a two year old by Tom Smith. The youngster was putting on all sorts of airs and nickering like a cross roads stud horse, but Adam G. stood the excitement of the trip through San Francisco's burned district and the ferry boat ride like a transfer horse. The McKinney gelding looks in the very pink of condition and there is not a trotter in America with a cleaner or sounder set of legs under him. Mr. Zibbell says that while he was not burned out and everything is all right with him, the big fire has made a change in his plans and he would like to sell Adam G. Here is a horse good enough to start in any class of trotters, no matter where they hail from, nor how low their marks. He is a 2.05 trotter sure and that rate of speed wins the money these days. Mr. Zibbell took with him to Pleasanton the black horse Dixie by Rey Direct, a big trotter of unknown breeding that looks like a 2:10 prospect, and Little Fox by Seymour Wilkes. On his arrival at Pleasanton Mr. Zibbell will add to his string F. Gomet's three year old Prince McKinney, winner of the two year old trotting division of the Breeders Futurity of 1905.

His son Willard Zibbell is in charge of the stable near the chutes in San Francisco, and has about 30 horses stabled there, being assisted in jogging them by Wm. Hammer. There is plenty of room at the Zibbell stables to accommodate fifteen or twenty additional horses and Mr. Zibbell desires it stated that he has not raised the prices any since the fire. There are plenty of excellent box stalls for those who desire them and the best of hay and grain is kept on hand at all times.

C. C. Crippen says Diamond Mac, three year old colt by Kinney Lou is the best colt and trotting prospect he ever saw, and that he possesses more of the qualities that are necessary in a trotting race horse than any other colt he ever handled. This coming from the man who broke Arion 2.07 $\frac{3}{4}$ (two year old record 2.10 $\frac{3}{4}$), trained Eleata 2.08 $\frac{1}{4}$, Lisonjero 2.08 $\frac{1}{2}$, who broke and developed hundreds of others and who drove Jasper Paulsen a mile in 2.20 as a three year old with only twenty-five days track work, means that Diamond Mac must indeed be a great colt. And why should he not be, when we consider that his sire is the greatest trotting

stallion of the McKinney tribe, and that he inherits the blood of the immortal Electioneer through his dam?

Fancy, three old record 2.26 by Welcome 2.10 $\frac{1}{2}$ has been bred to Kinney Lou 2.07 $\frac{3}{4}$.

Electress Wilkes 2.28 $\frac{1}{2}$ by Nutwood Wilkes, owned by Mr. J. C. Mowry of Newark, Cal., foaled April 4th, a big strong colt by Kinney Lou, and has been bred back. She is the dam of Lady Mowry, (four year old record 2.12 $\frac{1}{2}$), and her full sister Ollie M. is one year younger, but just as fast a trotter.

Diavola by Diablo, dam Lilly Langtry, dam of five in the list by Nephew, has been sent to be bred to Kinney Lou. This young mare is the dam of the very promising three year old trotting colt Ed McGary now in Budd Doble's stable at Lawrence Stock Farm, and owned by Mr. W. J. Dingee of San Francisco. Ed McGary is by Zombro 2:11 and was bred by the late Judge Green. He a royally bred colt, a grand individual, and a slashing gaited determined young fellow that has all the ear marks of a high class race horse trotter.

Laud C. Gates, of Modesto is very happy over the arrival at his farm on Easter Sunday of a handsome colt by Almont Boy out of his Arabian mare. Another fine colt on this ranch is one by the McKinney trotter Carlok in 2.20 $\frac{1}{2}$. It is marked just like its sire and is a beauty. With an Almont cross through its dam, it should be able to go some. Mr. Gates writes us that there will be a swell bunch of trotting foals in that locality this year.

Henry Delaney will take Zolock to Oregon at the end of the season here, June 1st. Zolock should get some of the best mares in the north this year.

THE STATE FAIR OF 1906

The Directors of the California State Agricultural Society have determined to put forth every effort possible for reviving interest in the institution, enlarging its field of operations, and increasing its usefulness to the great industry for which it stands. This is a big State with varied interests, but it is the hope and purpose of the present Board of Directors to extend the work and benefits of the Society to the remotest parts of California and to all the industries that are comprehended by the word Agriculture in its broadest sense. In this endeavor they ask the co-operation of the press and the

people. They realize that such co-operation is essential to success—to the creation of a sentiment that will make their work effective.

It is the desire of the Directors that the Secretary shall reach out for the best that is being done in this State, and in this country, and in other countries in industrial lines, and give the information thus obtained to the people in periodical bulletins.

It is the aim to get in closer touch with the Agricultural Department of our State University, with the Agricultural Department at Washington, with the Experiment stations of the Federal Government, with other State agricultural societies, and with Consular reports that have relation to our interests, and keep our people advised of the latest and best that is being done in the world in those particular industries that most concern them. In short, the intention is to extend the work of the institution along all lines of endeavor in which it may be of service to the people of California within the limits of the great field comprehended by its name.

The work immediately in hand is the preparation for the Fair of 1906, which is scheduled to open on the 25th day of next August. In harmony with the general purpose to improve all features of the Society's work, it is the determination of the Directors to make this the biggest, best, most attractive, and most comprehensive display of livestock interests and other industrial resources ever assembled in California. The aim will be to secure all products of the State from every part of the State, and present them in a manner that will not only be attractive, but a source of instruction to every one seeking a broader knowledge of California's possibilities. With proper encouragement to reinforce the high aim of the Directors, the State Fair can be made the greatest annual event in California, and the Society one of the stongest instrumentalities for the development on higher lines of the State's agricultural and other industrial resources.

In appealing to the Press to help accomplish these aims, the Directors realize that they are appealing to the people—to every enterprising man and woman, boy and girl, in California—and they especially appeal to organized bodies, such as Patrons of Husbandry, Chambers of Commerce, Boards of Trade, Merchants' Associations, Manufacturers' Associations, Producers' Associations, Promotion Committees, and all other bodies engaged in forwarding the interests of California, or of any part or industry thereof.

If every agency in the State

interested in the State's welfare gives such encouragement to the State Agricultural Society as the interests it stands for deserves, its influence for good will be felt in the remotest corners of California, and it will become, as it ought to be, one of the strongest arms of the State Government for the advancement of those instrumentalities which make for the betterment of the industrial classes and a higher civilization.

J. A. FILCHER,
Secretary.

Bell Ayers, the full sister to Jasper Ayers 2.09 and May Ayers 2.23 $\frac{1}{2}$ foaled a dark brown or black colt by Robert Direct on January 29th. This mare and foal are owned by Dr. J. H. Wagner of Selma, California and the youngster is entered in Breeders Futurity No. 6. He is a very likely colt. Dr. Wagner is breeding Jaspine Ayers, dam of Jaspine 2.14 $\frac{3}{4}$ to Robert Direct this year and should secure a real trotter as all this mare's foals are very racy. The Doctor's two year old colt Don Gentry by John R. Gentry 2:00 $\frac{1}{4}$, dam The Donna Inez, dam of Vena Inez 2.20 $\frac{1}{4}$ by Stranger, is developing into a large fine looking colt that is almost the exact counterpart of his famous sire, and if looks and actions count for anything should some day be a great horse. S. C. Walton of Fresno is training him, and last week drove him a half in 1.17. This is remarkable for the little work the colt has had. He is entered in the Pacific Breeders Futurity No. 4, and will race this summer as a two year old. Don Gentry has repeatedly stepped eighths in 18 seconds. He will be two years old on the 20th of this month.

All the Records of the Pacific Coast Trotting Horse Breeders Association with the exception of the Stake Books and a statement of the financial condition of the organization at the close of last year, were burned. There is nearly \$20,000 belonging to these stakes now on deposit in three of the best banks in San Francisco, and it will be ready for disbursement when the stakes are trotted and paced. If you want to win some of that money keep your colt eligible. First, second, third or even fourth money will come in handy now.

San Jose, San Mateo and Santa Cruz will undoubtedly fall into line if Fricso sets the pace.

Answers to correspondents
Subscriber, Santa Inez—Lou Dillon's best time for a mile is 1.58 $\frac{1}{2}$.

William G. Layng intends leaving for New York on the 18th inst. He has written up the earthquake for the Australian and New Zealand papers.

John A. McKerron, the best harness maker in the world, was completely burned out by the fire. Mr. McKerron went to his farm near Gilroy until the city cooled off a little.

Work is being rushed on the new athletic grounds in Golden Gate Park, despite the earthquake.

Dr. McLaughlin, Jos. Ciucello and Jack Curry were at Pleasanton when they heard San Francisco was on fire, but took the first train for Oakland, secured a gasoline launch and reached the city by way of the Union Iron Works. They arrived in time to be of great assistance to relatives and friends in helping to get them and their belongings to a place of safety.

The third annual tournament given by the Rocklin Gun Club was held Sunday, April 30th, and proved to be a very successful, considering the earthquake and fire, which affected the whole country. Out of the 47 shooters present, 38 were shooting Winchester "Leader" and "Repeater" shells. Event No. 6 K-U Co. medal championship of Northern California was won by J. W. Humble, score 20 straight, using Winchester "Leader" shells. Event No. 7 Mdse. 1st prize captured by J. Hoxie, making twenty straight with "Leader" shells. Event No. 8 pair, doubles for Gibson cup. Won by C. M. Troxel, score 18 out of 20. Mr. Troxel always shoots the "Pump" gun and "Leader" shells. Mr. Gibson also tied for cup, but withdrew. Event No. 9 Three-man team shoot. Championship Northern California won by Messrs. F. Rubstaller, F. M. Newbert and M. Newbert. Score 56 out 60. Each of these gentlemen used "Pump" gun and "Leader" shells.

Marysville will give a harness meeting the last of this month for the benefit of the San Francisco sufferers.

About 200 second payments in the Pacific Breeders Futurity Slakes No. 6--\$7000 guaranteed have been made to date and under the vales payment due on May 1st may be made as long as the legal holidays continue.

John Hussey is located at the Indianapolis track with the following horses: Chase, 2:07 $\frac{1}{4}$; Barajah, 2:14 $\frac{1}{4}$; Miss-in-Law, 2:11 $\frac{1}{4}$; at three year-old by Boreal, with a trail of 2:15 $\frac{1}{4}$, and several other that look good.

Detroit Entries Close May 15

Detroit's great classics, the M. and M. \$10,000.00, 2:24 Trot and the C. of C. \$5,000.00, 2:24 Pace are the only rich purses left for green horses. Entries to these events as well as the \$2,000.00 2:12 Trot and \$2,000.00, 2:08 Pace close Tuesday May 15, so the time is now short to get aboard and help open the Grand Circuit as Detroit's Great Blue Ribbon Meeting July 23 to 27. The time seems to have passed when the hogle of green horses with fast trials scared men with really good horses and kept many from entering.

So many of the much touted sensations have failed to make good that owners no longer take a chance on being left out and losing all chances of rich engagements. For horses without records or eligible to the 2:24 classes there is only one M. and M. and only one C. of C. and for horses left out May 15, there are only small purses left. It is the Golden Opportunity to make green horses valuable, by giving them large earning capacity. The 2:12 Trot and 2:08 Pace take care of the record horses and afford valuable engagements for any kind of a stable from one horse up. Early payments are very low so those who take a chance and later withdraw are put to only slight expense.

Liberal conditions and assurance of Detroit Treatment, a square deal for everybody are appreciated among the horsemen as proven by the general satisfaction at the announcement of the big meeting. The comparatively late closing of these stakes is profitable for the horsemen who can now size up their candidates so much the better. The wise man will make his entry because he can get out at slight cost but if he is left out he cannot get in at any price.

Horses must be named Tuesday May 15, when the entries close. Write now for entry blanks to Albert H. Moone, Secretary, Room 19 Campau Building, Detroit, Mich.

No matter what the age of the stallion or mare to be bred, a Safety Impregnating Outfit should be used by every breeder. There should be practically no use of the return privilege and less tax on the horse through the proper use of one of these outfits, and as it cost only \$7.50 and is guaranteed to produce results, there is no excuse for being without one. Made and sold by I. O. Crittenden, 9 Fox Bld'g., Elyria, Ohio.

The famous trotting mare, Margaret S., 2:12 $\frac{1}{2}$, by Director, 2:17, dam May Day, by Cassius M. Clay, Jr., 54, now 20 years old, is being driven on the road in Philadelphia. She took her record to high wheel at Independence, Iowa, as a four-year-old.

Senator Bailey as a Breeder

Hon. J. W. Bailey, whose speech in the highest forum of the country at Washington last week commanded the earnest and critical attention of the nation, and who is eulogized by great organs of public opinion, including the Chicago Tribune, as a constitutional lawyer with "no superior in the senate," is making rapid progress as a breeder of trotting horses. He believes in sticking closely to winning families, and contends that there would be fewer disappointments if mares were more frequently mated with stallions old enough to have established reputations for speed potency. Senator Bailey breeds and develops horses because the problem is an alluring one to him. He pays no attention to the odds of the betting ring, but it is good to see the flush of enthusiasm on his face when one of his young horses is in front. Senator Bailey is a valuable member of the Board of Appeals of the National Trotting Association, and he is a firm advocate of discipline. In public life he represents ideas, and is forcible in giving expression to them.

Ventilation of Stables

Many stables are too small to accommodate the number of horses kept in them, and these buildings, unless they are carefully ventilated, will either expose their occupants to dangerous draughts or else become nothing but places in which diseases may be transmitted from one animal to another. A small, illventilated stable, be it remembered, is a prolific source of wind troubles, as people can discover for themselves if they are present when doors are first opened at the end of a long winter's night. On the other hand, a stable can almost be too large and airy at this time of the year, that is to say, if the condition of the coats of the occupants is a matter of concern to the owner. Of the two evils, however, the latter is decidedly the lesser, for the heat of the horses' bodies can be kept up by the extra rug or two as circumstances demand. Regarding the question of clothing, it may be remarked that in this connection, as in most other things, the best is invariably the cheapest in the long run, and therefore it is false economy to invest in low-priced articles. A good woolen suit will last far longer than a shoddy one, and in addition will keep its wearer warmer and more comfortable, whilst after a little wear it will look much better, which is a matter that is worthy of consideration.

Walter Taylor is now located at the Dayton, Ohio, half-mile track and will have quite a large stable for 1906. He raced successfully the last season the pacing mare Lilly R., 2:13 $\frac{1}{4}$, by Nuthurst, 2:12.

The Coggeshall bill, increasing the tax on the incomes of racing associations from 5 to 7 $\frac{1}{2}$ per cent, has passed the New York senate.

M. J. Gibbins, of Grand Rapids, Mich., purchased the fast trotter Dan Wilkes, 2:09 $\frac{3}{4}$, for \$1,000 at the combination sale at Coldwater.

The early closing stakes offered by the Hudson River Driving Park Association for its Grand Circuit meeting at Poughkeepsie, N. Y., have all been filled.

The once great mare, Annie Burns, 2:10 $\frac{1}{4}$, by Bobby Burns, was bid off at the Washington Court House race, by Matt Laird, Mansfield, Ohio, for \$600. She is in foal to Rey Direct, 2:10, owned by Mr. Laird.

Wm. Estes, Lexington, Ky., will train a fine stable of horses at Portsmouth, Ohio, this spring. He has the following in his charge at present: Harold Brooks, P., 2:09 $\frac{1}{4}$; Daisy Elder, 2:14 $\frac{1}{4}$; Craton E., a very fast green pacer by Box Elder; Joe Astral, 2:22 $\frac{1}{4}$, by Guardsman; Moon Maiden, F., by Jay Bird, that stepped last year in 2:14, and several other good prospects.

M. S. Claypool, the well known breeder at Muncie, Ind., will campaign his good trotter James B. Duke, 2:18 $\frac{1}{4}$, by Sam Coates, dam by Sable Wilkes, again this year. Last year, this fellow started fifteen times, and got 11 firsts 2, seconds, 1 fourth, and was once behind the money. Mr. Claypool also has several promising youngsters by McKinney, Oakland Baron, Jr., Highwood, and other great sires, that he will train this year.

The Milwaukee Driving Club will in all probability use the State Fair track again this summer for its Saturday afternoon matinee races. The State Fair board has offered the horsemen the park at the same rates as were paid last year, and as it is the only available place at present for racing purposes in the city it will no doubt be rented for matinees from June 1 until the time of the annual State Fair. A meeting of the club will be held soon and the question of a track will be definitely settled then.

Messrs. E. Lee Lecompte and M. E. Gore, of Cambridge, Ml., have purchased of western parties the handsome stallion King Pointer, by Star Pointer, 1:59 $\frac{1}{4}$, dam Lucy Hal, by Grandview. King Pointer is one of the the most handsome stallion in the east, standing 16 hands, weighing 1,250 pounds, and the breeders of his country should be proud to have such a grand bred horse among them, as his breeding cannot be improved on, and as an individual he cannot be beaten.

Rod, Gun and Kennel

Conducted by J. X. De Witt

Charcoal Sketches

The earthquake on Wednesday, April 18th and the conflagration immediately following put the entire business portion of San Francisco out of commission for the time being. The total area burned over and completely ruined embraces about 2600 acres at least. The monetary losses run up into hundreds of millions. San Francisco for two weeks past has been a huge camp, everybody, without distinction of class or quality, was placed on practically an equal footing. Without an adequate supply of food, fresh water or light, temporary makeshifts of all kinds being compulsory. 300,000 people that were burned out of business and homes, faced the greatest calamity of modern history with fortitude and courage—and even good natured jokes at dire misfortune.

Amid scenes of ruin and desolation beyond realization of the most vivid imagination, in many business locations before the mass of debris had cooled, temporary structures have been erected for the resumption of business. Of the thousands of business places that were, it is the exception where one is now without a sign board address or some other evidence of the business vitality of the former occupants. The daily press—five papers, all were issued regularly and for the past ten days their columns have been crowded with "ads." Men who never before advertised have double and treble column display ads.

With our business community there is shown a unanimity of purpose and a spontaneous coherence in effort that will have this inevitable result—a greater, grander and better San Francisco.

In the broad, strong current of general enterprise our dealers in sporting goods, fire arms and fishing tackle are not one whit behind the times. Among the pioneers in the ranks of live up-to-date business men we mention with pride the following well known manufacturers, firms and Eastern representatives:

Clabrough, Golcher & Co.'s well known sporting goods emporium, formerly located at 538 Market street was gutted by the fire. The remains of a large and valuable stock of shot guns can now be seen in the cellar—a mass of twisted and blackened scrap iron. The balance of one of the choicest stocks of sportsmen's and outing goods also went up in smoke. This big loss will be replaced with

a larger and, if possible, better stock of goods. Mean time the temporary office of Clabrough Golcher & Company is located at 12 Cole street San Francisco where all communications and orders should be addressed. An order for a single trigger L. C. Smith a Clabrough, Parker or Ithaca gun etc. will receive the same prompt and courteous attention as if business were still going at the old stand.

Although the large local stock of "Old Reliable" Parker guns in the various sporting goods establishments of this City were destroyed there is a liberal supply of all grades to be found with all dealers on the coast.

The Eastern addresses of Parker Bros. are given in the Parker Gun ad.

The L. C. Smith hammerless, single trigger or any other grade of shot gun can be had either by sending an order direct to the Fulton Arms Company, Fulton New York or by placing the order with any Coast dealer. The most of the the stock of L. C. Smith guns in the local sporting goods stores were burned up. This loss however does not affect the Fulton Arms Company's factory. For the present we will refer our readers to the Fulton Arms Company at Fulton N. Y., for further information or catalogs.

The DuPont, Infallible, Laflin and Rand, New Schultze, etc. E. C. (Improved) powder agency headquarters are now located in Berkley, 2171 Shattuck avenue, P. O. Box 29, where the new offices of the California Powder Works have been established.

Just to remind shooters what is going on at some of the eastern shoots we give an excerpt from a recent communication from Wilmington, Del., regarding some general averages reported:

First General Average at the Muncie, Ind. Tournament on April 19th was won by M. R. O. Heikes, who broke 189 out of 200 using "Infallible" smokeless.

First Amateur Average was won by W. N. Wise of Carmel, Ind., who broke 188 out of 200 using DuPont Smokeless and Mr. Wise also tied with Mr. John S. Boa, who also used DuPont Smokeless, for second General Average.

Third General Average was won by Mr. C. O. Lecompte who used "Infallible" Smokeless and who broke 187 out of 200.

New Pattz, N. Y. on April 19th, First General Average was won by Mr. J. S. Fanning, who broke 180 out of 190 using "New Schultze."

We had a pleasant interview last Sunday with Mr. E. E. Drake, Pacific Coast Manager of the United Metallic Cartridge Company and The Remington Arms Company. The temporary offices of both concerns are now located in Mr. Drake's residence, northwest corner of Laguna and Sutter Streets, San Francisco.

Mr. Drake stated that all of the books, insurance and other important papers in the office at 86-88 First street, fortunately were saved. He received early notification from Meriden, Conn., that ten carloads of goods were on the way for the Coast branch—and that more goods would follow. Arrangements are under way to house all goods received. The Pacific Coast Branch, under Mr. Drake and his corps of able assistants, will be in a position to handle local and Coast business by the middle of May. At the present time orders are being filled directly from the East, where there is an ample stock available. Delays in transit are practically nil for this particular territory is given preference in the forwarding of all kinds of supplies by the various railroad lines.

Mr. Drake announces that the trade need not feel uneasy over the filling of orders. Goods will be rushed through. All communications for the U. M. C. Co. or Remington Arms Co. until further announcement, should be addressed to E. E. Drake, 1700 Sutter street, San Francisco, Cal.

The Winchester Repeating Arms Company's Coast Branch, formerly at 125-137 First street San Francisco was cleaned out of everything except the courage and energy of the manager and his corps of assistants. The Winchester Repeating Arms Company proposes to stay here and grow up with improved San Francisco. Under the able supervision of Mr. A. Muller the Coast Branch is now in working order at 1422 Park street Alameda Cal. where the temporary office is established. The W. R. A. Co.'s temporary warehouse is located at 1517 Park street Alameda. Immediate orders for goods will be attended to. Large consignments of rifles, shotguns, shells and fixed ammunition are now on the way from New Haven. Arrangements can be made for shipments direct from the East.

The facilities of the Winchester Repeating Arms Co., are only handicapped by the little extra time that may be necessary under the present circumstances in filling orders. Otherwise the business of the Coast Branch will proceed as usual.

The Shreve-Barber Company's

two stores passed up in the general demolition of business houses. The well known Market street store, which was superbly stocked now is a mass of debris ten feet deep. Announcement of the new location will appear later.

Ithaca guns are just as good now as before the fireworks two weeks ago. Notwithstanding the destruction of a splendid line in the local stores, there will be no difficulty in getting an Ithaca gun. Phil B. Bekeart, 2330 Alameda avenue, Alameda or the Ithaca Gun Co., Ithaca, N. Y., will be pleased to furnish further information.

The Olympic Arms Company, Market street, near Fourth, have a temporary headquarters at the Pacific Hardware and Steel Company, 7th and Townsend streets, this city. The immense warehouse of the latter concern was uninjured by the flames or quake.

The Elk Outing Goods Company, 34 Geary street, was put out of business entirely. Kaplan, Julius Bruns, Bonn and Harry Scott had started off under most encouraging auspices. Announcement of new location, etc., will appear later.

Chas. H. Kewell's neat little sporting goods bazaar helped to swell the general contribution for the conflagration we regret to state. "Charley" will get in line again at short notice, meanwhile his temporary business address is 658 Waller street, near Scott, this City.

San Francisco shooters are not the only sportsmen who use Ballistite. Baker and Hamilton are supplying orders from their branch houses in Sacramento and Los Angeles. The local address of Baker and Hamilton is No. 113-7 Berry St.

Selby Factory Loaded shells can be had by sending your orders to the Selby Smelting and Lead Company, Vallejo Junction, Contra Costa County. Ask any dealer for Selby Factory Loads and you will be supplied. The local invoices of Selby loaded shells that were destroyed was only a drop in the bucket comparatively. You can get all of these loads you desire.

The California Northwestern Railway and the North Shore Road, notwithstanding the destruction of the main offices are making all arrangements for summer outing and fishing resorts. The main offices are now located in the Ferry Building.

Phil B. Bekeart is a business man of resources and the courage to evolve positive results from any enterprise he is interested in. Within forty-eight hours of the total loss of the warerooms and stock of the Phil B. Bekeart Co., 114 Second St., San Francisco, temporary offices were opened and business resumed at 2330 Alameda Avenue, Alameda, Cal. This business house is the Coast agent for thirteen Eastern firms (see ad.) manufacturers of fire arms and sporting goods. The following letter head is not persiflage but a sample of the undaunted energy and gameness of the San Francisco business man and is merely a passing quip at fate. Men who have the disposition to joke in the face of total loss are hard men to down.

The California Powder Works have established a new office at 2171 Shattuck street, Berkeley, P. O. Box 29. Most of the books important documents type writing machines and office fixtures of the combined powder interests conducted in the Wells Fargo & Co. building were saved. Mr. Clarence A. Haight the popular representative of the DuPont products can be addressed at the above mentioned location.

Don't for a moment believe that Spratts is out of business. Thomas Banks is still located at 1324 Valencia street, Spratts' Coast headquarters which was luckily without the burned zone. A supply of dog biscuit, remedies soaps etc. is on hand, enough for temporary demand and lots more of Spratts goods are on the way from the East.

W. W. Richards was established in business across the bay 48 hours after the unpleasantness started. "Ole Bill" saved all of his fishing tackle and guns. He says it was the greatest show for the money he ever saw.

Clabrough Golcher & Co. should be credited with a broad mark on the tablet of fame. With the loss of a \$100,000 stock staring the firm members in the face on

the historic Wednesday morning the first articles taken out of the store were all of the guns of the customers that were stored in the cellar gun rack. Among them these guns were many valuable pieces owned by some of our prominent trap shots and field devotees.

Clarence Haight lost several fine guns. So did Clarence Nauman. Pete McRea's gun was saved by "Doc" Ayers.

Wednesday and Thursday when there was a general abandonment of the residence portion of the burned district east of Van Ness Avenue, we saw hundreds of guns, in cases, carried to safety by the refugees. Among those carrying guns were many ladies who had charge of a sportsman's favorite weapon. The fair sex also seemed to be very devoted to the saving of fishing rods and creels.

W. S. Wattles, of the U. M. C. and Remington agency, proved to be a good fire fighter. He organized a bucket brigade on Russian Hill and through his efforts were saved several houses on the hill, including his own residence.

Clarence Nauman, Edgar Foster, Eugene Forster, Billy Hillegass, Clarence Ashlin, Walter D. Mansfield, Alex. T. Vogelsang, Charley Vogelsang, Ed. Wands, Thos. L. Lewis and others we met were all burned out. Most of them lost all their guns and fishing tackle.

We saw Mastersen and Lynch at work on Drake's dining room table getting a trial balance.

George Jackson was one of the lightning change brick handlers on Market street during the early stage of the temporary inconvenience. We met George mounted on the hurricane deck of a pinto pony and riding up Market street Monday afternoon. He stated "There is a greater demand for Napa Soda than ever; we are rushed."

Fayette H. Reed, the President of the San Francisco Fly-Casting Club, received a telegram from the Chicago Fly-Casting Club which stated that the club by the lake is sending aid to the Coast. President Reed notified the Eastern club to send contributions direct to the proper authorities.

We met Champion Walter D. Mansfield of the Fly Casting club in the post office one day last week. Mr. and Mrs. Mansfield are located in a tent in Golden Gate

Park. He said. "I am having a better time than I've had for years. This camping out is all right." Mr. Mansfield is the recipient of the following dispatch from one of those Chicago fellows who have a fancy for fooling with fishing rods:

"Do you or any of the club boys need funds?"

T. H. BELLINGS.

The dispatch was fortified by a letter, which arrived later, giving directions for drawing on a Chicago bank. Comment here would be futile. Such unselfish generosity and solicitude as is in the make up of Bellows makes life, however dark the present may be, figuratively a path of sunshine and roses. All honor to T. H. Bellows.

The contemplated banquet of the San Francisco Fly-Casting Club this month, it is possible, may take place after all.

Carlos G. Young, who was lucky in his residence location, was one of the first to offer aid to his less fortunate friends. An ad in one of the dailies invited as many anglers as he could accommodate to take up quarters in his house.

John Butler is located at his residence, 2209 Steiner street. In a business circular to country patrons he states that 400 barrels of his choicest stock was safe in a bonded ware house. Some fellows have so much luck that invisible bristles grow on the backs of their necks.—For two weeks past this has been an exceedingly dry town.

Billy Hillegass, whom we met on Market street Tuesday said he "was burned out completely and lost all his fishing tackle." Commenting further he remarked, "Well, I guess it will be a good thing for next year's fishing. The large mob of anglers will be kept away from the nearby streams for the season and that means plenty of trout next year."

Ed. Wands hailed us as we were "hiking" out Market Street on the afternoon of April 19th. "Hey, Jack! come over here and help me watch my house burn up." Which we did and a good, brisk fire it was.

Edgar Forster can handle and stack sacks of flour, etc., with the same grace and precision that he runs a tournament.

The Pacific Coast Trap Shooters' tournament billed for Vallejo at the end of this month has not been declared off to our knowledge.

The Interstate shoot scheduled for September, at Ingleside, has a stumbling block in the way of hotel accommodation for visiting shooters to San Francisco. However September is quite a way off and much may be accomplished by then.

On a recent trip to Los Angeles we visited the L. A. Gun Club grounds near Sherman during the tournament. There was a strong bunch of powder burners on the firing line. Hip Justins, Dick Reed, W. D. King Jr., Emil Holling and W. H. Seaver made up one squad of pulverizers.

Breer, Gus Knight, Mills, the Juilan Brothers, W. H. Varien and Greene of Monterey, Guy Lovelace, J. Ed. Vaughan and others were in the firing line and all shooting well.

The southern circuit took in Santa Ana, two days, San Jacinto, three days, and San Diego after Los Angeles started the ball rolling.

The San Diego grounds are located on the "island" just back of the Coronado Hotel, and are, it is reported, the best trap grounds in Southern California. We hope to get in touch with our trap shooting information shortly and keep our readers posted on general trap shooting news.

The Northwestern shoot next month will draw a large crowd of shooters to Walla Walla.

Among the miscellaneous losses dogs were also on the inventory. During the days immediately following the blaze, the unburned districts, open squares and adjoining hills of refuge were overrun with stray dogs. Many of the poor homeless and ownerless animals were shot by the soldiers. For what sensible reason we cannot divine.

President John E. DeRuyter of the San Francisco Kennel Club left San Francisco on a honeymoon trip April 16th. He returned last week—to pay attention to his growing real estate business. John L. Cunningham met him on his return and among other doggy matter (just think of it), these two fanciers took the time to talk dog, both burned out too) discussed. DeRuyter said, "We ought to have one show if we give it in a shed." Thinking it over we agree with him, and who knows but what we will pull off a good show after all. The spirit, the men and women and the material is here for the holding of one of the most original bench shows in the history of dogdom.

In an outpouring procession of threatened residents of Clay street hill on Thursday morning we saw a fleeing house wife whose energies were devoted to the safety of five Japanese spaniels. The two parent dogs, and carking good ones they were too, were carried in arms and three fine looking puppies were on leads. This poor woman's devotion should have been rewarded with the ultimate safety of her pets. But she had the time of her life with the pups on the leads.

Apropos of shows, we met Secretary Dr. Watkins of the San Francisco Bull Terrier Club at the Ferry front on April 28th—the date for the club specialty show. He had two fine Bull Terriers with him. Edgecote Di and a son of Edgecote Joe, both in show fettle and condition. Watkins was full of enthusiasm then as when the show was apparently an assured fixture. To tell the truth, we held an impromptu show then and there but this is presilage and we will pass on to.

David Cresswell of Cocker fame.—Cresswell is a genial, wholesouled fancier and has a heart as big as a mountain. Ever since the local disturbance Cresswell has been a prominent figure in the executive work of the Mission district Relief Committee, a body of good Samaritans that looked fater the wants of at least some 25,000 people in their territory. Cresswell from the start conducted a sub-station for the distribution of shelter tents, clothing, blankets, footwear, etc., and to his untiring efforts may be credited the relief of hundreds of distressed and homeless people in his district.

We regret a lack of space with which to give the Southwestern Kennel Club the recognition which is due. We had the extreme pleasure of meeting the officers and members of the club at the recent show in Los Angeles.

The Southern fanciers are an enthusiastic coterie of sportsmen and seem to take great pride in making visiting fanciers comfortable. The show itself was a very classy affair and a credit to the club. Doggy affairs in the citrus belt are in excellent shape; we would not be surprised if there were two or three shows in the south every year. We will endeavor to give an extended report of the Los Angeles show next week.

Wm. Bay's Irish Water Spaniels were not within the recent danger

line nor was Wm. Wattson's grand old dog Ch Dennis C. A bitch sent to Dennis for service escaped from Mr. Wattson's place has been non est since, we regret to state.

S. Christenson and the writer were neighbors on Clay street hill, a district that was swept bare during Thursday's advance of the flames. Chris saved his fine Chesapeake Bay dog, our good English Setter bitch broke away from her lead and we fear went back to quarters that were subsequently a mass of red hot coals. All efforts to find her during the limited time of getting out of the threatened quarter were unavailing.

It strikes us that Portland sets a bad example in inviting an individual to judge who has been ruled off for life by the California Coursing Board, and was disqualified by the Pacific Kennel Club for conduct prejudicial to dog shows at a Portland show. This fellow and Isaac G. Morgan removed, surreptitiously, a number of the latter's dogs from the show building. The handler, and person we refer to, Bradshaw, afterwards gave the judge, Fred Mansell of London a dose of low Billingsgate that only he is capable of giving in full vulgar plentitude. Bradshaw was afterwards suspended from the Western Kennel League for cause.

At Los Angeles we heard Bradshaw give utterance, in the ring, to remarks that were a reflection on the intergity of the judge. This matter should have been acted upon summarily by the bench show committee. We trust that the Southwestern Kennel Club officials will bring the matter before the American Kennel Club for proper action.

WARRANTED TO GIVE SATISFACTION

Gombault's Caustic Balsam

has imitators but
NO COMPETITORS

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Sprain, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all bunches from Horses and cattle.

As a human remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

MEMBER OF GRAND CIRCUIT ANNOUNCES ITS

TWENTY-THIRD ANNUAL

BLUE RIBBON MEETING

July 23 to 27, 1906

Entries close Tuesday 15, when horses must be named.

STAKES

Merchants' and Manufacturers', 2:24 Class Trot, \$10,000	
Chamber of Commerce, - 2:24 Class Pace, \$5,000	
- - - - 2:12 Class Trot, \$2,000	
- - - - 2:08 Class Pace, \$2,000	

CONDITIONS

Entrance fee 5 per cent with an additional 5 per cent on the gross amount of each heat from the winner of any division of same. No nomination will be liable beyond the amount paid in, provided a written notice of withdrawal is received by the Club at the time any payment falls due.

The Main Race and Consolation of the Merchants' and Manufacturers' and Chamber of Commerce Stakes, also the 2:12 Trot and 2:08 Pace, will be **Three Heats of One Mile Each**. Should there be a dead heat between two or more horses in any of the first three heats, the money in the dead heat will be divided equally, but should two or more horses stand equal—tied—in the summaries for first position at the finish of the third heat, they shall race an extra heat in order to declare a winner of the race.

A distanced horse shall be entitled to money already won, but he shall not be eligible to start in the Consolation Race should the amount won exceed \$450 in the M. & M. and \$225 in the C. of C.

The Merchants' and Manufacturers' Stake will be divided as follows: \$1300 to the winner of each heat in the Main Race. \$700 to the second horse in each heat, \$500 to the third horse in each heat and \$500 to the winner of the race. In the Consolation Race, which is to be trotted three days from the date of the decision of the first race, and is open only to horses that start and do not win more than \$450 in the Main Race, \$300 will be paid to the winner of each heat, \$200 to the second horse in each heat, \$100 to the third horse in each heat, and \$200 to the winner of the race.

In the event of there being less than three horses eligible to the Consolation Race, there will be paid to the fourth horse in each heat in the Main Race the sum of \$300, to the fifth horse in each heat \$100, and the remaining money divided pro-rata among the horses finishing first, second and third. Should it amount to more than the sum mentioned, the surplus will be divided pro-rata among the winners of the Main Race.

The Chamber of Commerce Stake will be divided as follows: \$650 to the winner of each heat in the Main Race. \$350 to the second horse in each heat, \$250 to the third horse in each heat, and \$250 to the winner of the race. In the Consolation Race which is to be paced three days from the date of the decision of the first race, and is open only to horses that start and do not win more than \$225 in the Main Race, \$150 will be paid to the winner of each heat, \$100 to the second horse in each heat, and \$50 to the third horse in each heat, and \$100 to the winner of the race. In the event of there being less than three horses eligible to the Consolation Race there will be paid to the fourth horse in each heat of the Main Race, the sum of \$150, to the fifth horse in each heat \$50, and the remaining money divided pro-rata among the horses finishing first, second and third. Should it amount to more than the sum mentioned, the surplus will be divided pro-rata among the winners of the Main Race.

The 2:12 Trot and 2:08 Pace will be divided as follows: \$300 to the winner of each heat; \$200 to the second horse and a \$100 to the third horse, and \$200 to the winner of the race.

Under these conditions it is possible for nine horses to win money in each stake.

This Association is a member of the American Trotting Association, whose rules will govern except where otherwise specified.

PAYMENTS

	MAY 15,	JUNE 12,	JULY 10.
In M. and M.	\$100	\$150	\$250
In C. of C.	\$50	\$75	\$125
In 2:12 Trot and 2:08 Pace	\$25	\$35	\$40

Shaw, Oregon. **Salem, Oregon.**

Entry Blanks can be had from the Secretary or at the office of the BREEDER AND SPORTSMAN.

Campbell's IMOLLIO IODOFORM Gall Cure

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the Market relying wholly on its merit of success, and notwithstanding the fact that comparatively little has been done in the way of advertising, the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Keep It in their Stables

Terms—One Year \$3; Six Months \$1.75; Three
Months \$1

STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft
or letter addressed to F. W. KELLEY, P. O.
Drawer 447, San Francisco, California.

Communications must be accompanied by
the writer's name and address, not necessarily
for publication, but as a private guarantee of
good faith.

When the earth trembled and shook for almost forty-eight seconds on that eventful April morning in San Francisco there were very few horses on the streets, most of them being in their stables where they demonstrated their terrible fright in a manner never to be forgotten by their caretakers. There were numbers killed by falling walls in these buildings and many were so badly injured that it was deemed a humane act to shoot them. Along the streets amid falling walls and where clouds of dust were rising, the butcher, bakery, and milk wagons that were sent on their morning trips were checked as the poor affrighted horses sat on their haunches and shivered and shook with fear. It is not known whether there were any of these horses killed, but, in the large vegetable markets, walls fell burying a number of men and horses. As soon as the earth ceased shaking, many horses that were allowed freedom in the fire department stables rushed out into the streets and with difficulty were caught, but none could be led back to the badly shaken buildings. The cry of fire and the presence of immense clouds of smoke awakened the firemen to their sense of duty and as fast as these horses could be hitched to the engines, hose carts and hook-and-ladder truck they were dispatched to the places where the fires were. On arriving there, after a most exciting ride over the stone and brick covered streets it was found that all hydrants were without water so their services were useless. Many of the companies remained to assist the citizens but the fire overtaking them the drivers were compelled to unhitch their horses and leaving the fire apparatus to its fate, dash

through clouds of smoke to places of safety.

While the fire was burning all the livery stables were thrown open and horses and vehicles were generously loaned by the proprietors to help convey the household chattels and belongings of the unfortunates who were rendered homeless. When the horses were gone crowds clamored for vehicles of any kind to carry their wives, families and household goods to the various parks in the outskirts of the city. Everything that had wheels was pressed into service. It was deemed an honor by the fortunate ones to get between the shafts of a vehicle and try as far as possible to pull all they could. The family and whatever neighbors were interested in the loads drawn by these men aided by pushing the vehicles or with clothes line harness acted the part of tandem horses to the plodding human wheelers. The long journey, the sweetering heat of those two first days, and the absence of water, will never be forgotten by those who joined the various processions slowly moving over the hills to Golden Gate Park.

The horses, poor, dumb, and obedient creatures, struggled along dragging loads which at other times would have called forth a protest from every citizen. Up hills and across alleys having neither a drop of water to drink nor hay or oats to eat. Time after time they made that long journey. Some relentless drivers who acted no better than highwaymen to their distressed fellowmen charged prices ranging from \$5 to \$250 for carrying loads a few blocks and then seemed determined to drive their horses to death and in many cases succeeded. Some of the poor beasts were humanely shot by the soldiers after being abandoned as useless by those scoundrels. The exhibition of heartlessness to man and beast shown by these men was the only black spot which marred the good feeling and fellowship among millionaires, business men, mechanics and laborers and their wives and families during that terrible ordeal. All livery stable owners acted most magnanimously. One stable on Golden Gate avenue was turned into a hospital where the injured and dying were cared for until the fire fiend approached within one block of the place. Over eighty of

the finest equipped and best stocked livery stables were burned to the ground and competent men claim that over 10,000 horses were rendered homeless the first and second days of the fire, for over 6000 are now turned out to pasture. Hay was ten dollars per bale and oats could not be purchased at any price because the majority of the large hay and grain establishments went up in flames. Hundreds of fine carriages and elegant vehicles, harness, clothing and stable fittings in private and public stables were destroyed. The ruin seemed most complete.

During the third and fourth days of the fire the United States Army officers impressed every horse and wagon seen on the streets into service to carry provisions, medical supplies, etc., to the various camps. These men in the kaki uniform halted the carriage of the rich as quickly as the buckboard of the poor. There was no time for ceremony and when the owner of the rig tried to find it he found that it was a difficult as well as hopeless search.

The worst is over and many a horse that has been kept daily at work in this city for the past six years is now enjoying a respite from his labors and nibbling the rich succulent grasses on the hillside and valley far away from the scenes of his hard struggles. Before winter sets in the owners will be ready to take them up and with renewed strength these horses will assist in their way to make this city (what everyone is striving to do) a greater and a better San Francisco. In taking a retrospective view of the exciting occurrences of these days we shall never forget the noble part enacted by man's best and truest friend, the horse. There are many families today camping in tents in the parks that owe their lives and all they saved to the efforts of some willing and faithful horse that was pressed into service a few moments before the flames consumed their little homes.

We will be pleased to acknowledge the receipt of any sale catalogues, stallion cards, books on the horse, etc., as our library was destroyed in the fire. No one can thoroughly understand what a loss such reference works are to a turf journal unless placed in the same position the editors of this journal are.

Important to Horsemen

As will be seen by the advertisement in another part of this paper, the Pacific Coast Trotting Horse Breeders Association is offering \$1500 Guaranteed Stakes for slow class trotters and pacers and two stakes of \$800 for faster classes, entries to close June 18th. These stakes are to take place at the fall meeting, at which time two and three-year-old divisions of the Pacific Breeders Futurity Stakes, \$6000, will also be given. This meeting will be held in Woodland, if arrangements now being made are completed. In a communication from Mr. Fulton G. Berry in regard to the proposed summer meeting of the Association at Fresno, that gentleman states that the people there stand ready to carry out their part of the proposal, and dates will be taken and the meeting advertised as soon as the Los Angeles Association decides on what will be done there in regard to an early meeting.

There is no reason why a number of harness meetings cannot be given in this part of the state this year. We may not be able to give as large purses as was contemplated before the earthquake and fire, as quite a number of horses that would have started here may go East and to Montana, but there will be plenty of horses left to fill the purses and stakes, and if horsemen every place where there is a mile track would select a date and announce without delay that they intend to give a meeting all the horses that are now being trained would be kept in training and others would be taken up and prepared for the races.

The well known horseman, Mr. C. A. Durfee, returned from Los Angeles last week and says that the Los Angeles Harness Horse Association stands ready to subscribe \$50,000 for meetings to be held there this year, and he also says from the looks of things there, that the meetings would prove self-sustaining and the amount subscribed would not have to be drawn upon. A little of that kind of enterprise in this part of the state would give the harness horse industry the impetus it needs to push it to the front once more.

Notes and News

D. E. Newell, agent for "Save the Horse," etc. is now at 56 Bayo Vista Avenue, Oakland.

James Faris, Jr., formerly of Sacramento, but now of Red Deer, Alberta, writes us that a big fair and race meeting is to be given this year at Edmonton, the capital of the province of Alberta, from July 2d to the 5th inclusive, and that \$15,000 is to be distributed in purses and premiums. Mr. Faris says that his stock wintered well and he expects to get a share of the premiums and will show about 20 head. R. F. Garnsey, formerly of Santa Ana, Cal., is training the Faris Stock Farm horses.

Ira Barker Dalziel, the well known veterinary dentist, hardly waited until the ground was cool until he had his lumber piled up ready for the carpenters, and to the surprise of all who were moving down Golden Gate avenue toward the ferries they saw his building erected on the site of his former establishment 605 Golden Gate avenue. Mr. Dalziel is one of those energetic individuals who never lets the grass grow under his feet and since the fire he has been so busy attending to the calls for his services that he has hardly had time to notice that there are hundreds following the example he set when he erected the first building in the Greater San Francisco after the fire.

It was our intention to issue a twelve page paper this week, but with our present limited facilities we found that to do so would make a day late in getting out. We are in hopes to be able to increase the size of the paper in the near future to our regular issue and will do so as soon as we can get together a printing plant of sufficient capacity. We feel assured that under the circumstances our subscribers will bear with us for a little while.

We are also painfully aware that the work of issuing eight pages just at the present time is equal to getting out twenty-four pages before the fire and "quake."

The Los Angeles Horse Show association donated the sum of \$847 to the San Francisco relief fund. A portion of the amount came from the exhibitors at the show, who donated cash prizes received by them. The donors and sums given are as follows: John H. Norton, president of the Horse Show association, \$200; proceeds of sale of Stanhope buggy donated to the association by the Columbus Buggy company, \$313; cash prizes, Amy M. Norton, Los Angeles, \$10; Lucille Gage, Los Angeles, \$10; Broadway Saddle

Livery, Pasadena, \$1.50; Margaret Hogan, Los Angeles, \$7.50; Adelaide Gillis, Los Angeles, \$10; Roy Stanton, Los Angeles, \$10; Alfred Salano, six prizes, \$290.

Work on the new speed track and athletic field is being pushed rapidly and when finished it will be one of the most beautiful and complete of its kind in the United States.

Hay was selling for \$10 a bale in San Francisco the four days of the earthquake and fire.

Chas. Cook, a prominent stock breeder of Wyoming, recently purchased a farm in Castro Valley near Haywards, and moved there last week. He brought a fine Arabian stallion with him, nine prize Rambouillet sheep and some prize chickens and turkeys.

Coronado, 2:12 $\frac{3}{4}$, won the first prize in the roadster class at the recent Los Angeles Horse Show.

Millard Sanders and the splendid collection of Sidney Dillons in his care arrived in Indianapolis in excellent shape. They elicited much favorable comment from the horsemen who gathered at the depot to see them.

One of the few brick buildings in the business section of San Francisco that was not destroyed by the fire was the one owned by the heirs of the estate of Henry Pierce, 728 Montgomery street. It was built in 1851, and escaped the fires of 1854 and was not injured much by the earthquakes of 1865, 1868, or the recent shock. Henry Pierce and his brother Ira owned Sidney Dillon and bred the great Lou Dillon.

John (Directum) Kelly is a busy man at present. He has fifty-two horses in his New York Speedway stable. Among them are Sir Albert S., 2:03 $\frac{3}{4}$; Kitty Wilkes, 2:15 $\frac{1}{2}$; Direct View, 2:08 $\frac{3}{4}$; The King, 2:10 $\frac{1}{2}$; Sol B., 2:10 $\frac{1}{2}$; Malzour, 2:20 $\frac{1}{2}$; Promise, 2:10 $\frac{1}{2}$; Dan, 2:17 $\frac{1}{4}$, and Harold H., 2:22 $\frac{1}{2}$.

Walter Geers, the only son of Ed Geers, the famous reinsman, was accidentally killed on May 7th while playing baseball at the college he was attending in Columbia, Tenn.

It is very encouraging to trotting horse breeders to read the accounts of the recent auction sales held in the East and Middle

West during the months of March and April. The prices obtained have been far higher than at any time since the "boom". The demand for good horses is increasing and whoever owns a good looking sound, well-bred and well-mannered trotter or pacer, can get a price for him that will be most gratifying. The European buyers are flocking to the big sales just as the did in 1901-02.

Since the earthquake two of San Francisco's oldest livermen died, viz: Michael Conlan and John Nolan. They were the proprietors of two of the largest stables in San Francisco and were noted for their kindness, courtesy and upright dealings. Their loss will be severely felt and the news of their death will be received with sorrow by all who knew them.

A number of trotters and pacers are being worked at the Santa Rosa race track. Frank S. Turner has it in splendid shape and has made many good friends among visiting horsemen by his willingness to accede to their wishes regarding the care of this splendid course.

On Stanley, 2:17 $\frac{1}{2}$, died last month in Santa Barbara. He was sired by Direct, 2:05 $\frac{1}{2}$, out of Lily Stanley, 2:17 $\frac{1}{2}$, by Whippleton and was bred by the Pierce Bros. of the Santa Rosa stock farm.

As will be seen by an advertisement in this issue the State Agricultural Society has reopened the stakes for two-year-old trotters and two-year-old pacers, \$1000 each to be given at the State Fair this year and also announce the Stanford stake for foals of 1905 to be trotted at the State Fair 1908, entries to close June 1st. With the Breeders' Futurity Stakes this will give the two-year-olds a chance to win big money this year.

Our usual edition of 20 pages will soon be resumed and more extended notice of rod, gun and kennel news and events will be given. Meanwhile we ask the indulgence of our subscribers until we are in position to devote our usual weekly space to the regular matter of this department.

Judge Thos. H. Brents, of Walla Walla, who recently sent his great brood mare, Laurelia, to Spokane to be bred to Del Norte, 2:08 $\frac{1}{4}$, has received word that she dropped a filly on April 24th by Edgar Boy, 2:08 $\frac{1}{4}$, that looks like a good one. Laurelia is by William Hogoboom's Electioneer stallion Cautiou, 2:25 $\frac{1}{2}$, and is one of the greatest brood mares now living. She has produced beside

this filly only four foals, Belladi, Helen Norte, Magladi and Reina del Norte by Chehalis, 2:04 $\frac{1}{4}$. Belladi, Helen Norte and Reina del Norte are trotters. Magladi is a pacer. Belladi was on the Grand Circuit last year but was not well after crossing the Rockies. She was left at Walnut Hall Stock Farm, Donerail, Ky., to be bred to Moko. She has worked many miles in 2:12 and halves in 1:02 $\frac{1}{2}$ and has a mark of 2:19, obtained when 4 years old. Helen Norte, by Del Norte, took a mark at Columbus, Ohio, last fall, of 2:09 $\frac{1}{2}$ and has been entered again on the Grand Circuit in the 2:09 and 2:10 classes for the coming season. Her trainer, Homer Rutherford, expects her to trot in 2:04 before the end of the season. She was the champion two and three-year-old filly of the northwest. Madgladi was second to McFayden in the Pacing Division of the Pacific Breeders Futurity Stake race for two-year-olds at Santa Rosa last year and made him take a record of 2:15 $\frac{1}{4}$, the fastest race for colts and fillies ever pulled off on the Pacific Coast. Reina del Norte was foaled April 21, 1906, trotted a full mile in 2:33 $\frac{1}{2}$, and has trotted halves in 1:14 and quarters in 35 $\frac{1}{2}$. He is entered in eight futurities and in the two-year-old trot at the California State Fair to be held this fall. Judge Brents and his friends who have seen the Edgar Boy filly, just foaled, confidently expect it to add new luster to the fame of Laurelia as a great brood mare.

Santa Ana Races

About one thousand people witnessed the May day races of the Santa Ana Driving club. The track was in fine condition and many matinee records were broken. The event of the meet was the 2:25 trot between McKinney and Flash. The former was tipped to win but showed up ugly, and Flash won both heats and the race, the time being 2:21 $\frac{1}{2}$. The first race was a three-minute trot with Colaneer, Orange Lady, Snover, Nutway and Babe starting in the order named. It required three heats to decide the race which finally went to Orange Lady in 2:34.

In the 2:45 pace Popeye won both heats and the race in 2:32, Billy, Baldy and John finishing in the order named.

The fourth race was a 2:30 pace with Birdie Mac, Prince and Ora Bell, crossing the tape. Both heats were run in the order named. Time, 2:23.

The last race was a 2:40 trot between Eli and Albert, the latter taking both heats and winning the race in 2:27 $\frac{1}{2}$.

Averages Reported

At Easton, Pa., April 21, first general average was won by Messrs. J. M. Hawkins and J. F. Pleiss of Easton, Pa., both of whom shot DuPont Smokeless and scored 171 out of 180. Mr. Pleiss of course also won first amateur average.

At Milton, Pa., April 25, Mr. W. R. Crosby, shooting New E. C. (Improved), and L. J. Squier, shooting DuPont Smokeless, tied for high average with 157 out of 165. J. M. Hawkins, shooting DuPont Smokeless, was second with 153 out of 165. S. C. Yocum of Shamokin, Pa., on first amateur average with 149 out of 165. Mr. Yocum used DuPont Smokeless.

At Herndon, Pa., April 26th, Mr. L. J. Squier, shooting DuPont Smokeless, won first general average with 148 out of 150. Mr. W. R. Crosby with the "New E. C. (Improved)" won second average with 147 out of 150.

At Scranton, Pa., April 27th, Mr. W. R. Crosby with "New E. C. (Improved)," won first general average with 158 out of 165. Messrs. J. M. Hawkins and L. J. Squier, both using DuPont Smokeless, tied for second general average with 149 out of 165.

At Luzerne, Pa., April 28th, Mr. L. J. Squier won first general average with 142 out of 145, both gentlemen using DuPont Smokeless. Mr. W. R. Crosby won third general average, using "New E. C. (Improved)."

At both Herndon, Pa. and Luzerne, Mr. Squier made runs of 102 straight.

Winchester Wins

The third annual tournament given by the Rocklin Gun Club was held Sunday, April 30th, and proved to be very successful, considering the earthquake and fire which affected the whole country.

Out of the 47 shooters present, 38 were shooting Winchester "Leader" and "Repeater" shells. Event No. 6 K-U Co. medal championship of Northern California was won by J. W. Humble, score 20 straight, using Winchester "Leader" shells. Event No. 7 Mdse. 1st prize captured by J. Hoxie, making 20 straight, with "Leader" shells. Event No. 8 Ten pair doubles for Gibson cup. Won by C. M. Troxel, score 18 out of 20. Mr. Troxel always shoots the "Pump" gun and "Leader" shells. Mr. Gibson also tied for cup but withdrew. Event No. 9 Three-man team shoot. Championship Northern California won by Messrs. F. Rubstaller, F. M. Newbert and M. Newbert. Score 56 out of 60. Each of these gentlemen used "Pump" guns and "Leader" shells.

The Montana Races

Everything indicates, says the Butte Miner, that during the first annual exhibition of the Butte Fair and Racing association, August 21 to September 3, there will be twelve days of high-class harness and running events, probably as fine a program as was ever given in Montana.

There will be five races each day, trotting, pacing and running, all entries so far in the early closing stakes providing for fine sport in each event. The races will be conducted on the three-beat system and in the cleanest possible manner. Any horseman who comes to the Montana circuit with the intention of attempting anything crooked may as well save his traveling expense, as the first intent or attempt to pull off anything underhanded will meet with summary action on the part of the officials.

From all over the circuit encouraging reports are being received and it looks as if Montana would see the best racing season in her history. Secretary Galbraith, of the Butte association, is straining every effort to make the meeting a success as far as preliminary possibilities will permit, and all the committees and officials in every department of the racing and fair program are aiding him to their utmost.

The members of the Matinee club of last season are becoming active in arranging plans for the coming season. The races at the fair will not interfere with the weekly meetings this summer of the Butte driving club. Last year's success in this line of sport was too great to permit of its being dropped under any circumstances, and with a good, live board of managers much can be accomplished this year. In fact this season promises more than did last.

The club closed last season with eighty members and there will be undoubtedly be many more this season. There are nearly twice as many promising horses and the interest is greater, due to the success of last summer. The first matinee will probably be held Decoration day. A number of trophies are now placed to be raced for, including a speed wagon, offered by F. M. Grady, valued at \$250, and two handsome silver cups, offered by W. A. Clark Jr.

Pacing Event at San Diego

Considering the threatening weather there was a fair attendance at the gentlemen's driving matinee at the Sweetwater race track, April 29. C. L. Warfield

was starting judge, the other judges being Ed Gifford, Will Topping and C. T. Chadwick.

On account of the weather the trotting event, 2:20 class, was called off. The 2:25 pacing race furnished plenty of amusement.

Trix, the well known bay gelding driven by J. A. Connell, won both heats, the first by a neck and the second by a head, the bay gelding, Dewey, driven by Harry Daley giving him a hard fight. The track was too heavy for fast time. The summary was as follows.

Trix, bay gelding, driven by J. A. Connell, 1-1.

Dewey, bay gelding, driven by Harry Daley, 2-2.

Bonnie B., bay mare, driven by Thomas Brodnax, 4-3.

Fox, chestnut gelding, driven by C. Stuart, 3-4.

Blanche Knight, black stallion, Fred Fanning, 5-5.

Time: 2:29, 2:26½.

The Colusa Races

We are indebted to Mr. E. C. Peart for a report of the Colusa harness meeting held at that enterprising town the week following the earthquake. Mr. Peart is one of the leading merchants of Colusa County and a very busy man. He takes a great interest in harness horses, and it is due to his efforts that the Colusa meeting was made a great success. With his report of the summaries of the meeting, he sends us the following:

Colusa, Cal., April 30th, 1906.
Breeder & Sportsman,
San Francisco, Cal.,
Gentlemen:

We have just closed one of the best and most successful meetings given in California for years. With a large entry list we had only one drawback, that was so many men with harness horses scratched out at the last moment, simply because they thought someone else stood a better chance to win and in the hope that a special would be given them. There were many horses here that were entered that might have won had they started. It is not my policy to give specials, as specials rarely make good races and I will not encourage anything that tends to lower the standard of the sport. If they want to start their horses they must do so in the races in which they enter. Considering the awful calamity in San Francisco and the deep gloom cast all over the State, it is wonderful how people turned out here. At first I was tempted to declare the meeting off, but there were so many men with horses at the track, I thought

it best to carry it through. The contests were all excellent. The second and third days witnessed the largest crowd ever assembled at the Colusa track, and every body seemed pleased and enthusiastic over the meeting.

I sold my colt, "Buster," after the races for \$300 cash and I also sold a "Diawood," colt, nine days old, for \$100. So you see what each county loses by not keeping the harness horse interests alive by giving meetings. The meeting was in every way a success and all seemed well pleased with the races. Our aim was not to make money but to give a meeting that would be a credit to Colusa and prove self-sustaining. I am sending you the summaries. As my principal help belonged to the militia and had to go with the soldier boys to San Francisco, you can imagine that I was a very busy man during the meeting. With best wishes, I remain,

Yours truly,

E. C. PEART.

Purse \$100, 3:00 class—Red Hot by Dayton (Hogoboom) 1-1-1, Easter Bell by Diablo 3-2-3, Buster by McNeer, 2-3-4, Telephone, 4-4-3, Dagon by Sallie Wilkes, 5-dr. Time 2:33, 2:31½, 2:33½.

Purse \$100, 2:24 class—Dolly N. by Clarence Wilkes, walkover.

Purse \$100, 2:28 class—Kentucky Baron by Baron Wilkes, (Duncan) 1-1-1, Baron Bretto by Silver Bow, 2-2-2, Silver Bell by Silver King, 4-3-3, Lady Sutter 3-4-4. Time 2:35, 2:33½, 2:28.

Purse \$100, 2:35 class—Babe by Lynmont, 1-1-1, Buster by McNeer, 2-2-2. Time 2:32, 2:34½, 2:42.

Purse \$50, Farmers' race—Cricket by Tilton Almont, 1-5-1, Toots by Grand Island, 3-1-2, Joe, Kenney, Baldy, Alfred J., Rethis and Sport, finished in order named. Tim, 2:30, 2:29, 2:28½.

Purse \$150, free for all—Diawood by Diablo, (Hogoboom) 1-1-1, Dolly N. by Clarence Wilkes 2-4-2, Sutter by Noonday 3-2-3, Babe by Lynmont, 4-3-4, Easter Bell by Diablo, 5-5-5. Time 2:20½, 2:23½, 2:20.

Purse \$100, three-year-olds—Nettie F. by son of Harry Gear, 1-1-1, Roy Dillon, by Sidney Dillon, 2-2-2, Montea by McNeer, 3-3-3. Time 2:35½, 2:40, 2:36½.

Purse \$25, two-year-olds—Anona by Baron Bretto, 1-1, McKeen by McNeer, 2-3, Black Beauty by Dagon, 4-2, Edward D. by Sutter, 3-4. Time 1:45½, 1:43. Half mile heats.

Six running races were also on the program, there being two each day.

Rod, Gun and Kennel

Conducted by J. X. De Witt

The last shoot that was held at Ingleside was that of the Union Gun Club, Sunday, April 15th. In the club race at 25 targets, 16 yards, the winners were: Champion class—Edgar Forster 23, C. C. Nauman 21, Fred Feudner 21, Otto Feudner 21. First class—M. J. Iverson 22, Dr. E. Pters 22, C. S. Fish 22, H. Kelly 21, W. Roney 21, D. Daniels 20. Second class—J. Scott Leary 19, E. A. Taylor 19, C. A. Miller 19, F. Knick 18, H. P. Jacobson 17, C. F. Harvey 17, D. Burfiend 17. Third class—W. Cooley 21, B. Patrick 21, Pickersgill 17, F. Turner 17, F. Houpt 17, W. Schneider 14. Fourth class—J. Noonan 15, J. Lynch 14, Dr. Finnie 14. In the medal race 25 targets, the winners were: champion class—Nauman and Forster tied on 22, Nauman won in the shoot off with 23 breaks. First class—Dr. Pters 21. Second class—F. Knick 25 straight. Third class—W. Cooley 20. Fourth class—J. Noonan 17, C. C. Nauman won the Shields trophy race 24 out of 25, 10 singles at 16 yards and 14 at 20 yards.

The Ingleside trap grounds are intact and at the service of shooters. "Billy" Murdock is in charge as usual.

At the recent tournament of the Los Angeles Gun Club high average for the two days was shot by Mills of Santa Ana, 287 out of 300. Bungay of Ocean Park 272, Chas. Julian of San Diego and Fred King of Long Beach 267 each. Emil Holling of San Francisco won high professional average with 287 out of 300. "Dick" Reed was second with 271 and D. W. King Jr. third with 268. Guy Lovelace made the longest run, 61 breaks. Charles Julian won the individual championship 48 out of 50. The winning five man team made 115 out of 125—Hagerman, Orr, Knight, Bungay and J. Gibson. The Tufts-Lyons medal was won by C. D. Hagerman.

About forty shooters attend d the Orange County Gun Club shoot at Santa Ana, April 17-18, representatives from this city and various southern points being in attendance.

At the San Jacinto Gun Club shoot there was a good attendance of sportsmen. Mills of Santa Ana was high average the first day with over 95 per cent. A match between Gus Knight and Mr. Chubb at 100 targets for \$200 was won by Knight, 90 to 88 breaks.

At the Seattle Gun Club April bi-monthly shoot, the scores showed some pretty work on the part of the members. Ed Garnet took the medal in the A class, with 24 out of a possible 25 and Junker and Hildebrand tied in the B class. Kanuck won the C class.

At the regular shoot of the Multnomah Rod and Gun Club, held April 29, W. E. Carlon won the Inman diamond medal with 22 out of 25. Cullison's team

defeated Lipman's aggregation with a margin of two birds. The teams were made up as follows: First team—Cullison, Wintes, Norwood, Meister, Bordes, Thorn. Second team—Lipman, Carlon, Feckheimer, Geiser, Robinson and Abraham.

There was a larger attendance at the shoot on May 5th than at any time since the opening of the 1905 season. Carlier and Maurice Abraham were tied for first place, each man breaking 88 birds out of 100 shot at. Howe was a good third and Carlon fourth, with 82 per cent.

The trap shooters of Salem, Ore., organized a gun club with the following officers: Dr. J. G. Griffith, president; D. C. Tillson, vice-president; Paul Hauser, secretary and treasurer. Arrangements will soon be perfected for a shooting tournament to be held in that city in June.

Clarence Ashlin is reported to be in Portland, Ore.

John Benn, the well known fly-tyer was burned out by the recent fire. He contemplates a trip to Ireland in the near future, when he will have a try at salmon in some of the pools of the famous Blackwater.

The water is much too high at present on the Upper Sacramento. It is not expected that good fly fishing will be had in that section for several weeks yet.

The Big Meadows will be visited this season by a number of local anglers. Mr. and Mrs. Alex T. Vogesang will be among the first anglers visiting the meadows.

Klamath river, near the Hot Springs, is reported to be worth a visit. Fish have been caught in the Klamath near that resort, this season, that weighed over 6 pounds.

Reports from the Truckee river are to the effect that fishing near the town of Truckee is most excellent. Spoon fishing has been rewarded with a number of good sized fish. Below Poosser Creek, anglers do not have as good sport as in the water above.

Many of our local anglers have been taking themselves away to favorite fishing resorts for the time being.

The Fish Commission office is now located in the Ferry building at the foot of Market street.

The Chihuahua, (Mex.) Gun Club has 97 enthusiastic members on the roll.

That Portland show was not inconvenienced by the non-arrival of Spratts benching on time, is due to the quick action and foresight of Tommy Banks. Spratts benching was in transit from Los Angeles to San Francisco and due to arrive here in time to either be burned up or remain side-tracked indefinitely. Mr. Banks

sized up the situation and by energetic action, flavored with good luck, the whole outfit for Portland show was saved from destruction and forwarded to the the Oregon show.

Secretary Frank E. Watkins writes us very enthusiastically over the show prospect in Portland. Among other things he states: "I am just writing you a few lines to say that our annual show which will be held from May 30th to June 2nd, inclusive, promises to be the best in the history of our club. We have secured a large number of silver cups to be won outright (about sixty), and also have a larger number of trophies than for any show previously given by us, the general interest in the show is also very much greater. In spite of the fire at San Francisco we have a good string of dogs from San Francisco, Los Angeles and other California points. We are promised a large number from the British Columbia towns and Seattle, and several Eastern handlers have signified their intention of showing here this year. We will try to make our show a four point one this year and time and I believe we will probably be successful in doing so."

The hall in the Exposition Building in which our show will be held is much better arranged than it was last year. It has been enlarged and a better lighting service installed.

Major J. M. Taylor of New York city will judge all classes except terriers and collies.

The Portland Kennel Club is in a prosperous condition and was recently incorporated and with the gentlemen who now comprise the club membership its future successful career is well assured.

Our entries close May 22nd and it is important that all entries are made, or come in by mail by that date for positively none will be received after that time."

We regret, for the general interest of Coast dogdom, that the Portland Club after having arranged with Major Taylor as the all round judge made a change in the program and turned over collies and all terriers to dog handler Bradshaw.

A comparison between the gentlemen and veteran fancier first mentioned and the handler selected is impossible. Major Taylor's experience and unsullied reputation as a judge, both in the ring and the field, is of international esteem. His abilities as a clever and able writer, an authority on field trial and general doggy subjects, are well known and appreciated by sportsmen, fanciers and the general reader.

Benefit Meeting at Marysville

It has finally been arranged by the Yuba and Sutter driving club that a race meet will be held at the Marysville track May 28th, 29th and 30th. There are already a number of horses there that were entered in the Colusa races and a number will be taken there from Sacramento, Woodland, Oroville and other places.

A number of local horses are training on the track and will be entered in the several events that have been included on the program. The track is in fine condition and will be kept up.

The program arranged is as follows and it will be found much better than that of the last meet.

First Day.

First race—Trotting 2:30 class; three out of five heats. Purse \$100.

Second race—Pacing, 2:30 class; three out of five heats. Purse \$100.

Third race—Running, three-quarter mile dash. Purse \$70.

Second Day.

First race—Trotting, free for all; three out of five heats. Purse \$125.

Second race—Pacing and trotting for three-year-olds; three out of five heats. Purse \$75.

Third race—Special trotting and pacing for two-year-olds, one-half mile and repeat. Purse \$50.

Fourth race—Running, five-eighths mile dash. Purse \$65.

Fifth race—Running, three-quarter mile dash. Purse 70.

Third Day.

First race—Pacing, free for all; three out of five heats. Purse \$125.

Second race—Farmers' trotting and pacing. Purse \$50.

Third race—Running, half-mile dash. Purse \$60.

Fourth race—Running, mile dash. Purse \$75.

The management intends to sandwich in during one of the three days a saddle-horse race for local people. The entire surplus proceeds of the meet will be turned over to the Relief Committee for the benefit of the San Francisco sufferers. Last year's meet netted \$100 and it is believed this one will give more than double that amount.—Marysville Democrat.

Premium lists and entry blanks for Portland show can be had at the office of the Breeder and Sportsman, 709 Van Ness avenue, San Francisco.

Matinee at Riverside

The Riverside Driving Club held an afternoon of racing April 27th with the following results:

Race No. 1—Road race, special, won by Lady Nutford in straight heats; Zoerma second, Dick third; time 2:37½, 2:44.

Race No. 2—Matched Fernwood, owned and driven by E. F. Binder, won; Lauretta owned by W. A. Hayt and driven by G. H. Judd; time 2:21, 2:27.

Race No. 3—3:00 Mixed. Won in straight heats by Laura K., owned and driven by F. A. Ramsey; Zella Z. owned and driven by P. Beatty, second; Alta Rea, owned and driven by S. J. Elliott, third; time 2:35½, 2:33. This race was for a cup which is being hotly contested for. Yesterday's outcome puts Laura K. up with W. W. Wilson's Ping Pong and John Garner's White Stocking, each horse having won two legs of the cup.

Exhibition mile, road horse and buggy—F. E. Abbott's Lady Doris, driven by A. Wilson; time 2:55¼.

Race No. 4—2:30 Mixed. Monicrat, owned and driven by F. P. Ogden, won in straight heats from G. W. Prescott's Adalanthia, driven by G. W. Bonnell; time 2:35, 2:28.

Race No. 5—2:35 special. Won in straight heats by J. H. Thompson's Miss Monbell, driven by G. Judd; Conchita, second; W. W. Wilson's Ping Pong, driven by Alex M. Wilson, third; Maurice Griffin's Baby, fourth; time, 2:31, 2:30.

Race No. 6—Special. Norda driven by G. J. Bonnell, won in straight heats from G. Judd's The Trotter; time 2:34, 2:27.

SAFETY IMPREGNATING OUTFIT
Practical and durable and is easily used. Gets in foal all mares bred with it, and greatly increases the income from your stallion. GUARANTEED to produce results. A necessity in every breeding stable. Write for descriptive circular. Price of OUTFIT, complete, \$7.50.

I. O. CRITTENDEN,
9 FOX ELDER, ELYRIA, OHIO.

ABSORBINE

Removes Bursal Enlargements, Thickened Tissues, Infiltrated Parts, and any Puff or Swelling. Cures Lameness, Allays Pain without laying the horse up. Does not blister, stain or remove the hair. \$2.00 a bottle, delivered. Pamphlet 1 C free.

ABSORBINE JR., for mankind, \$1.00 bottle. Cures Syphilis, Weeping Sore, Strains, Gouty or Rheumatic Deposits, reduces Varicose Veins, Varicocoele, Hydrocele, Allays Pain. Book Free. Genuine mid. only by

**GOMBAULT'S
CAUSTIC BALSAM**

A safe, speedy and
positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

STATE AGRICULTURAL SOCIETY**STANFORD STAKE of 1908**

TROTting STAKE for FOALS of 1905.

To be trotted at the California State Fair of 1908.

ENTRIES TO CLOSE JUNE 1st, 1906.

With J. A. FILCHER, Secretary, at the office in Sacramento.

Fifty dollars entrance, of which \$5 must accompany nomination, June 1, 1906; \$5 Nov. 1, 1906, \$10 June 1, 1907; \$10 June 1, 1908, and \$20 on the tenth day before the first day of the State Fair of 1908. \$300 added by the Society. Mile heats, three in five, to harness. The stakes and added money to be divided 50, 25, 15 and 10 per cent. Right reserved to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided 66⅔ per cent to the winner, and 33⅓ per cent to the second horse. A horse distancing the field will be entitled to first money only. In no case will a horse be entitled to more than one money.

A horse not winning a heat in the first three shall not start for the fourth heat unless said horse shall have made a dead heat; but horses so ruled out shall have a right to share in the prize according to their rank in the summary at the close of their last heat.

Nominators are not held for full amount of entrance in case colt goes wrong; only forfeit the payments made, which relieves you from further responsibility and declares entry out. The stake is growing in value each year; every breeder should enter in it: it will ENHANCE THE VALUE OF HIS COLT in case he desires to sell.

Your colt entered in the OCCIDENT STAKE FOR 1908 is eligible for entry in this stake.

Remember the date of closing is JUNE 1st, 1906.

J. A. FILCHER, Secretary.

RE-OPENED STAKES FOR TWO YEAR OLDS

Offered by the California State Agricultural Society to be contested at the

California State Fair 1906

ENTRIES TO CLOSE JUNE 1, 1906

No. 1 } The A. B. Spreckles Stake, \$1000
 } For Two Year Old Trotters.

No. 2 } The Ben Rush Stake, \$1000
 } For Two Year Old Pacers.

Entrance payable as follows: \$20 on June 1st, 1906, \$20 additional if not declared out on or before August 1st, 1906, and \$100 additional if not declared out on or before August 1st, 1906. Declarations must be made to the Secretary and will not be accepted unless accompanied by the entrance money at the time of declaration.

Distance to be one hundred yards. Right reserved to reject any or all entries. Five per cent of the amount of the stake will be deducted from each money won. The Board of Directors reserve the right to declare two starters a walkover. When only two start they must contest for the entrance money paid in, to be divided 66 2/3 per cent to the first and 33 1/3 per cent to the second. A horse distancing the field shall only be entitled to first and fourth moneys, but in no other case will a horse be entitled to more than one money.

The Board of Directors reserve the right to start any heat after the fourth score, regardless of the position of the horses.

When there is more than one entry to any stake by any one person or in one interest, the horse to be started must be named by 5 o'clock P. M. on the day preceding the race.

Otherwise named is herein specified in these conditions, Rules of the National Trotting Association (of which this Association is a member) to govern.

For entry blanks and further information address the Secretary.

Campbell's IMOLLIO IODOFORM Gall Cure

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior
The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the Market relying wholly on its merit of success, and notwithstanding the fact that comparatively little has been done in the way of advertising, the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and it is THE GALL CURE OF THE 20th CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Keep It in their Stables

Breeder and Sportsman

Vol. XLVII. No. 19

SAN FRANCISCO, MAY 26, 1906

Subscription \$3.00 a Year

THE WEEKLY Breeder and Sportsman

F. W. KELLEY, Proprietor
Turf and Sporting Authority of the
Pacific Coast

OFFICE: 709 VAN NESS AVENUE,
SAN FRANCISCO
P. O. Drawer 447

Terms—One Year \$3; Six Months \$1.75; Three
Months \$1

STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft
or letter addressed to F. W. KELLEY, P. O.
Drawer 447, San Francisco, California.

Communications must be accompanied by
the writer's name and address, not necessarily
for publication, but as a private guarantee of
good faith.

From Walla Walla

Breeder and Sportsman—En-
closed find \$3, amount due on
paper. We surely miss it, and
will be very glad to see it again.
I am sorry to hear of the great
calamity for I still have my love
for the old State and hope to be
among you with some good ones
some day.

There are a great many horses
being worked here. I still have
old Lynmont and I have a two
year old by him that I broke two
months ago and he stepped a
quarter last week in forty seconds
and sold the same day for \$400.

One of my stallion Cautions'
three year old colts owned by
Frank Smith, just sold for \$1200,
and a road horse by Caution sold
for \$600.

My Diablo stallion Teddy A. is
well patronized and his colts all
show fast.

If I can be of any service to you
let me know.

Wishing you all success, I am,

Yours truly,

WM. HOGOBOOM

Stallion For Sale

Mr. M. Henry of Pleasanton,
offers his stallion Ed Keil for sale.
This horse is jet black, a high
stepper and of the true Morgan
type. He is a grandson of Director
and should bring twice the price
asked for him for a park horse, as
he can be driven by a lady and can
put on all the style of a show
horse. He is afraid of nothing,
Mr. Henry's daughter having
driven him in the Haywards horse
parade, and also in the 4th of July
parade last year in Oakland,
where even fiercrackers did not
bother him. He should be a sire
of high steppers and in any good
man's hands could earn his price
in one season in any county
where mares are bred. He has
shown 2:20 speed and is a good
gaited totter.

Horse News From Utah

Breeder and Sportsman—I was
very gratified to receive the first
issue of your worthy paper since
the disaster in your city. Father
is out on the ranch so I took it
upon myself to express his
gratitude as well as my own upon
seeing the "Breeder and Sports-
man" again in print.

There is very little horse news
around this city. In fact I never
remembered it being so quiet. There
is no prospect of racing except
down at Provo, Utah. The racing
and fair associaiton are there
putting up a half mile track and
expect to give some very successful
meetings this summer.

Dr. Geo. W. Shores, an ex-
resident of your city, is here in
Salt Lake in fact has been for
some time. Last June he pur-
chased from H. W. Brown a three
year old unbroken roan filly by
'Altoka' 2:10½, and out of Miss
Foxie 2:22¾. This filly is a very
well bred thing, her dam being
by Incas 2:14½ out of Lady Foxie
2:24¼ she being in the great
brood mare list. This filly was
broken last June and was turned
out in September, not being
worked at all to speak of. She
was brought up just about three
weeks ago and three days ago Dr.
Shores hooked her to the cart for
the first time this spring, and she
trotted a mile in 2:30, last quarter
in 35 seconds, last eight in 17 sec-
onds. And you never saw such a
surprised person as the Doctor. I
honestly believe, Mr Kelley, that
the mare is absolutely the fastest
trotter to-day in the Rocky moun-
tain country.

We have out at the ranch now a
two year old colt, red roan in
color, by Altoka 2:10½ that can
trot a 2:30 clip and he isn't even
broken yet. He is out of a mare by
Ned Wilkes. Atola is the sire of
more good looking colts that can
trot some than is usually seen in a
place like this. I would be glad
to send you a picture of our pole
team, full sisters to the roan colt,
if you desire it. I sincerely hope
that your paper meets with the
success that your kind of pluck and
gameness deserves and which you
will surely get.

Your sincere friend,

R. W. BROWN,

Salt Lake City, Utah
May 16, 1906.

From the Concord Track

Breeder and Sportsman--The
horsemen here expect to have
three day's racing this fall as the
Horgan's Yearling Stake is to be
trotted then. All made second
payment except one and his colt
met with an accident.

We are working on a stallion
stake for young stallions owned in
this county. There are two or
three young stallions by Welcome
2:10½, one by Silver Bow 2:16,
one by William Harold 2:13¼,
one by Altamont 2:26, one or two
by Chas. Derby 2:20, and two by
Sidmore 2:17¾, besides several
others.

The outlook for the horse
breeders was never better in this
locality. The aged stallions Chas.
Derby 2:20, Sidmore 2:17¾ and
Dictatus 2:17, all have their books
full or will have before the end
of the season, and many farmers
who did not have mares of their
own have rented mares to breed—
the prices paid ranging from \$75
to \$200 in some cases.

Even the young stallions that
have not produced anything yet
have been well patronized and if
the present prices for good horses
keep up, of which we have no
doubt, next year will be better
than ever.

James Grove, formerly of Fresno,
now of Nightsen, this county,
expects to locate here at the Con-
cord track with a string of young
horses. He has at the head of his
string a young stallion by
Altamont out of Blue Bells by San
Diego that is owned by Dr. Ham-
mond of Byron. He also has a
very fine filly by Dexterwood and
two by Con Brio.

A number of other trainers are
waiting with their horses to move
in whenever the track men get the
water pipes laid to the stakes.

Three or four of the yearlings in
the Horgan Stake are already
broken and will be ready to speed
as soon as the track is smoothed
down.

Last Saturday J. E. Durham
with Flyaway, C. Fosket with
Jakey F by Sidmore, Joel Harlan
with a daughter of Owyhee, and
L. R. Palmer with his full sister
to Ben F. 2:07½, had a nice
workout. Mr. Palmer's mare led
and stepped the mile in 2:23, with
the last quarter in 33 seconds over
a very rough track.

W. S. CLARK.

Concord, May 16th, 1906

Stanford Stake Closes June 1st

The Stanford Stake of 1908, for
foals of 1905, will close with
Secretary Filcher, of the California
State Agricultural Society on June
1st. The total entrance fee to this
stake is \$50, of which only \$5 is
required to be paid when colt is
nominated on June 1st. The other
payments come along in easy
stages, and are not large. The
Stanford Stake is always a valuable
one, and one of the classics of the
California trotting circuit each
year. Name your yearling in this
stake on the first of June, and
stand a chance to win \$1000 the
year he is a three year old.

Liberal Stakes for Harness Horses

Monday, June 18th, is the date
set for closing entries to four big
stakes offered by the Breeders
Association for its August meeting
which will probably be held at
Woodland this year. The Calif-
ornia Stake for 2:24 class trotters
has a value of \$1500, and the
Pacific Slope Stake for 2:20 class
pacers has the same value. These
two stakes have been the leading
features of the California Circuit
for several years past, and they
should attract large entry lists this
year. In addition there are
offered the Sunset Stakes of \$800
for trotters of the free for all class,
and the Golden Gate Stakes for
pacers eligible to the 2:09 class.
These four early closing stakes are
only a preliminary, and there
will soon be announced a big list
of \$500 purses for all classes of
trotters and pacers to be decided at
this meeting. The Woodland
tract is an excellent one, and is
located in the midst of one of the
most thriving sections of Calif-
ornia. The Breeders have never
given a meeting at Woodland be-
fore, and the horsemen of Yolo
County are anxious that the
association should give its prin-
cipal meeting there this year. The
meeting will precede the State
Fair meeting at Sacramento.

North Pacific Fair Circuit

Everett,	August 27 to Sept. 1
Seattle,	Sept. 3 to 8
Salem,	Sept. 10 to 15
North Yakima	Sept. 17 to 22
Spokane,	Sept. 24 to 29
Walla Walla	Oct. 1 to 6
Lewiston	Oct. 8 to 13
Boise, Idaho,	Oct. 15 to 20

Notes and News

It is estimated that 50,000 people witnessed the annual parade of speedway horses in New York City this month, and this in the face of the fact that the weather was unfavorable.

The good saddle mares Eugenia, by Highland Denmark out of Emily, and Magna by Cromwell, Jr., out of Maria, were sold in Kentucky last week for \$5000. The former is three-gaited and the latter five-gaited. Either can trot in 2:50 and they can pull a wagon to pole in 3:10. They are perfectly broken to saddle, single and double harness and fairly illustrate the utility of the American saddle horse.

F. J. Kelly of Pueblo is now sole owner of Obe Croft 2:16 $\frac{1}{4}$, having just purchased the other half interest. Obe made his record in 1904 as five year old and will be raced again this year.

P. Frank Little of Boulder recently took to Los Angeles twenty head of fine draft horses, for which he paid \$4,800 to Boulder county farmers. The stuff was put on sale and will no doubt bring \$300 or \$400 a head.

Nancy Hanks 2:04 will be bred to Todd 2:14 $\frac{1}{4}$. The owner, J. M. Johnson, wants to establish a Nancy Hanks family.

J. O. Gerrity, trainer for W. A. Clark Jr., will ship the latter's string of trotters and pacers east for Los Angeles about June 1st.

Sidney is a wonderfully potent horse. He is now 25, and last season 30 mares were bred to him. Of these 24 foaled living colts, two of the mares died, two aborted and only two were barren. Considering Sidney's age, this is indeed remarkable virility.

A contract has been signed between M. W. Savage and the management of the Minnesota State Fair, which will make the star attraction of Sept. 3, the opening day of the fair, a joint appearance of Dan Patch, the champion pacing stallion of the world, and Crescens, the champion trotting stallion. These two great horses appearing at the same time on the state fair track and each going against his own championship record, will constitute one of the most remarkable track events ever witnessed.

Draft teams are in great demand in San Francisco, and the ranches are being heavily drawn

upon for all available stock by the teamsters of this city. Several new drayage companies have been formed since the fire, the largest part of the new business being the removal of debris.

W. H. Bobb of Pendleton, Oregon, has shipped 800 horses to Alberta, Canada, for sale. They range in weight from 1150 to 1400 pounds and will be sold to the farmers. A heavy tariff on horses from the United States is likely to be levied by the colonial parliament soon.

E. A. Servis of Durham sold that good consistent pacer Edwin S. 2:08 to last week. He will appear on the eastern circuit.

The Yuba County Driving Club will open its three days meeting at the Marysville track on Monday next.

Mr. Reams has closed his training stable at Suisun. He had a very fine string of promising trotters and pacers, many of them being by Demonio. He had Memonia 2:14 $\frac{1}{2}$ and Anable a two year old sister to this fast pacer; Grace R a three year old pacer, Ora Belmont 2:15 $\frac{1}{2}$ and a fast high bred mare belonging to Julian Hoyt. She was sired by William Harold 2:13 $\frac{1}{2}$. He also had a two year old chestnut stallion the property of Jos. B. Nightingale. He is by Sidney Dillon out of Lena Holly a great road mare that Mr. Nightingale has been using for some time. Another good one is a chestnut filly by Demonio out of Mannie Airlie. She belongs to Jos. M. Bassford, and last but not least is Grant Chadbourne's John S. a two year old by Demonio out of Jess by Coligny. This is a square gaited trotter and very promising.

Bob Sparks of Suisun, who has been wintering three of Lewis Peirce's horses at Pleasanton, returned home a week ago last Sunday. Mr. Sparks says the past winter has been as unfavorable for race horses as it seems to have been on grain crops in this vicinity. He had three good horses on the Pleasanton tracks, the best being the five-year-old gelding El Diablo Mac, by Diablo, dam Hazel Mac, by Director, a high bred trotter that can go along in about 2:15, and show quarters in 30 $\frac{1}{4}$. Another one that is about as fast as the bay pacer, is Brutus, a Sidney Dillon. The other one is a bay gelding by Captain, dam by Anteo. This horse was on the sick list most of the time.

C. A. Post of Modesto, recently lost a valuable two year old colt by Prince Nutwood 2:12 $\frac{1}{2}$. The colt was snagged on a broken fence board while running in pasture.

Jake Brollier of Tulare writes of a thirteen months old filly called Lady Stoneway which he worked a full mile in 2:47 last quarter in 40 seconds. She can brush an eighth of a mile in 17 $\frac{1}{2}$ at the end of a 3:00 mile. Were it not that she is a bad knee banger he would insist on her owner continuing her work for he believes she would pluck the crown for Manager H. but this defect prevents her being trained at present. Her powers of endurance and gameness seem almost marvelous.

Messrs. Rush and Haile, proprietors of the Suisun Stock Farm have announced that they will hold their annual sale of Demonio yearlings this year on June 16. This sale will take place either at Mannie Ream's track or in Suisun. The catalogues are in course of preparation, and will be issued in a few days. The colts are all gilt edge youngsters and are from the dams of Nordwell, Miss Winn, Memoio and dams of other fast ones. Included in this sale there will also be ten well-bred colts from Lewis Pierce's stock farm ranging from one year to four years old. They were all sired by Our Captain, grand son of Electioneer. The dams of all these colts are standard bred.

The Zombro mare Italia 2:14 $\frac{1}{2}$ has been put to pacing by her eastern owner.

Geo. Algeo is doing a fair business with the royally bred Nutwood Wilkes stallion T. C. 2:30 that he has at Alameda track. Mr. Algeo is training a mare by James Madison for H. Johnson of West Berkeley and after six weeks work drove her a mile in 2:22 with the last half in 1:09.

Geo. G. 2:06 $\frac{1}{4}$ will be one of the starters for the gold cup at Pittsburg.

Hon. Sterling R. Holt reports that the great brood mare Earalma, dam of Borlama 2:07, and Pan Michael 2:03, has foaled a handsome horse colt at Maywood Farm by Sidney Dillon. This is the colt that Mr. U. A. Andrews, late proprietor of Forest City Farm bought of Mr. Holt for \$1,000. The Andrews estate will carry out the agreement and are ready to take the colt at weaning time. It is said to be a nice colt and admired by all who have seen the royally bred youngster.

W. R. Murphy, owner of Red McKinney, says he recently saw three foals by his horse, and all are bays with no white, except one that has a very small star. They are all shaped just like Red McKinney, and show that this horse has great promise as a sire. Mr. Murphy recently purchased from Herbert E. Coil of Woodland, a grand looking two year old colt by Searchlight 2:03 $\frac{1}{4}$, dam Golden Rose by Falrose 2:19, second dam by Alaska, son of Electioneer, third dam by Algona, fourth dam by Odd Fellow. This colt is a bay and looks very much like his illustrious sire. Mr. Murphy calls him Red Light.

The horses in M. Henry's string at Pleasanton are all in good shape and can step faster than they have yet been asked to. The five year old Robert C. trotted a mile in 2:22 last quarter in 32 seconds. Roger C. a four year old trotted a quarter in 37 $\frac{1}{2}$ seconds. Frank C., three year old, paced a mile in 2:16, last half in 1:07 $\frac{1}{2}$ and last quarter in 31 seconds, a 2:04 gait. These are all full brothers and the property of Frank D. Colburn of Boston. Selah, a five year old black stallion by McKinney, dam by Director, has shown a mile in 2:18. Will Guthrie, a black three year old colt by Educator showed a mile in 2:20, last quarter in 32 seconds. Hiram, a bay colt by Educator stepped a quarter in 35 seconds. Mr. Henry's mare Hulda by Guide 2:16, has a filly at foot by Bonnie Direct, and will be bred to Star Pointer. His mares Jacobina and Thera have both been bred to Bonie Direct.

Ed Benyon will have in his string besides the four year old fillies Bonalet 2:09 $\frac{1}{4}$ and Bonnie Me, both by Bonnie Direct, the great green pacer Rey del Valle by Rey Direct. Rey del Valle worked a public mile in 2:07 $\frac{1}{4}$ last year.

The many friends of Ed Geers will deeply sympathise with him in the irreparable loss sustained by him through the sudden death of his son Walter, which occurred in a baseball game at Columbia, Tenn., on May 5th. The youth was seventeen years old and was the only son and a very bright and clever boy.

A dealer in New York recently signed a contract to take 35 carriage horses from a Western buyer at \$700 per head.

Report has it that Myron McHenry is going to locate in Tennessee with the hope of getting a few horses for the races.

Another record of the Country Jay 2:10½ case was heard a few days ago, when Isaac Eckert of Reading, Pa., filed suit against Gus Macey for \$10,000, the sum paid for the horse by him over a year ago—on the grounds of misrepresentation at time of the sale.

Easter Direct, the much touted green pacing mare by Direct 2:05½ with a reputed trial of 2:03¾, will hardly get to the races this year. She was wintered at Macon, Ga., by Ed Mills, and threw out a splint not long ago, which made it necessary to fire her and throw her out of training.

This is the year to breed your mare. The breeding season is drawing to a close, but don't allow your mare to go over this year, as the value of horses is on the increase and will continue so for the next ten years. There is a demand for horses that cannot be supplied, and the stallions to patronize this year are the well bred members of the trotting and pacing families. Remember this prediction. — A good road horse will be worth more in 1910 than at any time during 1905 and 1906.

A dispatch from New Haven, Conn., states that Judge Townsend of the United States Court has issued an order requiring the National Trotting Association to show cause on May 28th, why a preliminary writ of injunction should not issue restraining the association from meeting at Lexington, Ky., on June 1st, or at any other time or place, for the purpose of hearing the case of the Memphis Trotting Association vs. E. E. Smathers. This is the case in which is involved the question of whether or not the mare Lou Dillon was drugged prior to the contest for the gold cup at Memphis, in October, 1904. The object of the order of the court is to prevent the National Trotting Association from hearing any evidence and to prevent all persons from offering any evidence to the board of review of the association. It is also sought to enjoin the association from taking any action in respect to the race and the controversy which has arisen out of it.

The Alameda track is being used by a number of trainers. It is not in the best of condition, but one can make speed over it.

A day of harness racing at the Oakland track with purses ranging from \$100 to \$300, would get a big entry list, draw a big crowd and enable the horse owners to earn a little money.

Many extravagant tales were written to the Eastern press about the San Francisco earthquake. It was bad enough, but not quite as bad as it has been painted. The earthquake damage in Oakland, across the bay was as great in proportion as it was in this city, and yet the buildings are all in use and business is proceeding as usual in all the stores. Had it not been for the fires, San Francisco business men would not have considered the earthquake more than an incident.

The Grand Circuit of 1906 gives every indication of being one of the greatest in the history of the turf. Every association that has closed a list of stakes or purses reports tremendous entry lists and the horses are from all parts of the country, California horses being very numerous. That the California owners who will go down the big line this season may bring home a big share of the money is our earnest wish.

James Berryman is training a young stallion by Zombro out of an Altamont mare at the Alameda track that is a natural and fast trotter. He has had but a very few weeks' handling, but has already shown an eighth in 16 seconds and is a Wilkes in style and action. Mr. Berryman says the colt reminds him of George Wilkes more than any colt he ever saw. Mr. Berryman, when a youth, took care of the founder of the Wilkes tribe for a time and has a vivid recollection of the great trotter and sire.

Owing to the large number killed recently by autos, the Ocean Accident & Guarantee Corporation, Limited, of London, has refused to pay a big accident policy at New Orleans, La., on the death of M. L. Hancock, a millionaire, who was killed in an automobile accident in Los Angeles, several months ago, on the ground that most automobilists are monomaniacs on the question of speeding their machines, and, therefore, the company is not responsible. This may cause some of the speed-crazy autoists to give a little more thought to personal safety, which will in a way, be beneficial to the general public. If the reckless autoists endangered the lives of none but themselves there would be little cause for the general public to complain, but unfortunately such is not the case.

Years ago it was the Geo. Wilkes Mambrino Patchen cross that was sought after by horsemen; now it is the Electioneer-Wilkes cross.

Mr. M. D. Wisdom, editor of the North Pacific Rural Spirit, and secretary of the North Pacific Circuit, visited California last week looking for entries to the big purses and stakes offered up north this year, but we are sorry to say left for home with but few entries in his pocket. The fearful calamity that visited San Francisco and the surrounding country in April, has made so many horsemen too poor to devote any time to sport this year, that they could not be induced to enter their horses outside the state this year. When it is taken into consideration that the majority of the horses in training at Pleasanton are owned by men who do business in San Francisco, it is not surprising that the list of entries obtained there for the North Pacific Circuit should be very small this year. In former years, California horse owners have been very liberal patrons of the Oregon and Washington meetings, but it can hardly be expected that they will be this year. We hope, however, that the Northern meetings will be liberally patronized by their local horsemen this season and that the meetings will all be successful financially and otherwise. The Northern association are all energetic and progressive and we wish them every success, promising them that California horses will be generously entered there next year.

This is the year for the smaller towns to get up meetings and offer \$200 and \$300 purses. There are a great many horses whose owners are ready to start them for that amount.

The three-year-old colt, Cnchato, 42293, recently sold in the East for \$10,000 to George Leavitt, carries lots of what are known as California strains in his breeding. He is by Todd 2:14¾, dam Castanea, 2:19¼ by Pistachio 2:21¾ (full brother to Nutwood 2:18¾); second dam Lindora Wilkes (dam of five of the standard list) by Guy Wilkes 2:15¼; third dam Rosetta (a producer) by The Moor; fourth dam Cecilia Clark by Clark Chief; fifth dam thoroughbred, Todd is by Bingen 2:06¾, from Paronella 2:13 (dam of Sadie Mac 2:06¾) by Arion 2:07¾. Bingen combines the blood of Electioneer, and George Wilkes; Fanella combines the blood of Electioneer, Director and Nutwood; Pistachio combines the blood of Belmont and Pilot Jr. 12, being by Belmont out of the dam of Maud S. 2:08¾.

The mare Silver Ring 2:14½, which Mr. Soule of West Hartford purchased at the Midwinter Fasig-

Tipton Co., sale, has been bred to Admiral Dewey 2:04¾. She is by Silver Bow 2:16 (son of Robert McGregor; out of Sadie, by Hambletonian, and second dam by William Welch, son of Hambletonian), her dam Maud Singleton, by Singleton (son of Willy Schepper, by Hambletonian); second dam Lettie, (dam of four) by Wayland Forrest; third dam Mary (one of Flaxtail's greatest producing daughters.) The breeding is rather peculiar and reaches the great fountain head, Hambletonian, quite close up for a thirteen-year-old mare, through two sources, William Welch and Willy Scheper, which seldom appear in pedigrees nowadays. Admiral Dewey seems to be the ideal horse for such a mare to be bred to, as he gives her the Electioneer, Happy Medium, Dictator and George Wilkes crosses.

Stakes for Two Year Olds

If you own a two year old pacer or trotter that is threatened with the least symptoms of speed, you should take a chance with him by entering in one of the two \$1000 stakes offered by the State Agricultural Society for two year olds. The A. B. Spreckels Stake is for trotters and the Ben Rush Stake for pacers. Two per cent is due June 1st with nominations, and unless declared out before there will be two per cent additional due July 2nd, and the remaining one per cent August 1st. Your two year olds that are in the Breeders Futurity are eligible to start in these stakes. Enter and get some of the money.

Pleasanton Matinee

The matinee given by the Pleasanton Driving Club on Saturday, April 14th, was a complete success. A full account of the races, was prepared for the Breeder & Sportsman, but the copy was destroyed during the fires of the following week and the reporter's notes also.

The summaries of the events which were all closely contested, are as follows:

FIRST RACE.

Mr. Lecari's Charlie J.	3-1-1
Mr. Helwig's Byron Lace	1-2-3
Dr. McLaughlin's Ringrose	2-3-2
Time—2:16, 2:13¾, 2:14½	

SECOND RACE

Col. Kirkpatrick's Charley D	1-1
Dr. McLaughlin's Kelley	2-2
Mr. Ronan's Antonetti	3-3
Time 2:25½, 2:21½	

THIRD RACE

Dr. McLaughlin's Mr. Young	1-1
Col. Kirkpatrick's Elden Bells	3-2
Mr. Perry's Billy Moore	2-3
Time 2:44, 2:34	

Gen. W. G. Harding, the founder of Belle Meade, the historical breeding farmer of Tennessee, tested the thoroughbred horse against heavy horses and even mules in cornfields when the sun was intensely hot. The horse descended from a long line of track tested runners, was able through higher physical and mental organization, to even cause the mule to wilt when the tall stalks of corn shut out the breeze. Our best trotters carry strong infusions of thoroughbred blood—Messenger, the sire of Mambrino, the sire of Abdallah, the sire of Hambletonian was a thoroughbred—and for this reason are more indifferent to fatigue than horses of spongy make-up. The farmer, however, should not sacrifice size to speed.

When three yearlings sell for \$22,000, four two-year-olds sell for \$37,000, there is a reason beyond breeding and speed. The answer is Futurity engagements. Sadie Mac, Boralma, Miss Previous, The Tramp, Bon Voyage, Grace Bond, Lightsome, Katherine L. and Kintore were sold because of their engagements in the Kentucky Futurity. Seven of them made good by winning, and one is not yet old enough to start.—Kentucky Stock Farm.

A bill prohibiting the docking of horses in New York State has passed the Assembly and has reached the third reading in the Senate, with little opposition.

Bon Mot by Erin, dam of Bon Voyage 2:12¾, recently foaled a filly by The Bondsman, sire of Grace Bond 2:09¼, winner of the Kentucky Futurity. Bon Mot is owned by W. A. Clark, Jr., and besides Bon Voyage is the dam of Endow 2:14¾ and Benqueath 2:23.

Trainer and drivers, are interested in the fact that the Phoenix, Ariz., pacer, Custer, by Sidney Dillon yet without a record, that showed ability to beat 2:10 in the Great Western Circuit last year, and now being trained by the former Wisconsin and Illinois trainer, Ed. Hall, at Phoenix, is training well and has been a half in 1:03 or a trifle better. It is quite likely that the J. C. Adams stable, in charge of Mr. Hall, will be raced at a few far western meetings before coming east, including, no doubt, Denver, so that those farther east will get a line on them before the opening of the Great Western Circuit. It is reported that Bystander 2:13, by Zolock 2:05¼, another crack pacer of the Adams stable, worked a mile in 2:16 recently, half in 1:03, and the last quarter in :30.

Dictatress 2:08¾ has a fine bay colt by Hal B. 2:04½. This youngster has a speed inheritance of 2:06½, the greatest of any colt ever foaled in Portland, Oregon.

"Well Ezzy! you are lookin' real smilin' and satisfied this afternoon. Betcha it's a boy or girl—hey?" "Betcha 'taint'!" was the reply. "I've just swapped a balky horse to Deacon Yampa for an animal that aint' got a thing in the world the matter with him except a spavin, the heaves and a stringhalt. That's what tickles me so."—Exchange.

Mack Mack, Swift B. and Helen Norte are all entered in the 2:10 trotting class at Readville.

For awhile the Grand Circuit meeting at Detroit was off, but authentic reports say it is on again, and the great M. & M. and C. of C. will be the feature of the Grand Circuit this year. This will be good news to many horsemen who have been laying awake of nights the past winter studying out how to win first money in these classic events.

A subscriber writes: "What chance has an owner of a really good standard mare or so of raising a real high-class race horse by breeding to an ordinary eight or ten dollar 'crossroad' stallion?" Oh, about the same chance one has of getting first-class boots and other turf goods at an "apartment store!"

There never was a market established for the cat-hammed, wedge-shaped, spindle-shanked, ewe-necked, pot-bellied, worthless horse, no matter what his blood lines are, how large he may be, or how small.

Hon. J. M. Johnson, owner of Blue Hill Farm, Ponkapog, Mass., recently turned down an offer of \$10,000 for Fanella, 2:13, the dam of Sadie Mac, 2:06¼, and Todd, 2:14¾.

The Portland Horse Sale

The attendance at the three days auction sale of trotting horses held under the auspices of the Portland Horse Sale Company at Irvington Park, Portland, Oregon, May 2, 3, 4, was very large and prices received very fair, considering the terrible depression which seems to affect everyone on the Pacific Coast since the destruction of the principal portion of San Francisco. The famous Missouri auctioneer, Col. R. L. Harriman proved a revelation to the crowd who listened to his remarks about the conformation and pedigree of every

horse led into the ring, and by his eloquence coaxed many a bid from hesitating buyers; and, when the sales ended, everybody, buyers and sellers, considered it was in order to congratulate him on his success.

Mr. Larrabee's Brook-Nook consignment headed the sale and a finer lot of well-formed horses was ever shipped from Montana. These youngsters had beauty combined with substance and soundness and whoever got any of them will never regret attending this sale. The Tongue estate sold Lovelace, one of the grandest-bred sons of Egotist beside several of his progeny. N. K. West disposed of some descendants of The Commonwealth and J. C. Baddelly, of Weston, Oregon, sent in some youngsters by Caution that will make names for themselves, their sire and their owners whenever given an opportunity. J. A. Jones sent a choice consignment, one being the two-year-old gelding Rastus by Oro Guy out of a daughter of Del Norte. A three-year-old and a two-year-old by Diablo averaged \$287. Taking it all in all, this sale was one of the best ever held in the Northwest and the scattering of these colts, fillies and broodmares among the various farms will prove of inestimable benefit to the trotting horse interests of that portion of the Pacific Coast. The total amount obtained was \$24,475 for the 130 head, an average of a little over \$180. The following brought \$200 and over. Some finely matched teams were also sold:

King Cole, b g by Vice Regent, dam Kiona, by Altamont	200
Star, b g (4), by Caution, dam by Alwood	200
Connell, br s (3) by Caution, dam Golden Seal, by Bedwood	200
Ballott, b g by Alcone, dam Bab Ballad by Com. Belmont	200
Seaman, b g (4) Alcone dam Seda, by Fieldmot	200
Christobel, b m (4) by Caution, dam Tat by Little Tod	205
Balley, ch g (33) by Silverlight, dam Mary A, by Pilot Lemont	205
Can't Tell, ch s (4) by Satsuma, dam Kathleen, by Long Taw	205
Bob White, br g (4) by Gyr Falcon, dam Brownie, by Aurora	205
Dominus, br g (4), by Vice Regent, dam Dolly, by Pilot Duroc	205
Tiddillo, ch g (4), by Ruby Star, dam Pipit, by Commodore Belmont	210
Nat, ch g (4), by Pilot Lane, dam Corvallis, by Tom B	210
Krishna, r g (4), Vice Regent, dam Kusa, by Commodore	

Belmont	210
Romeo Jr., s (5) by Romeo, dam Nellie W. y Baymont	215
Coly b g (4) by Gyr Falcon, and Viol, by Gyr Falcon	225
Adalina Patti ch f (2) by Boodle, dam Frankie by Scarlet Letter	225
Dalles Boy, ch c (3), by Valley Boy, dam Addie Nutwood, by Adirondac	225
Poet, b g (5), by Lambert Boy, dam by Malcolm	225
Felix, ch g (7), by Lovelace, dam Marigold, by Fred Hambleton	240
Billy, br g (5), by Malbrino; Ed Holman	240
El Monarca, blk g (4), by Alfonso, dam Coqueta, by Altamont	250
Georgia Rose, d b m (4), by Caution, dam Golden Seal, by Bedwood	250
Mr. Johnson, b g (4), by Caution, dam Lucy Lambert, by Leander Lambert	255
Harriet Gooch, br m, by Price-mont-Leona	260
Olga S., b f (3), by Diablo, dam Vevo, by Altamont	280
Ella E., br f (2), by Diablo dam Vevo, by Altamont	295
Anoymon, b r g (2), by Nocturno, dam Anodyne, by Malcolm	300
Exaris, b s (2), by Expedition, dam Nellie Nexible, by Nexible	300
Rastus br g (2), by Oro Guy, dam Alta Norte, by Del Norte	310
Violon, br g (2), by Nocturno, dam Viola, by Malcolm	350
King Lovelace, br s (3), by Lovelace, dam Maggie, by Duroc Price	350
Lovelace br s (5), by Egotist, dam Creponn, by Princeps	355
Salem Maid, b m (6), by Del Norte, dam Hazel, by Pilot Lemont	400
Bonduc b g (by Regent, dam Bon Accord, by Allen, and Liar, b g by Alcone, dam Lady Blackwood, by Blackwood	400
Presea, br m by Alfonso, dam Chain Coral, by Alaska, and Pafong, br m by Alfonso, dam Misy, by Alaska	500
Rose Pink, b m by Alcone, dam Tea Rose, by Fielde-mont, and Abbess, b m by Alcone, dam Novice, by Commodore Belmont	600
Attic Bird, b s by Alcone, dam Diva, by Fieldmont	600
Thomas H., b g (6), by Lovelace, dam Plauter Maid, by Planter	650
Red Ocher, b g by Alcone, dam Naore, by Alaska, and Khushkus, b g by Alcone, dam Kuskus, by Commodore Belmont	800
Burin, b s by Alcone, da Belle, by Kisbar	1025

Rod, Gun and Kennel

Conducted by J. X. De Witt

Marin county has long been noted for the splendid deer shooting to be found on the picturesque ranges of hills and in the rugged canyons and gulches of that attractive coast country. The best shooting territory, however, is to be found on the preserves of the several gun clubs, in fact all of the choicest deer hunting country is closed to the individual hunter. This state of affairs has long been exceedingly obnoxious to a large number of "outsiders"—residents of Marin county and elsewhere. Various attempts have been made, ostensibly in the interest of game and fish protection, by the Marin supervisors to disturb the serenity of the club members who hunt and fish in that county. In fact for several years past as the open seasons for wild game or game fish approached, the club sportsmen were kept rising or falling with the barometer of expectancy in a manner calculated to cut out much of the anticipated sport.

The vexed question arises again this year habilitated in a garment designed to protect and preserve deer. The various county papers are publishing the following petition to which is annexed a coupon, addressed to the Board of Supervisors, which all resident taxpayers, agreeing with the views expressed in the petition, are requested to sign and mail to the various editors of journals publishing the petition, which requests an ordinance to be passed declaring a closed season on deer in Marin county for the period of five years, making it illegal to hunt or kill bucks and legalizing the capture or killing of dogs engaged in chasing deer during such closed period.

The reasons urged for such action are the following:

"The danger to human life from the use of rifles in thickly settled parts of the county.

The danger from fire originating from the camps of deer hunters.

The killing by hunters of domestic cattle.

The torture and destruction of the deer which now form one of the most attractive features of our remarkable mingling of home and wilderness, and which if protected would furnish pleasure to thousands where only a very few—and most of those neither residents nor taxpayers, can profit by the hunting. The indiscriminate pursuit by dogs of fawns and does and their almost equally indiscriminate slaughter regardless of the state law.

The method of hunting with hounds which seems inseparable from success results in the wanton and wasteful destruction at all times of the year of many of these animals and constitutes in many localities a cruel and a noisy nuisance which should be abated by law."

It is evident after reading the foregoing "reasons" that they were not framed by one familiar with deer hunting. About the only logical point advanced is the one intimating danger from the reckless use of rifles in a thickly settled community. In the populous districts of the county, there is no deer hunting, furthermore, the whole county is posted with trespass notices. Better that there be no deer hunting at all than to have people killed or maimed by the rifle bullets of the hunters. If we are not mistaken all of the Marin gun clubs have indicted the use of the high power rifle and the use of any missile other than the soft nosed bullet. We do not recall any casualty that has taken place in Marin county on this score.

The cruelty phase of the sport as urged against the use of dogs has been worn threadbare. It is well known that there is nothing in it. The deer when chased out of the thick cover by dogs are well able to distance the hounds or stand them off in a fight. Even a doe with her sharp hoofs, will put a dog to flight. The sport is no doubt noisy, but the racket takes place generally where the silence of the glen or range can be broken with pleasure and profit.

As it looks now, the club members are due for their annual dividend of nervous prostration, for they put up a good amount of money for the privileges leased and also in preparation individually for each season's sport. All this without any assurance that the county fathers will not change their program and that's what makes the game full of tobacco.

The Vallejo Gun Club members have proven in the past to be congenial and hospitable sportsmen and entertained visiting shooters to Vallejo most pleasantly. They have recently shown that they also have the reserve fund of goodness that is invariably found in the make up of the true sportsmen.

On Sunday May 8th a shoot was held for the benefit of Santa Rosa sufferers from fire and quake. As a result Treasurer J. V. O'Hara of the Vallejo Gun Club sent to Mayor Overton of Santa

Rosa, the club's contribution \$56.60, for the relief fund of that city, which sum was realized at the shoot.

In the merchandise prize shoot, one of the events on the program Walter Roney broke 20 straight and won a fine Winchester repeating rifle. W. L. Wisecarver broke 19 and won the "shell" prize. Wm. Chappell won a gun case with 19 breaks. J. V. O'Hara, 19, also won a "shell" prize. M. A. Clark's prize for 18 breaks was a fishing rod.

The club's regular shoot was held on the 13th inst. on the new grounds near Flosden Station. J. V. O'Hara was high gun in the club race at 25 targets scoring 23. M. A. Clark was second with 22. O'Hara was also high gun in shooting at doubles. In the team shoot Clark's team beat O'Hara's squad by 4 birds. Class shooting has evidently met with the approval of the club members for it is contemplated to classify all of the members of the club and put up a class medal trophy for four classes. These medals will be shot for at the monthly meetings, high guns in each class to win and hold for two weeks—or until won by a higher score. The member winning the medal, in his class, most times during the season to hold the same permanently.

A number of local shooters were at the Ingleside trap grounds last Sunday. Among them were: Clarence A. Haight, A. M. Shields, Messrs. Sharpless, Nielson and Turner, Mark Iverson, Geo. Sylvester, E. Klevesahl, Wm. Murdock, Ed Schultz, J. K. Prior and R. Finnochio.

The shooters had some lively 12 and 6 bird pools at live pigeons in the forenoon and devoted the afternoon to blue rocks. The birds in the pigeon loft some 30 dozen in number were thus disposed of. Good scores were made by every shooter present.

Julius Bruns, Chas. Breidenstein, H. C. Kaplan and Jack McGovern, recently enjoyed a pleasant outing at the shack of the Bassio Club on Midshipman Slough near Sears Point Station.

The Douglas Gun Club of Douglas, Arizona, has a well appointed shooting ground and the various members are in such good shooting trim that the chip on the shoulder is much in evidence. A match with Bisbee trap shooters is a probable fixture for the near future. Teams from each club have been rolling up excellent scores recently.

The San Luis Obispo Gun and Boat Club second regular trap shoot early this month brought J. E. Van Schaick to the front as high gun in the four events shot.

The scores made were as follows:

At 10 targets—Van Schaick 8, C. T. Greenfield 2, J. C. Hill 5, R. Hearne 0.

At 20 targets—Van Schaick 18, Greenfield 13, Hill 12, Hearne 3.

At 20 targets—Van Schaick 17, Hill 11, Greenfield 9.

At 12 targets—Van Schaick 8, Hill 7, Greenfield 8.

E. E. Drake is a very busy man these days looking after the U. M. C. and Remington Arms Companies interests'. By June 1st a large and commodious warehouse will be in full running order.

The business affairs of both concerns have continued almost without interruption since the 18th of April.

A very graceful act of the California Powder Company, the principal Pacific Coast representative of the DuPont Powder Company, was consummated when the California Powder Company refused to accept payment for dynamite used by the city authorities during the recent conflagration.

Mayor Schmitz asked the company's manager for the bill due from the city, which amounting to \$4,000 was sent in. The Mayor promptly O.K'd it and sent the bill back with proper instructions for collection in due course.

The following day the bill was returned to the Mayor fully receipted, with a note stating that the dynamite used would be donated to the city. This shows that the powder corporation is not to be outdone by any other in generosity to our stricken city.

When the supply of dynamite in this city ran out it will be remembered how the manager of the company sent an order by a government tug to the Point Pinole and other magazines to give the soldiers all the dynamite that was needed. But for this prompt action who knows but that there would have been but few houses left in San Francisco

In connection with the above we will also mention that the Du Pont officials early sent reassuring messages from Wilmington to their employees in this city. These words of cheer were backed up by something more substantial just as soon as possible after the calamity and none of the Du Pont employees here were more than temporarily, and briefly at that, inconvenienced. A number of the clerical force in this city lost their homes and all they contained

The Multnomah Rod and Gun Club shoot at Portland on the 13th inst. had 25 shooters in the line up before the bulkheads. The program called for 100 targets per man in the different events. U. M. C. Howe was high gun with a score of 95. E. E. Ellis was second with 92 breaks. A. M. Robertson the popular LaBlin and Rand representative was among the roll of high scores. Several ladies took part in the shoot Mrs. Collier being top notcher in the ladies division.

Fresno trap shooters are disappointed at not being able to participate in the coming Sacramento tournament, which is open to shooters of northern California only.

The raisin growers have therefore issued a challenge to the Sacramento Gun Club for a five man team shoot. Five Sacramento shooters to meet five Fresno men, at a time and place to be selected by the capital city club, the shoot to be at 100 clay birds per man for \$100 a side, with railroad fares and a good dinner as trimmings.

This "def" is the result of a turn down the Fresno Gun Club received to an offer to participate in the tournament.

The seventh Grand American Handicap Target Tournament will take place at Indianapolis, Ind., June 19 to 22 inclusive. Programs were put in the mails Saturday May 19.

The program for the first day embraces 10 events, 20 targets each, \$20 added in every event, entrance \$2 for each event. Open to amateurs only, no handicap. Agents and representatives of the trade may shoot for targets only.

Second day, June 20. Preliminary Handicap, open to all. 100 targets, unknown angles, \$7 entrance, targets included, 14 to 22 yards handicap, high guns, \$100 added. The winner, in addition to first money, will also receive a trophy.

The special event for the second day will be the state team race, open to amateurs only. Five man teams, bona fide residents of the same state, or of the same province of Canada. 100 targets per man, (500 per team) \$35 entrance per team, targets included, no handicaps in distance, high guns. Moneys governed by entries of teams. In addition to first money, the winning team members will each receive a handsome trophy from the Interstate Association.

Third day, June 21, has been set aside for the main event, the Grand American Handicap, open to all. 100 targets, unknown angles, \$10 entrance, targets included, 14 to 22 yards handicaps, high guns, \$200 added, division

of purse determined by number of entries — from 40 to 50 moneys, first money 10 per cent, above 2 places for each 10 entries up to 250. The winner will also receive the Interstate Association Trophy. Regular entries must be made on or before Saturday, June 9, accompanied by \$5 forfeit.

Friday June 22 there will be two events—the Amateur Championship, 150 targets, unknown angles, \$15 entrance, targets included, 18 yards rise, high guns, \$100 added. Moneys to be determined by number of entries. Winner will receive in addition to first money a handsome trophy, presented by the Interstate Association.

The Professional Championship, open to professionals only, 150 targets, unknown angles, \$15 entrance, 18 yards rise, high guns, \$50 added to the purse. Moneys figured on the number of entries. A trophy from the Interstate Association will go to the winner.

Five automatic traps will be used during the tournament, targets will cost 2 cents apiece. The purse in the first day's events will be divided on the Rose system, 8-5-3-2.

The Interstate Association will add a total of \$1000 to the purses, (\$350 of which is reserved for the purchase of trophies).

Five different events will be shot off at the same time, one respectively at each trap. The total number of contestants will be divided into five sections, and a section will be started at the same time at each trap. After all members of each section have finished at their particular trap, they will pass on to the next trap, shoot there, and so on until they have shot at each trap. This arrangement will do away with a squad shooting 100 targets "off the reel" right down the line of five traps. Yet a true equity will be maintained, as each contestant will compete alike in each particular event.

In the handicap events the ties will be shot off at 20 targets, original distances will prevail.

Mr. Fred C. Whitney of Des Moines, Iowa, through the courtesy of the Winchester Arms Company, will have charge of the cashier's office. Mr. Whitney has few equals and no superiors in this position.

Mr. J. K. Starr, of Philadelphia, who for the past six seasons has officiated most satisfactorily will act as compiler of scores.

For further information address Elmer E. Shaner, secretary-manager The Interstate Association, 219 Coltart Square, Pittsburg, Pa.

The Pacific Coast Trap Shooters tournament, it is also rumored, may be pulled off at Vallejo later this season.

There will be an effort made, it is rumored, to have the Pacific Coast Intrestate Association shoot take place at Los Angeles instead of at Ingleside Park, San Francisco, as first programmed.

Not the least important among the manifold losses of the city sportsmen was the destruction by fire of a majority of the cups, trophies and medals our shooters have contested for ever since the sport of trap shooting has been in vogue in San Francisco.

We would like to hear from shooters relative to the fate of any trophies—whether lost or saved, that may be ascertained.

Secretary Chas. Heffernan of the Stockton Kennel Club, writes us that the club propose to hold a show October 11th 12th and 13th.

The enthusiasm among the tule land fanciers is strong and a show in October will draw a big entry list. This territory has recently been well fertilized for bench shows and there is no reason why a good crop of "one dog men"—the main support of shows, should not be cultivated to a pleasing degree.

Since the last Stockton show, a new building, in which a show can be held, has been erected. This hall will readily bench 500 dogs, and the Stockton club will try to fill every bench at their next show.

The Portland premium list gives a classification for 301 classes. Entry fees are \$2.00 for each dog and \$1.50 for each additional entry. The regular awards will be a silver medal to first, bronze medal to second and diploma to third. Handlers prizes are announced, \$20 for largest string from California, Washington and British Columbia.

The officers of the club are J. Westley Ladd, president; Dr. E. F. Tucker, vice-president; Henry Ladd Corbett, treasurer; Frank E. Watkins (250 Alder street, Portland Or.) secretary. Directors: H. Bergen, Jr., W. B. Fechheimer, Dr. J. C. Zan and Frank E. Watkins. Bench show committee: H. L. Corbett, W. B. Fechheimer and Dr. Zan. Veterinary surgeon Dr. S. J. Carney.

We have heard a rumor to the effect that it has been advocated to disorganize the San Francisco Kennel Club and go out of business.

The club is composed of a membership of five and has so it is reported, over \$2000 in the club treasury. Such action if contemplated after the support of the coast fancy, the general public and the press, for several years

past, which has resulted in placing the club "on its feet," is most unexpected.

It was argued by one of the club members, whom we met last week, "That the dogs are all gone from here now and its no use giving a show. We would lose money by it. We can't give a show for several years. I've given my dogs away. We couldn't get dogs down here from the north or from Los Angeles or anywhere else, so we might just as well give it up."

If this is the general sentiment of the five club members (and we doubt it sincerely) the sooner the club disbands and divides the funds the better for coast dogdom, for this will give other and stancher fanciers a chance.

So far as a show for this city is concerned we do not believe it would be a hard matter to arrange with the Chutes for instance, for the tenth annual show of the San Francisco Kennel Club. It would not cost the club a losing sum of money, nor would it be necessary, with all due respect, to send 5000 or more miles for a judge. The controlling interest of the Chutes could be approached, we believe, favorably by a prominent young financier who has always been an earnest advocate and supporter of both club and specialty shows and who has also successfully promoted the initial one day open air coast shows.

This later suggestion emanated from a prominent Cocker fancier and exhibitor and is heartily endorsed by a number of fanciers whom we have met and conversed with the past week.

The project is not surrounded with so many difficulties that the San Francisco Kennel Club should peremptorily dismiss the opportunity to be "dead game sports."

The Boston Terriers at the recent Los Angeles show entered by Col. J. W. Brooks' Ascot kennels proved a great surprise to Eastern visitors and were highly praised by fanciers who attended the show. The Colonel has some twenty-three Bostons in his kennels, among them Ch Bayside Chauncey, Mystic Spider, Endcliffe Quaker, Endcliffe Dictator, Jersey Lilly, Ascot Ramona and others, dogs that will win ribbons in any company. Acme Rocky, his first importation from the East is still the Colonel's favorite pal. Ascot Kennels won eight special cups at the recent show.

The angler sallies forth again,
And by the brooklet's shore,
Doth idly lie and fish and then
Goes home and lies some more.

A. L. Cresswell's cocker bitch Ch Plumeria Sally recently whelped six puppies (three dogs) to Ch Mepals Saxon. The litter is as nice a lot of solid black cocker puppies as one would like to see. Sally is in fine fettle and supplements a grand bench career by being a brood bitch of exceeding merit.

T. M. Stater's good Cocker bitch is heavy in whelp to D. P. Cresswell's Ch Mepals Saxon.

Dr. E. R. Bryant recently bought a fine brindle bull dog puppy from T. M. Stater.

We met George Jackson, E. A. Mocker and Jas. Watt one afternoon this week. The genial G. A. has opened up the Napa Soda business on Golden Gate avenue near Franklin Street. We tried a bottle—the first in many days. Ye Gods! but it was nectar and went to the right spot.

Mocker; besides his own losses, we regret to state had the bad luck to lose all of the records of the California State Game and Fish Association. He was full of good spirits as usual and is planning a July trip to Truckee.

The affable Mr. Jas. Watt has indulged in striped bass and trout fishing recently.

Last Sunday there was a flotilla of about 20 boats out in San Leandro bay. Al Wilson, Frank Dolliver, Baxter and a number of other refugees were among the anglers out.

Chas. Briedenstein and Jas. Watt will have another try at the bass tomorrow.

Striped bass are not yet running in large size but the attraction to the various resorts is as strong as

of yore. Sad sight to see some of the boys who used to take a pardonable pride in having the best tackle they could get now using any old Jim Crow rod and line.

"Ole Bill" Richards is another staunch irrepressible, on a trip over to the Tamalpais Club preserve in Marin county a week ago. Bill landed 50 fish.

Fred Pabst of Milwaukee has purchased the famous H. T. Ranch in North Dakota. The property comprises 65,000 acres of land and cost Mr. Pabst \$300,000. As the Huidekoper property this tract has been famous for its Percheron horses. Mr. Pabst will continue to breed Percherons. He will also stock the ranch with Orloff and American trotters. W. G. Clark will remain as superintendent. Frederick Pabst Jr. and J. G. Body, who is associated with Mr. Pabst in his farming operation, went to Kentucky to look up available stock for the new ranch.

It is surprising what a number of breeders keep plodding along in the same old rut, and do not use an impregnating outfit in their breeding, when if they thoroughly understood the many advantages to be derived through their use, they would not think of getting along without one. The safety Impregnating Outfit, sold by I. O. Crittenden, 9 Fox Building, Elyria, Ohio, is a No. 1 article, guaranteed to produce results and is fully described in his circular which he sends to all who write for it.

SPAVIN CURE

The PROOF OF ITS POWER

B. Chappel.

Shoeing and Carriage Repairing

• • •

Madrid, Iowa.

TROY CHEMICAL CO., Binghamton, N. Y.: GENTLEMEN—My colt Nero C developed a bog spavin on each leg.

I tried a number of so-called cures and veterinary surgeons without any improvement. I then procured a bottle of your "Save-the-Horse" spavin cure and used it according to directions. After using one bottle he appeared to be entirely well, but as I value him very highly I wanted to make sure, so sent for a second bottle and used about one half of it, and he is absolutely cured without leaving any scar or mark whatever and his hocks as smooth as when he was foaled.

Dan Chappel

Costs from \$5 to \$25 for repeated firing, horse must be laid up for several months; not 5 per cent of the cases are cured. Blistering is less effective. Mercurials preparation produce irreparable injury.

"SAVE-THE-HORSE" eliminates all these factors, Cures without scar, blemish or loss of hair.

Positively and permanently cures SPAVIN, RINGBONE, THOROUGHPIN, CURB, SPLINT, CAPPED HOCK, WIND PUFF, broken down, bowed or strained tendon or any case of LAMENESS. Horse can be work as usual and with boots, as no harm will result from scalding of limb or destruction of hair.

\$5.00 per bottle, with a written guarantee, as binding to protect you as the best legal talent could make it.

STATE AGRICULTURAL SOCIETY

STANFORD STAKE of 1908

TROTTING STAKE for FOALS of 1905.

To be trotted at the California State Fair of 1908.

ENTRIES TO CLOSE JUNE 1st, 1906.

With J. A. FILCHER, Secretary, at the office in Sacramento.

Fifty dollars entrance, of which \$5 must accompany nomination, June 1, 1906; \$5 Nov. 1, 1906; \$10 June 1, 1907; \$10 June 1, 1908, and \$20 on the tenth day before the first day of the State Fair of 1908. \$300 added by the Society. Mile heats, three in five, to harness. The stakes and added money to be divided 50, 25, 15 and 10 per cent. Right reserved to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided 66 2/3 per cent to the winner, and 33 1/3 per cent to the second horse. A horse distancing the field will be entitled to first money only. In no case will a horse be entitled to more than one money.

A horse not winning a heat in the first three shall not start for the fourth heat unless said horse shall have made a dead heat; but horses so ruled out shall have a right to share in the prize according to their rank in the summary at the close of their last heat.

Nominators are not held for full amount of entrance in case colt goes wrong; only forfeit the payments made, which relieves you from further responsibility and declares entry out.

The stake is growing in value each year; every breeder should enter in it; it will ENHANCE THE VALUE OF HIS COLT in case he desires to sell.

Your colt entered in the OCCIDENT STAKE FOR 1908 is eligible for entry in this stake.

Remember the date of closing is JUNE 1st, 1906.

RE-OPENED STAKES FOR TWO YEAR OLDS

Offered by the California State Agricultural Society to be contested at the

California State Fair 1906

ENTRIES TO CLOSE JUNE 1, 1906

No. 1 { The A. B. Spreckles Stake, \$1000
For Two Year Old Trotters.

No. 2 { The Ben Rush Stake, \$1000
For Two Year Old Pacers.

Entrance payable as follows: \$20 on June 1st, 1906, \$20 additional if not declared out on or before July 2, 1906, and \$10 additional if not declared out on or before August 1st, 1906. Declarations (to declare out) must be mailed to the Secretary and will not be accepted unless accompanied by the amount due at time declaration is made.

Distance to be one hundred yards. Right reserved to reject any or all entries.

Five per cent of the amount of the stake will be deducted from each money won.

The Board of Directors reserve the right to declare two starters a walkover. When only two start they must contest for the entrance money paid in, to be divided 66 2/3 per cent to the first and 33 1/3 per cent to the second. A horse distancing the field shall only be entitled to first and fourth moneys, but in no other case will a horse be entitled to more than one money.

The Board of Directors reserve the right to start any heat after the fourth score, regardless of the position of the horses.

When there is more than one entry to any stake by any one person or in one interest, the horse to be started must be named by 5 o'clock P. M. on the day preceding the race.

Otherwise than is herein specified in these conditions, Rules of the National Trotting Association (of which this Association is a member) to govern.

For entry blanks and further information address the Secretary.

Campbell's EMOLLIO IODOFORM Gall Cure

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES, ABRASIONS OF THE SKIN it has no equal. Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the Market relying wholly on its merit of success, and notwithstanding the fact that comparatively little has been done in the way of advertising, the sales of 1906 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the 'et-lock which injure and often lay up race horses.

All Trainers Should Keep It in their Stables

PRICE:—3 OZ. BOX 25c.; 7 oz. BOX 50c.; 1 LB. BOX, \$1.00

Death of Joseph Cairn Simpson

On Sunday, May 27th, Joseph Cairn Simpson, doubtless the best known writer on turf affairs in America, died at his home in Oakland aged 81 years. Mr. Simpson was born in Scotland, and moved with his parents to America while he was a mere youth, settling in Pennsylvania, where he learned surveying and followed that profession. He removed with his family to New York, and about 1845 emigrated to Iowa, where he speculated in land and afterwards owned a large farm and engaged in the breeding of horses. After a residence of several years in Illinois, during which time Mr. Simpson was interested both in racing and giving race meetings, he went to New York and became one of the owners and editors of Turf Field and Farm, and was associated with Col. S. D. Bruce in the compiling of the American Stud Book. He returned to Illinois in 1870, and four years later came to California, bringing the thoroughbred stallions Hock Hocking and Three Cheers, and the mares Lady Amanda and Marion, the later becoming one of the most famous in brood mare history. He also brought the trotting stallion A. W. Richmond and the mare Columbine, the latter afterwards becoming the dam of Anteeo, which Mr. Simpson sold for \$20,000 and Antevolo which brought \$17,500. In 1882, in company with the late James Kerr and John White he established the Breeder and Sportsman, and was either editor or special writer on the paper until 1898.

Few men have written as much about thoroughbreds and trotters as Mr. Simpson. He published before coming to California a book called Horse Portraiture, in which he set forth his ideas on

breeding and training, and after coming here published another under the title of "Tips and Toe Weights," which advanced some of his peculiar theories on shoeing. Mr. Simpson aided in organizing the Pacific Coast Blood Horse Association, and the Pacific Coast Trotting Horse Breeders Association. He also helped organize the National Trotting Association and was the author of the rule prohibiting laying up heats known to many as the Simpson rule. During the past forty years Mr. Simpson has been a regular contributor to the turf papers of America writing on nearly all subjects pertaining to the breeding and racing of both thoroughbreds and trotters. He was an accomplished writer and a very earnest advocate of his opinions and theories. His newspaper tilts with John Wallace, Hamilton Busby and others will be recalled by readers of the turf press.

For several years prior to his death Mr. Simpson was a great sufferer from cancer of the face, and though compelled to use opiates to lull the dreadful pain his mind was remarkably clear until a day or two before his death.

The funeral took place at Oakland on Tuesday of this week and was under the auspices of Live Oak lodge of Masons. There was a large attendance of horsemen and others who had known the deceased through an eventful career, and who assembled to pay their respects to the memory of the dean of American turf writers. Mr. Simpson left a wife, and two married and one single daughter to mourn his loss.

Mr. R. P. Lathrop, owner of that grandly bred horse Dictatus Medium, and one of the leading business men and progressive citizens of Hollister, was hard hit by the April earthquake. The quake threw down his two story brick building on the corner of 4th and San Benito streets in Hollister, the Grangers Union Building, a two story pressed brick building in which he was interested suffered damage to stock and goods of \$40,000, and the Gas Works in which he is a stockholder was also badly injured. Mr. Lathrop's loss will easily foot up \$20,000, but he says as he has his health and experience he will pull up again.

Oakwood Park Stock Farm.

In a recent interview with Mr. Humphrey, who purchased the celebrated farm from Mr. John F. Boyd a few months ago, we learned that the telegraphic news regarding this place being turned into a summer resort was erroneous. Mr. Humphrey and his two brothers are well known throughout the Middle West and Mexico as extensive breeders of cattle, horses and mules and have paid higher prices for pedigreed cattle as a firm than any other in America. The Ashland Herefords which they owned in one of their large holdings in Missouri became celebrated for the number of prizes won at all the large stock exhibitions and from these many of the choicest Herefords that head the leading stock farms in Texas and Mexico have descended.

Two of the brothers were in California during the late earthquake, one at the Oakwood Park Farm where very little damage occurred; the other happened to be in the fifth story of the Palace Hotel and after a most exciting time aiding in trying to extinguish the fire that finally destroyed that splendid building. He sent his trunk to some friend's place on Post street where he said he believed the fire burned it up as completely as if it had been left in the Palace. He left for Mexico where earthquakes are more prevalent than in California, last week.

His brother says regarding the Oakwood Park Stock Farm that the breeding of horses will be restricted to a few of the very choicest trotters and pacers. There are a number of well bred horses there, grand individuals, which he will sell in the near future. And from the reputation the horses from this farm have achieved in the past, there is no doubt that whoever buys any of these to be offered will never regret it. And it affords us pleasure to announce that this farm as the birthplace and training ground of so many record breakers will still be used for the same purpose and along the same lines established years ago which have proven so successful.

A pair of well broken small horses are wanted, suitable to pull a buggy over a hilly road. Apply at the office of the Breeder and Sportsman.

From Great Falls

Herman Johnson, of Great Falls, Montana, is one of the friends of the Breeder and Sportsman who has sent in the money for the paper since the quake. He states that Bob. Burris has Floy Direct 2:14 1/4 by Direct Hal at the Great Falls track and also owns a two year old sired by Mr. Johnson's stallion Directus J. This colt has been jogged on the roads for four months and has not yet been on the track, but can show a 2:30 clip. Mr. Burris thinks he is the greatest colt ever foaled in the State of Montana. This is the first colt by Directus J ever trained.

The mile track has been put in first class condition and is now ready to work horses. It is considered one of the fastest tracks in Montana.

Bob. Phillips has just bought Little Minister, 2:14 1/4 by Byerly Abdallah, from Walter Hill, son of President Hill of the Great Northern Railway. Little Minister raced against some high class horses last year, among others The Broncho.

Another of Harrison's Helps

F. W. Kelley, Esq., San Francisco, Cal., Dear Sir—

The First edition of the Breeder and Sportsman is before me, and I wish to congratulate you on your enterprise and wish you the best of success.

I enclose you my cheque for a year's subscription and hope that every old subscriber will do likewise, as after all, "it takes money to make the mare go" and I am quite sure this will apply to the re-establishing of your great journal. I know that you have the brains and pluck and experience necessary, but in addition to lots of grey matter in the establishing of any business enterprise, patronage and money are essential, and I sincerely hope that every old subscriber as well as many new ones will rally around you, while Phoenix like you are making a brave attempt to arise from your ashes.

May the Breeder and Sportsman grow, flourish and continue to be in the future what it has always been—the best horse journal in existence.

Yours very truly,

C. A. HARRISON
Victoria, B. C., May 22, '06

Notes and News

W. H. Button, veterinary of Santa Rosa, will accept our thanks for several stallion pedigrees, and a generous offer to share with us some of his valuable reference books. Dr. Button was engaged in relief work at Santa Rosa after the quake and over-exerted himself so that he is now confined to the house. We hope he may have a speedy recovery. Dr. Button owns the stallion Dorcus D 42259 by St. Whips, dam Italia, sister to Digirails 2:25½ by Daly 2:15. Dorcus D has shown a trial of 2:17 and will be trained for a race record this season.

Wilber Feild Smith, of Sacramento, known to every harness man in California writes us under date of May 26th offering us all the old volumes of the Year Books and Registers that are in his library, a generous offer which we greatly appreciate. He adds that all his catalogues and pamphlets were destroyed some time ago; that he had "a dray load, enough to reconstruct the Trotting and Running stud books, not to speak of rivaling Baron Munchausen and the Count of Monto Cristo." Mr. Smith will please accept our sincere thanks for his offer.

Stanford Stakes for foals of 1905 to be trotted in 1908, closes to-day. Send your entry to Secretary Filcher at Sacramento.

The A. B. Spreckles stake for two year old trotters and the Ben Rush stake for two year old pacers close to-day. These stakes are for \$1000 each. Enter with Secretary J. A. Filcher of the State Agricultural Society at Sacramento.

Thos. Atchison, known to the readers of turf papers as "Broad Church" over which nom de plume he has written for forty years, died at Memphis two weeks ago.

Major B. J. Thomas, one of the leading breeders of thoroughbreds in Kentucky, died two weeks ago. He bred Himyar and Domino besides many other great ones.

William G. Layng, formerly editor of the Breeder and Sportsman, but in late years manager of the Occidental Horse Exchange in this City left this week for a visit to relatives in Philadelphia, accompanied by his wife. En route Mr. Layng will visit the big stock yards at Kansas City and Chicago. He expects to return to California on September 1.

The Texas Fair Association announces that the following stake events to close July 1: For 2:24 trotters, \$1,200; for 2:15 trotters, \$1,200; for 2:12 pacers, \$1,200; for 2:25 pacers, \$1,200; for 2:18 pacers, \$1,200. A payment of \$10 is required to nominate. Altogether the Association offers \$35,000. In addition to the above named events the association will offer a number of purses of good value for heat and dash races for harness horses.

Sir Albert S. 2:03¼ has gone wrong again after a short season of work on the New York Speedway.

Martin Joosts' Steinway mare Presumption, foaled on the 12th of May a fine colt by Bonnie Direct 2:05¼. It will be either a black or a dark brown in color. All the Contra Costa county horsemen who have seen the colt pronounce him a fine individual, and predict a great future for him.

Mr. H. T. Owen of Kern, California, is the owner of a very promising filly called Irene Ayers, that is by Iris out of Babe by Altimont 985, consequently a full sister to Jasper Ayers 2:09, and May Ayers 2:23½. Mr. Jacob Broliar, who has been training this filly at Tulare says she improves every day he drives her and that she is a second Jasper Ayers for speed and gameness. Mr. Owen desires to sell this filly as he has not the time to devote to her. He owns her dam Babe, who will foal to Iris again in a few days and will be bred to Zombro this year. The filly is two years old and is entered and paid up in the Stanford Stakes for 1907. She is a great prospect for a winner of the stake. See the advertisement in this issue.

Easter Direct, the much touted green pacing mare by Direct 2:05½, with a reputed trail of 2:03¼, will hardly get to the races this year. She has wintered at Macon, Ga., by Ed. Mills, and threw out a splint not long ago, which made it necessary to fire her and throw her completely out of training.

John Ott of Pacheco is having a successful season with his horse Sidmoor. He has received inquiries from Modesto, Berkeley, Decoto, San Francisco, San Pablo and Santa Rosa concerning this great horse. It is possible that he may have to visit some of these towns with Sidmoor next year.

C. X. Larrabee, owner of the Brook-Nook Rancho, Home Park, Mont., has added the strongly Morgan-bred stallion Spokane, 2:15½, to his collection. Mr. Larrabee has also bought the brood-mare Lady Kane, by Spokane, 2:15¾, dam Ravelight, dam of Revel Kane 2:24¼, by Revenue, 2:21¼.

The Manitoba government has passed a Horse Breeders' Protection Act, which will protect breeders in the Canadian entries. It provides for the register of all stallions and the register must be printed on all bills and posters.

B. F. Wellington Jr., of Stockton will please accept our thanks for several old sale catalogues for our new library which is slowly but surely growing. Mr. Wellington also sends us a photo of a very handsome six weeks old colt by Lecco 2:09¾ out of the Palo Alto bred mare Clarette by Azmoor, second dam Clairionetti by Dexter Prince, third dam Clarion by Ausel, fourth dam by Dictator, fifth dam by Norman 25, and sixth dam by Mambrino Chief. This is one of the best bred colts in America.

In a letter enclosing a cheque for his subscription to the Breeder and Sportsman, Dr. J. H. Wagner of Selma states that his mare Bell Ayers, own sister to Jasper Ayers 2:09 and May Ayers 2:23½, foaled a dark brown or black colt by Robert Direct on June 29th this year. This colt the Doctor has entered in Breeders Futurity No. 6, and states that it is a very likely youngster. He is breeding Jaspine Ayers, dam of Jaspine 2:14¾ to Robert Direct this season, and expects the resultant foal to be a high class one, as all of Jaspine Ayers' foals are very racy. His two year old colt Don Gentry by John R. Gentry 2:00½, dam the Donna Inez, dam of Vena Inez 2:20¼ by Stranger, is developing into a large fine looking colt that is almost the exact counterpart of his famous sire that should be a great horse some day if looks and actions count for anything. Mr. S. C. Walton of Fresno is working this colt and recently drove him a half mile in 1:17, which is good considering the very limited training the two year old has received. He is entered in the Breeders Futurity and will race this summer. Don Gentry has repeatedly shown eights in 17 seconds. He was two years old on the 20th of May.

It is believed that all the stakes offered by the Oregon State Fair have filled. Secretary Durbin will send us the full list of entries this week.

Burns and Waterhouse will send their yearlings to New York on July 10th to be sold at auction by the Fasig-Tipton Company. There are over 30 head of grand looking and royally bred youngsters, by Altamax, Col. Wheeler, Eddie Jones, First Notice, Corrigan, Lovdal, Maxnic and First Tenor.

Sterling R. Holt has already sold several of the young Sidney Dillons he purchased in California. To Dr. Hendricks of Martinsville, Indiana, he sold the two year old stud colt out of Stamboulita 2:27 by Stamboul; to J. F. Fulmer of Pittsburg he sold the four year old gelding out of Silver Eye by Abbotsford, and also the two year old out of Russie Russell by Bay Rose. All these will be developed for speed.

Ted Hayes will race several of the horses owned by W. A. Clark Jr., in Montana this year. He has some rare good ones and they are all in fine shape.

Mr. C. L. Jones of Modesto went to Los Angeles last week and took in the matinee races there on the 23d. He writes us that there were ten thousand people at Agricultural Park to enjoy the sport. While there he saw W. J. Durfee work his five year old McKinney stallion Carlokin a mile in 2:14¼. Durfee has just begun to give Mr. Jones' horse stiff work, and he will trot in 2:10 this year sure. His record of 2:20½ as a three year old does not bar him from the biggest trotting stakes on the Grand Circuit, and if Carlokin goes east next year he will win his share of the money, as a gamer horse never lived. Mr. Jones has shipped Guy Walda McKinney to Mr. Durfee to be worked, and also sent Walda down to be bred to Carlokin. Waldo's colt by Carlokin is an exceedingly handsome youngster.

The two-year-old colt by Nazote, 2:28½, out of Liska, 2:28¼, dam of Lisonjero, 2:08¼, etc., owned by T. F. Adkin, of Rochester, N. Y., is spoken of as a promising futurity candidate.

Zambia 2:14¾, the mare by Cupid out of Gallata by Stamboul, that Mr. A. B. Spreckels sold at a Fasig-Tipton sale two years ago, is beating everything over the Boston speedway this year. It is stated that she has won every brush since the season opened. A chestnut gelding by Dexter Puce out of the dam of Zambia was bought at the Aptos Ranch sale in this city April 10th by Mr. C. C. McCafferty for \$500.

George Zilligitt, of Sawtelle, California, owns a gray horse that has a mane 18 feet long and is still growing. Morris & Rowe, the circus proprietors recently offered \$1000 for this horse, but the offer was declined.

Mr. C. G. Owen of this city reports that his fine mare Nancy O by Clay S 2:13 $\frac{1}{4}$ foaled a very handsome filly May 14th by Budd Doble's stallion Kinney Lou 2:07 $\frac{1}{4}$

Thos. S. Griffith, proprietor of Glen Tana Farm, Spokane, Washington, has recently purchased the highly bred stallion Gallatin Gratten 41212, by that good sire Gratten 2:13, and out of Miss Nefert, a daughter of Lord Russell, own brother to Maud S. 20:8 $\frac{3}{4}$. Gallatin Gratten. His pedigree is rich in trotting blood.

Mr. E. M. Humphreys, manager of the Oakwood Park Stock Farm will consign a lot of work and road horses to the sales ring shortly and will probably sell them in San Francisco.

Fred Cornehl has entered his pacing mare Mollie Button by Alex Button through the Montana circuit. He has also entered Homeway 2:14 $\frac{3}{4}$ the fifteen year old trotter, through the same circuit. Dan Misner will train and drive them.

Mr. Geo. W. Kingsbury, proprietor of the Lick House, was a very heavy loser by the earthquake and fire, and carried no insurance. Mr. Kingsbury is one of the sort that do not stay down however and he will be in business again shortly. He has been at his ranch near Sebastopol, Sonoma county recently, and last week sold his handsome and fast trotting mare Della K to City Marshall Fred Matthews of Sebastopol for a good figure.

G. C. Owen of Hanford will soon start for the east with Jonesa Basler, the fast pacing horse which was raised and is owned by Jolly Snyder of Kings county. The animal is now controlled by E. Gravatt under whose management the horse will be given the eastern trip. Jonesa Basler has made good record as a race horse in California and now has a record of 2:11 $\frac{1}{4}$. He should be a good horse in his class over east, as he is equal to three heats below 2:10 any time he is in condition.

It is as yet undecided where the Sweet Marie 2:04 $\frac{1}{4}$, Tiverton 2:04 $\frac{1}{2}$, Wentworth 2:04 $\frac{1}{2}$, race will be trotted. All three are reported working well.

Matinee Races at San Berdoo

San Bernardino, California,
May 22, 1906.

The Breeder & Sportsman
San Francisco

Gentlemen: The San Bernardino County Driving Club, after postponing their races from May 1st to May 10th and again to May 17th on account of wet weather were favored with a fine day Thursday 17th and pulled off a very successful matinee.

In the free for all trot R. Ambush by Zolock 2:05 $\frac{1}{4}$ was scratched and Hazel Kinney by McKinney, went an exhibition mile finishing easily in 2:31. In the two year old race two very fast heats were raced. The Captain, by On Stanley, showed himself well, finishing the second mile in 2:34 and only nosed out in 2:33 in the third heat. This colt has only been bridle wise about four months.

In your last issue you stated that On Stanley, 2:17 $\frac{1}{2}$ by Direct, dam Lily Stanley had died in Santa Barbara last month. This statement is in error as On Stanley is not only very much alive but I expect to breed back my trotting mare Lady Joy, shipped by me from Michigan two years ago, she having foaled a fine brown colt Sunday, of which On Stanley is the sire. On Stanley is owned by Wm. Rourke of San Bernardino and is making the season at his stables in this city, and those who know the horse report him as being in the best form he has shown in years.

Following are the summaries of the races:

2:30 Mixed.
Monocrat (F. P. Ogden) 2 1 2 1
Miss Monabells (J. H. Thompson) 1 2 3 2
Adalanth (G. W. Prescott) 3 3 1 3
Time—2:22 $\frac{1}{2}$; 2:21; 2:26; 2:24.

2:50 Mixed.
Lady Nutford (Dr. F. A. Ramsey) 1 4 1
Nearest (Dr. W. L. Spoor) 2 3 2
Baby (Maurice Griffin) 4 2 3
Zella Z. (Dr. F. A. Ramsey) 3 1 4
Time—2:35; 2:37; 2:34.
Exhibition Mile.
By Hazel Kinney (John A. Cole).
Time, by quarters—34; 1:06; 1:40; 2:13.

Two-Year-Olds.
Peggy McGinn (R. T. Curtis) 1 2 1
Captain (John A. Cole) 2 1 2
Raven Locke (Albert Johnson) 3 3 3
Time—2:48; 2:34; 3:33.
2:40 Mixed.

Conchita (J. H. Thompson) 1 1
Cedrick (W. C. McCully) 2 3
Forelock (J. E. Cram) 3 2
Time—2:23 $\frac{1}{2}$; 2:28 $\frac{1}{2}$.

From Arizona.

Phoenix, Arizona, May 23, 1906.

Breeder and Sportsman: We are glad to get your valuable paper again and extend our sympathies for your loss, and we had no doubt you would survive and come to the front again.

The horse business here has been good this last winter and spring and all the horses have been doing well.

J. C. Adams' string of four has left for the Grand Circuit meetings. Custer by Sidney Dillon is a much improved horse and no doubt will be in the front. Bystander by Zolock is a great horse and can side step with any. He stepped a mile before being shipped, in 2:08 $\frac{1}{4}$ and the last half in 1:01 $\frac{3}{4}$. Sally Pointer, although large, can step herself some, while Billy A. is the sweetest pacer Arizona has ever seen and will make someone step lively to beat him. We are in hopes that Mr. Adams will have the success he deserves for the interest he takes in the horses.

Dr. Ramsey V. S. is making a great season with his McKinney stud, Russell Mc. here and has already thirty-five mares to him. Oh So, the sire of Speed is also making a heavy season.

A. H. Davidson's mare, Delnette 2:25 has one of the best colts at foot that has been seen here for some time. He is by Arizona McKinney, first dam Delnette by Boydell. Arizona McKinney's dam is Lillian Melbourne by St. Vincent 2:13 $\frac{1}{2}$. This colt stood 41 inches high when born.

Milo McKinney by McKinney, dam Lady Rivers is being tried to a few mares this season also. He is a full brother to Sweet Marie and is quite a trotter.

We are all looking forward to our Territorial Fair this fall and expect to see some good horses come here for the fair which will be November 12 to 17. It was a great success last year and no doubt will be this year, owing to plenty of rain last season. We have good crops of hay and grain; baled hay oats are selling at \$7.00 per ton now, so feed will be cheap; although horses are very high and scarce, a lot of well bred young colts are coming up that will be a credit to any place.

W. C. Greene's horses are still here but expect to leave for New York the first of next month. Mr. Breckinridge of Tucson has sent up a three-year-old pacer to Mr. Robertson to train, that looks like good goods. Also, M. McGuire of Douglas has a good one in Mr. Robertson's hands. Robertson is track superintendent and has eight head in training for the fall meeting.

Yours respectfully,

RAIE.

Encouraging Words From Hollister

Hollister, May 28, 1906.

Breeder & Sportsman:—I am glad to see that you are to print the Breeder & Sportsman in the old form by July 1st. There is an association with the appearance of the paper that we miss. The fire and earthquake hit us all, but with true western grit and determination we will all get up again.

There is unusual activity at the Hollister track. Joe Sanchez, J. Mack, and M. Williams are working several horses. Ed Wright is working Salva, the filly which made such a good showing here last season as a two year old. She is entered in the Breeders Futurity Stake and is a remarkable filly.

I am now commencing to work Star Medium a yearling by Dictatus Medium, dam Diva. He is a big fine colt and should make a good one. The full brother to him died as a suckling a few days ago from colt distemper. He was a beautiful and well built colt.

We expect to have good racing here this season. We have the making of an excellent track, and Mr. Mack is doing everything possible to make it first class for training and racing over and is succeeding, as the course is getting into fine shape.

Sincerely yours,

R P LATHROP

From Stricken Santa Rosa

Mr. F. W. Kelley, Dear Sir:—I see by the Breeder you are all alive and still doing business. Well, you had some shake and a hell of a fire, and we had a hell of a shake and plenty of fire here in the city of Roses that Lou Dillon put on the map. Some say we are wicked and for that reason were put off the map, but I believe Mr. Sterling R. Holt of Indianapolis will put us back and make us known with the get of Sidney Dillon this year. I will do the best I can to help with Guy and Major, "sons of the old horse." They are both working nicely.

Well, my water tanks are all down and chimneys also, but will get them up again as soon as possible. The quake didn't do any damage at all to the buildings at the Santa Rosa Stock Farm.

Dick Ables is working three stake colts by Washington McKinney. One has been a quarter in 37 $\frac{1}{2}$ records, and two three year olds have been miles in 2:29 $\frac{1}{2}$ and 2:36 $\frac{1}{2}$ respectively. Mr. Holmes has a nice going pacer by Meridian that can beat 2:20 and looks to me like money in the green class.

It looked a while ago as if everyone wanted to get to Pleasanton, and they have a good chance to stay there now.

FRANK S. TURNER.

Pleasanton Track Items

By I. B. Dalziel.

Dr. Boucher, Joe Cuicello and George Ramage left this week for Denver, Colorado. Doctor Boucher took Bert Logan 2:16½¼, owned by himself, the Stam B. mare Ramona B., owned by Tuttle Bros. of Rocklin, and Derbertha own sister to Don Derby 2:04¼, owned by ———. Ramona B. is a trotter and one of the best prospects that has left Pleasanton this year. Derbertha is a pacer and a good one. Farmer Bunch worked her a mile in 2:07½ last winter at Pleasanton. Joe Cuicello took Ringrose, the fast pacer by Falrose that stepped a mile in 2:11 before going away, Mabel Winn, a very fast trotting filly by Zambro out of Grace Kaiser, the dam of Coney 2:02, and Thomas M., a big green trotter by McKinney that has worked a mile in 2:14½.

Ed Parker has George Davis' horses at the Pleasanton track. He will not go East this summer. He is working a bay trotter by Hart Boswell that has stepped quarters in thirty-five seconds and a mile out in 2:30. Another called Derby Direct by Chas. Derby out of a mare by Direct has been a mile in 2:18, with the last half in 1:04½ and the last quarter in thirty-one seconds. Another, Peter Direct by Rey Direct, dam by Anteeo, has paced a half in 1:07½ with the last quarter in 31½ seconds. He will soon bring to the track four or five yearlings from Mr. Davis' ranch which he will shape up to send East next year.

Dan Misner has gone to Montana. He has an exceedingly fine prospect in a trotter by Seymour Wilkes out of a Secretary mare, that is owned by Ed Sutro. He also took Fred Cornehl's mare Mollie Button that is well entered in the pacing classes through Montana circuits and the old campaigner Homeway 2:14¾ owned by Gus Lindauer.

S. Siljan is at Pleasanton with four good ones, all young and getting their first lessons in speed, for which they show great aptitude.

Henry Delaney has taken his great stallion, Zolock 2:05¼ to Salem, Oregon, where he will undoubtedly make a good season with the fastest entire son of McKinney, as the Oregon breeders are wise. Mr. Delaney also took with him the handsome filly Louise Carter by T. C. 2:30. She is a two year old and a very promising trotter.

S. Christenson and Frank Jermyn went to Tonopah last week and their friends hope they may find a mine worth a million.

James Thompson left for the east this week with Col. J. C. Kirkpatrick's string of Grand Circuit

horses. He has John Caldwell 2:08½ one of the best trotters produced in California in late years. Dadaelion 2:08¼, A. Ottinger's pacer that the Colonel will race in his string this year, Manuel, a green pacer by Nutwood Wilkes that should win some of the money, Bailey, a fast pacer by Cupid and Lucretia, a green mare by Nazote.

Walter Mendenhall is the party who purchased the fast pacer Edwin S. 2:08 from E. A. Servis. The pacer went east with Jack Curry's string which is claimed by some of the horse experts to be the best string of its numbers that ever left Pleasanton. Mr. Curry has Jas. de la Monanya's two mares Tuna 2:08½ and Brilliant Girl, Mr. Treadwell's Charlie T. 2:13½, What Is It 2:11, Forest W. 2:14¼, Iloilo 2:15 and the pacer Edwin S. 2:08. He also took the green colt trotter Sir John.

Farmer Bunch is among the crowd that went east. He took the Iran Alto colt trotter with him. Thos. Ronan proprietor of the Pleasanton track has been on a visit to his old home at Dayton, Washington, where he is looking after his hay crop and other interests. Geo. Ramage looked after the track during his absence.

Bert Webster went east with Monroe Salisbury and Ben Walker is doing the driving for that end of the Butler string.

Murdock Henry of Haywards, owner of the good stallion Educator, has sold his ranch five miles north of Haywards. He has for sale several royally bred colts and fillies by his horse and by Bonnie Direct 2:05½ and other good sires. Mr. Henry will leave Pleasanton June 1st. The horses he has been training at Pleasanton have all done exceedingly well this spring. Among the horses that have gone or will go east this month are Mr. Zibbell's great trotter Adam G. 2:11¼, Mr. J. C. Mowry's fast mare Lady Mowry 2:12½, and Henry Helman's trotting gelding Mack Mack 2:12. These three are all by McKinney and with ordinary luck will be in his 2:10 list before the summer is over.

The pacer Bonnie Steinway went east in the car with Jack Curry's horses. He is owned by Griffith and McCounell, who have entered him through the Grand circuit.

All sons or daughters of George Wilkes that got standard records or sons that became famous as sires were gotten by him after he reached the age of 17 years. When 20 years of age he sired the great Alcyone 2:27, and when 25 years of age he got Baron Wilkes 2:18, Patchen Wilkes and twelve others that became famous as sires

Breeders Meeting at Woodland

Mr. T. J. Crowley, one of the Directors of the Pacific Coast Trotting Horse Breeders Association visited Woodland this week, to talk over with the horsemen and citizens of that town the proposition of holding the Breeders Fall meeting there from the 15th to the 17th of August inclusive. Mr. Crowley met with a most cordial reception and states that all seemed to not only be favorable to the project, but enthusiastic over it. Among the gentlemen he met were editors Leake and Mixon of the two daily papers, the Democrat and Mail, and Messrs. C. A. Spencer, M. C. Keefer, Mr. Ware, A. B. Rodman, J. C. Reith, Chris Seiber, J. A. Murray, O. A. Lowe, A. C. Stevens, T. S. Spaulding, Mr. Randall and many others, all of whom were in favor of the Breeders Association holding its meeting over the Woodland track this year. Mr. Crowley states that the track and grounds are in fine order and a large number of horses are working there. C. A. Spencer, H. S. Hogoboom, C. B. Bigelow, J. S. Phippen, A. L. Charvo, C. A. Harrington and others having good strings of promising trotters and pacers. Mr. Spencer, who is Superintendent of the Woodland Stock Farm owned by Mr. Alex. Brown, is quite sanguine that a good bonus will be raised by the citizens of Woodland to bring the meeting there. Last year when a meeting was proposed for Woodland the Supervisors of Yolo County appropriated \$1000 to be given as premiums for a show of live stock, Yolo County being the home of some of the best herds of cattle, sheep and hogs in California, while the draft, coach, thoroughbred and trotting breeds are largely represented. A race meeting and stock exhibit combined will draw thousands of people to Woodland and Yolo County during the week.

Spokane Stake Entries.

The two \$1000 early closing stakes offered by the Spokane Interstate Fair filled well. The Northwest Stake for 2:16 class trotters received nineteen entries and the Falls City Stake for 2:12 class pacers has seventeen entries. The lists are as follows:

2:16 class trotters—P. H. McEvoy's Millbrae, Mrs. Kate Masten's Marvin Wilkes, W. B. Clowe's Monarch Medium, Geo. L. Warlow's Athasham, J. A. Jones' Lady Jones, F. J. Richardson's Pius, Ed Sharkey's Mayo, Thomas Moreland's Senator H., D. McDurmid's Jack Monroe, W. A. Ferguson's Kitty Clover, John Lance's Dr. Bunnell, F. E. White's

Brilliant, C. H. Lynch's Francisco, N. K. West's Satin Royal, F. E. Wright's Dredga, F. J. Rubstaller's Wild Bell, John H. Garrett's Lady Alfred, S. S. Bailey's Oma A., W. F. Watson's Red Skin.

2:12 class pacers—James Sutherland's John R. Conway, M. B. Sweeny's Cuckoo, S. C. Walton's Lady R., James Ervin's Ollie M., R. E. Davidson's Bridal, G. E. Peringer's Swiftwater Bill, L. C. Shell's Bonnie M, Woodland Farm's Buford, Ben Davies' Delilah, W. Harris' King Altamont, Brooker and Barnes' Bosida, R. D. Wiley's Amble W., Geo. Jenk's Duchess, W. F. Watson's The Imp, S. S. Bailey's Vinnie Mann, John H. Garrett's Remember, F. J. Rubstaller's Billy Dooley.

At Sam Hoy's Winters Track

Hoy's training stables are unusually busy this spring says the Winters Express, and there are several horses that promise to give a good account of themselves on the track during the coming season. Among those the reporter saw worked out the other day were:

McFadyen, a three-year-old stallion, by Diablo, with a record of 2:15½ at two years. He won the Futurity stake in 1905.

Then there is a half-sister of McFadyen, a two-year-old filly by Searchlight, that is stepping right along as though she meant to make a record. She is entered in the Futurity. Both belong to Del Dudley of Dixon.

Dorsey Cooper of Elmira has a green three-year-old pacer by Jules Verne, dam by Guy Wilkes, that is a very promising animal.

S. H. Hoy's own string is composed of—

The trotting stallion Jules Verne, sired by Demonio, dam May Norris.

Suisun, a green pacer, by Demonio, dam Hannah by LeGrand.

The Oregon, a green pacer, by Altamont, out of the dam of Kelly Briggs; and a green trotter by Oro Belmont, dam May Norris.

Ed Swasey, Dixon, has a green trotting mare by Zombro, dam by Antevolo.

Some of the other pretty steppers are a green pacer by Bayswater Wilkes, dam by Searchlight; a green pacer, full sister of Kelly Briggs; a two-year-old trotter by Searchlight, dam by Nutwood Wilkes; and two green trotters, one by Don Marvin, and one by Jules Verne.

It is well worth a drive out to the track to see the nags tried out some bright morning. There are more of them and some of them are speedy, too.

Rod, Gun and Kennel

Conducted by J. X. De Witt

The ninth annual blue rock and live bird Kimball and Upton tournament is the shotgun fixture on the new trap grounds at Whiskey Hill, Sacramento tomorrow. The general program as usual, is an attractive one. It is anticipated there will be over 100 shooters in attendance. We are sorry that a prior arranged trip to Portland prevents our presence at the capital city shoot, for we have found the Sacramento shooters and their conferees a jovial lot of sportsmen wherever we have met them. At all events Frank Newbert, Mr Upson, Geo. Williams,

Frank Rubstabler Jr, and the rest of the talent will pull off a happy tournament

Aside from the general events the principal individual and team races are a big card in themselves and should draw a big entry to the firing line.

Dr. R. E. Smith, who was last year's winner of the Washington gun club medal, will have to defend his title. In addition there will be decided the live bird championship and the three man team shoot. Frank Rushtaller, Frank Newbert and Monte Newbert compose the team now holding the silver cup donated by the Gridley Gun Club. They have won it twice by scores of 55 and 56 out of a possible 60. The live bird medal is held by Ed. Fissel of Davisville. "Dutch" Humble will have to defend two championship titles, as he was the last year winner in the Northern California championship blue rock event and the shoot for the Infallible cup.

The first day there will be shooting at live birds and blue rocks, while the second day will be devoted exclusively to blue rocks. Kimbal & Upson announce that there will be added money to the purses, while the merchandise prizes are especially attractive. The Adams system of class shooting, which is to prevail, is thus described: One hundred entries at \$1 each \$100; divide \$100 into four prizes of \$25 each. First class, \$25; second class, \$25; third class, \$25; fourth class, \$25; total \$100. By class shooting is meant that if two shooters make twenty straight they divide the \$25 in first class, or \$12.50 each. If three shooters make 19 they divide the \$25 in the second class, or \$8.85 each, and so on. Under this system every shooter has an equal chance for the purses, for all the money is not placed within the reach of the high gun fellows.

Apropos of trap shooters and their management sportsmen's journals have from time to time urged upon gun club secretaries and officials the importance of keeping the sporting press supplied with results and data concerning shoots.

Ever since the trap shooting game has been in existence the careless or indifferent shoot manager has been a thorn in the side of the sporting press. And what is more, he will continue to be until the end of time. It is a pleasurable reflection, however, that the careless one is in the minority. That he exists at all is to be regretted.

The publication which devotes time and space to giving the shooting public advance information on trap events has a right to expect reciprocal treatment. The press boosts your sports freely and without expense, reviews your programs and puts your events before the shooting public in the best possible light. Your shoot is held. It may be a success; it may be a failure. In either case and in any event you fail in your duty if you do not see to it that the journals you have used prior to the shoot receive the scores after it has taken place. Editors of sporting publications realize that shoot managers are busy people, often too much so for their own welfare. But editors have no sin-eure and the failure to receive reports of shooting events they have heralded for weeks prior to the meet does not make their existence any more a bed of roses.

Be fair with yourselves, with the shooting public and with your friends, the shooting press, and you'll have less to answer for some day.

The Baltimore shooting Association held a shoot on April 28th for the benefit of the San Francisco Relief Fund and the sum of \$25 thereby was realized. W. Watkins was high gun, breaking 94 out of 100. G. H. Gent was second with 92, and T. H. Keller, Jr., and J. H. Moxley were third with 91 each. During the shoot Gent broke 25 straight twice and Watkins 25 straight once.

We are pleased to not the expression of sympathy and aid tendered by the Marylanders and take the liberty on behalf of our sports, to return thanks for an act that is appreciated by every shooter on the Pacific Coast.

Charlie Mowry of the Sporting Goods Gazette, published in

Syracuse, N. Y., (and a very good journal it is too) has a warm heart as will be seen by the following. Phil B. Becekart recently forwarded \$1.00 his subscription to the Gazette. By return mail Beckhareart received a receipted bill accompanied by the statement that the Gazette could not accept any money from San Francisco "and hope that you may place the \$1.00 where it will do the most good. Glad to see your energetic spirit and hope you will soon be in running order again."

The amount is not much but the sentiment shown is worth more than money.

The Boise City and Inter-Mountain Gun Clubs of Boise City, Idaho, held a blue rock tournament on Wednesday. Both Sargeant systems and expert traps were used. Cash, medals and merchandise prizes offered were a strong inducement for large attendance from all parts of Idaho and some Washington points.

We learn that The South Bend Gun Club have recently fitted up a trap shooting ground and will hold regular shoots throughout the Wash., season.

Garrett and Theilman recently tied 22 out of 25 each for the Du Pont cup at a shoot of the Seattle Gun Club. At a subsequent meeting, May 11th, Theilman broke 23 and won the cup. The Seattle Rod and Gun Club has decided to affiliate with the National Rifle Association and will fit up a range.

Walla Walla, Wash., shotgun enthusiasts are showing considerable improvement with their regular weekly practice. On May 13 Kersha and Gibbons each broke the first 50 birds that were thrown from the traps. On the last 50 out of the hundred birds thrown for each Gibbons missed two and Kershaw 5, leaving their percentage at 98 and 95 respectively.

Scores at 50 targets were: Kershaw 50, Gibbons 50, Hills 44, Smails, 47, Peck 40, Drumbheller 41, Martin 9, Fulton 8, Talbot 40.

At 100 targets Gibbons 98, Kershaw 95, Smails 90, Hayden 90, Peick 76, Martin 71.

The knights of the rod are not a whit disgruntled apparently by the disturbance of the every day current of affairs in this city. There is good trout fishing to be had in many streams and the anglers are on to the situation.

Shad fishing with dip nets is the sport found at night in the San Joaquin by Stocktonians.

The striped bass anglers have located the borax wharf at Alameda Point as a great coign of vantage for the sport.

Al M. Cummings besides losing two valuable shotguns lost several fine rods and a lot of tackle that was in his office when the insurance district went up in smoke.

The first tuna of the season, which opened May 1, was caught Sunday, May 13th by Peter Reyes and when put on the scales weighed 18 pounds. The catch made quite a sensation on the beach and such member of Tuna Club as are here at this early date viewed the prize with envy. Prizes are offered by the club throughout the tuna season.

There is a closed season on perch and black bass in Washington state lasting from May 15 to July 1.

Bass fishing has been unusually good this spring. Ordinarily but few are taken in the spring before the season opens, but the bright sunshine and continued dry weather up to a few days ago brought the fish even to the fly while frogs and "spinner" minnows and sometimes spoon were good bait.

Salmon are beginning to run in Monterey bay. A week ago the first catch of the season, by market fishermen, numbered over 50 fish. This means that the best-salmon fishing on the Coast is now awaiting the attendance of anglers.

Mr. E. M. Tidd of Berkeley, who recently purchased Glen Tana Cracksman, wrote to Mr. Griffiths concerning his new dog as follows: We are very much pleased with "Bruce," especially because he is a good stock dog. I have bought several dogs with the understanding that they were both trained on cattle and sheep, but Bruce is the only one that has proved a worker. As I have charge of all the live stock on the University Farm, I want my dogs to prove they are of value aside from show dogs or pets, and all my collies are workers. As I have not received Bruce's pedigree, I wish you would send it by mail, and will you please give me a list of his winnings.

The "famous desk" was destroyed but all of the evidence was saved.

Among the latest evidence secured is a case where a Bull bitch (and the fee of \$20) was sent to this city to be served by a Bull dog in San Jose. The bitch was never served but the \$20 was religiously kept.

The bitch was sent back to the owner in Los Angeles with a guarantee that everything was O. K. The only guarantee in the transaction was that the Los Angeles fancier was swindled out of \$2000.

Should such a man be countenanced by dogdom and tolerated in the judging ring?

Victoria show (C. K. C. rules) was a very successful affair May 16 to 19th inclusive Harry T. Payne judged all classes satisfactorily there being about 150 dogs benched.

Seattle held the boards last week from Wednesday till Saturday. "Jim" Cole of Kansas City was the judge.

Portland will close the circuit next week, four days, from Wednesday till Saturday. The writer will attend the webfoot show and hopes to have the necessary space for a complete report upon his return.

There are some gun clubs so fortunately situated as to profitably and comfortably hold trap shoots the year round almost. This is very fine for all concerned since interest is not allowed to lag, but they may be said to miss that degree of exhilaration coincident with the rehabilitation of the clubs paraphernalia after the duck or quail season is over.

After the awakening it requires close watch of minor matters to bring about a successful season and the basis of this success invariably proves to be in the purchase and sale of targets. Every target thrown should be scored and every target scored should be a C. O. D. transaction, for no gun club is expected to hire a bookkeeper and keep a set of books. Many a good club has become defunct because targets were charged up to members, proving that no club can afford to give credit with the back scores so easily forgotten and much less rapidly paid for than when the shooting is prospective. Neither can a club afford to ignore the "pick-ups"—those targets once thrown but not broken either by the shot or by the contact with the ground. These constitute found money for a club when sorted over, tested and ascertained to be in perfect condition for a second flight. The picking up, too should be done immediately after a shoot. It does not do to postpone the pleasure for twenty-four hours unless the grounds are enclosed. Boys have been known to visit unenclosed grounds and smash every target they could find just for the fun of the thing.

The Capital City Bluerock Club shoot last Sunday was attended by a large crowd of shooters. The weather conditions were ideal and some strong scores were made. Mr. Newbert winning the Capital medal with 19 out of 20 and D. Ruhstaller winning the Washington with 20 straight, shooting from 18 yards. This being the second time he has won the medal, he will be handicapped two yards, putting him on the 20-yard mark. Following are the scores:

Twenty birds—George Hart, 11, 13; W. Mott, 16; C. De Merritt, 18, 17; M. Newbert, 15; F. Newbert, 17, 20; C. Cotter, 11, 17; E. Adams, 16, 17, 15, 18; E. Julitan, 16, 11, 14; W. Skinner, 16, 14; C. Bauer, 13, 11, 11; O. Patrick 19, 14; J. Inman 17, 17, 19; F. Adams 16; H. Derr 6, 20, 8; C. Troxell 6, 9, 8; Al Corad 2; F. Rhustaller 5, 7; J. Hughes 20, 5; G. Gray 17; H. Kissig 15; F. Reichert 17, 17; D. Ruhstaller 16; J. Guisto 16; H. Vetter 14; H. McWilliams 10; H. Trumpler 16.

Twenty-five birds—J. Hughes 19; F. Newbert 22, 23; F. Ruhstaller 22; M. Newbert 22; H. Derr 18, 22; H. McWilliams 19, 17, 19; C. Merritt 21; J. Guisto 21, 21; H. Kissig 20; O. Patrick 20; C. Troxel 19; G. Davis 20.

Capital City Medal, 20 birds—J. Inman 17; F. Adams 13; J. Shenkle 9; G. Davis 15; C. Baner 1; G. Gray 18; C. Troxel 1; O. Patrick 16; J. Hughes 18; C. Cotter 15; H. Derr (18 yards) 17; F. Ruhstaller (18 yards) 16; E. Adams (18 yards) 14; F. Reichert 16; D. Ruhstaller 18; E. Julian 1; H. Kissig 16; J. Guisto 15; H. Vetter 15; G. Hart 7; W. Mott 10; C. DeMerritt 18; M. Newbert 19; F. Newbert 17.

Washington Medal, 20 birds—J. Inman 18; E. Adams 14; J. Shenkle 12; G. Davis 15; C. Bauer 13; G. Gray 18; C. Troxel 17; O. Patrick 18; J. Hughes 16; C. Cotter 15; H. Derr 19; E. Adams 11; D. Ruhstaller 19; E. Julian 13; H. Kissig 14; J. Guisto 17; H. Vetter 15; D. Ruhstaller and H. Derr tied on 19 each. In the shoot off Ruhstaller won 20 to 18.

Three man team, 20 birds—Kissig, Conrad, Hart 5; Gray, DeMerritt, Reichert 50; E. Adams, Guisto, Inman 51; winning; Mott, Troxell, M. Newbert 44; F. Newbert, Hughes, Cotter 47; Ruhstaller, Trumpler, Ruhstaller, 4 Davis, Vetter, Patrick 46.

The scores made at the San Luis Gun and Boat Club shoot on May 13th were as follows:

At 12 targets—E. Taylor 7, 8; J. Vanhaick 9, 6; R. Hearne; Chas. Marino 8, 9; C. Younglove 9, 8; A. Van Scoy 9, 9; C. T. Greenfield 10, 5; J. Hill 4, 9; J.

Estuadillo 11, 11; J. Ronetzky 6. At 20 targets—Taylor 15, 13; VanSchaick 13, 15; Hearne 6; Marino 14, 16; Younglove 14, 17; Van Scoy 14, 12; Hill 13, 15; Estuadillo 13, 15.

Trap shooting is having a boom-let in Monterey and San Luis Obispo counties. A team shoot is scheduled of to-morrow between the San Luis Gun Club and the Paso Robles Gun Club, to come off at Paso Robles.

At a meeting of the Paso Robles Gun Club on May 13th, the program embraced 10 events. Johnson and Sudydam were the high guns in nearly every event.

The scores in a 20 target race were: Colling 12; Johnson 17; Mader 11; Cress 13; Sudydam 16; Himlaton 9; J. Daniels 14; Jefferson 16 Gaxiola 16; L. McDaniel 9; Hans Iverson 4; Wood 6.

First Handicap match—Dr. Cress 6 out of 31; Sudydam 7 out of 10; Johnson 10 out of 10; Gaxiola 9 out of 10; Janney 11 out of 12; J. McDaniel 5 out of 10; Colling 8 out of 10; Hamilton 5 out of 10; Keller 4 out of 13.

Second Handicap match—Gaxiola 6 out of 10; Sudydam 9 out of 10; Colling 7 out of 10; Johnson 7 out of 10; Cress 2 out of 11; Iverson 2 out of 11; Janey 7 out of 11.

Colling, Janney and Johnson tied and shot a five bird match with the following result:—Johnson 5, Colling 2, Janney 2.

At a recent shoot between Raymond and South Bend, Wash., sportsmen the series in scores in a 25 target race were: Geo. Cassels 13, E. A. Seabor 16, Dr. Schenk 12, C. E. Wilson 11, P. H. Ilwel 16, R. White 19, F. M. Bryam 6, T. Lewis 3, C. L. Hinkle 8, R. W. Barrett 15, C. F. Cathcart 1, F. Sturgiss 0, Wm. Shumay 2, C. Bendel 11, F. Chase 10, Mr. Berlin 8.

A number of Aberdeen, Wash., Sportsmen have organized a rod and gun club. The club will include members from Aberdeen, Hoquiam, Cosmopolis and Montesno. About 60 names have already been secured. It is expected the club will number 100 members when organization is perfected. It is the purpose if possible to secure the grounds a short distance below Electric park, and if all goes well a two day's shoot will be held here during the summer, with teams from all northwest points competing. The location of the grounds is convenient. The club will afford a additional protection to the game of the county, and will stock the various streams with trout. Finch

Vidler is circulating the membership list and is meeting with good success.

Los Angeles Matinee

The Fiesta matinee of the Los Angeles Driving Club drew about ten thousand people to the track there on the 2d inst. The sensational features of the program were the mile to wagon in 2:14½ by John A. Cole's mare Hazel Kinny by McKinney, and the winning of the first heat of the free for all pace by Welcome Mac, also by McKinney, in 2:11, nearly every outside watch making Welcome Mac's mile a half second faster. The summary of the races follows:

First race, 2:30 pace—

Zollie, b m, Mosher	2-1-1
Henry N., gr g Delorey,	1-4-3
Toughnut, b g, Bryson	4-3-2
Billy K, b g, Moon	3-2-4
Time 2:21, 2:16½, 2:19	

Second race, free for all trot—

Danube, br h, Newton	2-1-1
Electric Maiden, blk m, Clark	1-2-2
Time 2:17, 2:14, 2:14½	

Third race, free for all pace—

Welcome Mac, b g, Hughes	1-1
Bonnie Ailsie, b m, Mott	2-2
Lohengrin, b g, Dodge	3-3
Fleety Gazele, br m, Wilson	4-4
Time 2:11, 2:13½	

Fourth race, 2:20 trot—

Billy H, b g, Clark	1-1
Burnut, b g, Ford	2-2
Abe Miller, b g, Mosher	3-3
Time 2:21, 2:17	

Fifth race, 2:30 pace—

Rondo, b g, Snowdon	1-1
Proctor, s g, Colyear	2-2
Laura G, b m, Pierce	3-3
Time, 2:19, 2:21	

Exhibition trot to wagon, to beat McBriney K's record of 2:5

Hazel Kinney, b m, Cole won.	
Time 2:14½.	

There has been considerable talk in certain quarters about long-drawn-out races and that horses could not stand three-in-five racing. In view of this the following, taken from a letter written by Horace Wilson, secretary of the Kentucky Breeders' Association, will be interesting: "Talking of old-fashioned racing, I want to give you some figures. In the past three years we have had just 104 races, requiring 351 heats, an average of a fraction over three heats to a race. Sixty-seven of these races, nearly two-thirds, were decided in three heats or less. Eighty-seven, or over four-fifths were decided in four heats or less. Seventy-five of the 104 races were for the best three-in-five heats, and of these 40 were decided in three heats, 58 in four heats or less, and 12 of the remainder in five heats,

so you will see that in three years' racing we have had but five races out of 104 over our track requiring more than five heats. I think that's a pretty good record for fight-to-a-finish racing, with the rules applied, and an honest effort to give every one a square deal."

Flying Fox, the Thoroughbred stallion bred in England by the late Duke of Westminster, has had the most phenomenally successful career ever achieved by a horse of his kind. He won on the turf approximately \$200,000, was sold at auction for \$190,000 the record price for a Thoroughbred stallion, has begotten in France where he is now owned colts and fillies that have won in three seasons over \$500,000 and now stands at a fee of \$3,025.

In the Coliseum building at the Union Stock Yards, Chicago, the old eighth-of-a-mile speedway, erstwhile the feature of the Dexter Park pavilion, has been restored to usefulness and in that mighty show building horses may now be speeded at the sales. At the recently held Chicago Horse Sale Company's vendue the crowd of buyer and sellers declared it the finest sale arena in the world. At this sale the highest price was \$900, paid for the pacing gelding Fremont S., 2:14 1/4.

Considering that two three-year-olds and one two-year-old, all New England bred, in fact Massachusetts bred, have sold for sums aggregating \$20,000 or more within the past two months, it would seem that breeding trotters in the "cold North" is not altogether unprofitable, says the American Horse Breeder. Of course not everyone who breeds can get a Cochato or an Achille, but when one of these prizes does come along it is worth a whole lot to the breeder. It is a significant fact, too, that two of these three colts, Cochato and a three-year-old by Bingen, out of Gaiety Girl that was recently sold for \$5000, were products of small breeders. As a matter of fact the big breeder has not as much advantage over the small breeder as may be imagined. More than half the Kentucky futurities have been won by parties who have nominated but one or two mares. A colt, if he is worth keeping at all, ought to sell for enough as a three-year-old to pay for his keep and if he should happen to turn out a crackerjack the price he would sell for would be a small fortune to the ordinary farmer and more than one mortgage has been lifted by such a sale.

Stanley Adderly, importer Carriage and Harness Sponges, now at 2103 Pine street, San Francisco, Cal.

Program of Butte Races

Horsemen who have been wintering in California and are figuring on summer racing season should not overlook Montana this year.

The first meeting of the circuit takes place in Butte commencing August 21st and running to September 5th, after which come five other towns with one week each.

The Butte meeting is so arranged that horsemen who so desire can catch the North Pacific Meetings after the closing of the Butte races.

Butte needs no introduction to the racing public and horsemen going to Denver would do well to arrange to go from Denver to Butte as the Butte Meeting opens shortly after the close of Denver. Below is given a copy of the Butte programme for twelve days:

Tuesday August 21st

Stake—2:30 trot, \$1,000. Closed
Purse—2:08 pace, \$500.

Running Stake—Opening handicap for three-year-olds and upwards, 6 furlongs, \$500. To close July 1st.

Running purse—1/4 mile running purse \$200.

Running purse—4 1/2 furlongs, running purse, \$200.

Wednesday, August 22d

Stake—2:25 pace \$1,000. (Closed)
Purse—2:16 trot \$500.

Running purse—4 1/2 furlongs, running purse for Montana bred three-year-olds \$200.

Running purse—3/4 mile handicap \$200.

Running purse—Special.

Thursday, August 2d. Elks' Day.

Stake—Three-year-trot \$500. (Closed) 2:20 class matinee trotters (cup) owners to drive 2 in 3.

Running stake—Elks' handicap for three-year-olds and upwards, 1 mile, \$500. (To close July 1st)

Running purse—3/4 mile selling purse \$200.

Running purse—5 furlongs, selling purse, \$200.

Friday, August 24th.

Purse—2:40 trot \$500. 2:19 class matinee pacers (cup) owners to drive 2 in 3.

Running purse—1 mile running purse \$200.

Running purse—3/8 mile selling purse \$200.

Running purse—Special, \$150.

Saturday, August 25th.

Purse—2:05 pace \$500.

Purse—2:24 trot \$500.

Running purse—3/8 mile running purse \$200.

Running purse—5 furlongs, running purse \$200.

Running purse—Special, \$150.

Monday, August 27th.

Stake—Three-year-old pace \$500. (Closed).

Purse—2:09 trot \$500.

Running purse—7 furlongs, running purse \$200.

Running purse—5 furlongs, running purse \$200.

Running purse—Special.

Tuesday, August 8th.

Stake—2:20 trot \$1,000. (Closed)

Purse—Two-year-old trot \$200.

Running purse—1 one-sixteenth mile running purse \$200.

Running purse—1/4 mile running purse \$200.

Running purse—Special.

Wednesday, August 29th.

Stake—2:18 pace \$1,000 (Closed)

Purse—Three-year-old trot \$300.

Running Stake—Butte City selling stake, any age, 7/8 mile \$5,00. (To close July 1st)

Running purse—1/2 mile handicap \$200.

Running purse—6 1/2 furlongs, handicap \$200.

Thursday, August 30th.

Purse—Free for all pace \$750.

Purse—2:14 trot \$500.

Running purse—1 mile running purse \$200.

Running purse—1/2 furlongs, running purse \$200.

Running purse—Special.

Friday, August 31st. Ladies Day.

Stake—2:14 trot \$1000. (Closed)

Purse—Three-year-old pace \$300.

Running stake—Woman's Club stake for two-year-olds, \$300, 1/2 mile (To close July 1st)

Running purse—7 furlongs, selling purse \$200.

Running purse—5 1/8 furlongs, selling purse \$200.

Saturday, September 1st, Miner's Day

Purse—2:27 trot \$500

Purse—2:21 pace \$500.

Running stake—Miner's Union handicap for Montana bred three-year-olds and upwards, 5 furlongs, \$300 (To close July 1st)

Running purse—1 mile selling purse \$200.

Running purse—6 furlongs, handicap \$200.

Monday, September 3d. Labor Day.

Stake—2:10 pace \$1,000 (Closed)

Purse—Free for all trot \$750.

Running stake—Labor Day handicap for three-year-olds and upwards 1 1/4 mile, \$1,000 (To close July 1st)

Running purse—1/2 mile running purse \$200.

Running purse—5 furlongs, running purse \$250.

CONDITIONS OF HARNESS EVENTS.

All harness races shall be on the THREE HEAT PLAN, money divided at the end of each heat, except in the matinee classes. These shall be two in three, no race to exceed three heats, and in case no one horse has won two heats, the horses to be placed according to the standing at the end of the third heat. Money divided 50, 25, 15 and 10 with 5 per cent entrance and 5 per cent additional from winners of first and second money only.

Entrance to purse classes to close August 1st, and complete description of horse must accompany the nomination fee. All nominations must be accompanied with cash. Any horse not finishing within 100 yards of the winner in any heat will be barred from further competition in the event.

No conditional entries accepted, but two horses may be named by the same owner in same purse and held

but for one entrance, but the starter horse must be named before 12 o'clock the day before the race. We reserve the right to declare off or re-open any race not filling satisfactorily by refunding entrance money, and to declare off or postpone races on account of bad weather.

There must be four starters.

Applications for stables should be sent to the secretary, stating the number of horses to arrive in order to reserve stalls.

Records made August 1st or after will not constitute a bar for PURSE races in the Montana Circuit. Records made subsequently to April 10th will not constitute a bar in STAKE engagements throughout the Circuit.

American Trotting Association rules to govern except hoppers not barred on horses over three years old.

All running races, except running stakes, are to be overnight events. Running stakes to close with nomination fee payable July 1st, 1906.

Entry blanks and any further information on application.

A. D. GALBRAITH, Sec'y,
Butte, Mont.

Sacramento is not to be a wide open town during the State Fair this year according to the Sacramento Union which says: "It may just as well be said now as at any time that the decent law-abiding element of Sacramento—by far the larger part of our population—has set its face against the demoralizations which in years past have commonly accompanied the State Fair season. We will not tolerate here revival of that wide-open condition which some pretend to think a legitimate part of the State Fair season. We will not tolerate any 'lay-down' on the part of the municipal authorities in behalf of the gambling interest and of vice in general. Let this matter be understood in advance—let it be known that the city authorities from the top to the bottom must respect the law or face the contempt and resentment of the decent people of Sacramento."

June 5 and 6 a horse show is said to be held in Rutland, Vt. It is announced that a feature of the exhibition will be the selection of two stallions and two brood mares for the starting of the United States experiment in the breeding of Morgan horses for cavalry purposes.

Major David Castleman, Pleasant Hill, Ky., reports the sale of the saddle-bred stallion The Moor 1907 at a price of \$7,500 to Gen. William Palmer, Colorado Springs Col. The Moor is by Cecil Palmer dam Lizzie Cromwell by Harrison Chief. The horse is three years old and is described to be one of the greatest of the breed ever produced in Kentucky.

News From Los Angeles

One of the largest crowd ever been at Agricultural Park attended the matinee of the Driving Club on Wednesday of last week. There must have been 10,000 people present. Johnny Brooks left for Denver May 25th with the good green trotting mare Neergard by Neernut 2:12½ out of a mare by Diablo 2:09¼. She worked a mile in 2:16 before leaving.

Charley Jeffries expects to leave for the same place this week. He has a green pacer that recently stepped the mile in 2:33.

M. Todhunter was down from Sacramento last week to see his four Zombros that Ezra Tilden is training. Billy Emerson is a four year old and worked a mile in 2:22; Zomitella, the same age showed him a mile in 2:25½; Silver Hunter, a three year old better known as Hooligan stepped his mile in 2:26½, and as he is entered in all the stakes on this coast this year will bear watching; Gerald G. also a three year old and in all the stakes in California, marched a mile in 2:23½, and looks like a sure winner. All three are trotters, and all by Zombro. Mr. Todhunter offered to sell Gerald G. for \$2500 to a man who asked a price on him. The party let a good thing go for the colt is cheap at \$4000. His dam is Italia by Sidney, and is the dam of Sidney Derby 2:20½. Mr. Tilden will continue training this colt and will probably race him for Mr. Todhunter, and started him in the Breeders Futurity, and the Occidental and Stanford Stakes.

Geo. T. Becker, owner of Zombro, has leased Silver Hunter from Mr. Todhunter, and will get him ready for the big end of these stakes. This young stud is a full brother to Zomboyette 2:16½, being sired by Zombro out of a mare by Silver Bow, son of Robert McGregor. Mr. Becker also leased from Todhunter the six year old mare Zomboyette for the racing season of 1906.

About the first man to put up a new building in New San Francisco was the energetic irrepresible Kenney, the bike man. The next week after the fire had destroyed his factory and machines shop at 531 Valencia street, he was at work putting up a new building on the same spot and was soon doing business at the old stand. His stock of sulkies, carts, etc., is complete and he is selling them at the same old prices with a good percentage off for cash. If you want a new sulky or cart, or want your old one repaired remember that Kenney is at 531 Valencia street and has been there ever since the ground cooled off sufficiently o stand on.

What's Doing at Dixon

On the excellent half-mile track at Dixon, Solano county, there are three very promising Altamonts at the present time.

First there is the black stallion Alton, by Altamont, dam by Alexander Button, second dam by Reavis' Blackbird. Alton has shown two minute speed in his work on numerous occasions. He paced a half mile to a high wheel cart weighing 98 pounds in 2:18 on this track last summer as a four-year-old, and is a very promising green pacer.

Second there is Falmont by Altamont, dam by Falrose, second dam by Alexander Button, third dam by Clay Duke, fourth dam by Signal. Falmont is a three-year-old. He was worked five months as a two-year-old and three months this year. After seven workouts he stepped a half on this track in 1:09½, the fastest half ever paced by a three-year-old on this track. He was slowed up on the turns in this half on account of hitting the wheels or he would have gone in 1:07½.

Third there is Oyama by Altamont, dam by Electus. Oyama is a three-year-old that was broke last year. He has paced a full mile on this track in 2:29½, with the last half in 1:11½ and will beat 2:20 soon.

These horses are all in Lou Mativia's string at Dixon, who is the owner of the black stallion Alton.

Respectfully
DIXONITE.

"SAVE-THE-HORSE" SPAVIN CURE

DON'T DELAY

Prepare your horse—put him in condition—at once if you want him ready for coming season.

"SAVE-THE-HORSE" has proven absolutely unfailing on Bucked Shins. One bottle will cure from five to twenty cases. For strained, injured and broken down tendons, it is marvelously effective.

POSITIVELY AND PERMANENTLY CURES Bone and Bog Spavin, Ringbone (except Low Ringbone), Curb, T. roughpin, Sprain, Capped Hoof, Shoe Rot, Woodbush and lameness. Horses can be worked as usual. It cures without scabs, blisters or loss of hair.

\$5 Per bottle, written guarantee with every bottle, constructed solely to satisfy and protect you fully. The need of second bottles is improbable except in rarest cases. Send for copy of guarantee, booklet and letters. All druggists and dealers or sent express prepaid.

Blasting operations and sawdust from lumber mills are raising hob with the trout in the Sacramento river near Oroville. The constant jar from the blasts affects the eggs in the process of fertilization, it is alleged. That there is ground for the protests there seems to be no doubt, as the complaints come only from the ranchers immediately along the line of operation, and not from those living farther back. The same blasts also destroy the hatching properties of chicken and turkey eggs. Anglers report that sawdust is so thick in places that the fish have been completely destroyed. In fact, it is said that below the mills it is useless to fish, while above them the fishing is yet fairly good.

Anglers claim that unless the dumping of the sawdust into the creek is stopped that it will be but a matter of a short time before the fish are completely destroyed.

Isn't He Worth Saving?

Why trade off or sell at a beggarly price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpuffs or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. L. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say with out hesitancy that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists.

Campbell's EMOLLIO IODOFORM Gall Cure

For GALL BACKS and SHOULDERS,
CRUPPER SORES and SADDLE GALLS
there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS,
SCRATCHES, BLOOD POISONED SORES,
ABRASIONS OF THE SKIN it has no equal.

Its use will absolutely prevent Blood
Poisoning. In this respect there is no Gall
Cure offered which can justly even claim to
be a competitor. We placed it on the Market
relying wholly on its merit of success, and
notwithstanding the fact that comparatively
little has been done in the way of advertising,
the sales of 1900 were 100 per cent greater
than the aggregate sales of Gall Cure pre-
ceding that year. This increase was entirely
due to its MERITS, and it is THE GALL
CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fet-
lock which injure and often lay up race horses.

All Trainers Should Keep It in their Stables

PRICE:—3 OZ. BOX 25c.; 7 oz. BOX 50c.; 1 LB. BOX, \$1.00

The Biggest String in America

Out at Palatine, twenty-five miles northwest of Chicago, Charles Dean is training the biggest stable of trotters and pacers ever trained in America, there being about sixty head in active training by Mr. Dean and his assistants. It is impossible to mention the lot, although in looking them over the admiration for the promising green ones has to be divided with the old campaigners with their sensational records.

The Broncho 2:03½ is the fastest of the lot, and although she has not been asked to step faster than a 2:10 clip, she does it in a way that betokens great things the coming season. Dorcas H 2:09½ is looking fit as a fiddle, and if she does not meet with the run of bad luck she had last year will be the 2:10 class sensation of 1906.

Several in his string belong to the Uihleins of Milwaukee, most of them receiving their first lessons. The star of this division of the stable is Gramattan 2:11½, the fastest four-year-old trotting filly somewhat erratic under the guidance of an amateur, but Dean has coaxed that all out of her, and she is a changed mare. He thinks she will beat 2:10 by a good big margin.

Another of the most attractive ones is Dean's stable is a chestnut mare by Axtell, owned by Secretary Knight of the American Trotting Association. She looks and acts a great deal like her famous sire.

Then there is another, a six-year-old stallion, that is a trotter for sure, and that is Teddy Grattan, by Grattan 2:13. He is owned up at Menominee, Wis., by Paul C. Wilson. He is not only a sure trotter, but by far the best looking stallion in Dean's stable. He is a big, robust, strong young fellow that will take a fast mark at no very distant day—Palmer Clark.

Riverside Driving Club Matinee

There was a big crowd at the Riverside track May 24th, when the local driving club pulled off an excellent program of races.

The first race was won by Binder's Mein Kleiner in two straight heats; time 2:42½ and 2:43. J. T. Garner's White Stockings was a good second in both these heats, pushing the winner to the wire. Otto Martin's Corbett and J. Hudson's Prince finished third and fourth, with J. A. Cole's Maybreaker scratched. Mein Kleiner, the winner is only a two-year-old, by Zolock, out of Mr. Binder's speedy big mare Fernwood, and the little horse is making a promising show as a racer. The first prize was a pretty piece of cut glass, offered by I. S. Logan and the second a driving whip given by Jack Kenyon.

One of the best races of the day was between Norda, owned by Prescott & Bonnell, and Lauretta, owned by W. A. Hayt. Norda took the first heat in 2:26, but broke badly in the second heat which Lauretta won in 2:32½. In the third heat Lauretta had a big lead till the stretch was reached, when Norda began gaining and in a great burst of speed landed first by a neck in 2:19. Norda won the first prize for the race, a handsome horse cooler, presented by R. J. Welch; and the second prize, a fine lap duster, presented by Sheriff Coburn, was given to W. A. Hayt, owner of Lauretta. But the heat also made Norda and her driver, G. W. Bonnell, the winners of the special prizes—an elegant gentleman's scarf pin, offered by Robert Lee Bettner for the fastest mile driven by an owner, and a beautiful stein, presented by John T. Garner and Eugene F. Binder, for the fastest mile driven by any member, whether owner or not.

The 2:40 pace developed a surprise for F. A. Ramsey's Lady Nutford won in two straight heats in handsome style from Laura K., who holds two legs on the club cup in this class, and W. W. Wilson's Ping Pong, who holds two other legs. The time was 2:39¼ and 2:39. Ramsey's Zella Z. was scratched. Ping Pong was a good second in each heat, with Laura K. finishing last. The first prize in this event was five sacks of rolled barley, and the second prize a \$3.50 pair of shoes.

G. H. Judd's The Trotter took two heats out of three in the 2:30 mixed, winning in 2:13 and 2:39; while the second heat was won by J. H. Thomson's Conchita in 2:34. G. W. Prestoncott's Adalanta finished third, and John A. Cole's The Blonde was scratched. All three heats were pretty races between The Trotter and Conchita, and the last heat was won only in the stretch by Judd's speedy gelding. The first prize was a \$6 pair of shoes, and the second was four bales of choicest hay.

Stanley McDougall's Pete made his appearance on the track after an extended absence, and the old fellow led the bunch a merry chase for two good heats, winning both in 2:35 and 2:37. Maurice Griffin's Baby and Beatty's Betty Raymond alternated in taking second honors, though the second prize went to Baby for the hot finish she pushed Pete to in the second heat. Pete won a safety razor for his owner, and the second prize was a fancy driving bridle.

Oak Park Driving Club

Sacramento, Cal., June 1st.

Breeder and Sportsman: Your issue of May 26th at hand, the first I have seen since the fire visited your City. I am pleased to have you on my table once more and I trust you are here to stay.

Oak Park Driving Club is prospering and our last matinee, May 13th, was a decided success according to the accounts of our esteemed dailies here. Didn't know you were in type, else I should have mailed you a account of the races.

The Club put on a three minute class, a 2:40 and a 2:30 class and the Sacramento Driving Club put on a special race.

Baby Knight, owned by Mr. Ira Woodworth, captured the blue ribbon in the three minute race, best time 2:42. Prince, owned by Charles Lewis was second, and Zwick, owned by Howard Kerr, was third. Lady Silver Bow and Black Sid also started.

In the 2:40 class Capt. Hackett was first Bess W. and Bell Madison dividing honors for second place. Best time 2:36¼. In the 2:30 class J. M. was the winner, with Sir Carlton second after taking the first heat, and Daisy S. third. Best time 2:27¾.

Frank Wright's Dredge easily

won the special event in the good time of 2:23. This is a green trotter by James Madison and he was never in a race before. He will be heard from again this year as he will be raced in California and up north.

A large crowd in the grand stand and the infield liberally patronized by people in stylish turnouts, gave the Agricultural Park grounds the appearance of a day in fair time.

Our Club proposes to hold another matinee in June and the Sacramento Driving Club will also hold one in the near future. The track is in excellent condition and steadily improving.

A. K. KERR.

The Draft Horse Will Stay

An English writer in referring to growing demands there are here for good draft horses, says: "Some fifty years ago when railways were springing up in all directions, farmers became in many instances so discouraged, thinking that horses would be no longer needed, that breeding was quite neglected for a time until gradually it was discovered, in spite of steam, the horse was still needed, and breeding was taken up again with redoubled energy. For the past two or three years the motor has been the bete noir of horse breeders, but so far there does not seem the slightest possible reason for this fear.

"Farmers will always find the horse the most suitable means, the cheapest, for performing their work, simply because half a dozen horses can be in half a dozen places at the same time, whilst a six-horse power motor cannot be divided, neither can extra speed atone for this. Many operations on the farm can only be carried out at a limited speed, such as stacking and loading at harvest time—the same with manure carting and numberless odd duties, and precisely the same applies to much of the work in the towns and at railway stations. Let breeders pay attention to the mating of their mares, discard the bad and indifferent too, where possible, and especially the unsound, either sire or dam, and use only as much as possible those animals that can give similar good accounts for generations.

STRIKE! if they don't give you Jackson's Napa Soda.

Notes and News

Among the numerous frenzied financiers who have been offering suggestions through the San Francisco and other papers as to the best manner to make receipts and expenditures of the State Government balance during the next two years, is a Rip VanWinkle of Chico, who advises that the appropriations for district fairs be cut off. As there have been no appropriations for these fairs for several years, the Chico expert who has just waked up should make another try at arranging the State finance. It's a two to one bet that he has been asleep since the last State appropriation for district fairs was made and was only awakened by the earthquake.

Al. Thomas has got a Mainsheet 2:08½ in fine form this spring. The splint which lamed him last season was fired after the campaign closed and he goes perfectly sound.

Irish 2:08½, pacing, was gelded a few weeks ago and has been converted to the trot by Al. Thomas. He is a better gaited trotter than he was pacer.

The three-year-old filly Irene Mac, 2:29¼ by John A. McKerron 2:04½, woked in 2:23 at Cleveland and a few days ago.

Liska 2:28¼, dam of Lisonjerro 2:08¼, and others, is nursing a fine filly by the champion Cresceus 2:02¼.

The only two California horses entered in the \$10,000 M. & M. this year are Brilliant Girl by James Madison, owned by J. de la Montanya, and trained by Jack Curry, and Charley Belden by Lynwood W., owned by Mart Rollins of Santa Rosa and trained by Chas. DeRyder. There are twenty-three entries all told.

Chas. DeRyder has entered The Donna by Athadon and George Perry by Waldstein in the \$5000 Chamber of Commerce stakes at Detroit. In the same stake Griffith and McConnell have named Bonnie Steinway. There are thirteen entries in this stake.

Joe Goss took his good green Sidmoor to Cleveland and will try to sell him.

At the Down East Sale held in Boston, the young stallion Codero, by Bingen sold for \$5000, the top price of the sale. Thos. Lawson's stallion Dreamer 2:14¼ and Ponce de Leon 2:13 sold for \$2025 and \$475 respectively.

Custer, the Sidney Dillon gelding owned by J. C. Adams of Pheonix, Arizona, is named in the \$5000 Chamber of Commerce stake.

Woodin & Little, proprietors of the pump house where one can get any sort of pump from one of the little old fashioned Douglas type to the biggest centrifugal ever built, have leased a piece of property at 534 and 536 Mission street, and will put up a building to be ready for occupancy June 20th, when they will resume business on the old basis. They have a large shipment of goods on board steamers in the harbor and by rail, which will enable the firm to meet all the requirements of the trade. If you want a pump, pipe fittings, a gasoline engine, a tank or a windmill, address Woodin and Little for the next two weeks at 701 Scott street, and after that at their permanent address, 534-536 Mission Street, San Francisco.

At the Blue Ribbon Sael, Directwood, 2:07½, sold for the top figure—\$2100. He is by Direct 2:05½. Miss McKerron, a four-year-old by John. McKerron, sold for \$410. A yearling by John A. McKerron brought \$500, and a yearling by McKinney brought \$350. Zomday by Zombro, a three-year-old, sold for \$50.

Leonora 2:12½ by Mendocino sold for \$9500 at the Down East Sale.

Crown Prince 2:13½ by Dexter Prince out of Point Lace by Antevolo brought \$300 at the Down East sale. She was bred by Mr. A. B. Spreckles.

Chas. Marvin owns a two-year-old filly by Wiggins out of Mr. W. A. Clark's Bon Voyage 2:12½, that is trotting like as Stake winner, and worked a half in 1:17 last month.

Trainers and owners are waiting for the announcement of programs by associations that are to comprise the California circuit. If they don't come soon many horses will be turned out.

Mr. Frank Kilpatrick, who purchased and sent to New York the pacing mares Virginia 2:09½ and Gertie H. trial 2:17¾, also the trotter Jabbowok, has advertised them all for sale.

Sweetheart, the Baywood mare owned by Mr. Bolton of Vallejo, was taken east by Farmer Bunch.

Mr. H. T. Owen of Kern, California, had the great misfortune to loose a foal by Iris out of Babe by Altimont. The foal was a colt and a full brother to Jasper Ayers 2:09. It was dead when foaled and the mare is in bad shape, but may recover. It was Mr. Owen's intention to breed her to Zombro this year. The filly Irene Ayers, sister to Jasper Ayers, which Jacob Broliar is training for Mr. Owen is improving every day and her trainer is certain she will make a very fast and high class race horse.

The Maid of Del Norte, owned by Mr. C. A. Harrison of Victoria, B. C. is back home after being bred to Star Pointer 1:59¼. Mr. Harrison has a good pacer by Montana Director, and the roan American Hal colt that he purchased some time ago in Merced. The colt is being trained by John Sawyer at Portland and he is quite enthusiastic over him. He is a pacer and a smooth going one. Mr. Harrison writes that Red Seal 2:10 is doing a big stud season at Seattle. His first crop of colts are on the ground and are said to be good ones. Hal B. 2:04¼ is at Portland and getting good mares and will be a great sire.

Ted Hayes left for Montana last Friday with the following horses belonging to W. A. Clark Jr., which he will race this season over the Montana circuit: Miss Georgie 2:10¼, Electric Maiden 2:13½, Sally Lunn 2:28¼, Centereye, Buck, Tertius, the yearling filly by Highland called Highland Chiquita, Fussy B. by Stam B., and Miss Derby by Chas. Derby. Bon Voyage was shipped to Los Angeles and will be taken east by trainer Gerrity who will race a string for Mr. Clark on the Grand Circuit. Both Highland and Bon Voyage made a very successful seasons at Pleasanton, several mares having been refused to the latter after April 15th when his book was full.

C. L. Jones of Modesto, who is farming a big tract of land this year which requires all his attention, wants to sell his McKinney five-year old stallion Carlokin 2:20½ as a three year old and one of the best prospects for a 2:10 trotter in the country. Carlokin is a race horse, tried and proven as game at trotter as ever lived. He was one of the best winners of the California three year olds of 1904, and is one of the best ones ever sired by McKinney, whose service fee is now \$500. Write to Mr. Jones about Carlokin if you want a high class stallion that can win in any country.

It is not ofetn a woman has the pleasure of riding a mile behind a horse in 2:17½, but that is what Mrs. Charles Whitehead did at the Salinas race track Tuesday, and she herself was the driver, says the Salinas Journal. Her favorite driving horse, Toppo 2:10, is being prepared for the circuit and has been driven by Mr. Whitehead in 2:14½, the best mile the little pacer has been asked to do so far this season. Mrs. Whitehead thought she could drive Toppo in 2:20, but her leige lord thought she could'nt beat 2:30 with him. Hence he gave the sweet going little son of Delphi 2:12¼ a couple of warming up heats, and then Mrs. Whitehead took the reins and landed her mount under the wire in 2:17½, covering the last quarter in 31¾ seconds, a 2:07 gait. Toppo went without a boot or any other rigging excepting harness, and pulled a racing cart at that.

Charles Clancy, a well-known horseman and government contractor of Seattle, recently returned from a trip to Union county, Oregon where he shipped four carloads of horses for the use of the United States Army in the Philippines. Mr. Clancy declares that the day of the range horse in Washington and Oregon has passed, and that animals suitable for cavalry purposes are becoming fewer and fewer in the Northwest every year. "The ranges are being swept clear of good horses," said Mr. Clancy, "and it is now difficult to pick up a large band of animals having sufficient size and weight for the use of the government. The rules of inspection by the government officers are very rigid. There are very few bands of well-bred horses to be found either in Eastern Oregon or Washington. Indian ponies, or cayuses are not so scarce, but they are not suited to the needs of the government. The time has come when the Coast buyers are forced to go further east for their stocks, and this will continue as long as the present demand for sound and good-sized animals exist.

Says Western Horsemen: Hon. S. R. Holt, owner of Sidney Dillon, is the "proper stuff" for a matinee club member. He neither waits for ideal race horse conditions, nor a "sure thing" for a winning in classification before he will start. He says to the racing committee: "Class me as well as you can, but put me on the card somewhere—anywhere—and I will start," and so he does. There are quite a few other gentlemen—members of the Indianapolis Club—who would help long the sport if they would emulate Mr. Holt's example.

The Los Angeles Harness Horse Association met on the evening of June 1st and elected new officers for the ensuing year as follows: President, C. A. Canfield; Vice President, E. J. Delory; Treasurer, L. J. Christopher; Secretary, Robt. A. Smith. The Board of Directors comprises these four and the following well known gentlemen: J. H. Bohon, G. A. Pounder, Chas. Saddler, Dr. Wm. Dodge, and Byron Erkenbrecher. It is the intention of the association to give a four-days meeting during the month of July at Agricultural Park, Los Angeles, for which generous purses will be offered, and the date and program will be announced within a few days. This Los Angeles association will open the California circuit for 1906. It is an energetic body of men and deserves the patronage of every harness horse owner in California.

A horseman in alluding to the recent sale of fifty horses for \$52,000 to a New York man, says breeders should take warning at this very rapid advance on prices as it is apt to have a tendency to cause indiscriminate and careless breeding that will, in the end, bring loss and disaster, while if you will heed the warning and only breed and raise the best, forcing the survival of the fittest by the most rigid and careful selection and raise only such as are truly useful for the purpose for which they are intended your profits will be great and your business a success. Prices must of necessity continue to advance for the next six or eight years if not longer, as comparatively few of the people begin to breed in earnest and at once, and if they did it would take six years to raise a five-year old horse.

That picturesque Klondike character Swiftwater Bill is a little late in achieving the very pinnacle of fame but he has got there at last. Geo. Perringer of Pendleton, Oregon, has named a fast pacer after him.

Mr. S. U. Mitchell of Sacramento has had the misfortune to loose by death his very handsome and valuable stallion Peter J. by Stam B. The immediate cause of death was inflammation of the bowels. Aside from the direct loss to Mr. Mitchell, which is a severe one, the loss to the public is even greater as Peter J. was one of the most promising young sires in California.

A program of racing events is being arranged for the 4th of July at Olive Park, Davisville. Three harness and one running event will be on the card.

Pleasanton is not deserted by any means, although many trainers have gone east with their strings and many horses have been turned out since the San Francisco fire. There are still at least a hundred horses being worked on the Pleasanton track however.

The Tuscon, Arizona, Citizen of May 21st, contained the following: "Horsemen are commenting on the scarcity of horses throughout the Territory. They declare that the price of good horses has advanced about 50 per cent. in the last three years and that even at fancy prices it is difficult to get good horses. The scarcity prevails in all lines and it is a hard matter to find either a good riding, driving or draft horse. Nearly all horses here are native bred, and there are many fine animals among them, but a large number are scrubs. A year ago a team of heavy draft horses could have been purchased for \$350. Now it costs from \$500 to \$550 for a first-class draft team.

M. A. Locke, a prominent breeder at Columbus, Ind., will train several head of good prospects this year, including his fast trotter King Do-Do by Chimes, dam Fregia 2:29 $\frac{1}{4}$ by Egbert, a two year old stallion by Allendorf, and a fine looking yearling filly by Cresceus.

The Government experiments in breeding a cross of the zebra and the mare have received a setback by the death of the zebra recently presented by King Menelik of Abyssinia. This fine animal did not relish captivity, and recently broke his neck trying to get through a wire fence at the zoological park in Washington, where he was confined. The Department of Agriculture, however, still has another zebra which will be used in the experiments.

It is for the interest of every man who is breeding light-harness horse stock to have his animals registered, says the Horse Breeder. The speed ability of the animals is not increased in the slightest degree from the fact that they are registered, but it is a guaranty that the animals are bred as represented. It is not only for the interest of the owners of the animals that all stallions that are used as sires and all mares that are used for brood purposes be registered, but it is for the interest of all who are breeding for the track or who are desirous of improving the speed and racing qualities of the light-harness stock of America.

The State Fair track is in fine shape for training harness horses.

Billy Dooley by Bay Bird, that took a trotting record of 2:16 $\frac{1}{2}$ last year, has been shifted to the pace and is being entered through the North Pacific circuit. He is owned by Mr. F. J. Rubstaller of Sacramento.

Schuyler Walton will race the fast pacing mare Lady R. 2:11 $\frac{1}{4}$ by Col. K. R. R. through this State and Oregon this season.

The Grand Circuit opens at Detroit July 23d. There will be no week of racing at Windsor this year as a curtain raiser to the Grand Circuit.

The Eastern papers are saying that East View Maiden by Directum Kelly is the best trotter Monroe Salisbury has been identified with since he raced Directum 2:05 $\frac{1}{4}$.

Thirty thousand dollars has been paid by Philadelphia horsemen within the past three months for 46 trotters and pacers, an average of \$652 for each animal. The new speedway in the Quaker City has created an almost unprecedented demand for fast horses.

The earthquake and fire in San Francisco destroyed so much property for owners who had trotters and pacers in training that they were compelled to economize and therefore ordered their horses turned out. But had there been a California circuit organized nearly all these horses would have been kept in training.

The only early closing stake offered by the Oregon State Fair that failed to fill was the 2:12 class trot. It will be re-opened.

Californians who visit the Oregon State Fair this year will will have a chance to see many familiar faces when the races are called. The trainers from this State are well represented in the Salem entry lists.

The Austrian Trotting Derby was decided on May 13th. It is for four year-olds and was worth \$8750 this year. There were seven starters, all by American bred sires, and all but one driven by American drivers. It was won by Levento by E. L. Robinson 2:17 $\frac{3}{4}$, driven by Andy McDowell. The distance was about two and one-sixteenth miles and the time 4:49 $\frac{1}{2}$ broke the record for the race.

Democracy 2:07 $\frac{1}{4}$ may be purchased by a syndicate of Bellingham, Washington, horsemen, who believe the son of Happy Partner has a chance with the free for all pacers on any circuit.

Mr. R. E. de B. Lopez, former owner of the Meriwa Stock Farm, better known as the Valensin Farm, left this week for a visit to relatives in England. He was burned out by the San Francisco fire which followed the earthquake of April 18th.

Sandy Smith has gone to Cleveland where he will remain until the Grand Circuit opens at Detroit.

There will be races at the Concord, Contra Costa track on July 4th, and an excellent program is now being arranged for the occasion. The track is in fine shape.

R. O. Newman of Visalia, California, has bred his mare Daisy Basler, dam of Robert Direct to W. R. Murphy's stallion Red McKinney. Jake Broliar has sent Ethel Basler, dam of My Way 2:22 and Stonelita 2:15 $\frac{1}{4}$, to be bred to Red McKinney. Ethel Basler and Daisy Basler are full sisters.

Bernice, the chestnut filly, own sister to Owybo 2:07 $\frac{1}{4}$, that is in Sutherland & Chadbourne's string, has been entered through the North Pacific circuit in a number of trotting events. She is a good gaited trotter and very promising.

Los Angeles will give a good meeting next month and will soon announce the program.

Salinas and Hollister will both give harness meetings this year.

The Breeders meeting at Woodland will be one of the best ever held in the Sacramento valley.

There are ten entries in the 2:10 pace to be decided at the Oregon State Fair this year, and six of them are from California.

W. H. Gocher of Hartford, Conn. and Lewis J. Powers of Springfield Mass. respective secretary and treasurer of the National Trotting Association, were re-elected for a term of two years.

There are 466 stalls in the barns within the inclosure of the Lexington, Ky., track and 454 of them are occupied by horses in training.

The New York Herald says that Geo. Spear's application for a license to train runners has been denied by the Jockey Club.

Wentworth 2:04 $\frac{1}{2}$, by Superior, had a narrow escape from permanent injury at Point Breeze track Philadelphia a few days ago by trotting over a spike harrow on the course.

It would appear from government statistics that the value of horses has increased surprisingly during the past nine years. On January 1, 1897, there were 14,364,667 horses in the United States, and their estimated value at that time was \$452,694,396, the average value at this estimate being about \$31.50 per head. On January 1, 1906, the total number of horses was 18,718,578, and their estimated value was \$1,510,889,906, which is about \$80.75 per head.

The racing management of the Pennsylvania State Fair Association has directed the reopening of the four \$1,000 stake races, the closing date of which has been advanced to May 28.

It is evident that owner M. W. Savage intends to make an extended exhibition tour with Dan Patch and Crescens this fall. The stallions are booked to appear at the Allentown, Pa., fair this fall. It was there that Dan last fall set the world's pacing record over a half-mile course at 2:01.

W. F. Matlock and W. H. Babb have bought from Geo. Drumbheller of Walla Walla the Lama Bros.' band of thoroughbred horses consisting of 150 head says the Pendleton Tribune. The price paid was \$75 all around. This is the largest and best band of thoroughbred horses in the northwest having been bred strictly to thoroughbreds for upwards of forty years and have produced many high class race horses among them Tom Benton, Grey Eagle, Bogus White Cloud, Maggie, Thomas, Bob Wade and many others. This band of fine horses were shipped from Pendleton about May 15 together with some 700 others to Alberta where they will be sold in the open market.

Answer to Correspondents

M. T. W.—The stallion Ira, sire of Iora 2:14½, Lou 2:14½ and others, was bred at Palo Alto Stock Farm. He is standard and registered, his number being 13,837. He was sired by Piedmont 2:17¼, his dam Irene, dam of two in the list, was by Mohawk Chief, and his grandam Laura Keene, was by Hambletonian 10. Ira's record is 2:24½.

R. G. M.—A bay gelding called Old Nick foaled 1878, took a record of 2:23 trotting at Stockton in 1887. He was by Electioneer out of Stockton Maid by Chieftain 721. He was bred by Robert F. Morrow.

The Gold Cup Case

The Memphis Trotting Association instituted proceedings in New York last February to take the Gold Cup from E. E. Smathers that had been awarded to Major Delmar in a contest with Lou Dillon at Memphis in October 1904, charging that it had been won by fraud.

A few days later Mr. Smathers filed a paper with the National Trotting Association denying the charge and demanding an investigation. The Memphis Association met the denial and demand of Mr. Smathers by reiterating the charge and also asking an investigation by the Board of Review. It was definitely understood by all parties that a hearing would be had at the following May meeting of the Board. When the case was called May 1, counsel for the Memphis Association asked for a continuance. They were required to file an affidavit setting forth grounds for the motion, who the absent witnesses were, and what they expected to prove by them, and informed them that unless it was admitted that the witnesses if present could testify as counsel might claim in the affidavit, the continuance would be granted.

They were given until three o'clock that afternoon to prepare the paper. When the time arrived they failed to submit an affidavit to sustain the motion for a continuance.

The Board then overruled the motion and set the case for hearing the following Tuesday morning at ten o'clock. It was called a little later after the appointed time. Mr. Smathers was present with counsel and filed a sworn denial of the charges. Representatives of the Memphis Association did not attend or submit any proof. The case was therefore dismissed without prejudice.

If Mr. Howe or his attorneys understood, as claimed, that the case was to be called at eleven o'clock instead of ten, the understanding had no basis other than the public announcement in their hearing that it would be called at ten.

When Mr. Smathers filed his application for an investigation I had the fact communicated to persons interested in the prosecution, and Mr. Howe came that evening for the purpose of taking a like position before the Board. He wrote his charges and request for an investigation in my presence, signed the document and turned it over to me.

The move of Mr. Smathers was recognized by horsemen to be right and in conformity with the rules governing the race. It reminded

the Memphis Association that the entire subject had passed from its jurisdiction and that it was not in a position to do anything at that time but join the request for an investigation and do all it could to get the facts before the Board for its judgment.

Messrs. Parker, Hatch and Sheehan, counsel for the Memphis Association, have given out a statement in which they say, "General Tracy and Mr. Cloonan made application to the Board of Review for an adjournment fully expecting that in accordance with the promise of the President that an adjournment would be granted."

The President made no such promise, he refused to fix a date for the trial earlier than the regular May meeting and all parties understood that it would be set for a hearing then. It was not intimated that a postponement would be asked for, nor were any promises of any kind asked or given. The power to grant continuances is vested in the Board and not in the President.

The statement of counsel goes on to say, "Subsequently the Board meets and directs Mr. Gocher, who is notoriously a friend of Mr. Smathers, to procure and present the evidence in the case."

My information is that the alleged notorious friendship for Mr. Gocher for Mr. Smathers had never existed, that they have a very slight acquaintance and there is absolutely nothing upon which to base such an allegation. The order of the Board to Secretary Gocher was the usual procedure, and was rendered necessary by the failure of the Memphis Association to produce proof. From such premise they proceed to say: "The Board of Review may believe that in this way they can impress the people with their fairness, they may have some idea that by tactics of this sort they can either influence or forestall the action which is pending in the Supreme Court, but they will fail. The Memphis Trotting Association will not permit its hand to be forced prior to the Supreme Court hearing."

It is to be regretted that counsel should feel at liberty to indulge in such gratuitous and offensive imputation, calculated only to injure where the truth is not known.

The Board of Review has no desire to influence or forestall the action pending in the Supreme Court of New York. As I understand, counsel in that action claim the Gold Cup for the Memphis Association. They do well to fight shy of the Board with such a claim, and will probably find that they have assumed too much in taking it to the courts. The trophy was

won by either Major Delmar or Lou Dillon and is owned by either Mr. Smathers or Mr. Billings. The right, title and possession passed with the race from the Memphis Association. The judges awarded the premium to Major Delmar.

The Memphis Association cannot review any incident of the race and has no interest in the controversy that entitles it or its Secretary to be parties to the suit.

The only power they have is to bring such violations of the rules coming to their knowledge, after the judges leave the stand, to the attention of the Board of Review, with all the proof to be had for its judgment. If Major Delmar was not eligible to win, unless the threatened injunction intervenes, the race will go to Lou Dillon and the Gold Cup to Mr. Billings.

P. P. JOHNSTON,
Lexington, Ky., May 14, 1906.

Detroit Entries

Following are the entries received by the Detroit Association for the Merchants and Manufacturers 2:24 trot and the Chamber of Commerce 2:24 pace:

M. and M.—1. Ormond, b h, by Wilkes Boy; R. H. Shokney, Kirkwood, Del. 2. Czarine Dawson, b m, by Czar; E. E. McCargo, Philadelphia. 3. Kenneth Mac, br h, by Bobby Burns; Vance Nuckols, Cleveland. 4. Alice A., br m, by McAdams; Forest City Farm, Rardall, O. 5. Frank Herdic, bl g, by Rex Princeton; J. C. Merrill, Lake, Miss. 6. Wau Actell, br g, by Actell; Dr. J. R. Williams, Carrollton, O. 7. Anita, ch m, by McEwen; F. B. Fisk, Montgomery, Ala. 8. Ben Axworthy, b g, by Axworthy; A. L. Thomas, Agt., Bensen, Neb. 9. Allie Jay, b m, by Jay Hawker; W. B. Cisolm, Cleveland. 10. Direata, b m, by Directum; W. H. McCarthy, Terre Haute. 11. Glendale, br g, by Ondale; T. W. Murphy, Glen Cove, L. I. 12. Ladie Babbie, g m, by Ansel Cheif; A. P. McDonald, Albany, N. Y. 13. Capt. Bacon, b, by Bingen; Dr. J. W. Day, Rochester, N. Y. 14-15. East View Maiden, bl m, by Directum Kelly and Ana Direct, bl m, by Direct; East View Farm, East View, N. Y. 16. Madge Wildfire, b m, by Bert on; David Shaw, Pittsburg. 17. Nickel Grattan, bl, by Grattan; Grattan Stock Farm, Pararie View, Ill. 18. Delight, b m, by Allerton; J. H. Thayer, Lexington, Ky. 19. Fashoda, b m, by Barondale; E. F. Geers, Memphis, Tenn. 20. J. N. Blakemore, bl g, by Bow Bells; W. O. Foote, Dallas, Texas. 21. Silver Band, b g, by Colonel Cochran; G. H. Estabrook, Denver. 22. Brilliant Girl,

m, y Jas. Madison; J. C. Curry, Pleasanton, Cal. 23. Charley Belden, br g, by Lynwood W.; C. L. DeRyder, Pleasanton, Cal.

The C. of C.—1. Tipko, b g, by Moko; R. H. Shockency, Kirkwood, Del. 2. Laura Blellini, br m, by Moquette, R. B. Williams, Boston. 3. Glen Patchen, b g, by Bourbon Patchen; Rouse and Hornaday, Eanville, Ill. 4. Robinson b g, by C. F. Clay; H. H. Stambaugh, Youngstown, O. 5. Bonanza, b g by Alfonso Vincent; A. L. Thomas, Agt., Benson, Neb. 6. Contractor, ro g, by Fred Wilkes; David Shaw, Pittsburg. 7. Rey del valle, g h, by Rey Direct; Ed Benyon, Lexington. 8. Ardelle, br m. by J. H. L.; E. F. Geers, Memphis, Tenn. 9. Custer, ch g, by Sidney Dillon; Hotel Adams Farm Phoenix, Ariz. 10. Bonnie Steinway; Griffith & McDowell Connell Pleasanton, Cal. 11. Miss Jones bl m by Bobby Burns; Willis Jones Mt. Sterling Or. 12-13. The Donna g m by Athadon and Geo. Perry b g by Waldstein; C. L. DeRyder Pleasanton, Cal.

Humboldt County Horses

Fortuna Beacon—The training season has opened at the Rohnerville track. Landon Hunt the well known trainer of Eureka has engaged six stalls and will soon have his string in preparation for the fall fairs. Among his horses is Uno which has paced a trial mile in 2:15, a half in 1:05 and a quarter in 30 seconds.

Bob Noble will have four this season Humboldt Dillon son of Sidney Dillon will be trained for a low record.

Matt Zabner has half a dozen fast youngsters. With a Waldstein colt belonging to Thos. Samuels of Rohnerville he hopes to capture the two year-old stake at Ferndale this fall. Matt also has Anna Rey a four-year-old filly by Monterey Jr. out of Countess W. which he is polishing for a slow class.

Patrick and Mizer have a string already on the Rohnerville ground in training for the fair. A three year-old Cassiar filly Evelyn and a two-year-old colt Cassene are among them.

Dr. Ring of Ferndale has turned out his fast young Bonnie Direct filly California Maid for the summer. The Doctor has his eye on the three-year-old stake at the Ferndale Fair.

Wilson Elliott Jr. of Loleta had the m is fortune to lose a fine filly last week—a full sister to the promising Evelyn.

Dr. Lane is pleased with a couple of Humboldt Dillon colts foaled last week.

Howard Malone sent his Way-and W. Mare full sister to John

A. 2:12 $\frac{3}{4}$ and Forest W. 2:14 $\frac{1}{4}$ to be cared for by Paddy Rolley. She is due to foal to Cassiar.

Owing to the fine promise of Evelyn and others Bill East finds Cassiar stock on the rise.

Fred Swanger is now the owner of the Kramer mare and will breed her to Humboldt Dillon. With good blood on both sides he has a right to expect some fine progeny.

Jas. Kelly has a very fine colt sired by Budd Doble's great horse Kinney Lou 2:07 $\frac{3}{4}$.

An exchange says: While there is always a chance for disagreement on the part of pedigree experts, it can be safely be said that the Moko-Fanella colt which has just arrived is one of the most valuable foals that will be dropped this year. Fanella as a brood mare is in a class by herself. Her daughter Sadie Mac 2:06 $\frac{1}{4}$, was the sensational trotter of 1905, and until her tragic death at Hartford last fall, was looked upon as the coming champion trotter. She also produced Todd 2:14 $\frac{3}{4}$, an extremely fast colt trotter and coming sire. Moko is one of the very best sons of Baron Wilkes, and as sire of Futurity winners is perhaps the foremost sire in the country to-day. The youngster by him out of Fanella should be a great colt trotter, a great campaigner, and later on a sire. Fanella will be sent to Patchen Wilkes Farm and bred to Peter the Great 2:09 $\frac{1}{4}$, sire of Sadie Mac 2:06 $\frac{1}{4}$.

Some horses can be trained to perform feats that are considered impossible. According to W. D. Bohn, of Cable, Montana, Dick Chalmers, who has the contract for carrying the mail between the head of Warm Spring Creek and Ramsey, has devised a novel method of overcoming the difficulties encountered by reason of deep snows. Mr. Chalmers has a horse which he has trained to make the trip over the route daily. The animal has been fitted with snowshoes, and these it has learned to use in such a manner that it can go over almost unfathomable drifts of snow without breaking through the crust or becoming mired. The horse seems to relish the innovation and has learned to carry the mail without the attendance of a driver, making the round trip daily. So successful has been the experiment that other horses are to be trained in the same way.

In the State shoot at Austin, Texas, April 25, L. A. Dryden, of Waco, won the individual championship at live birds, killing 20 straight. M. E. Atchinson, of Giddings, and W. Stith and C. D. Ellison killed 18. In the 10-bird shoot event George Tuebker, of Brenham and M. E. Atkinson, of Giddings, tied with perfect scores. The seven-bird event was won by George Tucker, of Brenham with a straight score.

R. H. Connerly, of Austin, won the target championship of Texas at the State shoot April 26, by breaking 50 straight, duplicating his score of the first day, when he won the cup. The State target championship was formerly held by M. E. Atkinson of Giddings.

W. J. Kenney, the bike man at 531 Valencia street (the same old stand) is up to his eyes in business. He has some fine road and speed carts that were slightly scratched while being hauled to a place of safety during the fire, but are just as good as ever with this exception. They will be sold at bargain prices. Robert Brown of Petaluma and J. Williams of Oakland got new road carts of Kenney this week.

The statement made in a letter from Dixon printed in our last weeks issue that the stallion Alton paced "a half mile" on that track in 2:18 should have read "a full mile." The Dixon track is a half mile in circumference and at the time Alton made this trial had not been watered for two months and was quite rough. The mile was probably as good as 2:12 over a first class track.

Frank Neely, the well known Michigan reinsman, is working a good stable of horses at Brooklyn, Mich., including the pacer Joe Gencloe, 2:15 $\frac{1}{4}$, by Lou Sutton; Jack M. 2:23 $\frac{1}{4}$ by Ada Wilkes, the trotting mare Busb Rocho; and a green trotting mare that worked in 2:17 last fall.

Anella, a full sister of Told, 2:14 $\frac{3}{4}$, foaled a filly on March 22 by Baron Silver 2:25 $\frac{3}{4}$, a son of Baron Wilkes 2:18. Anella will be mated this season with Cochato, a son of Todd 2:14 $\frac{3}{4}$. Anella is the property of J. M. Johnson, president of the New England Breeder's Association.

The camel, mule and donkey are still the chief means of transport in Persia. The loads they carry are as follows: Camel, 520 pounds; mules, 326 pounds; donkeys, 240 pounds, usually divided in two packages of equal weight for convenience of carriage. The narrowness of the roads in some parts compels caravan men to make the loads smaller than the animals could carry under more convenient circumstances.

Trainer Bowen is jogging a fine lot of youngsters sired by Advertiser and Tommy Gregor, at the White River Stock Farm, Munice, Ind., and all are in the pink of condition. Adboo, a grand looking black stallion by advertiser, owned by the Farm, is thought to be a sure 2:10 trotter and is as fine an individual as one would care to look at.

Drink Jackson's Napa Soda, it means health

Articles of incorporation have been drawn by a company to be known as the Illinois Trotting Association, with a capital stock of \$50,000, and with 5,000 shares at \$10 per share. The officers of the incorporation are J. A. Kincaid, president; M. L. Potts, vice president, and C. M. Williams secretary. It is the purpose of the company to lay out a half-mile track to be located on the grounds of the Illinois State Zoo and Amusement Company, on North Eighth street. It is the intention to build a steel grand stand on the grounds with a seating capacity of 6,000 and barns for 240 horses. Quarters for permanent trainers will also be installed, and the equipments will be up to the standard of all modern race courses. It is the intention of the company to offer good clean races to the public and to give the best facilities possible. Among other things a street car line will be built direct to the park as soon as the track is in shape and the best accommodations will be offered.

Mambrino Chief never sired a pacer, his twenty-three sons sired ninety-six trotters and no pacers, and his seventeen daughters produced no pacers.

At a meeting of the Munice, Ind., driving Association, the following officers were elected: President, C. H. Anthony; Vice president, Joseph Hinton; treasurer, B. C. Bowman; superintendent, F. J. Claypool; secretary, M. S. Claypool. Dates for this year will be August 14-17. Good, liberal purses will be given in all of the races.

The "pony pacer" Tom Thumb, by Maple Bell, consigned to the Washington Court House sale by M. Spellacy, Hopedale, Ohio, was purchased by C. F. Nagle, Lexington, Ky., for \$600. He is 12 $\frac{1}{2}$ hands high, weighs less than 500 pounds, has been miles in 2:20 and halves in 1:07 $\frac{1}{2}$. Mr. Nagle will use him, giving exhibitions this year.

John E. McClintock, who formerly trained the matinee horses of E. T. Woodward of Philadelphia, including the trotters Temple Wilkes 2:10 $\frac{3}{4}$ and Gene D., 2:11 $\frac{1}{2}$, has engaged with a Russian gentleman as trainer and driver. Mr. McClintock has been commissioned by his new employer to purchase several fast trotters and pacers to take with him.

Carriage Team For Sale.

Bays, about 7 years old, weigh about 1250 each, well broken single and double, good drivers, well mannered, sound and stylish, first class team in every respect. For further particulars and to see team call or address

A. L. SCOTT,
Hillside Ave., Piedmont, Cal.

Cole Stake Entries at Ferndale

Mr. W. B. Alford of Ferndale, sends us the following list of entries to be trotted at the Ferndale Fair this year in September:

Two year olds—

Matthews and Hunt, names Sunday by Timothy B.

W. J. East, names Cassene by Cassiar.

D. L. Zahner, names May Mouch by Cassiar.

Ray Felt names two fillies.

Jos. Mulleady names Sandy Rey and Katrina, both by Young Monterey.

Jos. Long names a filly.

Thos. Richardson names Teddy R, by Bean B.

Samuels Bros. names Gelding by Caldstein.

W. Elliott names Gelding by Cassiar.

H. J. Ring names Maid of California by Bonnie Direct.

Three Year Olds—

Thos. Purcell names Lilly Goldstein.

W. B. Alford names Ulallie by McKinney.

H. Cochran names J. D.

W. J. East names Eveline E. by Cassiar.

Proposed Track For Arcata

The following from the Arcata Union of recent date will prove interesting to horsemen: For some time past there has been talk of a home racing association for Arcata and vicinity, and it looks now as if the matter might be successfully carried out. The plan is to build a half mile track near town, and have it fully equipped with training stables, box stalls, etc., so that training could be carried on nearly the whole year round, and race meets held whenever occasion demanded. About three thousand dollars would be needed to successfully launch the project, and it is thought that the sum could be raised among the horsemen and business men of this section. It is understood that Wm. J. East of Robnerville, would back the proposition with a substantial sum, and make his headquarters here as well. A number of Arcata men are driving speedy steppers at the present time, and have no place except the county road to try them out on. Blue Lake has been talking of a track, and Arcata ought to get in first, as two tracks in this end of the county would not pay. Following is a partial list of those who have horses in training and who are interesting in the movement: L. G. Barker, Herman Wahl, E. Beaulieu, William Devlin, Rasmus Anderson, David Miner, Nick Haugh, Everett Porter, Caleb Benham Nixon, Wm. Smith, J. Dolson and I. Minor, Jr.

Calks on Light Shoes

James Clark, the famous horse-shoer, who goes through the Grand Circuit every year and fits shoes to nearly all the trotting and pacing cracks, has written the following very interesting article for the Horseshoers Journal.

"Most of the calks and rims that are used on the race horses today are made from three-sixteenths round machine steel, flattened out. I prefer to make my calks and rims from round material, as it leaves the edge of the calk next to the shoe oval, thus creating a small space on each side of the calk for the accommodation of the copper. When we desire to put on a very fine calk or rim it is customary to make them from one-eighth square cutlery steel.

Make the calks and rims in the usual way, being particular to make the "tip" small and fine, so that it will not be necessary to punch a large hole for its reception in a light shoe. So much for the calks.

I have tried several different kinds of so-called brazing compositions, but I have failed to find anything that gives better satisfaction than pure copper and boiled borax. Boil the Borax thoroughly, then pulverize; get a spool of No. 14 copper wire, step around the corner to the five-cent counter and purchase a small steel wire brush and your brazing outfit is complete—at least for all ordinary purposes.

We will suppose that you are doing a bar shoe job with set calks and a rim toe. Make the set, or heel calks, about one inch and a quarter long, possibly a trifle longer; make the rim toe about two and a half inches long; fit the shoe to the foot perfectly before you attempt to do any brazing; place the set calks about one-quarter of an inch from the heel of the shoe, placed also in the center of the web of shoe in such a manner that they are in direct line with the forward motion of the foot. You will find it necessary to punch a small hole for the reception of the tip on the calk, as it is so small that it cannot be driven in the usual way. After your calk is in position the shoe is supposed to be a dark cherry heat, sprinkle borax on both sides of the calk and drop on a piece of copper wire the length of the calk and press down into the borax. Heat until the copper melts. When the copper begins to run remove from the fire, being careful to hold your shoe in such a position that the copper will settle in the angle of the calk and shoe. When the copper "sets" or begins to solidify, give the shoe a quick dip in the slack tub. This will raise all of the scales. Next comes the steel wire

brush, with which you will quickly clean up your work. Now, don't get funny and begin to pick at it with a hammer. If you do, you are more than liable to destroy the lesion formed between the steel and copper and your work will count for naught. After your calks and rims are all brazed on lay the shoe aside and let it cool, then finish it up in an artistic manner, taking especial pains to file around the calks thoroughly. If you do not, you will find that the rough surface will collect clay and other substances forming a bunch on the heels of the shoe, thus to a large extent destroying the object for which the calk is intended—preventing severe concussion by gradually sinking into a hard track.

In brazing rim toes or side rims you may find it necessary, when the copper is melted to quickly slip the shoe into the vise and squeeze just enough to hold the rim tight on the shoe until the copper sets, or you can lay the shoe on the anvil and press down on the rim with your hammer, being careful to not get it out of position. In all cases you have your shoe fitted perfectly before you braze on the calks, and don't hammer the shoe any more than is absolutely necessary to level it after the brazing is done. When brazing on a long rim, don't try to do it all in one heat. You will find it is better to take two, and possibly three heats to make a perfect job.

You may ask, "Why do you boil the borax?" Boiled borax will not "curl up" and carry the copper out of place. A little experience and a few experiments along the lines suggested will convince you how simple and yet how important a thing is brazing.

Boston Work Horse Parade

The fourth annual Work Horse parade was held in Boston on Memorial Day, and proved to be, it is said, the biggest and finest show of horses ever seen in the United States. There were about 900 horses in line, including 45 sleek, well-preserved veterans in the Old Horse Class. This was the best feature in the parade. Some of the drivers gave exhibitions of driving without reins which pleased, and it may be added, instructed the crowd. Dock-tailed horses were excluded, and also all that were not in good condition. The sole object of these parades is to better the condition of work horses, and to reward humane drivers. The Mayor of the City was present, and fastened the blue ribbon to the bridles of a few special horses. The silver and bronze medals awarded to veteran drivers for long service were handed to the recipients by young ladies in the reviewing stand.

Oregon State Fair Entries

Lewis and Clark Stake, \$2000, for 2:17 class trotters—Athasham, Hank Pius, Mayo, Senator H., Lady Jones, Lady Alfred, Milbrae, Marvin Wilkes, Wild Bell, Oma A., Kitty Clover, Pilot Lane, Red Skin, Satin Royal, Dredge—16 entries.

Farmers Stake, \$500 for 2:27 class trotters—Pius, Mayo, Ounita, Senator H., Black Diamond, Bessie Jones, Bernice, Monarch Medium, Jack Mourne, Doc Mundy, Packline, Poliot Lane, Francisco, Blacksmith, Georgie Chamberlain, U. N. I., Bonnie Tangent, Dredge—18 entries.

Greater Salem Stake, \$2000, for 2:15 class Pacers—Bosida, Duchess, Robert H., Dewey Ann, David St. Claire, Lady Julia, Adimont, McClosky, Wainwright, Nellie Mack, Rosa O'Moore, The Imp, Ben W., Amble W., Captain Hall, Lord Lovelace, Remember, Bonnie M., Teddy R., Billy Dooley, Swiftwater Bill, Delilah, Altrim, Knicknack, Ruby H.—24 entries.

Merchants Stake, \$1000, for 2:25 pacers—Captain John, Sunny Jim, Major Dell, Dr. J., Gen. Hertus, Malcaton, Bonnie M., Teddy R., Swiftwater Bill, Phalto Norte, Altrim, Knick Knack, Ruby H., Bosida, McClosky Wainwright, Dick K, Nellie Mack, Lou Miller, Miss Jerusha, Rosa O'Moore, Topsy T., King Athby, Captain Hall—23 entries.

Rural Spirit Stake, \$700 for 2:10 Pacers—Cuckoo, Lady R., John R. Conway Delilah, Ollie M., Bridal, Glenn, Vinnie Mann, Adimont, Kelly Briggs—10 entries.

Oregon Stake—\$400 for two year old trotters—Violin, Anodymon, Rastus, Shamrock, Chehalem, Hops, Diablo Girl, Money Back, Hazel Wealth, Vingora—10 entries.

Inland Stakes, \$500 for three year old trotters—Dallas Boy, Zou Etta, Bonnie Norte, Zella McB., Lady W., Sam G., Election Bells, Doc Mundy, Ena, Dr. Long, Cautious Guy—11 entries.

Valley Stake, \$500 for three year old Pacers—Delpha D., Olga S., Zanthus, Midget, Idlewise, Gen Herus, Lookout, Dell Kisbar, Lou Miller, Miss Jerusha, King Athby—11 entries.

Young McKinney Stallion FOR SALE

I offer for sale my young stallion CARLOKIN, record 2:20 $\frac{1}{4}$ as a three year old. He is by McKinny and out of the great brood mare Carlotta Wilkes (dam of Volita 2:15 $\frac{1}{4}$, Carlota 2:24 $\frac{1}{4}$ and Carlokin 2:20 $\frac{1}{4}$, by Charley Wilkes 2:56, second dam Aspasia, dam of Faustina 2:19 $\frac{1}{2}$ by Alcantara 729, etc. Carlokin is standard and registered, and can show a mile at the trot now in 2:13 or better. I believe he will trot in 2:10 this year. Will sell him at a reasonable figure for cash. He is a game race horse and his first crop of colts foaled this year are as fine lookers as can be found anywhere. Correspondence invited. Address

C. L. JONES, MODESTO.

Rod, Gun and Kennel

Conducted by J. X. De Witt

The Portland Kennel Club closed the northern circuit on Saturday evening June 2d after a very successful and well attended four days' show. The gate on Friday night, Saturday afternoon and evening should put a comfortable amount in the club treasury.

The officers of the Portland Kennel Club are J. Wesley Ladd, President; Dr. J. C. Zan, Vice President; Henry Ludd, Corbett Treasurer; Frank E. Watkins, Secretary; Board of Directors, Henry Berger, Jr., W. B. Feckheimer, W. B. Honeyman, Frank E. Watkins; Bench Show Committee Messrs. Corbett, Feckheimer and Dr. Zan.

Mr. G. H. Fleming acted as Superintendent and Mr. H. M. Papst, formerly of San Francisco filled the responsible office of Ring Steward. All of the above named gentlemen worked unremittingly and zealously for the success of the show.

The number of dogs benched numbered 227, entries totalled 358. The quality of the show averaged well throughout, brilliantly so in several individual instances. Major J. M. Taylor judged all breeds save Collies and Terriers. His decisions were satisfactory almost without exception. Collies and Terriers came under handier Joe Bradshaw of San Francisco (who since an unsavory episode in connection with coursing, which compelled his absence from the coursing turf for good, has been known as John Bradshaw). His work in Collies and Bostons was unpalatable to a number of exhibitors. In several classes however he had the precedent established at Seattle and Victoria to guide him.

Spratts benched and fed, and in this respect everything was carried out in perfect order. We regretted the absence of Mr. Thos. Banks, without whom a Coast show seems to lack the finishing touch. Mr. Banks was unfortunate to the extent that illness in his family necessitated his stay in San Francisco. Mr. G. H. Bentley, assistant to Mr. Banks had charge of Spratts booth and the benching.

Among the out of town visitors were Mr. and Mrs. W. H. Deming, C. Steinbach and Clarence Ashlin of San Francisco, J. C. Scott, Walla Walla, Wash., Miss Leigh-Spencer, H. G. Owen, Vancouver, B. C., Walter C. Cox, Denver, George Tinto, Seattle, Donald McGregor, Spokane, Hon. Johann Wulfsobn, Vancouver, B. C., W. E. Beaman, C. H. LaFarge, of Seattle, Wash., Frank Christy, Arlington, Thos. Howe, Hills-

boro, Or., R. G. Gamwell, Bellingham, Wash., E. F. Willis, Banks, Or., C. D. Nairn, Ballston, Or., and others.

The large breeds were not well represented in numbers. St. Bernards (rough coated) had five entries. Belfast Buster, first, beat Star of the North mainly for superior condition and show form. Star has a nicer head and markings and is far better in hind-quarters. He was sent in the ring run down and out of coat. Glenwood Booze, third, showed up a better looking head than ever, but is all in otherwise. Smooth coats, three benched were mediocre. Don the winner is light in bone and not a good type.

Two Bloodhounds benched, solid tan colored, lacked type and bloodhound character. One Dalmatian shown was fair specimen, barring a rather weak muzzle.

Lief, a fawn colored Great Dane, is a far better dog than one usually sees at a show. He is a symmetrical and massive dog with a typical head. He is full of character and expression upstanding and graceful on good strong legs and proper feet and shows finely. Jack H., an uncropped blue dog, is a better one than his condition implied. There were but three Danes benched.

Vioka of Valley Farm, the solitary Russian Bloodhound entry, is a bit light above the eyes. He could have been a shade heavier in weight however—good dog on the whole and worthy of a ribbon.

Four greyhounds were rather poor class, the winner DeOro was shown in low condition and with a staring coat. Company B was also in bad shape.

Foxhounds were a rather creditable display. Lane, the winner, can be noted as exemplifying good show form and class, an excellent dog in fact. The eight dogs benched, however, showed quite a diversity in type.

Chesapeake Bay dogs, seven in number, all Seattle entries, we are glad to see is an indication that most worthy and useful sportsman's dog is beginning to get a Coast attention that is deserved. There was a uniformity and correctness of type that is about the best yet seen on a Western bench. King, the winner, is a typical dog, with capital head and body. Chessa winners bitches, was better, a bit in quality, eye and coat than King. The Seattle entries of Chesapeakes were prompted by the fact that Major Taylor was to judge the breed.

Pointers, as a class, were far above the general quality one sees at most of our shows. Thirty-four dogs and 58 entries was an evidence that the Oregon and Washington sportsmen hold Pointers in much esteem for field work. A glance over the breedings also shows a selection of blood that is most promising for the future of the breed in Oregon and Washington. Sport, the winner, has a fine Pointer head, but is built on rather sturdy lines, is a bit loaded in the shoulders. Mason's King, reserve winners, is a more symmetrical dog and turned on neater lines than Sport, but is deficient in muzzle. It would not have been a serious breach had the positions been reversed. King could have been improved by being put down slightly less in flesh. Queenie, winners bitches, has style and quality and is a fine type throughout. Bangs' Minna, reserve winners, a daughter of Woolton Bang, looks as if she has a career as a brood bitch of style and quantity. A number of the Pointers shown would do well in any company. Referee, a three letter dog in novice, could have gone up higher, for with the exception of skull a bit too wide, he showed conformation and a merry style in the ring that demonstrated his quality. He was afterwards placed second in limit and third in open.

English Setters were a very pleasing lot throughout. There were twenty-seven entries and eighteen benched. Mallwyd Bob, the well known Victoria dog could not be denied the tri-color. His head and body will carry him through pretty strong competition. He was not in as good feather and flag as we have seen him. Fleet Sergeant, gave way to Handsome Jim for reserve winners, by a slight margin. Jim is a well coupled stylish dog and was put down in good condition and showed merrily. In coat, flag and feather he was better than Sergeant. Jim struck us as being just a trifle too deep in muzzle. Sergeant has a fine head, showing type and quality, has fine dark eyes that are full of expression and is teeming with Setter character. Both dogs are most excellent in body, legs and feet conformation.

In bitches Rockline Ladybird scored over Cynthia. Ladybird showed well in the ring being in good form and coat, but somewhat out at elbows. Cynthia ran her pretty close. The latter is an all round neat bitch albeit a trifle lacking in muzzle. Janilla, an oft time winner, being in whelp, consequently did not show in her usual form and gave way accordingly.

Irish Setters, five in number,

were excellent, two of them Ch. Jeannot and Daerig Magic were as high class and handsome a brace as one could well wish to see. In show form and style they were probably the best pair of any one breed shown. Jeannot has a grand head, the right color of eyes, he is full of character and expression and is a splendid shower in the ring. In coat, feather and flag he was unapproachable. The rich mahogany color of his coat is a desideratum vainly sought by many fanciers. Daerig Magic, a stylish, handsome bitch, is a close second in type and quality to Jeannot. She is lacking a trifle in the splendid color of coat of the latter, only so much so as to make this perceptible when the two are together. It will take a good one to beat her.

Gordons, four in number, were better averaging than is generally seen at most shows, but at that not one of them had the head we like to see in a Gordon. In coat and color they were most excellent, with one exception, and that an immature young dog, the class showed excellent bodies, legs and bone qualities. The lack of attention to the breed a decade or so past was shown by the want of type finish and quality in heads. Oregon Rowdy, winners, an Ohio bred dog, is rather round in skull and lacking a bit in expression, with proper bitches, he should, however, do quite a lot of good for the breed in the north. He looks as if he had the elements for a rather workmanlike stud dog.

Irish Water Spaniels were not a pleasing exhibit. The quartette were in bad shape throughout. Happy Hooligan, a really good dog with a typical head was in poor condition and minus coat almost. Maude Gonne, an undersized, off colored bitch won winners dogs and bitches on suggestive quality. Three inches higher and she would be considered a good type of bitch. This time of year, however, is not a period when Irish Water Spaniels are in show form, particularly so, if they have worked during the shooting season.

Cockers were notable for three things, the slight entry in blacks, the predominance of parti-colors and a sprinkling of quality that was well demonstrated in about every class. Duke Royal came to the front deservedly in the blacks. Duke is an even bodied dog he is properly coated and feathered and has excellent legs and feet, the former boned just right enough to stylishly finish off a handsome little Cocker. Portland Duke, reserve winners, lacks a bit in head and muzzle and is a trifle wide behind, a fairly good dog, but not good enough even with the aid of his handlers,

jockeying to beat Duke. Wilton Blackberry, winners bitch in blacks has about the prettiest Cocker head one could wish to see. An evenly balanced symmetrical skull and muzzle and a well proportioned body sends her to the front as a competitor in the hottest company. She is a good exemplification of what an all round show bitch should be.

In parti-colors Portland Kid first winners and open holds his form nicely, a compact typical even headed dog with proper legs and feet topped off by pretty markings and general good finishing. Baby Duke reserve and first puppies well showed the quality of his sire Portland Kid.

Butbeta, winners bitch is probably the best parti-colored bitch on the Coast today. She holds her show form and style well. Freckles, reserve winners, a bit over fleshed could have given way to Lady Orcas, second in open, a better modelled bitch. Kulshan Pablo, first puppy and novice, shows the hall marks of Portland Kid decidedly and is a very promising young Cocker.

Collies were but twenty-nine entries (20 dogs), rather a falling off in numbers for a northern show. The breed is well liked through the northwest where there are many large and well appointed kennels.

Gallant, first winners, limit and open, is a large sized dog, with the much discussed Borzoi head, he is rather thin in flanks and hind quarters and is not any too straight in front. Eversholt Poyntz, second open and limit, is light eyed, has heavy hanging flews and is very thin coated. Jan Ridd third limit should have gone higher. He is a typical Collie all over and is far better in every way than E. Poyntz. That he might be a bit heavier is about the strongest criticism to make against him. He was placed over Poyntz at Seattle, and has many other wins to his credit. Westland Duke, reserve winners, is a large sized Borzoi headed dog with a very open coat. He won v b c recognition last year in a small class. Glen Tana Monk second to Duke in open tri-colors is a better type of dog and far ahead in style and appearance and coat. This decision was received with surprise by both fanciers and spectators.

In bitches Eversholt-Gertrude, a light boned bitch in rather poor coat and with heavy flews was given first winners, open and limit in sables. Springmead Marion, reserve winners and first puppies is better in head body, coat and bone, than Gertrude and should have won the tri-color. Brandane Marlonslea, second open should have been first open over Gertrude, a bitch she beats in head,

front, bone and legs as well as coat. The well known winners Glen Tana Marquis and Gen Tana Black Baby were absent. Glen Tana Monk and G. T. Black Baby are from the same kennels as E. Gertrude. Barwell Climax firsts able puppy and novice is a very promising young dog.

Doctor Jim, the only Old English Sheep dog shown could be larger in size. Bull dogs were but, two neither over ordinary merit.

Bull Terriers were a fine showing and a classy lot. Ch Edgecote Peer in grand fettle standing out above the bunch. Peer is a grand all round good dog and will out out the pace in the competition at any show. He holds his form splendidly. Willamette Peer, a son of E. Peer, is a coming one. His skull, muzzle, eye and expression, and well balanced body on good legs and feet stamp him is a dog worth watching. Willamette Sunshine winners and open bitches, is an evenly balanced good bitch. She would look better, however, with a darker eye. In the marked catalogue reserve winners is printed No. 158, Rosemont Bess. Bess is a short muzzled light boned bitch that was reserve novice first limit and reserve open. No. 158 in the catalogue is Newmarket Queen a bitch formerly owned by Bradshaw. Queen was second in open. Willamette Violet, a young bitch first in novice is far and away better than either, and should have received the reserve winners.

Bostons, with two or three exceptions, were only a fair lot. Nobaska II a dog with a wrinkled muzzle, undershot jaw and bulbous eyes giving him more of a Japanese Spaniel face than a Boston was placed for winners, limit and open over Dandy (a winner at Boston). Dandy is much the better type of Boston Terrier than is Nobaska II, he passes him in head, muzzle and body, legs and feet and is a better conditioned and more stylish dog. This award created much comment. Moohrays Elsie, shown in very bad condition, has class and quality that stamps her a good one when put down right. Bismark III was also in very bad shape and should not have passed the vet.

Smooth Fox Terriers developed a grand young dog Multnomah Blue for winners and first in puppy, novice and limit. Blue is a terrier from the ground up. He is fitted with a fine head, long punishing jaws, neck, body, loins, ribs, legs and feet are all in coherent working order. His coat is about right and he is full of class and stylish throughout. He will improve and with this will undoubtedly come a better ear carriage, which at that is not obviously faulty. Norfolk Rustic reserve winners is a fair looking terrier. In bitches Multnomah Blue Girl winners, first novice and limit is a sweet bitch rather on the small

order, however. Multnomah Flurry reserve winners, second novice and first open lacks the class of Blue Girl, but is a very good bitch nevertheless.

Wires, four in number were fair, Multnomah Stopper is a youngster that looks very promising.

Irish terriers were few but rather good, Boy first winners, is a clean out looking individual that could be a bit larger. Ramlih Nell, winners bitch, is a nice bitch that would show up better if she was livelier in the ring.

Airedale Terriers were a surprise both in numbers and quality, a round dozen being on the benches. Brairdale Record winners dogs is a proper sized dog of more than average quality and has the style and appearance of a game and typical Airedale.

Bearwood Bloom, winners, first limit and open bitches was the best one in the classes. She is a fine specimen of the breed and has show quality and class to go with it.

Three Dachshunds were good all through, Princess Von Jaegerhaus, a sleek, well finished black bitch being particularly good.

Two Scotties, Hum (first) and Badger were both excellent ones. Kuroki, the only Jap entered was a fine a little dog, having a better chrysanthemum tail than usually shown. A Chow with a clipped coat, was nevertheless a very good one. Two Toy Black and Tans were an illustration of the present decadence of a once popular breed.

The winner in the Miscellaneous class (8 entries) was a rather leggy sample of an Esquimaux (Mallinuth) dog. In this class were also entered five "pit Bull Terriers." This dog is a mongrel, pure and simple, and the custom of receiving such entries should be discouraged by all kennel clubs.

Harry Gilchrist, the crack shot of the Centralia gun Club won the high average of the day with a percentage of 87 1/2. Wray, of Elma, the champion was a close second. Ed. Cooper of South Tacoma and Gus Watson of Cosmopolis were also near the top of the list. Some of the best shots of the Northwest were present and took part.

The association held the regular shoot at Elma on Decoration day, and will follow at Olympia on the 4th of July, with probably a second shoot on the same day at South Tacoma.

The annual dinner of the Multnomah Rod and Gun Club took place in Portland May 17th was a jovial convention of shooters, twenty members and guests being present. There was something substantial for the inner man and many stories of hunting and fishing were told at the expense of one or the other of those

present. Billy Lippman told a good poker story and Maurice Abraham, Dick Carlson and George Leithoff related yarns that had to do with the killing of ducks and big game. R. D. Inman presided over the dinner. Those present were W. F. Lippman, Adolph Woelm, John Kiernan, M. Abraham, A. R. Parrot, Walter Honeyman, Harry Beckwith, W. E. Carlson, L. Bell, C. H. Collier, R. D. Inman, George McMillan, L. M. Norwood, Charles Wagner, W. B. Fehbheimer, George Liethoff, E. E. Redfield, H. Hudson, V. E. Funkhouser, F. B. Thorn, Will G. McRea.

Sober up on Jackson's Napa Soda.

Good News

from

THE SOUTH

The following telegram was received Friday morning:

San Bernardino, Cal.,
June 7, 1906.

"Breeder and Sportsman"

Santa Ana, San Bernardino
and Los Angeles will all give
meetings beginning July 4th.

G. A. POUNDER.

Cleveland Track Notes

American Sportman, May 31.—It is understood that Charlie De-Ryder is on his way from California to the track here. It is not understood that he has a large stable but a select one.

Jack Curry worked his horses in his stable, miles around in 2:30 Tuesday morning. They stood the long ship from the Pleasanton, Cal., track in good shape. None of them have been asked for much since their arrival.

Dr. G. W. Simpson who came from California to Pontiac, Mich., last winter, is expected at the track this week. He has in his stable two stallions Koblan King by Simmocolon 2:13¾ and Koblan Prince, a son of Kohlan King.

Monica 2:15 by McKinney 2:11½, dam Maggie Thorne by Director 2:17, owned by R. C. Hopkin, a prominent member of the Gentlemen's Driving Club, has foaled a nice filly by John A. McKerron 2:04½. In point of breeding, this filly is certainly royally bred. It is a large, handsome filly and Mr. Hopkins is greatly pleased with it. She will be returned to McKerron.

Vance Nuckols electrified the railbirds Tuesday morning with a brush of speed that nearly caused some to collapse. He let the brown mare Italia, trotting record 2:14, step down to the half in 1:12 and then let out enough links to step home in just 1:03 flat. It was an evenly rated half and was done easily, the mare not being fully-extended at the finish, she could have gone the mile in 2:10 easily. There is no question but that the daughter of Zombro is a 2:10 pacer sure this season. Italia is owned by Mr. W. P. Murray, an enthusiastic horseman who also owns Jack Wilkes 2:17¼ and Reuben S. 2:18¼. It looks now that barring accidents, Mr. Murray owns three 2:10 performers this year. Kenneth Mac 2:24¼, Col. Osone 2:24 and My Gilt 2:29¼ worked miles in 2:25.

Maj. P. P. Johnston of Lexington Ky., president of the National Trotting Association has nine two-year-olds in training by his young stallion Free Giver 2:18 the first get of that horse.

"SAVE-THE-HORSE" SPAVIN CURE

COSTS LESS for Results than all others known
Treatments and Remedies.

Gibson, Ill.

TROY CHEMICAL CO., Binghamton, N. Y. —
Dear Sirs: In regard to the bottle of "Save-
the-Horse" which I purchased of you, I used it
on my horse Bellado, record 2:20 1-3, for a bad
case of bone spavin of six years standing. At
times was so lame he could hardly get around.
I used about a bottle and a half and he is com-
pletely cured. I have given the horse hard
drives and he never favors it at all. The remedy
is all right. Very truly,

GEO. McNABNEY.

Kunkle, O., Feb. 15.

TROY CHEMICAL CO., Binghamton, N. Y. In
reply to your request of about 10 months ago,
I will now send reply in regard to "Save-
the-Horse" Spavin Cure. I used two bottles and it
cured my horse completely. He has never
shown any sign of lameness. I can recommend
it above any spavin cure on the market.

Yours truly,

WILLIAM FRANKS.

"SAVE-THE-HORSE" permanently cures
Spavin, Ringbone (except Low Ringbone), Curb,
Thoroughpin, Splint, Shoe Boil, Wind Puff, In-
jured tendons, and all lameness without scar
or loss of hair. Horse can be worked as usual.

\$5.00 per bottle, with a written gua-
rantee, as binding to protect
you as the best legal talent could make it. Send
for copy and booklet.

At Druggists and Dealers or sent express paid.

Campbell's EMOLLIO IODOFORM Gall Cure

For GALL BACKS and SHOULDERS,
CRUPPER SORES and SADDLE GALLS
there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS,
SCRATCHES, Blood POISONED SORES,
ABRASIONS OF THE SKIN it has no equal.

Its use will absolutely prevent Blood
Poisoning. In this respect there is no Gall
Cure offered which can justly even claim to
be a competitor. We placed it on the Market
relying wholly on its merit of success, and
notwithstanding the fact that comparatively
little has been done in the way of advertising,
the sales of 1900 were 100 per cent greater
than the aggregate sales of Gall Cure pre-
ceding that year. This increase was entirely
due to its MERITS, and it is THE GALL
CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fet-
lock which injure and often lay up race horses.

All Trainers Should Keep It in their Stables

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, spint, spavin or other like lurch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is the most reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. T. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have cured many many horses. It will cure deep-seated curbs, spint, spavin, and all other ailments of the horse. I have cured many horses that were considered incurable. I am never without it." This is the general verdict of all who have used Quinn's Ointment. For curbs, spint, spavin, and all other ailments of the horse, it is the only cure. Price \$1 per bottle at all druggists or sent by mail. Send for free copy of testimonials, etc.

W. B. Eddy & Co., Whitehall, N. Y.

DON'T BLAME THE REEL

If it fails you at a critical moment. Don't give it a chance to fail you—use "3-in-One" and it never will! "This oil keeps the reel's sensitive mechanism in perfect order. "3-in-One" is the one sure and safe reel lubricant. Won't gum; won't dry out.

Contains no acid. It absolutely prevents rust. Apply it to rod joints, they will come apart easily. Use on rod—it's good for wood—promotes pliability. Rub on line, prevents rotting. Trial bottle sent FREE by G. W. COLE CO., 111 Washington Life Building, New York City.

Kendall's Spavin Cure

has never had an equal in the world for curing common horse ailments, such as Spavin, Ringbone, Curb, Splint and Lameness.

A Cure for Spavin.
Washington Globe, March 3, 1900.
Dr. B. J. Kendall Co.,
Dear Sir:—Enclosed find a 2 cent stamp for your book, "A Treatise on the Horse and his Diseases."
I have used your Spavin Cure and found it a sure cure for Spavin.
Yours respectfully, W. James Fitzpatrick.

Price \$1; 6 for \$5. Greatest known liniment for family use. All druggists. Accept no substitute. "Treatise on the Horse," free from druggists or

DR. B. J. KENDALL COMPANY,
Enosburg Falls, Vermont.

RECORD BREAKING FISH

are caught every year at

LAKE TAHOE

JUST as large ones still uncaught. You can get them. Don't you long to feel again that sharp tug at the line, hear the shrill whirr of the reel, and, after a blood stirring fight, experience the joy of landing one of the finest, craftiest old trout you ever saw?

You shall do that many times on this beautiful lake and on the mountain streams round about. Also good hunting and mountain climbing. Many hotels; fine camping places; no poison oak.

Buy your ticket and get there in one night. Sleeper leaves San Francisco daily 7 p. m. and you arrive at Tahoe next morning in time for breakfast.

Who Knows this Mare?

There is a fine looking chestnut mare in Oakland with a filly foal a week old by the Palo Alto stallion McKena at foot, owned by Mr. E. Needham of 829 San Pablo avenue. Mr. Needham would like very much to ascertain the breeding of this mare and in case any of our readers who scan these lines know anything about her, we will esteem it a great favor if they will notify us or Mr. Needham. Some six or seven years ago a man known as "Dr. Flanders the Healer" was residing at San Leandro in Alameda county and purchased this mare, then about four years old, in the vicinity of Pleasanton. She is a chestnut, with star and small strip in the face and a very "breedy" looking animal. After Dr. Flanders owned her she got her left hind foot severely cut on a wire, and her ankle became enlarged. Dr. Flanders sold her to Mr. Needham. Every horseman who sees the mare expresses the opinion that she must have Nutwood blood in her veins, as she bears a strong resemblance to that family. She has a good head, fine neck, and is a handsome chestnut in color,

and outside her injured ankle has good legs and feet, and can show 2:30 speed even now on the road. Mr. Needham bred her last year to the stallion McKena (son of McKinney 2:11 1/4 and Helena 2:11 1/4) and the result is a very handsome filly with black points. If any of our readers who reside in Alameda county remember "Dr. Flanders, the Healer," and his purchase of this mare will they please communicate with us, or send word to Mr. E. Needham, 829 San Pablo avenue, Oakland.

Breeders' Meeting at Woodland

The citizens of Woodland have raised a bonus to induce the Pacific Coast Trotting Horse Breeders Association to visit Woodland, and that organization has accepted the Woodland offer and in this issue of the Breeder and Sportsman announces its stakes for the meeting which will be held during the week ending August 18th.

Woodland is one of the most thriving towns in the great Sacramento Valley, and is located in the midst of the most prosperous farming section of the State. The hotel accommodations are first class, and the people have always patronized harness races most liberally.

Woodland's race track, situated on the Woodland Stock Farm, owned by Mr. Alex. Brown, is one of the fastest on the Pacific Coast and one of the best appointed. It is located about one mile northwest of the town, and is reached by beautifully shaded avenues that are kept sprinkled during the summer months.

Some of the best contests ever seen on the California circuit have been decided on this track, and there is no place in California

where horsemen would rather race than the one located near the shire town of Yolo county.

Among the features of the program to be given at the Breeders meeting there in August will be the Pacific Breeders \$7000 Futurity, of which four divisions will be decided. The two year old trotters, two year old pacers, three year old trotters and three year old pacers will all race for their share of this big stake. Then there are those two big stakes, the California for 2:24 class trotters, and the Pacific Slope for 2:20 class pacers to be decided at Woodland this year. They are worth \$1500 each. The 2:09 pacers and the free for all trotters will bring out the fastest horses of the aged classes in California, and there will be many other classes in which the most exciting contests are sure to result. The Breeders Association has never before held a meeting at the Woodland track, and its officers and members are looking forward with great pleasure to the meeting to be held there in August.

From Woodland the horses will be shipped direct to the California State Fair at Sacramento, and thence many of them will doubtless go north to participate in the splendid program of racing at the Oregon State Fair at Salem.

Santa Ana Will Open Circuit

Harness racing will be held in Southern California this summer, and will be opened July 4th at the Santa Ana track with an excellent program of racing, to be followed the next week by a meeting at the San Bernardino track, and from thence the horses will be shipped to Los Angeles where a four days meeting will be held with purses ranging from \$500 to

\$800. This is good news to horsemen, and we are able to print the programs of these meetings in our issue of this week.

In Los Angeles last week the Harness Hores Association of that city was incorporated with a capital of \$10,000, divided into 200 shares at \$25 each. There were a large number of shares subscribed for immediately and it was resolved to give a meeting in July, to follow the San Bernardino meeting. The following officers were chosen for the association C. A. Canfield, president; E. J. Delorey, vice president; L. J. Christopher, treasurer; Robert A. Smith, secretary; Dr. Wm. Dodge, J. H. Bohon, G. A. Pounder, Chas. Saddler, Byron Erkenbrecher, directors.

For the Los Angeles meeting there will be three races each day, and the purses will range from \$500 to \$800. There will be one \$800 purse for 2:25 pacers and another for 2:30 trotters. The admission to the track will be 50 cents and the grand stand free.

It was stated that there would be a meeting at Fresno the first week in August, followed by meetings at Salinas, Woodland and the State Fair at Sacramento the last week in August, so that the horses will be through with the racing in California in time for the State Fair at Salem, Oregon.

It is the intention of the association to hold another meeting in Los Angeles in the fall.

According to the schedule as arranged last week here is an open week between Los Angeles and Fresno which may be taken by any town wishing to give a meeting.

California's favorite hot weather drink is Jackson's Napa Soda.

Notes and News

The Wilkes-Electioneer-Nutwood combination of blood lines bids fair to become even more popular than the Wilkes-Mambrino-Patchen combination has ever been, says the Horse Breeder. Those who aim to secure such a combination will do well to secure their Wilkes cross from such sources as have the Mambrino Patchen cross close up and if there is also an American Star cross in the Wilkes-Mambrino Patchen animals it will increase its value, especially if it comes through Dictator, Robert McGregor 2:17½ or Aberdeen.

The premium list for the California State Fair of 1906 is out. Write to Secretary Filcher for one, and make up your mind to exhibit the product of your farm, orchard, vineyard or factory at this fair.

Bert Webster is again located at Pittsburg, Pa., where he has charge of the horses belonging to Henry Schreiber, who owns several fast pacers and trottes.

Worth Ober, with the gray pacing mare owned by Mayor Schmitz, and Victor Verhilac driving his own mare Gertie A., worked out together at the Alameda track Sunday morning. The mile was in 2:19 and the last half in 1:06. Charley J., the pacer that won at Pleasanton April 14th in 2:13½, went away with the other two, but his owner evidently did not want to drive him a fast mile as he laid back with him the last half.

Mike Donnelly, the popular horseshoer of this city, took his mare Flora G. over to the Alameda track last Sunday and let her step a half mile in 1:04¼. She did it nicely and with apparently little effort.

James O'Kane let his gelding King V. have his head at the Alameda track last Sunday morning for a quarter of a mile and he stepped it off in 32½ seconds, the last eighth being in 15 seconds flat.

All eyes will be turned toward Cleveland's grand circuit meeting this year which will be tried without pool selling, bookmaking, or speculation of any kind. The directors have prepared for all possible contingencies by raising a guarantee fund of \$15,000. The association will offer no big stakes but will have a substantial list of good purses, with liberal conditions.

Monterey 2:09¼ is proving a sire of very handsome, rangy, high headed trotters. Peter Williams, owner of Monterey, has a four old son of this stallion that is out of the good brood mare Leap Year that is one of the classiest looking young stallions in California. Mr. Williams calls him Yosemite, but finds that he will have to select another name before registering him, as that has already been taken. This young horse worked a very easy mile last Sunday at the Alameda track in 2:34 with the last half in 1:15 and looks as if he had 2:10 speed. He has a very handsome head and neck, good body, is well quartered and stands on perfectly clean bony legs and excellent feet. He is a chestnut, but Mr. Williams has a younger full brother that is coal black. Monterey has had a fair season this year and a few mares are still being booked to him. He will be one of the most popular sires in California within a few years.

Teddy Ray is the name of a very fine and promising three year old colt owned by Mr. Howard at Alameda, that James Berryman is giving a few lessons to at Alameda. Teddy Ray is by Monterey 2:09¼ out of a mare by Diablo 2:09½ and has size and good looks, as well as the ability to show considerable speed.

Mr. I. M. Moddison of Wheatland will please accept our sincere thanks for a bunch of old sales catalogues that we consider a very valuable addition to our library. Mr. Moddison states that he is just finishing up a good season with his stallion Kildare. The foals by this horse are all good looking and large. Mr. Hollinshead's mare by Bay Bird has one that is a grand looking filly and Mr. Durno's mare by a son of Electioneer has another that is a natural pacer. Mr. Burdock of Wheatland owns a very fine filly by Falrose out of a mare by Stam B. The filly by Barondale 2:11¼ owned by Mr. Moddison is just being broken and he says she is a sweet one.

Third payment of ten dollars each has been made on thirty-four colts and fillies entered in the Stanford Stake of 1907. These are now two years old.

The Stanford Stake for foals of 1905, to be trotted in 1908, closed for entries June 1st. It received 49 entries. The full list appears in another column.

To balance a pacer by shoeing, says an exchange, is often as trying and calls for as much skill as to balance a trotter. The pacer that is so sure of his gait that he will not have to wear hobbles to keep him going steady and not shift his gait or make a break, are few. The inclination of a pacer to bark is more serious than the same propensity in a trotter, because when a pacer makes break or loses his stride it is very much more of a problem to get him back to his stride without loss of all chance of winning the heat, if he does not get the flag, which is not unlikely with the majority of pacers when they make a break during a race.

The United States Department of Agriculture publishes officially gathered figures which show that there are thousands more horses in the country, in actual use, than were to be found when the first automobile wended its odorous and noisy way over the city pavements. More than that, when the first auto appeared the average value of the horses owned in America was but \$65; today it is \$130, which helps to prove, says the Horse World, that while the new industry may not have benefited the horse business, it has not injured it in the least.

E. E. McCargo, the Philadelphia trainer, who has Wentworth 2:04½ in his stable, will take quite a number of horses through the Grand Circuit with him this season. He has the green trotting mare Czarine Dawson, by Czar, that trotted in 2:10 last season, and has her heavily staked. He also has Hal Fry 2:12¾, by Fry's Brown Hal Tillie Ferguson 2:18¾ by Tilford, Grattan Bells, a fast trotter by Grattan Boy 2:08; Owyho 2:07¼, a son of Charles Derby, that is thought to be a 2:04 pacer by the Philadelphia critics; Royal Audubon, by Audubon Boy, and Prince Albert, a green son of Axtell.

The second forfeit has been posted by all the owners for the three cornered race between Sweet Marie, Tiverton and Wentworth. The last two have records of 2:04½ and Sweet Marie is but a quarter of a second faster. Secretary Jewett of Readville, was present when the second forfeits were put up and offered to add \$7500 to the stakes of \$7500 if the race was trotted on his track. The offer was accepted, and the race is to come off on July 4th.

There are 32 entries for the two year old trot at the Iowa State Fair this year.

The British steamer Anderado took out a cargo of 1069 mules at Port Costa this week, which were consigned to the Colonial Sugar Company, Fiji Islands. The mules were purchased by B. T. McCullough of Crows Landing, on an order from Thos. Hughes of San Francisco, representative of the sugar company. They have 100,000 acres of land under cultivation over there, and some 7,000 acres are cultivated annually. Between 4000 and 5000 head of stock and some 22,000 natives of India are employed in the company's operations. Mr. McCullough's contract requires him to land the mules at their destination, the proposition involving some thing like \$200,000. Mr. McCullough has heretofore made shipments of mules to the same company, consigning over 500 on one occasion and over 600 on another. Most of the animals have been purchased in Stanislaus county.

Secretary Van de Vanter announces that the Seattle Harness meeting is off. There are over 500 runners at the Seattle track and stall room is more than crowded. Then the harness stakes did not fill satisfactorily, and the management decided it was better to declare the harness meeting off entirely. The running meeting which opens today, promises to be the greatest in the history of the northwest.

J. B. Shockency, recently of Louisville, Kentucky, has opened a training stable at Irvington Park, Portland.

The gray mare Louise Jefferson 2:10 that trotted to her record in 1902 at Memphis, is dead. She was bred by Chas. Owens of Colorado, and owned at the time of her death by Mr. C. K. G. Billings. Her foal of 1905 was by John A. McKerron 2:04½.

"Teddy" Bunch went east with Bonnie Steinway and will condition him for the races in which he is entered. "Teddy" is one of the most promising trainers that California has developed in years. He has given Bonnie Steinway all his work.

Silver Ring 2:14½, the mare P. W. Williams formerly owned and sold to New York parties, has been bred to the great trotter Admiral Dewey 2:04¾ this year.

The string of trotters and pacers to be campaigned by trainer Gerrity on the Grand Circuit this year for W. A. Clark Jr., left Los Angeles June 7th by express. Trainer Rutherford took the mare Helen Norte 2:09½ in the same car with the Clark string.

Geo. T. Beckers, owner of that great race trotter and sire of speed, Zombro 2:11, will be in Sacramento from August 1st to September 1st, and will have his stable of horses with him. Zombro will be taken along and those wishing to breed mares to him during that time should correspond with Mr. Becker. Many owners in this section desired to send mares to this great son of McKinney this year, but did not on account of the long shipment to Los Angeles. Now that the horse will be in Sacramento during the entire month of August owners whose mares have not been bred will have an opportunity to secure the services of one of the greatest trotting stallions in America.

J. W. Miller of Colorado Springs has sold to J. A. Richardson and C. H. Hancock of Los Angeles, the trotting horse, Queer Knight, for \$1,500. Mr. Miller shipped his horses to Los Angeles a month ago. Queer Knight is in fine condition and his new owners will take him east to be prepared for the grand circuit. While at Los Angeles Mr. Miller sold The Jester 2:19½ by Stam B. to Mr. Richardson. The latter formerly owned Swift B. 2:12¼. He paid \$1200 for The Jester.

Silver Hunter the Zombro colt that Geo. T. Beckers will race this year is showing so well that Beckers thinks first money is his in some of the big stakes.

Charlie Jerfies left Los Angeles for Denver last week with his pacing mare Ruby H. by Malcolm that he will race through the north west this year. She worked a mile over the Los Angeles track in 2:09 two days before she was shipped.

The Denver meeting opens today. A large number of California horsemen and horses are at Overland Park to take part in the meeting.

More Good News

Every horse owner on the coast will be glad to know that John A. McKerron maker of fine harness and horse boots will be ready for business again about July 1st. His new location will be at 321-323 Hyde street, southwest corner of Ellis street, one of the most accessible locations in the burnt district of San Francisco. The new building will be ready by July 1st, and Mr. McKerron will be prepared to fill all orders with his usual promptness. Until July 1st, his address will be 218 Eureka street, where it has been since the fire.

The \$1000 Spreckles Stake for two year old trotters and the \$1000 Ben Rush Stake for two year old pacers, offered by the State Agricultural Society, were both declared off at the last meeting of the Board of Directors. The first named received but eight entries and the latter but four.

An eastern paper says: "Not much has been heard of Monte Carlo 2:07¼ since he became a road horse in Kansas City a couple of years ago, but he is reported as having his old speed and that same faultless gait—as near the poetry of motion of trotting as ever.

McKinney's first crop of colts sired after he left California are now two year olds, and are being spoken of as very promising already.

The annual sale of Rush and Hailes' yearlings by Demonio 2:11¼ will take place at Suisun today.

There are thirteen colts and fillies that have had fourth payment made on them in the Stanford Stake to be trotted this year at the State Fair. Three are by McKinney, three by Zombro, two by Nutwood Wilkes, and one each by Kinney Lou, Stam B, Mushgaak, Monbells and Neernut.

Dr. R. B. Boyle, a veterinary surgeon of Concord, California, died at his residence in that town last week of pulmonary tuberculosis.

The Western Pacific Railroad Company grading contractors are experiencing great difficulty in securing enough horses and mules for scraper work.

On May 4th, this year a mare belonging to W. J. Lennon of Sparta, Illinois, gave birth to twin foals, horse and a mule. The horse colt survived but the mule foal died.

The very handsome filly Fashoda by Barondale 2:11¼, that Tom James had at San Jose when he was located there, has grown into a fine large mare that is trotting so fast for Ed Geers that he has named her in the M. and M. \$10,000 purse to be decided next month at Detroit.

It has been made a crime to make a false entry of a horse in New York and the punishment is a fine of not less than \$500 or more than \$1500, or a year in prison. Anyone who knowingly aids in making a false entry is guilty of a misdemeanor.

Jacob Broliar will ship his horses from Tulare to Los Angeles next week with the expectation of racing them at the Santa Ana, San Bernardino and Los Angeles meetings. Mr. Broliar's mare Stonelita 2:15¼ as a three year old, record made last year, has a beautiful brown filly foal by Zolock 2:05¼, that is a natural pacer. It is entered in the Kentucky, Breeders and Kentucky Stock Farm Futurities, and Mr. Broliar expects and has a right to expect great things for this one if she lives. Stonelita is a wonderful young mare, as she has two club feet forward, the result of wire cuts, and an affected hip, but made her record with them, after being sick with distemper during June and July last year, and was not put to training until the first of August. On the 20th day of August Mr. Broliar drove her a full mile in 2:12, and Vet Kent A. W. Bruner and Lee Mayberry of Los Angeles, and W. H. Hall of Bangor, Maine, held the watches and can vouch for the time. The mare afterwards had a relapse, and was started in several races, winning at Hanford and Tulare.

Judge A. G. Andrews, who has held down a training stable at 226 Second street, Oakland, for so many years, has sold out his interest to San Francisco parties who have turned the block into a Chinatown, and Mr. Andrews has given up the horses that he had in training. He has turned out his fine two year old Guy Abbott by Searchlight and accepted a position at Red Bluff as head trainer for John Andrews. The horsemen around Oakland will miss his smiling countenance on Sunday mornings at the speed track. The "wise one" gathered together and presented him with a beautiful medal made from the bark of a mushroom tree on the day of his departure.

Notice the big display advertisement of the Butte meeting, containing the full program of races. The early closing running stakes will close July 1st, and the harness events August 10th. The meeting will open at Butte, Montana August 21st, and close September 7th. Full particulars and conditions will be found in the advertisement in this issue.

Walter Masten, the well known trainer has been so seriously ill with rheumatism at his home in Sacramento that he has leased his racing stock and will repair to Tuscan Springs to recover his lost health.

Chase's Tattersall to be Ready Soon

Just before the calamity of April 18th, Fred H. Chase had completed arrangements to build a big tattersall and sales pavilion on Valencia street near 16th in this city. Of course the earthquake and fire changed the course of many a man's business affairs completely, but while Mr. Chase was burned out of house and home, he never quit smiling and after twelve days hard work as a member of the Relief Committee began getting things in shape to go on with his project. He has already had the Valencia street lot cleared off and leveled, and will begin the immediate erection of an office and fifty fine box stalls for the accommodations of horses that will be consigned to his sales. The pavilion will not be erected just yet, but we expect to see work started on it inside of two months and as soon as San Francisco streets are cleaned and sufficient new stables are built to accommodate the driving and draft horses that are needed, horse sales will be held in this new location. The stalls which Mr. Chase is building are to be of two inch surface pine, built in the most up-to-date and substantial manner, and will be provided with every sanitary improvement, including sewerage, etc. The Fred H. Chase salesyard and tattersall is at 478 Valencia street, and the cars will pass the door.

Matinee at San Diego

The San Diego Driving Club turned out in full force May 30th, to witness a race between five pacers owned by members. Mr. Stewart's chestnut gelding Fox was the winner in straight heats, but every heat was very closely contested. The summary follows:

Fox, ch g, C. W. Stewart	1-1-1
Trix, br g, J. E. Connell	2-3-4
Dewey, b g, Harry Dailey	3-2-2
Bonnie B, b m, T. W. Brod-nax	4-5-3
Black Night, bk s, F. Fanning,	5-4-5
Time 2:21½, 2:19, 2:22½.	

The starter for the race was Mr. Potter, a New York horseman; the judges, Harry Rudder, George W. DeFord, Archie Taylor; timers Howard Weston and W. B. Hage.

Carriage Team For Sale.

Bays, about 7 years old, weigh about 1250 each, well broken single and double, good drivers, well mannered, sound and stylish, first class team in every respect. For further particulars and to see team call or address

A. L. SCOTT,
Hillside Ave., Piedmont, Cal.

Rod, Gun and Kennel

Conducted by J. X. De Witt

The sport of trap shooting is essentially a summer recreation with sportsmen on the Pacific Coast. Granted that a few clubs keep at the game all the year round we find all the same, that most club members do but little trap shooting during the general open game seasons. Many clubs close the trap program in September, thus allowing ample preparation for the duck, quail or pheasant season, and until the following April, generally, offer no inducement to the clay pigeon shooters. Strange as it may appear to the majority of sportsmen, not a few devotees of the shotgun confine their attention more to the traps than to the field or marsh shooting. As soon as April arrives, the traps are once more in vogue and things go on as usual. All through the summer months—a series of six or seven monthly and semi-monthly club shoots, the pastime continues, and consequently, shooters have the opportunity of keeping their hands in. For nothing contributes to putting one out of form so much as enforced rest. Before the advent of the blue rock and since the general protective game law statutes prevailed a sportsman could hardly pull a trigger at anything worth the candle in close season. The inanimate target has changed this state of affairs and makes it now possible, and inviting, for a shooter to keep at his favorite sport all the year round—feathered game in its seasons, and blue rock smashing during the balance of the year, a period of practically eight months.

Continuing this subject we quote in substance a writer in the English Shooting Times whose views we are sure will meet the endorsement of most of our trap shots.

"It is always interesting to listen to the divers views and opinions of shooters when they get to talking about blue rock shooting. No two men seem to take quite the same view of things when the inanimate target comes up for discussion. Everyone is welcome to his opinion, of course, but, all the same, it is to be regretted somewhat that those who don't care for the clays should deride and sneer at them. We find this is so, strange as it may seem, and the man who does not like them, or cannot hit them easily, condemns them, and asserts 'there is no sport in blue rock shooting.' Nothing could be further from the truth than this, for I know of no more exhilarating

fun than a match, especially a team contest, at the traps, either for a prize in kind or cash.

Next to shooting clay birds myself I like to watch others doing so, particularly good shots and experts. What a lot you can learn, too, by keeping careful watch on others. Many a man has come to be a first rate performer himself who started by merely looking at his friends shoot. Not only is much wisdom to be derived in this way, but it is a pleasure of itself to watch crack shots at work. It may quite truthfully be said that no two men shape themselves in exactly the same way. Even in the manner a competitor walks to the traps, or rather, to the firing line, we see so much to speculate upon. One man, the moment his name is called, makes a sort of dash for his gun, and immediately hurries to the mark, as if to make up for lost time. He rushes at things as if he were trying to catch a train and feared he would miss it. This is the excitable sort of shot, and is seldom a reliable one. His opposite is found in the shooter who has frequently to be called up twice before he stirs from his seat, who selects his gun from the rack with tantalizing precision, strolls leisurely to the score and often keeps the entire squad on the firing line waiting. Here again, we seldom see in this type of shooter a crack shot. Then comes all other sorts and sizes; each man plainly shows some individual peculiarities that belong to himself, and only to him, and so he plays his part.

Equally interesting is it to watch the actual shooting after the word 'pull' is called. I like to see a man stand well when facing the traps; and here I may as well say that until a man learns to stand properly he cannot shoot properly. I also like to see a man keep his gun down below the elbow until he has called a 'pull' and then to bring it to the shoulder with grace and smartness, a quick 'kill' putting the finishing touch to a clever and pretty performance. I do not think it nearly so graceful to keep one's gun at the shoulder while giving the word 'pull' although many men do this."

Standing with the gun ready at the shoulder and then calling 'pull' is now generally the custom with trap shooters throughout the United States. That this custom seems to be the better for general results is proven by the fact that the old style, below the elbow, has been discarded. The

present style showed its superiority when the teams of the American shooters met Great Britains' crack teams and bested them all through several years ago when the 'Indians' made their memorable tour of England, Ireland and Scotland.

"As to the leading of one's birds—that is to say the distance the shooter fires in front of the mark—it is a vexed question. I know shooters who lead very little, but by keeping their gun on the swing and pressing the trigger at the same time, shoot brilliantly. I know others equally good who don't carry much swing in their gun, but fire at an imaginary spot some distance in front of the flying target, and arrange things so that the bird and the charge of shot reach the same spot at identically the same time. These men, I repeat, are equally good (some of them) as the first mentioned, but their style is not nearly so pretty or attractive to watch.

For my part, the pastime of trap shooting at blue rocks is one that deserves to be well supported by sportsmen. What better practice can a shooter have? None, that I know of. It is nonsense to say it does not improve a man's form for field or game shooting. It could not do otherwise than improve him, for if a shooter can break clay pigeons sent from fast traps at unknown angles, he need have no fear of missing ducks, quail, partridges or doves, no matter how they go."

The writer might also have added that for the novice there is no better opportunity offered than is found in trap shooting, for the becoming familiar with the gun and its workings, the best methods of handling and using a gun safely and effectively. For at a trap shoot, he has the chance of observing experienced shooters at work, every shooter's system and style is under constant surveillance and the greenhorn's crudities and shortcomings are called to his attention in short order followed by pertinent advice in correcting mistakes (which are but natural to a beginner) and their avoidance in the future.

Clabrough, Golcher & Co., have secured a fine location on the south side of Market street, near First, where they have resumed business. This enterprising and well known firm had the reputation of carrying one of the best and most complete stocks of sportsmen's and outing goods in the United States. This reputation will be maintained in the new Emporium. The firm would have been started in business again ere this had a suitable location been available. We wish them the same success and popul-

arity as they enjoyed for a quarter of a century prior to the fireworks, and if experience, intelligence, courtesy and the ability to cater to the wants of sportsmen are any qualities to bank on we venture to predict great business prosperity and popularity for the rehabilitation of Claybrough, Golcher & Co., and satisfaction to their friends and customers.

The California Powder Works (Coast Agents for DuPont Smokeless, Laffin and Rand, New Schultze, New E. C. Improved) announce that the purchasing department is now located in this city, the new quarters are on Second and Mission streets adjoining Welis, Fargo & Co.'s building. Mr. L. E. Lyon, assistant traffic manager will have his headquarters at the San Francisco office. They have also made arrangements to have a representative of the sales department located at the same address, to receive local orders. All mail for sales department should be addressed to the Berkeley office, 2044 Center Street, P. O. box 29. Telephone, Berkeley 2430.

The Anaconda Cup won in Portland last year at the Northwestern tournament by J. W. Bradrick was destroyed by the flames when the Shreve-Barber Co.'s sporting goods store on Market street contributed to the material of the general conflagration on April 1th.

Despite the loss of the valuable and handsome trophy the shoot for the Anaconda Cup will be one of the features of the program at the Northwestern Association shoot to come off at Walla Walla the latter part of this month. Whether the loss of the cup will cut any figure in the receipt of by Bradrick of the two thirds entrance money or not, we are not advised. From our personal acquaintance with a number of the northern sportsmen we are inclined to believe that they are 'dead game sports' and the 'Frisco refugee may not be held to a full accounting for the loss of the trophy. This mishap was one that ordinary foresight could not guard against. The entire contents of the store in which the trophy was on exhibition were lost as were the contents of hundreds of other stores in the vicinity.

The report that Phil B. Bekeart was ill is not of very serious consideration, for while it is true that the genial Phil was under the weather for a day or two, he is now in his usual good health and spirits.

We regret to chronicle Dave Thom's bad luck on April 18th. He is a popular veteran sportsman and the most widely known gunsmith in all America. A large and complete and very valuable outfit of tools and machinery was destroyed and also quite a number of costly guns which had been left with him for care and overhauling, as was usual every year with sportsmen during the close season.

Clarence Haight the popular DuPont representative, has taken unto himself a bride and is away on a honeymoon trip to Los Angeles. The many friends of Mr. Haight offer him all sorts of well wishes and prosperity, none more so than the writer, for more than a decade we have known Mr. Haight rather intimately and have invariably found him a congenial sportsman, self-sacrificing for the welfare and interests of others and a courteous gentleman, contact with whom is always replete with pleasant memories.

The postponed May shoot of the California Wing Club took place at Ingleside on Sunday June 3d, the regular date for the club shoot. Weather conditions were rather too moist for large attendance of the pigeon shooters. A lively lot of birds were on hand and four events were good enough to remind those present that the good times were not all in the past. In the first race at twelve birds Ed. Schultz handily accounted for a straight score. In the medal race, also at 12 pigeons he repeated for a straight and followed with another in a 12 bird pool race. In shooting up a back club score he lost his sixth bird, 47 out of 48 birds is pretty good shooting. The scores shot were as follows:

Club purse race, 12 pigeons, distance handicaps — E. Schultz, 28 yards, 12; Frank Turner, 25 yards, 11; J. K. Prior, 29 yards, 10; C. C. Nauman, 30 yards, 10; W. E. Muddock, 28 yards, 9; Ed. Dohonohue, 30 yards, 8.

Club medal race, 12 pigeons, 30 yards rise — Schultz, 12, Prior 11, Nauman 11, Turner 9, Donohue 4. Back scores: Nauman 12, Prior 12, Schultz 11, Turner 11.

Pool shoot, 12 pigeons, same handicap as in club purse race — Schultz 12, Nauman 11, Turner 10, Prior 10, F. Schultz 10.

Nauman and Prior shot a race at 6 birds each, 34 yards rise. Prior won by a bird.

The Golden Gate Gun Club will hold a series of blue rock shoots at Ingleside. The initial meeting is dated for the 24th of this month.

Captain Thos. L. Lewis of the Union Gun Club announces that the club will hold the next regular club shoot at Ingleside on the third Sunday in July, the 22d.

The boys have been scattered somewhat since the shake up but they are all getting the sporting fever again and will be at the game in old time form before many moons.

It is very probable that the Empire Gun Club will carry out, in the near future, the program originally scheduled to come off at the Alameda Junction grounds.

The Vallejo Gun Club held the first of the series of class shoots for four gold medals at the Flosden trap grounds on Decoration Day. "Togo" Hirschle was high gun in class A with 21 out of 25. White was high in class B with 21 out of 25. Sessarego won the class C initial race with 18 out of 25. In the merchandise shoot Walter Roney won first prize, a rifle, with a straight of 25 breaks; H'Oara the \$10.00 cash prize with 22 breaks; Magistrini the third prize, 100 shells; Chappell the fishing rod as the fourth prize; Wisecarver the fifth prize, and Sessarego the sixth prize.

Rose and Elias tied for seventh prize and divided. Steve Magistrini won the eighth prize.

In the team shoot the team composed of Hirschle, Chappell, Shouse and Wisecarver won by a score of 81 out of 100. The second team, composed of H'Oara, Roney, Magistrini and Sessarego scored 77 breaks.

The Rising Sun Gun Club will shoot this season, among other events, for a DuPont trophy under the following conditions: Holder of trophy 20 yard handicap, 20 out of 25, 18 yards; 17 to 19, 16 yards; 16 and under, 14 yards. Each shooter is handicapped on his preceeding score. Contestants winning twice not less than 18 yards. New entries, 16 yards. The scores made in the DuPont trophy race in May were:

J. Miller 15, E. Jamison 14, J. Pedrick 16, Silvey 8, Rohwer 15, Peterson 20, C. T. King 20, Gratton 14, Agee 18, McElwaine 20, Geithle 15, W. Perdiok, G. Zenter 10, H. Zenter 16, C. Meyer 13, T. Feudner 12, A. Bensen 16, Chas. King 17, King, Peterson and McElwaine tied. Shoot off King won the trophy.

15 targets, pool shooting — J. Miller 12, L. Geithle 10, E. Jamison 5, Feudner 3, McElwaine 10, Bensen 9, Rohwer 10, Gratton 11, Chas. King 11, C. E. King 12, W. D. Peterson 14, Silvey 4.

The Santa Maria Gun Club held the first shoot for the Peters Cart-

ridge Company's silver cup on Sunday, May 20th. The scores at 25 targets were: E. T. Bryant 23, J. Eschilsen 19, A. L. Smith 16, E. E. Bryant 16, Dr. Dart 14, Guthrie 14, Lockwood 9, Chas. Whaley 7, S. T. Coiner 4.

At a recent Paso Robles Gun Club practice shoot the scores resulting in three events were the following:

At 20 targets — Tognazzini 15, Johnson 16, Gaxiola 12, Dr. Crees 6, Janey 10, Mader 12, McDaniels Jr. 11, Motfield 10, Gaxiol Jr. 14, McDaniels 7, Brendlin 2, Keller 11, Woods 5.

Team shoot, 10 targets:—Johnson 8, Gaxiol Jr., 1, Mader 6, Keller 3, Motfield 8, Crees 3, McDaniels 4, total 33; Tognazzini 6, Gaxiola 4, Brendlin 3, McDaniels 5, Janney 8, Wood 5, Crees 4, total 5.

Team shoot, 10 targets — Motfield 6, Gaxiola 5, J. McDaniels 3, Keller 5, Wood 4, total 24; Janey 5, Tognazzini 9, Brendlin 6, Mader 1, Crees 4, total 26.

Two well known San Francisco trap shots participated in the Multnomah Rod and Gun Club shoot at Irvington June 3d, W. A. Robertson and Clarence Ashlin, both members of the Union Gun Club of San Francisco.

In two 25 target shoots the scores were: W. E. Carlon 19, 23; E. E. Young 17, 20; W. B. Fecheimer 17, 18; Charles Wagner 20, 20; A. E. Guist 15, 18; J. L. Bell 17, 23; H. R. Ellis 23, 20; Frank Geiser 18, 19; H. Meister 15; C. H. Collier 22; 20; N. Norwood 16, 16; W. A. Robertson, guest, 20, 24; Clarence Ashlin, guest, 20, 24; Mrs. Webster Holmes, guest, 17, 19; J. M. Brown, of Chicago, guest, 17, 19.

The San Francisco shooters held their own with the Oregon cracks. Mrs. Holmes is the champion lady shooter of Salem, Oregon. J. M. Brown is a well known Eastern shooter identified for years with the Illinois tournaments.

A good crowd witnessed the second monthly tournament of the Southwestern Gun Club association which was held at Elma, Wash., on Decoration Day under the auspices of the Elma Gun Club. The weather was cold and the wind strong and puffy, which accounts for the low scores of the entire shoot. Time was called promptly at 8:30 a. m. and continued the shoot til the last tie was shot off at 7 p. m. For high gun, Gilchrist and Fennell tied, 145 out of 175. Cooper came in second 141, and Sam Wray third 139.

Gilchrist and McLaughlin tied for the individual championship medal, 23 out of 25, and Gilchrist won out in the finals.

J. Fennell won the California Powder Works cup.

The team shoot was won by the South Tacoma team in the finals though it was tied with the Elma first team in the event. Mrs. Ed. Storey won the woman's high average after a tie with Mrs. Arland and Mrs. Wray. After a tie with Miss Lulu Campbell, Mrs. Agnew won the second high gun for women. The next shoot will come off at Tacoma July 3 and 4.

The Tucson Gun Club held a shoot on the 1st. The club is getting ready for the annual territorial tournament in September when New Mexico and Texas teams will shoot with Arizona's best. The Texas-New Mexico clubs were added to the association at the last meeting.

At the Seattle Gun Club shoot May 27th on the Interbay grounds, Mitchell won the DuPont cup race 19 out of 25. In the medal shoot Cowley 22 out of 25 won in class A; Fischer 23 in class B, and Moore 18 in class C.

We note a new phase in the sport of trap shooting and from the far away Hawaiian Islands. The Oahu Gun Club is composed mainly of Chinese members and has a well established ground in Palolo valley. Fifteen members were participants at the initial club blue rock shoot early in May. Robinson (Anglicised for Chop Suey) scored 9 out of 10 and Chang broke 8 out of 10. The other Chinks were probably a little wild and did not get on to many targets for the scores were not given. Nevertheless they had a good start at the game. Who knows but there will eventually be established a set of traps at Pekin in the Imperial grounds. Well, the more the merrier. The club will hold regular Sunday shoots during the summer. What a funny thing it must be to hear a bunch of Chinamen telling each other about how they shot too high at that left quarterer from No 1, etc., etc., and all the small talk that goes with a comparing of scores. "Too muchee fast high. No likee him. G'ivot dim! Hop die go mesey."

L. Todhunters' two year old colt Just Litsen by Zombro 2:11, paced a mile recently over the Sacramento track in 2:33. This colt is a full brother to Zombogette 2:16 and the three year old Silver Hunter.

The Sacramento Driving Club will give its first matinee at the State Fair Grounds, Agricultural Park, on Sunday, June 17th. The Oak Park Driving Club will contribute one race to the card, returning the compliment of the Sacramento club, that added a race to the club card of May 23d. The two clubs will probably unite in giving a six race program on July 4th.

Payments in Stanford Stakes

Payments were made June 1st on the following foals entered in the Stanford Stakes of 1906, 1907 and 1908: Entries making fourth payments of \$10 each in the Stanford Stake of 1906—

Alex Brown's b. f. Red Blossom by Nushagak-Redflower.

Mrs. S. V. Barstow's Nearest McKinney br. c. by McKinney-Maud J

Russell Gray's b. c., Walter G. by Nutwood Wilkes-Bessie C.

Ray Dittus' b. c. Our Bells by Monbells-Maiden.

M. G. Gill's br. c. Kinney G., by Kinney Lou-Mattie G.

W. C. McCullys' blk. c. Gen'l Torres by Neernut-Concha.

Wm. Morgan's b. c. Crisis by Zombro-Nellie K.

Thos. Smith's Prof. Heald ch. c. by Nutwood Wilkes-Daisy S.

L. H. Todhunter's b. c. Gerald G. by Zombro-Stella.

L. H. Tedhunter's br. c. Silver unter by Zombro-The Silver Bell.

Vendome Stock Farm's b. s. Alto Kinney, by McKinney-Irantilla.

Geo. L. Warlow's blk. s. Stanford McKinney by McKinney-Avena.

Sutherland and Chadborune's b. c. Sam G. by Stam B.-Bertie.

Entries making third payment of \$10 each in the Stanford Stake 1907—

Mrs. S. V. Barstow's br. gf. Miss Alright by Greco-Maud J.

T. W. Barstow's T. W. B., br. c. by Nearest-Bessie S.

W. O. Bowers ch. c. W. O. B. by Silver Bee-Sadie Benton.

I. L. Bordens' Cresco Belle ch. f. by Cresco Wilkes-Alice Bell.

Thos. H. Brent's b. f. Reina del Norte by Del Norte-Laurelia.

Alex. Brown's br. f. Nocha by Nushagak-Pioche.

Alex. Brown's br. f. The Bloom by Nushagak-Redflower.

Alex. Brown's b. c. Harold M. by Prince Ansel-Mamie Martin.

Alex. Brown's Prince Lot by Prince Ansel-Lottie.

C. L. Crellin's b. c. The Limit by Searchlight-Bertha.

Chas. R. Detrick's br. c. by Searchlight-Jaunita.

Mrs. L. J. H. Hastings's blk. f. Lady H. by Coronado-Lady Gussie.

W. G. Durfee's blk. c. Coronado by Ashewood.

W. G. Durfee's b. c. by Petigru-Ida Direct.

W. G. Durfee's Petigru-Joannah Treat.

C. E. Farnum's Marcus Aurelius ch. c. by Cupid Hock-Flossie.

E. A. Gammon's b. c. Ed. Geersby Bayswater Wilkes-Urana.

Fred Wadham's b. c. Alone Hastings by Petigru-Juliet D.

F. Hahn's blk. f. by Chas. Derby-Nellie Emmoline.

E. P. Heald's blk. c. Tommy Murphy by Monterey-Honor.

J. A. Jones blk. c. Chehalem by Capt. Jones-Daisy Q. Hill.

La Siesta Stock Farm's Mogolore b. c. by Iran Alto-Lady Belle Isle.

M. L. Lusk's b. c. Zeleso by Zombro-Sallie Brooks.

D. S. Mathew's b. f. Valentine B. by Edward B. Rhoney G.

W. J. Miller's br. f. Ellen M. by Guy McKinney-Kit.

M. A. Murphy's b. f. by Zombro-Maid of Monterey.

M. A. Murphy's b. f. by Zombro-Nellie Bly.

H. T. Owens Irene Ayers, b. f., by Iris-Babe.

Thos. Smith's b. f. Marguerite Hunt by Nutwood Wilkes-Daisy S.

Jas. J. Summerfield's b. c. Lord Dillon by Sidney Dillon-Roblet.

L. H. Todhunter's br. c. Flash by Azmoor-Bestella.

Valencia Stock Farm's b. c. Captian by Direct Heir-Rosedrop.

Geo. L. Warlow's b. c. Nogi by Athablo-Cora Wickersham.

Geo. L. Warlow's b. f. Soisette by Guy McKinney-Narcuba.

Entries making first payment of \$5.00 each in the Stanford Stake of 1908.

I. L. Borden's Juliet ch. c. f. by Moterey-LaBelle Altamont.

W. O. Bower's ch. f. Betty Direct-Betsy B.

Alex. Brown's br. c. Nushado by Nushagak-Addie B.

Alex. Brown's gr. c. Nupolo by Nushagak-Serpolo.

Alex. Brown's b. c. Bigelow by Prince Ansel-Bonnie Derby.

Alex. Browns b. f. Anjella by Prince Ansel-Majella B.

S. Christenson's b. f. by Stam B. Perza.

W. A. Clarks b. f. Monida by Nutwood Wilkes-Ruth Mary.

James Coffin's Suergus Witte by Cassian-Secretary.

James Coffin's San Felipe by Zombro-Etta J.

James Coffin's Rose Lecco by Lecco-Rose McKinney.

C. L. Crellin's b. f. Beretta by Searchlight-Bertha.

Geo. A. Creasy's b. c. by Chas. Derby-Elsie.

Rick DeBernardi's b. c. Kinney Rick by Kinney Lou-Ione D.

W. G. Durfee's b. s. by Cornado-Lulu Wilkes.

C. A. Durfees' blk. c. Dr. Lecco by Lecco-Bessie D.

A. Morris Fosdick's b. f. Lulu K. by Kinny Lou-Athena.

E. H. Gammon's b. m. Cleo Dillon by Sidney Dillon-Cleo G.

F. Gomet's b. f. by Alta Vela-Zorilla.

Charles A. Graves' b. h. Rosamond by Hurler-Saly Payne.

Mrs. L. J. H. Hasting's br. c.

California Boy by Coronado-Lady Gossip.

F. Hahn's b. s. Gold Bond by Chas. Derby-Nellie Emmoline.

Henry Hahn's b. f. Alameda by Stam B.-Henrietta.

C. Z. Hebert's h. c. by Delphi-Altoonita.

S. H. Hoy's b. f. Julia by Jules Vern-Privateer.

W. H. Hoy's b. c. Ernest by Scott McKinney-Amy I.

J. A. Jones' blk. s. General Jones by Capt. Jones-Daisy Q. Hill.

J. A. Jones' Alta by Capt. Jones-Alta Nort.

J. A. Jones blk. f. Sakaiawe by Capt. Jones-Lady Beach.

Rudolf Jordan, Jr., br. c. El Pronto by Stam B.-Vantrim.

Geo. A. Kelly Jr. b. h. Bonkin by Bonnie McK.-Constancia.

J. A. Kirkhams blk. f. Idolway by Stoneway-Carrie.

La Siesta Ranchs b. c. Siesta by Iran Alto-Lady Belle Isle.

J. W. Marshalls b. g. Julius V. by Jules Verne-Sophia.

William Morgan's br. s. Traverse by Direcho-Grace McK.

John O'Keefe's b. Sobre Vista by Alta Vela-Elma.

L. H. Todhunter's br. c. Zombro-The Silver Bell.

L. H. Todhunter's b. f. by Zombro-Loma B.

J. H. Torrey's f. b. Bessie T. by Zombro-Manilala.

Valencia Stock Farm's br. c. by Direct Heir-La Belle.

Valencia Stock Farm's blk. f. by Direct Heir-Rosedrop.

Geo. L. Warlow's b. s. Cordero by Athablo-Lustrine.

P. R. Watt's blk. m. Nelly J. by Peter J.-Nellie Bly.

E. R. Whelibam's ch. c. California Boy by Dictatus-Bell Patchen.

Mrs. Alma Whiteheads br. f. Miss Delphi-The Mrs.

T. D. Whitley's blk. c. by Bonnie Direct, by Guy Wilkes.

J. W. Zibbell's b. f. Katalina by Tom Smith-Kate Lumry.

Meeting at Victoria

There will be two days racing at the Victoria, B. C., track on Saturday, June 30th and Monday, July 2d. The purses will aggregate \$1500. Mr. J. A. Fullerton has been requested to act as judge. with D. E. Campbell, J. G. Mitchell, C. A. Harrison and D. R. Kor as associate judges. The program was arranged as follows:

Saturday, June 30th.

Gentlemen's driving race—Purse \$125; half mile heats; best three in five, trotting or pacing; open to horses without a mark, owners and amateurs to drive.

2:30 class—Purse \$200; best three in five; trotting or pacing.

One mile—Purse \$150; weight for age.

Half-mile—Purse \$100; weight for age.

Three-quarter-mile—Purse \$125; weight for age.

Monday, July 2d.

2:45 class—Purse \$150; trotting or pacing; three best in five.

Free-for-all—trotting and pacing—Purse \$300.

One and one-half mile running—Purses \$250; weight for age.

Five-eight-mile dash—Purse \$100; weight for age.

No entrance fee will be charged, and 10 per cent. will be deducted from all winners, the division of all prizes being 60, 25 and 15 per cent. of the purse.

Marysville Meeting

The race meeting given by the Sutter and Yuba Driving Club at Marysville June 1st, 2d and 3d was a success so far as the races were concerned but the attendance was not very large and the club lost about \$80 on the venture. Several circumstances prevented the meeting being a financial success. The meeting was postponed from its original date and counter attractions kept many away. The summaries of the harness events during the meeting are as follows:

First Day

Trotting 2:30 class, \$100

Easter Bells, b m, Vance	1-2-1-2-1
Kid, b g, Johnson	2-1-2-1-2
Baron Bretto, bs, Leech	3-4-4-3-3
Silver Bells, s m., Gomez	4-3-3-5-4
Alfred J., b r g, Duncan	5-5-5-4-5
Time 2:30½, 2:22½, 2:26, 2:27, 2:27.	

Pacing, 2:30 class, \$100.

Kenny, b g, Duncan	3-1-1-2-1
Sir John S, bs, Vance	4-2-2-1-2
Lena A., b m, Gibbonslin	1-3-3-3-3
Babe, b m, McGurder	2-4-4-4-4
Time 2:26, 2:21½, 2:25½, 2:27, 2:21½.	

Second Day

Pacing, three year olds, purse \$50.

Montea, b s, Ohleyer	1-1-1
Maxine, c f, Moore	2-2

Time 2:25 2:30.

Special, two year olds, ½ mile heats.

King S., s s, Strain	1-0-1
Anona, b f, Leech	2-0-2
Edward D, Donnelly	3-3-3

Time 1:32, 1:31, 1:36.

Third Day

Trotting, 2:30 class \$100.

Silver Bells, s m, Gomez	1-1
Baron Bretto, Leech	2-2

Time 2:25, 2:30

Special, free for all, mixed, \$100.

Sir John S, b s, Vance	1-3-1
Kenney, b g, Duncan,	2-1-2
Easter Bells, b m, Renetti	3-2-3

Time 2:31, 2:30 2:18.

There were two or three running races each day of the meeting.

Your stomach is O. K. if you drink Jackson's
Napa Soda.

Judge Townsend's Decision

Following is the full text of the decision of Judge Townsend of the United States District Court of Connecticut, in refusing the application of the Memphis Trotting Association, for an injunction against the National Trotting Association in the Lou Dillon case:

"This bill is not filed to restrain the defendant from expelling the complainant from the defendant association, nor does this bill seek, except inferentially, to restrain the dealings between agents of the defendant association and persons who may hereafter be called upon to testify in the replevin suit which is pending in New York.

"This bill is filed to prevent the defendant from holding a meeting of its Board of Review, to make inquiry into certain charges with regard to the drugging of this Lou Dillon.

Now, it is claimed, and the argument is pressed with much force, that this preliminary injunction should be granted on the ground—providing the questions of law and fact are doubtful—that to withdraw the injunction would inflict irreparable injury upon the complainant.

In support of that proposition it is said that the finding of this Board of Review would have such force with the Court in the replevin proceedings as to be practically a matter of res adjudicata, and at least for the preservation of its rights the complainant should have brought the application. It is also suggested that other damage may follow, over which his court has no control.

Now, no proposition is better settled than that there can be no res adjudicata where the issues are entirely distinct and involve different causes of action. The cause of action in the replevin suit is a question of title; the cause of action—if I may term it such—or the question before the board of review is whether somebody drugged Lou Dillon, and that question was deliberately referred by this complaint, by his own preferment of charges to this board of review and with a request that they would investigate the matter, when he already had an action pending in the state of New York to determine the title to the cup. Thus by his own conduct he indicated that the two questions were distinct and separate. The one is not conclusive as to the other, but even now he may have made that application upon an agreement that the hearing before the board of review should be postponed; yet the conduct of his counsel in asking for a con-

tinuance upon other grounds, without making any such suggestion was brought and the hearing called for by him, as indicated in his application, points strongly to the contrary view. That question, however, is not material here.

The claim is made that this decision of the board will be affected by certain fraudulent conspiracies and attempts to deprive the complainant of his legal rights. The fact, if it be a fact, is open to the complaint to prove, either in the replevin suit in New York, or by appropriate proceedings or review of any such decision before a proper tribunal. And therefore there is no damage which can follow—there is no damage or irreparable injury accruing to this complaint which would justify a court of equity to set its machinery in motion, and to grant the extraordinary remedy of a preliminary injunction, when the theory upon which the application is made, is that a tribunal, to whose jurisdiction he has himself voluntarily submitted, by his admission, on the theory advanced before hand that the tribunal will not give him a fair hearing. The motion for the injunction is therefore denied.

Horses in Demand Everywhere

Railroad building on a large scale in California and Nevada, and the tremendous amount of clearing and construction work under way in San Francisco has made the demand for draft stock far exceed the supply here, and the situation is the same in Washington as will be seen by the following from the Seattle Times of June 6th:

Draft horses are being shipped into Washington for railroad work from the states as far east as Iowa. The importations from Montana have been heavy and continued, but Montana will find a use for most of its own horses and this state will have to go farther east for the supply that must be had this summer.

The demand for horses in the camps of railroad contractors and for the Alaska trade is responsible for a shortage that seriously affects operations. The Harriman line, ready to send out two corps of engineers to make a definite location of the line south of Tacoma, has not yet been able to purchase satisfactory teams and the road only wants twelve horses.

Extensive ditch building operations in Alaska this summer will call for all the horses that can be taken north. It is feared by railroad contractors that the Nome demand will deplete the supply in this state and seriously

interfere with their operations this summer.

A team of horses, weighing about 1200 pounds is quoted to railroad men at \$400 to \$500 and four-horse teams have been held at from \$900 to \$1000.

With construction work just starting on the Chicago, Milwaukee and St. Paul, work being planned for the Harriman extension, construction expected to be ordered this year on Hill's extension through British Columbia and numerous other railroad projects under way, the demands of railroad contractors will be very heavy. This demand will continue, too, for a year or more.

Shoeing the Pacer

The pacing gait is that of a horse that brings the front and hind feet on one side forward at the same time, placing them on the ground, and then bringing the feet on the other side forward in the same way, alternating first on one side then the other. writes J. P. Adams, in the Horseshoers Journal. There are several ways of going that are related to the pace; one is the amble, which is a slow pace of shorter stride and quicker action; another is the single foot, a gait used by saddle horses very largely and one that speed cannot be attained at. The racking gait is that of a horse going at the pace but swings his feet in a circular motion, landing near a straight line which is central to the body, which gives to the horse when in motion a swinging or swaying from side to side appearance, not seen in a smooth-going pacer, or in fact in any other gait or way of going. Extreme speed cannot be acquired at this way of going. The pacing gait is not as varied as the trot, but the two ways of going are interchangeable, breeding does not control either gait. Some of the very best pacers are trotting bred and some of the high class trotters are pacing bred, and sometimes a pacer will be trotting-gaited in front. Such horses may have a great turn of speed, but usually are not very reliable.

To balance the pacer by shoeing is often as trying and calls for as much skill as to balance a trotter. The pacer that is so sure of his gait that he will not have to wear hobbles to keep him going steady and at shift this gait or make a break, when called upon for a supreme effort, are few. The inclination of a pacer to break is more serious than the same propensity in a trotter, because when a pacer makes a break or loses his stride it is very much more of a problem to get him back to his stride without loss of all

chance of winning the heat, if he does not get the flag, which is not unlikely with the majority of pacers when they make a break during a race. It is utterly impossible to balance some pacers by shoeing so that they can be relied on for race purposes. In such cases the best results will be obtained by learning what the defects in his gait are and then shoe to improve his way of going. As a general thing pacers require light weight shoes, both in front and behind, but occasionally a case will be met with that will require heavy shoes all around or possibly only a pair, either in front or behind.

When a horse is uncertain in his way of going but is inclined to pace, a heavy shoe, made entirely plain, without calks, put on behind, will have the effect of settling the horse in a steady pace. Care should be taken not to drive the horse faster than he will go with a true and even stride, because in cases of this kind the gait or way of going will be mostly acquired. That many horses can be taught to go very fast, at either the trot or pace, is shown by horses getting fast records at both ways of going. More mixed gaited pacers can be balanced by shoeing them behind than in front. Weight on pacers' hind feet has near the same balancing effect that it does on the trotters' front feet. Most pacers like their feet rather short, a long toed pacer being very unusual.

I have a case in mind that required all the weight in the shoes that was convenient to put on both front and behind; the weight had the effect of regulating the stride. The weight was reduced as fast as possible until within ninety days the horse was wearing a set of light weight shoes and going fast and steady. Almost all pacers go best with a shoe that affords a hold on the ground, because the pacer depends upon the toe of his shoe to propel himself along with, more than a trotter. A pure gaited and natural pacer can be shod without any trouble; usually the best results can be had by using a shoe as light as the character of the foot and work will permit, dress the feet to a natural size, with the length of toes alike and the same angle. If the horse is used for speed purposes, a flat shoe for the front feet with calks, and behind, a shoe usually a little lighter than the front ones, with calks, or a swedged shoe will be found to suit a great many pacers.

I have known several very high class pacers that wore twelve to fourteen ounce shoes in front and eight or ten ounce behind, and the weight was not reduced until after

GUARANTEED STAKES

RECORD BREAKING FISH

are caught every year at

LAKE TAHOE

JUST as large ones still uncaught. You can get them.
Don't you long to feel again that sharp tug at the line,
hear the shrill whir of the reel, and, after a blood-stirring
fight, experience the joy of landing one of the finest,
craftiest old trout you ever saw?

You shall do that many times on this beautiful lake and
on the mountain streams round about. Also good hunting
and mountain climbing. Many hotels; fine camping places;
no poison oak.

Buy your ticket and get there in one night. Sleeper leaves
San Francisco daily 7 P. M. and you arrive at Tahoe next
morning in time for breakfast.

QUINN'S OINTMENT

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpufts and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dick, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: 'I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, spavins, windpufts and all bunches it has no equal.' Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

An Invitation From Victoria

Victoria, B. C., June 15, 1906.
"Breeder and Sportsman," San
Francisco—The Victoria, B. C.,
Agricultural Association will give
a spring race meeting for harness
horses and runners on July 1st and
3d. The purses are fairly good,
and the program is an attractive
one. The track will be in fairly
good shape, and all coast horse-
men are cordially invited to
participate. For the Oregon and
Washington contingent the
Victoria meeting should be a
great attraction. Trainers can
get a line on their horses that are
nominated in the rich North
Pacific circuit events, and in-
cidentally gather in some easy
spring money.

Victoria can be reached by both
day and night boat, the race track
is an easy distance from the wharf,
and every effort will be made by
the Society to please the visiting
horsemen.

The Dominion fair will be held
in Victoria in September, for
which time a good race program
has already been prepared.

John Millington is training
Captain John, chestnut stallion by

Tennysonian, dam Fanny Putnam
2:13.

William Stevenson is training
Fanny Putnam 2:13.

C. A. Harrison is training Maid
of Del Norte by Del Norte, and
Mike Director by Montana
Director.

Al Humber is training Victoria
Girl by Christmas.

The Victoria, B. C., track has
about twenty trotters and pacers in
training.

Your Canadian cousins cordially
invite you all over to Victoria,
and when you do come remember
what the late W. B. Fasig once
said to Knapsack McCarthy years
ago: "Come along and put your
racing shoes on" The Victoria
track is here, and some of your
Canadian brethren once in a while
uncover a pretty good horse.

Now, you Yankees, come over
and be sociable.

Yours,

C. A. HARRISON

Answer to Correspondents

Fred Watson, Colusa—The stal-
lion Black Walnut by Antelope, is
not registered, and as we do not
know his dam cannot say whether
he is eligible to registration. An-
telope is a registered horse, and if
the Signal mare is eligible to
registration, Black Walnut could
be registered by registering her
first.

E. G., Riverside—At the close
of 1905 Allerton 2:09 $\frac{1}{4}$ was the
sire of 110 trotters and 35 pacers
that have obtained standard record.
At the close of the same year Mc-
Kinney 2:11 $\frac{1}{2}$ was the sire of 60
trotters and 16 pacers in the stand-
ard list.

Your stomach is O. K. if you drink Jackson's
Napa Soda.

An Excellent Hoof Protection

Since the great fire the streets of
San Francisco have been covered
with nails and many horses are
daily disabled by getting nail
punctures. Dr. Masoero has had
as many as twenty-five cases of
tetanus under his charge at one
time, and it is said that during the
first week in June as many as
five horses died per day in this city
from the disease, caused by nails in
every instance. I. B. Dalzell,
the well known veterinary dentist
has devised a device of his own
invention which he has used on all
his horses (some half dozen of
which are in daily use) and not
one has picked up a nail since the
fire. Dr. Dalziel says there is
no patent on this device, and he
advises all horse owners to try it.
The horses are shod all round
with a common leather pad cover-
ing the whole bottom surface
of the foot. Before putting this
pad under the shoe, a piece of
sheet iron (stove pipe iron is heavy
enough) is cut a little larger than
the inside surface of the iron shoe,
and fastened to the leather pad
with three copper rivets. When
the pad is put on and the shoe
nailed, the sheet iron protects the
entire sole of the foot, and is
heavy enough to turn a nail. The
Doctor's half a dozen horses have
traveled the streets of San Fran-
cisco every day since the fire, and
the fact that not one of them has
picked up a nail during that time
is pretty good evidence of the
effectiveness of the device. It costs
a few cents, and many horseshoers
are now putting them on.

J. P. Patrey, the well known
horseshoer of Oakland, who shoes
most of the speed horses of that
city, suggests that instead of sheet
iron, a sheet of aluminum be used.

It is not expensive, is lighter
than iron, and being harder will
turn nail points better.

Money in this Race Track

Yreka, Siskiyou Co., June 7.—
The old race track ground near
this place has at last been bonded.
It is supposed to be very rich in
coarse gold, as Yreka Creek passes
through it, and more especially as
it adjoins the famous Blue Gravel
Mine on the west.

It will be found to be a pretty
costly mining proposition, as it is
about 110 feet to bedrock. As the
history of the Blue Gravel Mine
proves that the bedrock is very
rich, so the bedrock at 110 feet on
this ground now to be prospected
may turn out equally as rich, if
not richer.

The Board of Directors of the
Siskiyou County Agricultural
Society recently held a meeting
and bonded the race track ground
to John O. Harrison, of Pine Bluff,
Arkansas, for \$7,000, \$5,000 being
paid down. The remainder is pay-
able in two equal payments, due in
one and two years.

There are about 100 acres in the
ground, and it is believed that the
ancient river channel from which
the gold is taken extends west
under the race track.

It is not stated yet whether this
ground will be worked in the old
placer style by piping, or with a
dredge.

The Society will retain all sur-
face right not required for mining
purposes.

D. C. C. Meade, of Cincinnati,
Ohio, owns a mare by McKinney
2:11 $\frac{1}{4}$ that has a fine filly at foot
by the champion stallion Cresceus
2:02 $\frac{1}{4}$. The mare will be bred to
John A. McKerron 2:40 $\frac{1}{2}$ this year.

Notes and News

Mondays and Thursdays are work-outs days at the Hollister track.

One hundred and ten horses out of 500 had that were being shipped from Ephrata, Washington, to H. J. McCurday of Dickson, North Dakota, died in the stock yards at Billings, Montana, the other day. The wholesale death of the animals is said to have been caused by filling them up on water in the Helena yards and making the run from the starting point to Billings without feeding. The loss to the owner is in the neighborhood of \$5000.

Irish 2:08 $\frac{1}{4}$ pacing as a four year old, has trotted a mile in 2:16 since he was shifted to the trot. He is by Peter Williams' good horse Monterey.

The trotting game is growing in popular favor more rapidly in Austria than in any country on the continent. The American trainer, M. P. Davy, who formerly trained for John H. Shults, has just returned home from Austria. In an interview in New York he says that harness racing as a pastime has more followers in Austria than any other form of sport. Meetings are held there two days in a week, and 15,000 people is considered a small attendance, and as the admission fee, including a grand stand seat, costs \$1.20, the races pay well. The best trotters are handled exclusively by American trainers.

It is said that Mr. Fred Pabst of Milwaukee, Wis., a well known breeders of trotters, will sail for Europe in few days with the express purpose of visiting Russia, where he will buy a band of Orloff mares, to bring home and mate with his stallion, Bon Ton U., by The Astronomer, 2:13 $\frac{1}{4}$, son of Axtell, 2:12, dam by Stambul, 2:07 $\frac{1}{2}$, second dam the great producing mare Bon Bon, 2:26 (dam of Bonnie Direct, 2:05 $\frac{1}{2}$, etc.), by Simmons, 2:28. If Mr. Pabst carries out this purpose the breeders of this country will be able to see right at home the results of the American-Orloff cross, which is now being tried in Russia.

The Ark. State Fair Association will hold its first annual meeting Oct. 1st to 10th in the \$500,000 racing plant of the Oaklawn Jockey Club, Hot Springs, Ark. The Fair will embrace all exposition features and a complete racing program of harness and running events.

Baron Silver, owned by Mrs. H. A. Busby, of Cleveland, stands almost 18 hands high and weighs 1,475 pounds. He is reported to have trotted a mile in 2:15 $\frac{1}{4}$ and will be trained for a record this year.

A Baltimore correspondent writes to Trotter and Pacer under date of 24th inst: "In the twenty-mile race yesterday between Mr. Paul Frame's horse Nemo and one belonging to Mr. Irwin Brown, Mr. Brown's horse won. It was by only a length of the runabout and horse, as Nemo was close to Mr. Brown's wheel. They started from Towson, went around Loch Raven, then returned through Towson and finished at the place of Mr. George Brown, at Brooklandville, a distance of exactly twenty miles, which was made in 1 hour and 10 minutes. Mr. Frame's horse was not in as good shape for the trial as was that of Mr. Brown's. They have arranged for a meeting in October over the same route for a side bet of \$500, and Mr. Frame expects to have his horse Nemo in good training by that time."

A Lexington, Ky., dispatch of recent date chronicles the following: "A big land deal, which involves the transfer of 350 acres of the finest land in the Blue Grass section, and its conversion into a breeding and training farm for trotters and pacers, will likely be consummated here during the next few days. For several weeks J. K. Newman, of New York, has been touring Fayette County with a view of buying a farm, and after inspection of every available tract of land in the county, he has opened negotiations with James A. Headley for the purchase of the latter's holdings on the Russell Cave and Iron works pikes, at a price said to be close to \$50,000. Should the deal go through Mr. Newman contemplates an expenditure of about \$30,000 in equipping the farm for extensive breeding and training quarters, which include a number of fine barns and paddocks and a half-mile track. Mr. Newman is the owner of the noted trotting stallion The Director General, now located on a farm in this section, and if successful in purchasing a farm this sire will be placed at the head of his stud, which will include some of the most fashionable trotting bred stud matrons in the country.

Bonnie Steinway has worked several quarters in better than 30 seconds since Ted Bunch reached Cleveland with him.

As an evidence of the high prices at which good draft stock is held it is stated that James Raycraft, proprietor of a large livery stable in Nevada, recently visited Bridgeport, Mono county and paid Mr. Webb \$5000 for twenty head of large well broken draft horses. When drafters can be sold for \$250 per head in that section of the country, the prices are certainly away up. Several of these horses were sent to San Francisco and will aid in clearing up the streets of debris.

At a race meeting held at Centralia, Washington, May 30th, the California bred stallion Yukon won a half mile heat race in straight heats, the best time being 1:09. The track was heavy and Yukon was so far in the lead each time that he was pulled up and jogged under the wire. He is said to be greatly improved in his manners since leaving California and it is thought he will materially reduce his present record of 2:14. Yukon is by Bay Bird and was formerly owned by Mr. C. W. Welby.

The Sebastopol, Sonoma county Driving Club has been organized with Frank Rafael as President, Jos. Rorba Secretary and E. C. Clark, Ben McIntosh and William Hawks as Directors. A half mile track has been built on the Brown property opposite the Sebastopol depot of the California Northwestern Railroad, and the rent of the property paid one year in advance.

Enough money has also been subscribed to keep the track in condition for a year, and matinee racing will be held frequently during the summer. There are many good trotters and pacers owned in the vicinity.

A freak of nature is reported from Barnhart's Landing. Recently a mare owned by C. E. Barnhart gave birth to a mule colt which two days after seeing the light of day weighed only 27 pounds and stood 28 inches high. It was perfectly formed and appeared quite healthy. For two days it was fed from a bottle, but subsequently was able to stand its nourishment in a natural manner and is progressing nicely.

At the matinee of the New York Driving Club held Thursday, May 31st, the bay gelding Mush, by Lottery Ticket, won the Class C pacing event, beating a field of seven fast pacers. The race was half mile heats and the time 1:04 and 1:06. Mush is now owned by Mr. J. J. Foody.

Cresceus is said to be in grand form this spring.

A four day race meeting was held at Balitmore, Maryland, June 5th to 8th, at which the purses were \$300 each. In the 2:30 pace "Farmer Bunch" of Pleasanton started the gray mare Sweetheart that he trained during the spring at the horse center, and the crowd of wise ones, thinking a mare shipped clear across the country to be raced must be a fast one, made Sweetheart favorite in the pools at \$8 against \$10 for all the others. Sweetheart was out of condition, and after finishing third the first heat, paced in 2:21 $\frac{1}{2}$, was distanced the second heat in 2:20 $\frac{1}{4}$. In the 2:25 trot Bunch started Alto Down by Iran Alto, but the colt finished 7 and 8 in the first and second heats respectively and was behind the flag in the third. The best time in this race was 2:24 $\frac{1}{4}$. At the same meeting Ed. Lafferty started the bay horse Nut Boy by Nutpine in the 2:12 pace but was distanced the first heat in 2:14 $\frac{1}{4}$. In this race a horse called Raoul W. won in straight heats driven by a trainer named Wilson, but the money was protested on the ground that Wilson is under expulsion. Can it be that this is the same party that "rung" the pacer Watler K. on the California circuit six years ago. If so Ed Lafferty should know him as Ed drove the pacer I Direct in the heat at Santa Rosa when Walter K. paced to his record and was only beaten by a narrow margin.

At the Woodland race track the trainers are busy getting the trotters and pacers in shape for the races. John Phippen is working hard every day. He has a green pacer that worked the last half in 1:05 $\frac{1}{2}$. The trotter Milbrae 2:16 $\frac{1}{2}$ owned by P. H. McEvoy of Menlo Park, worked a nice mile in 2:19 $\frac{1}{2}$ for Philpen and he has several green trotters that are working around 2:20. Mr. Hashagen has two in his string; Kinney Rose showed him a mile in 2:20 recently. Al Charvo has five; his Futurity candidate Renown worked in 2:19 $\frac{1}{2}$. Mr. Harrington has four all stepping close to 2:20. Det Bigelow has several promising green ones and this week received a new one from Mr. Rudolph Jordan of San Francisco that he will train for a record. Hiram Hogoboom has quite a number of green ones that are good material. Woodland Stock Farm is working eight head all doing well.

There will be no pool selling in Massachusetts, says the Governor.

"Happy Jack" Trout is now "mine host" at the Metropolitan Driving Club's home alongside the Boston Speedway.

According to a cablegram from St. Petersburg, Captain Byieff, of the Russian army, has completed a wonderful equine feat. The Captain left the front in Manchuria shortly after the peace treaty was signed and arrived in St. Petersburg on June 5. He rode the entire distance, about 8700 miles, in eight months and four days. His horse, which was of English breed, was in good condition when the journey was finished. The Captain's orderly, who was his sole companion, had a Mongolian mount. The average distance covered per day was over 35 miles.

There are many horses in training at Pleasanton and all are in good shape. No sickness among them.

Charley DeRyder has Willard Zibbell's great trotter Adam G. 2:11 $\frac{1}{4}$ by McKinney in his string and will race in the 2:12 and faster classes on the Grand Circuit. He is now in fine shape and is one of the best gaited trotters living.

Harry Devereux driving the pacer Morning Star 2:04 $\frac{3}{4}$, Doc Tanner driving the trotter George G. 2:05, and Jack Curry up behind Tuna 2:08 $\frac{1}{2}$, worked out a mile together at Cleveland two weeks ago. Morning Star and George G. went away in the lead, made the mile in 2:13 and the last half in 1:03, while Tuna's mile was in 2:19 $\frac{1}{2}$ with the last half in 1:04 $\frac{1}{2}$. The three brushed the last quarter together in 30 $\frac{1}{2}$ seconds. Tuna finishing in front.

A dispatch from Detroit says that no Grand Circuit meeting will be held there this year, as the State authorities have announced that no betting of any description will be permitted. The Merchants and Manufacturers \$10000 stake, the Chamber of Commerce \$5000 stake and the 2:08 pace, all of which had already closed, have been transferred to the Cleveland Association and will be decided on that track.

Frank Silva of San Pablo, has a good looking young stallion by Sidmoor that he has placed in the hands of the veteran Dennis Gannon to train. The colt is a pacer and looks like one that will do. Mr. Silva has a two year old full sister to this one that he says is a still better prospect.

Sweet Marie 2:04 $\frac{1}{4}$ has not been given any extremely fast miles as yet, but is showing quarters at all her former speed and will be in good shape for the big match at Readville on the Fourth of July.

S. Christensen has had another piece of bad luck since being burned out by the fire. His colt Chas. F. Kapp, tried to jump a picket fence while running in a pasture lot near Pleasanton and received fatal injuries. This colt was two years old and not only a fine looker but fast trotter and was well staked. He was by Stam B., 2:11 $\frac{1}{4}$ out of the pacing mare Marguerite by Dom Pedro. Marguerite won a matinee pacing race in 2:17 some years ago.

Racing has commenced on the half mile circuits over east and there is no lack of entries or starters at the majority of meetings.

Frank O'Kane the well known member of the harness making firm of J. O'Kane, reports the loss of a new Payne long shaft cart, taken during the fire, and not since returned. There are but four of this style carts in the city, it is said, so Mr. O'Kane thinks he should be able to find this one if his friends will keep their eyes open for it. It was a brand new, latest model Payne cart with long shafts.

The Transylvania has closed with 23 nominations. Last year there were but 15 entries in this event.

East View Maiden by Directum Kelly, trotted a half in 1:04 $\frac{1}{2}$ at Empire track, New York, last week.

The latest news from the Zombro mare Italia 2:14 $\frac{1}{4}$ trotting, is that she has paced a half in one minute flat at the Cleveland track.

Entries for the Breeders' Woodland meeting will close Monday, July 2d.

Dennis Gannon is training the mare Lady Shamock by Grover Clay and may race her this year.

The Idaho Intermountain Fair advertises for bids for privileges. The advertisement states that auction and mutual pools will be sold, but no books will be allowed.

Hazel Patch, the pacing stallion that beat Zolock at Los Angeles last fall is racing up in Manitoba. He won the free for all purse of \$600 there on May 2th. Best time 2:15 $\frac{1}{2}$.

James Thompson, Henry Helman, Jack Curry, Ted Bunch and William Cecil are all at the Cleveland track with their horses.

Charley T. by Zombro has worked a mile in 2:41 $\frac{1}{2}$ since he reached Cleveland.

A farmer of Whitman county Washington, returned from town one day last month and left several pounds of squirrel poison in his wagon. The next morning on reaching his barn he found twelve horses dead from eating the poison.

Dave McCarthy, the first man to drive a harness horse faster than two minutes, is working some twenty head at Charter Oak Park.

Matinee at San Bernardino

The San Bernardino County Driving Club held its June matinee on the afternoon of Saturday, the 9th inst., with a large crowd present and excellent races although all the events were decided in straight heats. A most interesting event was the free for all trot, in which there were but two starters. Hazel Kinney 2:09 $\frac{1}{4}$ by McKinney and the good colt R. Ambush 2:14 $\frac{1}{4}$ by Zolock. The young horse won in straight heats over the mare, the first heat being trotted in 2:13, the best time ever made in a race given by the San Bernardino Club. He was driven by Mr. G. W. Bonnell, and every horseman who saw the race believes this four year old son of Zolock will take a record below 2:10 this year if raced.

Another feature of the afternoon's sport was the exhibition of speed made by James Campbell's thirteen months old colt On Bly by Or Stanley, dam Nellie Bly, by Woolsey, dam of Harry Madison 2:27 $\frac{1}{4}$, trial 2:12 $\frac{1}{2}$ and Julia M., trial 2:12. On Bly was driven a mile, the second quarter in 37 $\frac{1}{2}$ seconds, and the last quarter in 39 seconds.

Following is a summary of the different events, kindly sent us by Secretary Fred C. Drew:

First event, 2:25 mixed—
Monicoat, blk h, F. P. Oden 1-1
Adalanthia b g, G. W. Prescott 2-2
Time 2:28, 2:24 $\frac{1}{4}$.

Second event, 2:40 mixed
Neerest, b m, Dr. W. Spoor 1-1
Inaugerita, gr m, Dr. I. W. Hazlett 2-2
Lady Nutford, ch m, Dr. F. A. Ramsey 4-3
Betty Raymond, b m P. Beatty 3-4
Time 2:27, 2:35

Third event, Free for all Trot
R. Ambush, blk h, G. W. Bonnell 1-1
Hazel Kinney, b m, John A. Cole 2-2
Time 2:13, 2:18 $\frac{1}{2}$

Fourth event, 3:30 Mixed
Bolock, ch m, J. H. Kelley 1-1
The Captain, b c, J. A. Cole 2-2
Baby, b g, Maruice Griffin, 3-3
Time 2:46 $\frac{1}{2}$, 2:33.

Fifth event, 2:30 Mixed
The Blonde, ch m, John A. Cole 1-1
Forelock, b g J. E. Cram 3-2
Cedric, ch h, W. C. McCulley 2-3

Los Angeles Horses Go East

Although there are several hundred running and trotting horses still being put through light training in this city, says the Los Angeles Times of June 10th, a number of good ones were sent east over the Salt Lake route. There were but twelve in this lot, but they are good enough to bring home considerable money to their owners. The racers are headed for Libertyville, Ill., and after being unloaded there for a short rest will be sent over the Grand Circuit tracks at Detroit, Buffalo, Poughkeepsie, Readville and Hartford.

In this car Will Clark Jr., sent three seasoned trotters, a green two-year-old trotter and a runner. Rutherford, Owens and Richardson also sent one or more horses. Clark's seasoned horses are Bon Voyage 2:12 $\frac{1}{2}$, the \$10,000 beauty who held the two-year-old trotting record two years ago; Morene, with a record of 2:13 $\frac{3}{4}$, and Billy H., with a record of 2:25. Rutherford has Helen Norte, a trotter with a record of 2:09 $\frac{1}{4}$, which many horsemen believe will be reduced to 2:06 this summer. Owens sent the pacer Jonesa Basler 2:11 $\frac{1}{4}$ and Richardson has The Jester, a trotter. The best that these latter can do is not a matter of public record, for the owners do not desire their speed known this early in the year. Trainer Garrity and Owners Owens and Richardson went with these horses in the car.

B. O. Van Boklen and Charley Jeffries are to try their fortunes in the Intermountain Circuit, and have shipped their strings to Denver, and from there will take them over the Northwest. Van Boklen has five harness horses and two runners that raced at Ascot Park last winter, and all of them are good enough to be bread winners or they would not be carted to the Rocky Mountains. Jeffries' reliance is in Ruby H., a green pacer that has worked a mile in 2:08 $\frac{1}{2}$, and this is certainly remarkable speed for a new beginner.

Henry Berry is receiving good reports of the work of his horse, Barney K., which he sold recently to Fred Roberts of Denver. Barney has a record of 2:11, has won two good races since going to his new owner, and is generally regarded as a good animal.

It is understood that the Southern California harness horse circuit will definitely include Santa Ana, San Bernardino, Los Angeles, Fresno and possibly Hanford, it being the intention to race at Santa Ana the first week in July; San Bernardino the second week, and at Fresno and Hanford the last week, splitting the six days between the two valley towns.

Horse Sale at Chico

A sale of horses was held at the Stanley Park Farm, near Chico on Saturday, June 9th, and the following prices were paid

TROTTING BRED

Aille Thorn and colt—Brown mare by Altivo, dam Lilly Thorn; W. J. O'Connor, \$200.

Cornie—Chestnut mare by Norwood, dam Lou Whipple, James Hagan, \$95.

Nordelle and colt—Chestnut mare by Boydell, dam by Norfolk; H. R. Reed, \$170.

Panic and colt—Bay mare by Monroe Chief, dam Jane; W. J. O'Connor, \$180.

Ruth and colt—Bay mare by Kentucky Baron, dam Jane; Albert Wahl, \$325.

Dorothy Tennant—Brown mare by Clay, dam Ella Rhea, W. J. O'Connor, \$145.

Rosote Bay mare by Nazote, dam Sweet Rose; J. R. Houghton, \$300.

Tom Sharp Bay gelding by Senator B., dam Magnolia; W. J. O'Connor, \$90.

Chiquite—Three-year-old black colt by Kentucky Baron; Wm. Rodgers, \$100.

Susie—Three-year-old chestnut filly by Soudan; J. M. Deter, \$105.

Ella—Three-year-old bay filly by Chief Whips, dam Ruth; J. W. Konning, \$175.

Alice—Three-year-old brown filly by Kentucky Baron, dam Munny Begum; Robert Tait, \$155.

Mabel—Three-year-old bay filly by Kentucky Baron, dam Joy; W. J. O'Connor, \$95.

Mackey—Two year-old bay colt by Moormont, dam Marion; J. M. Deter, \$127.50.

Indian—Two-year-old black colt by Moormont, dam Munny Begum; W. J. O'Connor, \$150.

Happy—Two-year-old bay colt by Moormont, dam Joy, J. M. Deter, \$145.

Racquet—Two year-old bay colt by Moormont, dam Dorothy Tennant; J. M. Deter, \$165.

Colusa—Two-year-old bay colt by Arthur Wavland, dam Cornie; J. M. Deter, \$122.50.

Rosalie—Two-year old sorrel filly by Moormont, dam Ruth, Wendell Miller, \$220.

Nadine—Two-year-old bay filly by Moormont, dam Nara, Wendell Miller, \$170.

Bell—Yearling black filly by Moormont, dam Ruth; J. M. Deter, \$125.

Sweetheart Yearling bay filly by Moormont, dam Joy; J. M. Deter, \$97.50.

Adele—Yearling bay filly by Moormont, dam Nordelle L. B. Daniels, \$90.

Norine—Yearling by filly by Moormont, dam Nara; J. W. Snowden, \$135.

Linda—Yearling bay filly by

Moormont, dam Clara; J. W. Snowden, \$100.

McIntosh—Yearling bay colt by Moormont, dam Marian; W. J. O'Connor, \$80.

Sunlight—Yearling sorrel colt by Moormont, dam Cornie; W. J. O'Connor, \$35.

El Capitan—Yearling bay colt by Moormont, dam Panic; W. J. O'Connor, \$90.

Redlight—Yearling bay colt by Kentucky Baron, dam Osote; Louis Roper, \$90.

RUNNING BRED

Marian and colt—Brown mare by Martenhurst, dam Milliner; Silas Stockwell, \$170.

Joy and colt—Bay mare by Wildidle, dam Libbertifbbet; C. W. Davis, \$140.

Money Begum and colt—Brown mare by Imp. Loyalist, dam Magnolia; W. J. O'Connor, \$150.

Driving Club Matinee

The matinee given by the Sacramento Driving Club at the State Fair race track last Sunday afternoon drew a great crowd that thoroughly enjoyed the sport. The day was warm, and the horses were in fine fettle, resulting in some very good time for the crack roadsters.

A brass band of twelve pieces sat in the game at a quarter before 2 o'clock and an excellent concert, lasting until 5 o'clock, added to the enjoyment.

The Sacramento Driving Club are good entertainers, and they look to the comfort as well as the pleasure of their guests. Between heats ice water was passed through the grand stand, so that none might go thirsty. There were six races, two best heats in three, and there were no long waits between heats.

Among the starters were Emma Nevada, owned by Peter S. Jensen of Reno. It was the first race the mare ever started in, and she did the work cut out for her nicely. She took the two first heats and her race, her best time being 2:25. Horsemen expect to hear from this mare later in the season.

Albert Elkus has purchased the pacer Penrose from Walter Mastin, and will use him as a matinee and road horse. Penrose has a record of 2:18 $\frac{1}{4}$, and has done the mile in close to 2:10. It is an acquisition of which Mr. Elkus has just reason to be proud of.

Ray Dittus' Kruger, John Riley's Aleta R. and Albert Alkus' George M. started in the first race. Kruger took the first two heats and the race; best time 2:25.

In the second race F. J. Ruhstaller's Wild Bell and Frank E. Wright's Dredge were the starters.

Wild Bell took the first heat, but Wright let Dredge have something like his head in the last two heats, and won readily. Best time 2:25.

In the Oak Park Driving club's special, J. H. Donnelly's M. J. and James McEwen's Captain Hackett started. M. J. outfooted the old-timer in both heats. Best time 2:30 $\frac{1}{2}$.

Ray Dittus' Constructor I. J. Christie's Briarwood and John Norton's Lightbird started in the Capital Hotel special. Instructor won both heats, Briarwood second. best time 2:27 $\frac{1}{2}$.

In the Golden Eagle Special, F. E. Wright's Emma Nevada, C. H. Shone's Katie B., and Fannie Mc. started. Emma Nevada took both heats. Best time, 2:25 $\frac{1}{2}$. In the Oak Park Driving Club's 2:40 class, D. Woodworth's Baby Knight, O. A. Wilbur's Bess W. and J. H. Allen's Belle Madison started. Baby Knight was too fast for his field, taking the race. Best time 2:36 $\frac{1}{2}$.

The next matinee of the club will be held at the State Fair tracks the afternoon of the Fourth of July, and the speed program will be made up in a few days.

The Woodland Meeting

Over twelve thousand dollars will be paid out by the Pacific Coast Trotting Horse Breeders' Association during the week ending August 18th, to the owners of the horses finishing "in the money" at the races to be held at the Breeders meeting, which will be at the famous Woodland Race Track this year. The largest stake to be raced for is the three year old trotting division of the Breeders \$6000 Futurity, which will be worth \$2300 this year. The two year trotting division of the stake has a value of \$1450, the three year old pacing division is worth \$1300 and the two year old pacing division \$950. For aged horses \$1500 is offered for a 2:24 class trot, and the same amount or a 2:20 class pace. The 2:09 pacing and the free or all trotting events are worth \$300 each. Besides these rich stakes there are four worth \$500 each as follows: 2:12 pace, 2:16 pace, 2:13 trot and 2:18 trot.

While Woodland has held some of the best harness meetings ever given in California, there has been no meeting held there since 1902, which was the last year the district fairs received State aid. Never in the history of racing in Yolo county have such stakes been offered for harness horses to contest for as those hung up this year by the P. C. T. H. B. A. The last meeting of the Woodland Fair Association in 1902, was a grand success, largely attended and the

racing was high class. Yet the total amount of the purses offered was but a little over \$6000, and the largest purse was \$750.

This year twice as much money has been offered and there are no less than five stakes worth from \$1300 to \$2300. These will be contested for by all the best horses and colts in the State and the Yolo Co nty people will have the opportunity to see the best harness racing to be held on the coast this year.

Every owner and trainer who has horses in training should make it a point to enter as many of them as possible at this meeting. The State Fair will follow the Woodland meeting and then the horses will be shipped north to Oregon.

The Pacific Coast Trotting Horse Breeders Association proposes making the Woodland meeting one of the best in the association's history and no pains or expense will be spared in the preparations. The organization is composed of the leading harness breeders of California and has the reputation of giving high class meetings annually, at which clean and honest racing between the best horses on the coast is patronized and enjoyed by the best citizens of the State.

Spreads the News

Robert A. Smith, Secretary of the newly incorporated Los Angeles Harness Horse Association, has sent entry blanks to every horseman on the Coast whose address he could learn, and with every other member of the organization is working day and night to make the Los Angeles entry list which close June 29th, big one, and the meeting the best ever held in the Southern California metropolis. Los Angeles is a grand place to visit. As one horseman from Oregon said last year: "It is worth one's while to go to Los Angeles to race even though one don't get better than fifth money, as the track is so fine, the accommodations so good and the horsemen there so sociable, that a week's stay is a pleasure." What has been said of Los Angeles is equally applicable to Santa Ana, which will give a meeting the week before Los Angeles. The complete programs of both these meetings will be found in our advertising columns this week. Every horseman who can should enter at these meetings. Entries close June 29th.

Los Angeles and Santa Ana entries close Friday, June 29th.

California's favorite hot weather drink is Jackson's Napa Soda.

Stable Horses

A writer has this to say about salable horses in American Farming: "Many farmers think that there is no money in raising horses. Yet there is constant demand in the markets at remunerative prices for horses of a definite type. Last summer I had opportunity to talk with a farmer on this very point. He was near an excellent horse market, and on his farm he was producing an abundance of the finest horse feed. But the buyers did not want his horses. The trouble was that they were neither draft horses nor road horses; neither express horses nor coach horses. They were nondescripts, without the right form or weight for any particular purpose. This farmer had started with a number of fairly good mares, but he had used first one stallion and then another without any definite idea in mind as to breed. The natural result was that the colts showed a mixture of incongruous tendencies. All that could be said for them was that they were horses. The modern market will not buy nondescript horses. They must be horses of a different class—draft horses, roadsters, etc.—with proper form, size and action to admit them to that class. By consulting those buyers the farmer can easily learn what the market requirements are, and can breed horses that meet these requirements. Then it will be found that there is money in raising horses. But there is surely no use in producing a mongrel horse when no one wants it.

There are several ways in which horses may be improved by intelligent selection and breeding, such as the farmer adopts in securing a herd of cows noted for their milk yield or a flock of sheep to produce winter lambs. I once had occasion to observe a company of cavalry horses that had been selected for their rapid walking gait. These horses, without urging would easily make five miles an hour on a walk. I had previously thought my saddle horse was a fast walker, but found that he had to be trotted at frequent intervals to keep up with the procession. This seemed to be an interesting point, and I accordingly timed several ordinary saddle horses. They made less than four miles per hour. Now there are lines of work in which a fast walking horse gait would add to the value of the horse. The walking speed of a horse can be increased by breeding just as readily as the trotting or running speed. A fast walker is more in demand and is good for more purposes than a fast runner. Horses are just as susceptible to improvement by breeding as other animals

are. It will therefore pay farmers who are fitted for this work to breed up a line of horses with a fast walk. Don't be content with present standards but raise them. The matter of endurance in horses also deserves attention.

Raise More Horses

Industrial demand for horses is constantly expanding, and farmers can make no mistakes in raising standard commercial classes from the viewpoint of profitable husbandry. The apprehension that the inquiry for horses would diminish with the invention of the automobile has now been eliminated from the industry, and farmers raise horses with the extreme confidence that when the foals reach maturity industrial demand stands ready to take the surplus at remunerative prices, says the Chicago Drivers' Journal. It would appear that the broader the competing motor power for commercial use the greater the inquiry for good horses.

Not only in cities has demand for horses increased during the past decade, but in agricultural development demand is steadily broadening. Vast new territory is being bought under the domain of improved agriculture and the cultivation of a great area of land annually creates increased demand for horses. Machinery is largely supplanting hand labor in farm management, and horses are indispensable to operate the new farm implements. It is an admitted fact that in many localities farmers are short of horses and have been the best buyers of the surplus in their community.

Farmers are favorably situated to raise horses, and the bulk of commercial classes that are weekly distributed to the trade come from the farms of the middle west and the western states. The great breeding establishments have been dismantled and dispersed, and the horses that supply the commercial demand come from farms where from one to six foals are raised every season.

It is doubtful from a financial viewpoint if great breeding establishments could be operated at a remunerative profit. The fact that the great studs have been dispersed demonstrates that the supply of horses must come from the farms operated on the lines of general husbandry.

The average farmer is admirably situated to raise commercial horses. He annually raises a large amount of roughage especially adapted for horse feed rations. Using many horses in his agricultural operations, economic administration of the farm compels him to exploit the horse industry. The breeder can no more

afford to keep a mare only to raise a foal than he can afford to keep a cow to raise a calf. The expense of maintenance of the mare in idleness would counterbalance the profit in raising the foal. But when the mare performs the regular work in harness her foal becomes a most profitable by-product. Some farmers are natural horsemen with a judicial eye for the commercial points in good horses. Farmers as a rule realize the great profit in raising those classes that can be utilized in the regular work on the farm. Horses weighing fourteen hundred to sixteen hundred pounds are desirable workers on the farm and free sellers at wholesale markets. If the farmer loses a horse and has no supernumerary to take its place it means that he must draw on his bank account around \$200 to replace the animal. The \$200 represents the sale of live stock or farm products, and to invest it in a horse that the farmer could have raised looks like prodigal economy.

Buying horses for farm work soon takes a thousand dollars, and in a quarter of a century amounts to a snug fortune. If the farmer raises his own horses and always carries a small surplus for sale it will make an almost incredible difference in his accumulations in twenty-five years of active husbandry. Every farmer should raise his own supply of horses and always try to have a surplus to sell to dealers if he could get the greatest profits from agriculture.

Butte Driving Club

Butte, Mont., June 11—The 2:45 trot and the colt mixed trot and pace races at the matinee of the Butte Driving club yesterday, repaid the enthusiasts who made the trip to the flat to witness the first speed contest of the season. The 2:45 pace was not so interesting because of the fact that several of the entries did not appear.

The colt mixed trot and pace was won by Tat-a-Tat, owned and driven by H. H. Daum, in two successive heats. Time 1:21¾ and 1:20. The distance was one half mile.

The 2:45 pace was taken by Kittle, Phil Trenarry's horse, in two successive mile heats. Time 3:01¾ and 2:49. There was but one other starter, John Scovil's Babe.

In the 2:45 trot, Albert W. won the first two heats and the race. In the first heat Dean Keener was second and Dandy third. In the second heat, Dandy was second and Ginger third. The time was 2:36 in both heats.

Billy Gemmel acted as starter, Silas King as judge and George MacDougall as timer.

New Track in Humboldt County

A very enthusiastic meeting of business men and citizens was held in Justice Merriam's office at Blue Lake on Tuesday evening, June 5th. The meeting was called for the purpose of getting in definite shape for organizing a race track association. Plans had previously been discussed and options on land for such purpose secured. After a thorough discussion the company present organized, by electing Robert Henry, president; Henry Brown, secretary and Walter N. Ingham, treasurer.

It was determined to incorporate with \$5,000 capital stock, of which \$1,000 was subscribed and paid for on the spot.

The association leased the Brizard picnic grounds for a period of ten years with the privilege of purchase. Work on the track was begun Wednesday morning. The track will be one-half mile in circumference. The present picnic platform is to be taken up and a new one with grand stand erected in another part. Where they do not interfere with view or track, trees will be left standing. With favorable climate and a track in good shape, portions of the ground nicely shaded. Blue Lake certainly should be attractive to horsemen after July 1, this year, when the work is to be completed.

Race Meeting at Eureka

A four days race meeting will be given at Eureka, Humboldt county, beginning July 4th, under the auspices of the Eureka Stablemen's Union. \$1600 in purses has been hung up and no entrance fees will be charged. The harness classes are as follows: Trot or pace, 2:50 class, \$100; Yearling trot or pace, \$100; Two Year Old trot or pace, \$100; Free for all trot or pace, \$100; 2:35 class trot or pace, \$100; Ladies buggy race, \$75; 2:25 pace, \$100; Gentlemen's buggy race, \$75. Three running races will be given each day, purses being \$75 each.

Grand Circuit Dates

Detroit, Mich., July 25 to August 4.
Buffalo N. Y., August 6 to 11.
Poughkeepsie, N. Y., August 13 to 18.
Readville, Mass., August 20 to 25.
Providence, R. I., August 27 to September 8.
Hartford, Conn., September 3 to 8.
Syracuse, N. Y., September 10 to 15.
Columbus, Ohio, September 17 to 22.
Cincinnati, Ohio, September 24 to 29.

Rod, Gun and Kennel

Conducted by J. X. De Witt

The Interstate Association tournament and Pacific Coast Handicap is announced as a fixture for Los Angeles September 8, 9 and 10, under the auspices of the Los Angeles Gun Club. The shoot will be under the general management of Elmer E. Shaner, which is a guarantee for a successful tournament. The shoot will be held under the same rules and conditions that prevailed at Ingleside last September.

The association have added \$500 and the Los Angeles Gun Club a similar amount. Out of this \$1000 there will be used the money to purchase the trophies for the Preliminary Handicap and the Pacific Coast Handicap, the balance will be added to the purses.

It is very probable that the crack Eastern shooters, Gilbert, Crosby Heikes, Fanning, Hirschey, Marshall and others will be in attendance at the shoot.

For further information, etc., our readers are referred to Elmer E. Shaner, Secretary manager Interstate Association, Coltart Square, Pittsburg, Pa., or Chas. Van Valkenberg, Secretary, Los Angeles Gun Club, Los Angeles, Cal.

The Preliminary Handicap was won at Ingleside last year by C. D. Hagerman of Los Angeles. George Sylvester won the Pacific Coast Handicap after shooting off a tie with Bob Bungay of Ocean Park.

Copious showers rather dampened the ardor of the participants in the recent Kimbal-Upsou tournament at Sacramento and lessened the attendance of shooters accordingly. During the first day gusts of wind suddenly sweeping over the summit of the hill whereon the trap grounds are located carried many targets out of their regular flight and spoiled many scores by more than the average misses. The only straightbs on the first day were made by Emil Holling 20, H. Hazelbursch 20 and C. M. Troxell 20. Troxell of Rocklin was high average the first day, 89 per cent. F. F. Merrill of Stockton, whose presence at a tournament we are pleased to note again after a long interval, was second with 88 per cent. Holling and C. A. Haight made 87 per cent. W. H. Seaver, Otto Feudner, F. Turner and Frank L. Carter also participated as trade representatives. J. W. Humble of Gridley won the live bird championship of Northern California. He was

tied by Hazelbusch and Merrill, all scored a straight 12. On the tie, miss and out, Hazelbusch dropped out on his first, Merrill quit at the fifth. Humble scored his fifth bird and won. E. Fissell of Davisville, last year's winner was not present to defend his previous win. The Infalible Cup went to F. F. Merrill of Stockton who scored 19 out of 20. Humble of Gridley, previous holder of the trophy was tied for second place by Ferguson of Folsom, 18 each. The Gibson cup was won by Troxell, who scored 17 out of 20. F. F. Merrill and Ferguson each broke 16.

The Santa Cruz Rod and Gun Club are planning to entertain the Eastern sportsmen who will be in attendance at Los Angeles during the Interstate shoot. The Santa Cruz sportsmen have already sent out many invitations to Eastern sportsmen asking them to stop over at Santa Cruz on their way home from Los Angeles.

The shoots part—part of the program for the visitors will take place at the Corcoran lagoon trap grounds of the Santa Cruz Club which will assume all the expenses of the proposed entertainment.

The Paso Robles Gun Club members enjoyed a barbecue after the club shoot on June 3d. Trap shooting has become quite a fad with the sportsmen of that section and the gun club shoots are not only well attended, but team shoots are held with representatives of other gun clubs in nearby towns. This is encouraging to the development of trap shooting in the Pajaro valley. At the shoot above mentioned the scores averaged well, a notable improvement being apparent in the scores of several shooters. The shot were respectively at 25, 10 and 10 targets as follows:

Brendlin 11-2-4, Keller 18-7-6, Colling 16-5-4, Wood 17-8-9, Cress 7-5-5, Johnson 24-8-6, Janney 11-0-3, Brown 15-4-0, Gaxiola 19-7-9, Ooley 15-5-7, Green 22-9-9, Hamilton 14-7-5, McDaniel, Jr., 17-0-5-5, Tognazzini 20-8-8, McDaniel, L., 10-3-0, Mader 14-7-5, Iverson 9-5-3, Gaxiola, Jr., 0-0-5.

It is very probable that a big blue rock shoot will take place at Ingleside on July Fourth.

The affair is contemplated under the joint auspices of the local gun clubs and an attractive program is intimated by the management.

The club medal winners at the Vallejo Gun Club shoot on the 10th inst. were—Expert class, Clyde Drake, 25 straight. Class A, R. Burnett 23 out of 25. Class B, C. L. Wisecarver, 22 out of 25. Class C medal was won by our old college chum "Maud" Elias who fractured 19 discs out of 25. Since having the refractory appendix taken out of his pump gun by Dr. Magistrini the jolly tar has been getting well into line with the tagets.

In a team shoot for record, a most creditable score, in fact we believe it is the top notcher for a five man team, resulted in a total of 114 out of 125. The scores were: Roney 24, Wisecarver 22, Chappell 23, Roders 21, Drake 24, total 114.

The Sacramento Blue Rock Club members participated in a lively powder burning fest on the 10th inst. The club medal for the month was annexed by H. Derr who centered 18 out of 20 targets. F. M. Newbert was there with a good eye for the only 20 straight during the day. The scores in different events were as follows:

Twenty targets—Adams 13, 15, 13, 17, 14; Gusto 15, 18, 15, 15, 13; Rubstaller, D., 17, 16, 17; Moulton, 8, 7, 7, 15; Derr 18, 14, 16, 13, 17, 17; Newbert, F. M., 19, 17, 15, 20, 19, 18; Vetter 15, 14; O'Brien 14, 12, 7, 8; Newbert, D. E., 18, 13, 17, 17; Rubstaller, F., 13, 14; Griggs 8, 9, 16; Jackson 12, 12, 12, 14; Reed 14, 12, 15; Berry 5, 11; Pratt 4; Chambers 8, 11.

Twenty-five targets—Chambers 8; Elkus, 8 16; Rubstaller, D., 20, 19.

Doubles, 10 pairs—Gusto 11; Newbert, F. M., 19; Derr 17; Vetter 12; Newbert, M., 12; Elkus 3; Chambers 15, 11.

Team shoot—Rubstaller, F., 15; Newbert, F. M., 18; Newbert, M., 19; total 52.

Rubstaller, D., 19; Derr, 13; Kessig 9; total 42.

Gusto 16; Vetter 17; Adams 15; total 48.

Club Medal—D. Rubstaller 17, O'Brien 9, Newbert 16, Cunningham 11, Derr 18, Rubstaller, F., 17, Vette 17, Gusto 18, Adams 17, Jackson 12.

A handsome and valuable trophy, the DuPont cup, which was supposed to have been destroyed in the recent conflagration, was saved and eventually turned up in Berkeley. This trophy was intended originally for the Southwestern Gun Club Association of Washington, and to be competed for under the auspices of that organization. The cup has been forwarded to President Harry Gilchrist at Centralia, Wash. and will be shot

for by the northern shooters in accordance with the program first outlined.

The Capitol City Gun Club closed the club season at the Whiskey Hill grounds on June 17th. A large attendance of sportsmen were present for the day was an ideal one for indulgence in shotgun recreation. The results in various events were the following:

Twenty targets—F. Adams 13, 17; H. Derr 16, 17; E. D. Adams 17; F. Newbert 18; A. Just 12; C. Bauer 12, 15; M. Newbert 17; D. Rubstaller 16, 16; C. DeMerritt 17; W. Sayer 14, 15; C. Cotter 14; J. Hughes 13, 14; J. Juisto 16, 18; F. Reichert 16; H. Kissig 15; O. F. Reed 14; H. Trumpler 17; G. Davis 19, 11; H. Stevens 18; H. Vetter 12; E. Jones 9; C. Juslian 14.

Capitol medal, 20 targets—Adams 17, C. Cotter 16, M. Newbert, eighteen yards, 15; D. Rubstaller 16, J. Hughes 18, W. Sayer 19, C. Bauer 14, G. Gray 17, C. Julian 13, I. Inman 16, A. Just 11, A. Elkus, H. Vetter 19, E. Jones 16, F. Rubstaller 88, H. Stevens 18, G. Frazer 14, E. Adams 133, F. Reichert 19, Ed Yardley 6, W. Mott 13, F. Schoenbachler 13, J. Guisto 18, H. Kissig 17, F. Newbert 18, F. Hackman 13, H. Derr 18, C. De Merriitt 19. In shooting off on ties on nineteen Merriitt won with nineteen breaks at eighteen yards.

Washington medal, 20 targets—F. Adams 13, C. Cotter 16, M. Newbert 17, D. Rubstaller 11, J. Hughes 13, W. Sayer 17, C. Bauer 8, G. Gray 16, C. Julian 14, W. Shpperd 11, I. Inman 18, A. Just 16, A. Elkus 9, H. Vetter 15, E. Jones 15, F. Rubstaller 16, H. Stevens 17, J. Frazer 9, E. D. Adams 16, G. Davis 17, F. Reichert 17, Ed Yardley 11, W. Mott 13, F. Schoenbachler 11, J. Justo 17, H. Kissig 17, F. Newbert 19, F. Hickman 9, H. Derr 17, C. De Merriitt 15, I. Inman winning the medal.

Three man team—Cotter, M. Newbert, D. Rubstaller—49. Sayer, E. Adams, Derr—43. Gray, Reichert, Davis—47. Hughes, Sheppberd, Vetter—35. Guisto, Schoenbachler, Elkus—34. Stevens, F. Newbert, Juslian—49. Yardley, Kissig, Just—41. Mott, DeMerriitt, Trumpler—45.

The Delaware Legislature on June 12th elected Harry Henry A. DuPont United States Senator for the term beginning March 3, 1905. His election was practically unanimous and all the Republicans save one voted for Col. DuPont.

Drink Jackson's Naja Soda, it means health.

Otto Feudner is with the firm of Brittan & Company, Van Ness avenue, and Turk street this city. He is engaged in congenial lines in the sporting goods department (formerly Olympic Arms Company). Associated with him is Mr. Cooley, formerly with the Phillipot Company on Market street. Whether Feudner is a drawing card or not we leave to the opinion of the sportsmen. Suffice it to say that a week ago Saturday, June 9th, the sales of sporting goods amounted to \$250, pretty good for a store on the edge of the burnt district. Many orders could not be filled, the sportsmen, particularly the anglers, cleaned out several lines entirely.

Cooley saved 500 dozen of John Benn's flies and there is now a strong demand for them.

Golcher Bros., formerly Claibrough, Golcher & Co., 538 Market, are located on the south side of Market street near First.

Shreve Barber & Co., will soon resume business, we were informed, on the old site 739 Market street. We are sure that the new store will be as popular a house and as much of a rendezvous for the sportsmen as was the case before the fire last April.

E. J. Kaplan has started in business again—The Imperial Sporting Goods store, Van Ness avenue and Market streets.

E. E. Drake, the Pacific Coast manager for the U. M. C. Co. and the Remington Arms Co., is at present in the East. Mr. Drake is accompanied by Mrs. Drake, his trip is one of recreation as well as business and before returning to the Coast, he will visit many points of interest in the East, including a brief sojourn in Florida.

Meanwhile "Billy" Wattles is in charge of the new offices, 925 Golden Gate avenue, where the dual business is now conductive in commodiously fitted up sunny offices.

We are extremely pleased to correct the report, published in this journal recently, that the San Francisco Kennel Club was to be disbanded and which seems to be without foundation in fact. On this subject, Secretary Fred P. Butler, wrote us: "The members of the San Francisco Kennel Club are not in for what they could make out of it. We have not got the sum of \$2000 in the club treasury, and further the world could come to an end before we would use the money in the treasury for our personal needs—that is by disbanding and dividing pro rata. This fund belongs to the Pacific Coast fanciers and will be expended for their benefit by the club.

"The club still exists, and I hope

will always be in working order and the rumor above referred to is most positively without authoritative foundation. The sentiments of the club members is unanimous in furthering the best interests of local and Coast fanciers and kennel clubs."

This pertinent denial and encouraging statement by Mr. Butler will have the effect of bracing up Coast dogdom to an appreciable extent, for with the loss of the San Francisco Kennel Club, there would be a missing link in the dog chain of kennel affairs that would be hard to replace.

Mr. George Flexner has a promising young Bull Terrier bitch in Hawthorne Queen Lillian (Hawthorne Don't ex. Hawthorne Snowflake). She will be benched at Stockton in October. Mr. Flexner believes she will turn the tricolor his way—providing everything goes well with her, for she is only ten months old. She has a neat head and as good a pair of beady terrier eyes as one would wish to look at. She is a light weight and is built on very pretty lines.

Dave Sinclair, we note with regret that will find response from every Coast fancier, has been laid up in a Los Angeles sanatorium for a month past. Poor Dave has been very ill, but the attending doctors are now sanguine of his early recovery, which we heartily trust may soon take place.

Alec Truman, these strenuous times, still has the enthusiasm and leisure to look after his good dogs. We saw Wig Wag and Ch. Mike Swiveller the other day and they were in tip-top condition.

Wag recently served Mr. Kean's Blue Belle Noble and Mike served Kean's Irish setter bitch Norcen, a winner at Frisco, 1905.

Striped bass fishing is reported very good in the straits and also in the Tiburon lagoon. In the vicinity of Sacramento striped bass weighing over forty pounds have recently been caught on spoons. San Antonio creek anglers also met with success in landing bass.

Black bass fishing in Ballard's lake is worth a trip over the California Northwestern Railway to that picturesque part of Sonoma county.

Reports from the Truckee state that spoon and bait fishing is excellent at present. The water is yet too high for first class sport with the fly. This desirable condition of the royal trout stream is most promising for sports in about two weeks.

The Golden Gate Gun Club will hold a regular shoot at Ingleside tomorrow.

The trout streams of Santa Cruz county are ripe for the angler now. The head of Soquel creek is full of large steelheads that went up during the recent rains and are landlocked at many riffles.

J. Boswell Kenniff is still connected with the sporting goods department of Baker and Hamilton, 117 Berry street, this city.

Tom C. Kierulff, the popular secretary of the San Francisco Fly Casting Club can be found in his law office, 300 Haight street, this city.

The first of the interrupted fly casting contests took place at the Stowlake last Sunday. There was a good attendance, following the water whipping a meeting of the club was held during which several new members were elected.

Salmon fishing still is first class in Monterey bay.

Racing For \$300 Purses

At first glance it always appears strange that California trainers should cross the mountains and race their trotters and pacers for purses of \$300, when they decline to enter at home unless the money hung up for each race amounts to at least \$500. There is a reason for it however. The California circuit has been in the past four years limited to a very few meetings, and owners will not pay to have horses trained for three or four races unless the purses or stakes raced for are large enough to be worth getting records for. Across the Rocky mountains however there are so many circuits that racing can be had every week from June 1st to November 1st, and the shipments are short and inexpensive. Chas. DeRyder, one of the foremost of the Grand Circuit drivers and trainers left California a few weeks ago with a string of horses that he has been racing through Iowa for \$300 purses during the past two weeks, but as soon as the larger meetings open he will leave the half mile tracks and go for the larger game if his horses are in shape.

There are twenty towns in California where successful and profitable meetings could be given every year with purses limited to \$300, but to do so they would have to form circuit of not less than ten weeks racing. With a circuit of this sort for a "feeder" the State Agricultural Society, the Breeders Association, the Los Angeles Harness Horse Association, and two or three more organizations, could form a Grand California Circuit that would receive large entry lists and put twice as many horses in training every year on the different tracks of this State.

If there are but four or five meet-

ings at which to race harness horses each year, the purses must be large to attract them, but could three months racing be provided for owners and trainers would be willing to enter their horses where purses were as low as \$300.

It is the history of all the eastern and western organizations that the organized circuits get the most entries and have the best racing. Let us suppose, to illustrate, that a circuit of harness racing for \$300 purses could be arranged, with Salinas, Hollister, Pleasanton, Concord, Vallejo, Dixon and Marysville as members. Here would be seven weeks of racing, with the distances between towns not great, and the expenses of shipment consequently small. By organizing thoroughly, all these meetings could be advertised together and a flat rate secured for horses shipped through the entire circuit. Three days of racing at each place with three races a day would make a total of \$2700 in purses to be hung up at each place, and a grand total of very nearly \$20,000 to be raced for on the entire circuit. Another circuit like this could be organized in the northern part of the Sacramento Valley, one in the San Joaquin Valley, one in the far south and another in the country around Eureka, Humboldt county. It would not make any difference as to the circuits conflicting with each other, but the dates of the four or five big meetings on the main circuit should not be taken by any of the smaller meetings. By this arrangement all the best horses raced at the smaller meetings could meet at the larger meetings and much interest would surely be aroused and grand racing result. We hope the managers of tracks in different parts of the State will give this subject some thought before another year.

DIVIDEND NOTICE

German Saving and Loan Society

525 California Street

For the half year ending June 30, 1906, a dividend has been declared at the rate of three and six tenths (3 6/10) per cent per annum on all deposits, free of taxes, payable on and after Monday, July 2, 1906. Dividends not called for are added to and bear the same rate of interest as the principal from July 1, 1906.

GEO. TOURNEY, Secretary.

DIVIDEND NOTICE

California Safe Deposit and Trust Co.

Cor. California & Montgomery Sts.

For the six months ending June 30, 1906, dividends have been declared on the deposits in the savings department of this company as follows: On term deposits at the rate of 3 6/10 per cent per annum, and on ordinary deposits at the rate of 3 1/2 per cent per annum, free of taxes, and payable on and after Monday July 2, 1906.

J. DAZELL BROWN, Manager.

DIVIDEND NOTICE

San Francisco Savings Union

N. W. Cor. California & Montgomery Sts.

For the half year ending 30th June 1906, a dividend has been declared at the rates per annum of three and two thirds (3 2/3) per cent, on Term Deposits and three and one third (3 1/3) per cent, on Ordinary Deposits, free of taxes, payable on and after Monday, July 2nd, 1906. Depositors are entitled to draw their dividends at any time during the succeeding half year. Dividend not drawn will be added to the deposit account, become a part thereof and earn dividend from July 1st.

RECORD BREAKING FISH

are caught every year at

LAKE TAHOE

JUST as large ones still uncaught. You can get them. Don't you long to feel again that sharp tug at the line, hear the shrill whir of the reel, and, after a blood-stirring fight, experience the joy of landing one of the finest, craftiest old trout you ever saw?

You shall do that many times on this beautiful lake and on the mountain streams round about. Also good hunting and mountain climbing. Many hotels; fine camping places; no poison oak.

Buy your ticket and get there in one night. Sleeper leaves San Francisco daily 7 P. M. and you arrive at Tahoe next morning in time for breakfast.

"SAVE-THE-HORSE"

Registered Trade Mark

SPAVIN CURE

DON'T STAND IN YOUR OWN LIGHT

The powerful potency of "SAVE-THE-HORSE" cannot be analyzed or comprehended in this small space. We wish to send you evidence, demonstrations, results—from men in every walk of life—cures of cases considered incurable, and in addition we make a guarantee or legal contract absolutely binding to protect purchaser to treat any case for which "Save-the-Horse" is indicated.

 One bottle save the horse.
 We cannot get along without it*

*Yours
 Madden Bros*

Costs from \$5 to \$25 for repeated firing, horse must be laid up for several months; not 5 per cent. of the cases are cured. Blistering is less effective. Mercurial preparations produce irreparable injury.

"SAVE-THE-HORSE" eliminates all these factors. Cures without scar, blemish or loss of hair. Positively and permanently cures Spavin, Ringbone, Thorophpin, Curb, Splint, Capped Hock, Wind Puff, Broken down, Bowed or Strained Tendon or any Case of Lameness. Horse can be worked as usual and with boots, as no harm will result from scalding of limb or destruction of hair.

\$5.00 per bottle, with a written guarantee, as binding to protect you as the best legal talent could make it.

Campbell's EMOLLIO IODOFORM Gall Cure

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES, ABRASIONS OF THE SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the Market relying wholly on its merit of success, and notwithstanding the fact that comparatively little has been done in the way of advertising, the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Keep It in their Stables

PRICE:—3 OZ. BOX 25c.; 7 oz. BOX 50c.; 1 LB. BOX, \$1.00

**Take It In Time**

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the pedler's cart and the broken-down horse market. Mr. C. B. Dick, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, spavins, windpuffs and all bunches it has no equal."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

THE OLD THREE IN FIVE SYSTEM retains its popularity with owners and trainers in spite of the kickers and newspaper writers who say it is doomed. The largest entry list ever received by any association for harness meeting has been received by the Kentucky Trotting Horse Breeders, whose program sticks to the old three in five.

THE AUTOMOBILE did grand work in saving life and property during the big fire, but the old reliable horse is doing the work necessary to clearing up the debris and hauling the material for rebuilding. And he is doing it patiently and to the best of his ability, and in some cases with kicks and lashes for his reward. The work horses of San Francisco are doing a work that cannot be accomplished without them, and they should be well fed, well groomed and kindly treated. Every case of cruelty to one of them should be instantly reported by the eye witnesses to the same.

ENTRIES CLOSE MONDAY NEXT, JULY 2d, for the big stakes offered by the Pacific Coast Trotting Horse Breeders Association, to be decided at the Woodland meeting in August. Every horse in training should be named in the class to which it is eligible. This is the year when an average horse should be able to get some of the money. Nearly all the highly touted trotters and pacers of the green class have been shipped East or to Colorado and Montana, and there will therefore be a better chance than ever to win the \$1,500 trot or the \$1,500 pace without being compelled to step your horse to a low record. Horsemen should remember that an opportunity is offered this year that may not offer again soon, and govern themselves accordingly. The program, which will be found in our advertising columns, gives every horse a chance, and the wise owner will see that his horses are named in those events to which their records do not bar them. No more delightful week can be spent than the one at Woodland during the Breeders' meeting. The town has first-class hotel accommodations and is one of the busiest and most prosperous in the whole Sacramento valley. Get your entry blank properly filled out and mailed on Monday, July 2d.

IT PAYS to breed and raise trotting bred colts to sell as yearlings if the sales of the Suisun Stock Farm are any criterion. The fourth annual sale of yearlings by Demonio was held at this farm two weeks ago today, and the average price received was \$111 per head. Yearlings at that figure are a profitable crop, as no money has to be expended on their education and the only requirements asked by buyers is that they are sound and in good condition.

THE GRAND CIRCUIT will open at Cleveland this year with a meeting at which there will be no bookmaking or pools sold. The Detroit meeting had to face the same puritanical law, and after closing the M. & M. and C. of C. stakes, transferred them to Cleveland and declared off the balance of its program. It will be remembered that the Cleveland meeting was declared off last year a few hours before the time set for calling the first race, the reason being that betting was prohibited and the association felt itself unable to stand the loss of revenue which this would have brought about. This year the citizens of Cleveland who enjoy harness racing have subscribed a guarantee fund of \$15,000 to insure the association against loss, and the meeting will be held. At Readville, Mass., where the New England Trotting Horse Breeders Association holds its annual meetings, the State officials have resurrected an old blue law against betting on races and will enforce it. The association will give its meeting nevertheless. Is it not time that horsemen all over the country should organize against the bigotry that permits such laws to be on the statutes? We believe there is power enough in the members of the National and American Trotting Associations to secure the abrogation of these laws in every State where they are in force. The prevalence of long continued running meetings with their accompaniment of bookmaking and reckless gambling do much to make these anti-betting laws popular with the people in some sections, and the harness horse people will have to divorce themselves from

any connection with the running meetings whatever, unless the managers of the jockey clubs will be content to see some such law as the New York Racing Law adopted. The breeding of trotters is a national industry, and the farmers and business men of nearly every State in the Union are engaged in it to a greater or lesser extent. Trotting races are necessary to the development of the trotting breed of horses to its highest degree and is as pleasurable and harmless a pastime as baseball, tennis or golf. It should be fostered and encouraged in every way so long as it is conducted in a respectable manner.

THE STALLION SEASON ends July 1st. It will not be out of place at this time to call the attention of the owners of mares to the fact that many stallions make a summer and fall season at reduced rates, and mares that are not in foal can be bred during that time. Where mares are not bred with the idea of racing their foals in the early stakes, the fall season is about as good a time to breed them as the spring, if the mare can be put on green pasture at foaling time, such as alfalfa, of which there is a great deal in California. A fall colt is generally weaned in the spring when all the pastures are green and will thrive during weaning time. The reduced fees for stallion services during the summer and fall months should induce many persons to book their mares then.

A PRACTICAL TALK is thus given breeders of horses by the editor of Western Horseman: "There is such a thing as being practical in the breeding of trotters and pacers, and the time has arrived when stock farm owners should seriously consider this phase of the business. There are farms with scarcely an aged gelding on the place, while others may be found that are overstocked with horses that should have found their way to market. We have in mind a prominent farm where not a single gelding over three years old has been found on the premises in several years. This farm has a practical man at its head, a man who weeds out the brood mares and the fillies each season, fitting them for sale and finding a buyer for each at good prices. The stock farm must advertise. Not spasmodically, but with regularity. The farm that is in the business to stay must advertise each year, regardless of conditions. The public expects such things of the successful breeders. The yearly advertisement brings the farm prominently before the public. It is a positive assertion that the farm is in the business to stay. And, again, one can never tell just when an advertisement is going to do some good, or in what way. Benefits from judicious advertising are frequently derived months after the advertising has been dropped or changed. As an end to bringing about practical results on the breeding farms, proper advertising will always play an important part. Breed the class of animals in demand, properly grow and develop them, and compel the public to recognize the fact that you are making a success of the business."

Prof. E. P. Heald has had the misfortune to lose from pneumonia his fine three-year-old trotter by Nutwood Wilkes out of Nona Y., dam of Adam G. 2:11 1/4 and three others. The colt was one of the most promising Prof. Heald has ever bred.

NEWS AND NOTES

Joe Cuicello is riding in front nearly every race he starts in at Denver.

Entries for the Breeders' meeting at Woodland close Monday, June 2d.

There are not more than fifty horses left at Pleasanton track and the place looks rather lonesome.

Mr. S. Christenson's mare Perza has foaled a fine chestnut colt by Strathway 2:19, and has been bred to Star Pointer 1:59 $\frac{1}{4}$.

Mr. F. J. Kilpatrick, the well-known timber land owner and contractor, who took the mare Nannie Derby to New York, a short time ago, has sold her to Mr. John Holmes of Holmdel, New Jersey, owner of the stallion Red Wilton, and breeder of the old-time trotter, Sir Walter Jr. 2:18.

Geo. Ramage, who trained at Pleasanton this spring, has gone to Chico to take a look at the country up there, and visit Barney Simpson at the same time. Barney has made a good season with his handsome and fast pacer, Arner 2:17, full brother to Don Derby 2:04 $\frac{1}{4}$, Diablo 2:09 $\frac{1}{4}$, and other fast ones.

The big round up of horses in the Snake River country last month resulted in about 2500 branded horses being brought in from the ranges where they were running wild. Of these 1500 belonged to one firm. The horses were in very good condition and were immediately consigned to different points for sale.

Search Georgie, a two-year-old pacing filly, by Searchlight 2:03 $\frac{1}{4}$, dam Georgie B. 2:12 $\frac{1}{4}$, by Nutwood Wilkes 2:16 $\frac{1}{2}$, is working like a future two-minute pacer for Fred Chadbourne, who is training her for Mr. Martin Carter. She has only been handled a few weeks, yet stepped a mile in 2:28 last Saturday, with the last half in 1:12 and last quarter in 35 $\frac{1}{2}$ seconds.

La Siesta Stock Farm, San Jose, has an entry in the Stanford Stake of 1907, and another in the same stake of 1908. In the first-named stake the entry is the bay colt Mogadore by Iran Alto 2:12 $\frac{1}{4}$, dam Lady Belle Isle. In the stake of 1908 the entry is bay colt Siesta by Iran Alto 2:12 $\frac{1}{4}$, dam Wanda 2:14 $\frac{1}{4}$. In the published lists of the entries to these stakes made two weeks ago both the La Siesta colts were given as out of Lady Belle Isle, which was an error.

The hair on the shapely head of J. M. Alviso of Pleasanton is rather silvery, but he can give cards and spades to many a younger man in the horse-training business and then beat him at putting a horse in shape to go a fast mile. Just thirty days after getting Major Cook he asked Henry Dunlap to drive him a mile, and the result was as follows: Mile 2:15, last half 1:04 $\frac{1}{4}$, last quarter 31 $\frac{1}{2}$ seconds. Dunlap said he could turn the horse around and beat that time three seconds, but Alviso said the speed was fast enough for that day, and satisfied him.

About as nice a work-out as has been seen on a California track this year took place at Pleasanton last Saturday, when Fred Chadbourne, driving Walter Masten's handsome five-year-old stallion, Marvin Wilkes 2:18, and John Green, up behind Mr. J. A. Jones' good mare, Lady Jones 2:16 $\frac{1}{2}$, worked three heats together. The two trotters kept together in every mile, and finished noses apart every time. Not a skip or a bobble was made by either horse during the day, and they impressed an onlooker as two good ones in their classes this year. The miles were in 2:26, 2:19 $\frac{1}{4}$ and 2:17. The last half of the second mile was in 1:11, with the last quarter in 33 seconds. The last half of the third heat was in 1:10, with the last quarter in 32 $\frac{1}{2}$ seconds. Both horses were trotting easily in the last heat, and it looks now as if 2:12 will not stop either of them by the last of August.

Siliko, J. E. Madden's sensational three-year-old bay colt Moko, dam Silicon 2:13 $\frac{1}{4}$, by Wilton, has been shipped to Terre Haute, Ind., to be trained for his engagements, including Hartford, Horse Review and Kentucky Futurities, by the veteran horseman "Knap-sack" McCarthy, who had such a successful season last year with the black gelding Norman B. Siliko took a record last season as a two-year-old of 2:17 $\frac{1}{2}$. He won the Lexington Stakes and won third money in the two-year-old division of the Kentucky Futurity, and in one of his races he defeated Lightsome, the winner of the latter event. Siliko left Lexington in the pink of condition after a good winter at Hamburg Place. He has not grown so much in height, but has spread out to such proportions that among other colts and fillies of his age this season he will not appear of such a pony size as he did last season. Before being shipped Charles Marvin wagered Ed Benyou, in a friendly banter, a supper for a few picked friends that Siliko would beat Lightsome in more Futurities this year than the daughter of Constantine finished in front of him. Marvin drove Siliko in all his races last year, being then a part owner of the son of Moko.

The Riverside and San Bernardino horsemen are arranging a race program for purses on the 4th of July.

It is reported that Dick Benson, who went over to the runners several years ago, will race David Medium, 2:15, this season.

The Butte Driving Club held a matinee last week, and Ted Hayes won one of the events with the mare Sallie Lunn, owned by W. A. Clark Jr. The time of the two heats was 2:25, 2:22.

Mr. J. B. Iverson recently sold to Sacramento parties a four-year-old brown gelding by Boodle Jr. that will be used as a roadster and perhaps take part in the matinee races of the Sacramento Driving Club.

It is said that the little whirlwind, Prince Direct 2:07, owned by George Amsden of Richmond, Ind., after a season in the stud, will be fitted for the track again, with a view to reducing his record, if possible.

Fred Chadbourne has received from the East a new-fangled knee-boot that has a pneumatic pad on the inside to take the jar off the knee. It is being tried on John R. Conway 2:12 $\frac{1}{2}$, and seems to be just the thing.

There will be plenty of harness racing on the 4th of July. The Concord track will be the scene of several contests, and races will also be given at the San Lorenzo half mile track, while at Sebastopol, in Sonoma county, it is proposed to hold races on the 3d, 4th and 5th of July.

Sweet Marie, according to Alta McDonald, is in better condition than ever this spring, and he says he expects to see her trot in two minutes this year. The Albany, N. Y., reinsman believes in wintering race horses in the North. Those "canal travelers" of his have certainly done well in any company.

Jonesa Basler 2:11 $\frac{1}{4}$ and his full sister, Lucie Woodruff, have been shipped to Terre Haute, Ind., by their present owner, Mr. E. Gravatt, and will be raced through the Indiana and Illinois circuits this year. Neither of them wears hopples or boots of any description. Jonesa Basler worked an eighth in 14 $\frac{1}{4}$ seconds before leaving Hanford, while Lucie paced the distance in 15 seconds.

Murray M. 2:14, record made as a three-year-old, made a good season at Los Angeles and Santa Ana this spring, in charge of Johnny Weber. Murray M. has a crop of sucklings in that vicinity this year that are as fine a lot of young trotting colts as can be found in California. His owner, H. W. Lawrence, will put him in training this fall, with the idea of giving him a low record next year. Murray M. should easily trot into the 2:10 list.

The injunction proceedings instituted by the Memphis Trotting Association against the National Trotting Association, at Hartford, Conn., to prevent a hearing of the Memphis gold cup scandal, have not been finally disposed of, the Billings people having filed additional pleadings before Judge Townsend, and he has set July 2d as the date for a hearing. The National Trotting Association will soon file a rejoinder to the latest pleadings of the Memphis people.

The veteran trainer, Knap McCarthy, is preparing for a trip through the Grand Circuit, at Terre Haute, Ind. He says that the black gelding Norman B. 2:06 $\frac{1}{4}$, by Phallas, is in grand form this spring, and apparently ready to go out and hold his own with any trotter in his class. So well does McCarthy think of the black gelding that he says he would be willing to start him in a special four-cornered race during the Buffalo Grand Circuit meeting against Sweet Marie 2:04 $\frac{1}{4}$, Tiverton 2:04 $\frac{1}{2}$, and Wentworth 2:04 $\frac{1}{2}$, for \$2,500 a corner, which would make a \$10,000 purse.

The Kentucky Trotting Horse Breeders' Association reports the largest entry list in its history for the fall meeting. Sixty-nine colts and fillies had the June payment made on them for the Kentucky Futurity, the Transylvania has twenty-three nominations, the Tennessee for 2:06 class pacers has twenty-one, the Walnut Hall Cup for 2:15 trotters has fifty-eight named, and the McDowell stake for 2:08 trotters has twenty-five named. Just think of this, you Californians who regret that you do not live close enough to the Grand Circuit to race in it: Fifty-eight owners who think they have a chance to win in the 2:15 class next October and are ready to name their horses now, and twenty-five who have done the same in the 2:08 class trot. Those entered in the 2:08 trot are the following: Kid Shay, 2:07 $\frac{1}{4}$; Turley, 2:07 $\frac{1}{4}$; Glenwood M., 2:07 $\frac{1}{2}$; Angiola, 2:07 $\frac{3}{4}$; Redlax, 2:07 $\frac{1}{2}$; Mainsheet, 2:08 $\frac{1}{2}$; Leonardo, 2:08 $\frac{3}{4}$; Tuna, 2:08 $\frac{1}{2}$; John Caldwell, 2:08 $\frac{1}{2}$; Lisonjero, 2:08 $\frac{1}{4}$; Judge Green, 2:09; Mainland, 2:09 $\frac{1}{4}$; Goldust Maid, 2:09 $\frac{1}{4}$; Deloree, 2:09 $\frac{1}{4}$; Boreazelle, 2:09 $\frac{1}{4}$; Alexander, 2:09 $\frac{1}{2}$; Emma Brook, 2:09 $\frac{1}{4}$; Helen Norte, 2:09 $\frac{1}{4}$; Ore, 2:10 $\frac{1}{4}$; The President, 2:09 $\frac{1}{2}$; Watson, 2:09 $\frac{1}{4}$; Leola, 2:10 $\frac{1}{4}$; Angle, 2:10 $\frac{1}{2}$, and Bessie Brown, 2:12 $\frac{1}{4}$.

Heavy horses do not last long when they are compelled to move quickly with heavy loads. The majority of heavy horses now used in hauling debris in this city are showing signs of hard usage.

Get your blanks filled out and mailed next Monday for the stakes at the Breeders' meeting. You never had as good a chance to win big money as this year when so many of the fast green horses have gone East.

The trial of A. L. McDonald for the killing of Joseph Mello at Pleasanton was concluded in Oakland last week and resulted in the acquittal of the defendant. The jury deliberated six hours before rendering a verdict.

Kenney is selling sulkies, carts and wagons at his place, 531 Valencia street, at low prices for cash. His repair shop is complete in every way and there is nothing in the sulky or bicycle repairing line that he cannot do promptly and well.

C. O. Stanton, who is the Pacific Coast manager for Singmaster & Sons of Keota, Iowa, with residence at San Jose, has been on a trip to Arizona in the interests of his firm. Mr. Stanton has a number of fine draft stallions at San Jose.

One of the sweetest gaited and fastest young pacers in California is Mr. I. L. Borden's mare Roberta 2:19 $\frac{1}{4}$, by Robert I. 2:08 $\frac{1}{4}$, that J. Albertson is training at Pleasanton. Roberta recently stepped a half in 1:03 over that track, and did it very handily.

C. P. Lillard of Crook county, Oregon, sold 80 horses and mules last week to a Los Angeles buyer, who is supplying the market at Oxnard. The prices paid were \$85 for horses and \$110 for mules. The horses were not large enough to be called drafters.

The five-year-old black stallion Silver Band, by Colonel Cochran 2:10 $\frac{1}{4}$, has been entered in the M. and M. at Detroit by George H. Estabrook of Denver. Mr. Estabrook bought the horse without having seen him. Last fall he trotted a quarter in 30 $\frac{1}{4}$ seconds and a mile in 2:12.

The Southwest Missouri circuit has the novel distinction of having for its secretary a talented young lady, Miss Emma R. Knell. Miss Knell has acted in the capacity of secretary of the Knell Fair and Racing Association of Carthage, Mo., for several seasons with great acceptance.

Fred H. Chase broke ground this week for his new pavilion and horse mart on Valencia street, between 15th and 16th. Lumber is already on the ground and the builders will be at work Monday morning. Mr. Chase will have the finest place to sell horses that San Francisco has ever seen.

The well known Denver driver, Frank Loomis, has given up control of all the horses he had in hand for the present meeting at Overland and has gone to Minnesota, where he will make his home for a time, as his physician advised him to go to a lower altitude at once for the benefit of his nervous system.

Thomas M., the trotter that Joe Cuicello has won three races with at Denver, and given a mark of 2:17 $\frac{1}{4}$, is by McKinney, and is owned by Thos. Murphy, formerly of Petaluma, but now of the Czar's stables at St. Petersburg. Cuicello has the horse leased, which is a large bay gelding, that many horsemen look upon as a coming 2:10 trotter.

The Don Derby pacer, C. E. Hasey, which Chas. De Ryder sold to Mr. G. H. Easterbrook of Denver, started in the 2:30 pace at Overland Park last week, and won the first heat in 2:14 $\frac{1}{4}$. He was beaten the next two heats and the race by the chestnut mare, Helen Gould, in 2:15 $\frac{1}{4}$ and 2:20 $\frac{1}{2}$. There were seven starters in the race. The pacer's name has been changed to Casta Nada.

The conditions of the great three-cornered trotting race that is to come off at Readville, July 4th, are that the owner or manager of each horse shall put \$2500 in the hands of Secretary Jewett, and the Association is to add \$7500. The race is to be best two in three and the winner takes all. A percentage of the gate receipts also goes to the owners or managers of the horses. The winner is to have 70 per cent, the second horse 20, and the third horse 10 per cent of their proportion of the gate receipts. Each has deposited \$1500 and the balance, \$1000 each, is to be deposited with Secretary Jewett, June 25. It will undoubtedly be an old fashioned contest for blood worth a journey across the continent to witness.

The Kentucky Stock Farm says: J. O. Gerrity has shipped his string of horses from Los Angeles to Libertyville, Ill. The stable includes Bon Voyage 2:12 $\frac{1}{4}$, Morone 2:13 $\frac{1}{4}$, Billie H. 2:26 $\frac{1}{4}$, and Spill 2:12 $\frac{1}{4}$. Helen Norte 2:09 $\frac{1}{4}$ also shipped with Gerrity. Gerrity thinks Zombro 2:11 is destined to make a great sire. He says if his colts in training in California alone were given records, and there is not one of them but can go in 2:30, he would become the leading sire of the year of 2:30 performers. He says he knows of six of his get at Los Angeles that can beat 2:15. The pacer Spill, mentioned above, started in eleven races last season, won nine and was second in two. Gerrity speaks in the highest praise of Liberty Song, the two-year-old colt by Liberty Chimes 2:22 $\frac{1}{2}$. The colt recently trotted a mile right at 2:30.

Frank J. Sifford, of Ventura county, is on a trip to Oregon and Washington looking for work horses. He wants to buy several hundred for the Southern California trade.

Easter Bells, a full sister to Sir John S. 2:18 by Diablo, is being worked at the trot over the Marysville track and if she stays right there will be something doing down the line this season when she starts.

Without exercise, it is impossible for the muscles of young horses to develop, hence the necessity of a good-sized field for them to run in. If you would have horses with endurance, give the colts a chance to develop their muscles.

Briney K. 2:11 won the cup race at Denver last Friday for his new owner, Mr. J. Fred Roberts. The race was to wagon, best two heats in three. Briney K. won the first heat in 2:13 flat and had an easy time winning the second and final heat in 2:18. His only contestant in this race was Mr. Colburn's horse Congressman Sibley by Cecilian.

Rey del Valle, the colt raised by Geo. Davis of Pleasanton and sold East as a two-year-old, is in Ed. Benyon's string this year, and that excellent reinsman expects him to win the Chamber of Commerce Stake, which is to be paced at Cleveland this year. Rey del Valle is by Rey Direct 2:10 out of Sidlette by Sidney and paced a trial mile in 2:07½ last year.

Mr. W. S. Harkey of Gridley, Cal., is driving Devil-etta 2:14½, as a three-year-old, on the road this summer and instead of going the gait at which she took her record, she trots all the time and does not show any desire to pace. Mr. Harkey bred her to Frank Wright's fast stallion Lijero by James Madison that paced a trial mile in 2:14¼ as a three-year-old. Mr. Harkey thinks he should get a pretty good colt from this union and so do all the horsemen who have seen the two horses.

Mr. S. H. Crane, who now resides at 1817 Bancroft Way, Berkeley, brought down from his Turlock ranch recently a three-year-old filly by Prince Nutwood 2:12¼ out of a mare by Diablo 2:09¼, that is one of the best developed three-year-olds we have seen in years. She is large, but smooth and powerfully built, with a disposition that is about perfect. She has not been trained, but is thoroughly broken and can show a fast road gait. Mr. Crane will get her accustomed to all city sights and may have her trained later on, as she is a prospective fast trotter.

The suckling age is the period of most rapid growth in horses, and foals during the nursing period should have plenty of nourishment to stimulate natural growth. The mares should be fed rations that will promote lactation and we know of nothing better than alfalfa for this purpose. A youngster stunted while following its dam never attains its greatest possible growth. Healthy foals make growth of about four pounds a day in most instances, while the exceptions are less. We need to pay especial attention to this matter for the next few years.

There is at Nutwood Stock Farm a bay gelding by Zombro, dam Georgie B. 2:12½ by Nutwood Wilkes, that can pace as fast in the field as the other horses run. Mr. Carter intended to keep this fellow for a stallion, but the colt got sick or injured as a yearling and had spinal meningitis. For a long time he could not get up without assistance, but improved so much this spring that Mr. Carter concluded to turn him out and let him run in the pasture. He had him gelded and the colt recovered quickly from the operation. He still shows a weakness in the back, but can pace very fast and if he fully recovers should make a good racing prospect. He is a big fine fellow and it is a great pity he is not a sound horse.

Budd Doble, the great reinsman, does not come to the city as often as he did before the fire, but finds lots of work to do as well as pleasure jogging his horses at the Lawrence Stock Farm, near San Jose, where his stallion Kinney Lou 2:07¼ has made a good season. The colts and fillies by Kinney Lou are just about the neatest turned and toppy lot of youngsters in the country, and that this stallion will soon have his name in the Great Table with a list of fast performers under it, is as certain as night follows day. Homer Saxe and Mr. Doble are joint owners of a magnificent McKinney stallion out of a Dexter Prince mare that is a grand horse and a trotter. He has served about fifteen mares this year and will be worked some during the summer. He should develop into a very fast trotter.

The Trotter and Pacer of June 14th says: The fastest mile over Empire track this season was one by the pacing mare Daphne Direct 2:11½, by Direct 2:05½. Ben Walker stepped her a mile in 2:16¼, last quarter in 32½ seconds. Ben worked Ann Direct, a six-year-old black mare by Direct out of Anne Allerton 2:15¼, by Allerton 2:09¼, a mile in 2:16½, the last eighth in 16 seconds. This mare and East View Maiden are the farm candidates for the M. and M. stake. East View Maiden stepped a half in 1:04½, and did it in a very impressive manner. Princess Athel worked a slow mile, the last half in 1:04½. Direct Wilkes, a good looking three-year-old black gelding by Directwell, son of Direct, out of Edna Simmons 2:12½, by Simmons, stepped a mile in 2:29, last quarter in 36 seconds. He looks, goes and acts like a trotter right now. The rest of the horses are all going in a way to please Mr. Salisbury, the "Grand Old Man of the Turf." They will move from the Empire track about the twenty-fifth of the month.

DENVER RESULTS.

Trotting, 2:34 class, purse \$500.
Thomas M., b. g. by McKinney (Cuicello) 1 1
Brighton Boy, b. g. by Happy Allerton (Higgins) 5 2
King, b. g. by Primont (Brewerton) 4 5
Oosoola, b. n. by Zombro (Frost) 2 3
Little Major, b. g. (Williamson) 3 4

Time—2:21¼, 2:21½.

Trotting, 2:30 class, purse \$1000.
Thomas M., b. g. by McKinney (Cuicello) 1 1
T. C. B., b. g. by The Judge (Russell) 2 2
Gebby, br. g. by McVera (Ferry) 3 3
St. Elmo, br. g. by Consterne (Morgan and McGuire) 4 4
Conscience, b. m. by The Conqueror (Irwin) 5 dis

Time—2:20¼, 2:17¼.

Pacing, 2:00 class, purse \$500.
Helen Gould, ch. m. by Reward J. (Bush) 4 1
Casta Nada, b. g. by Don Derby (McGuire) 1 2
Arra E., b. m. by Albemede (Bell) 2 4
Jennie A., blk. m. by Neamott (McCoy) 3 3
Clara B., b. m. by Zombro (Frost) 5 5
Bill Dugan, blk. h. by Amerigo (Macdermid) 6 6

Capeo, b. g. by Orono (Erwin) dis
Time—2:14¼, 2:15¼, 2:20½.
Trotting to wagon; cup race.
Briney K., b. g. (Roberts) 1 1
Congressman Sibley, b. h., by Cecilian (Colburn) 2 2

Time—2:13, 2:18.

Pacing to wagon; cup race.
Jess C., ch. g. by Electwood (Gutshall) 1 1
Martha B., b. m. by Ashland Wilkes (Roberts) 2 2

Time—2:13¼, 2:18½.

PLENTY OF RACING IN THE MIDDLE WEST.

With the withdrawal of Detroit from the Grand Circuit and possibly Readville being declared off or made like Cleveland, a "betless" meeting, attention is again drawn, says Palmer Clark, to the Great Western Circuit, which is now complete without a break for ten successive weeks, as follows: Davenport, Ia., July 31 to August 3; Decatur, Ill., August 7 to 10; Pekin, Ill., August 14 to 17; Galesburg, Ill., August 21 to 24; Dubuque, Ia., August 28 to 31; Hamline, Minn., September 3 to 8; Milwaukee, Wis., September 11 to 15; Liberty, Ill., September 18 to 22; La Crosse, Wis., September 25 to 28, and Springfield, Ill., October 1 to 5.

At Galesburg there are the 2:15 trot for \$2,000 and the 2:18 pace for the same amount. At the Minnesota State fair there are the 2:13 pace and the 2:21 trot each for \$5,000, and the 2:35 trot and 2:30 pace with guaranteed purses of \$2,500. At Milwaukee the two \$5,000 purses are for 2:20 trotters and 2:12 pacers and they have also three \$2,500 purses for 2:16 trotters and 2:02 pacers and 2:15 pacers. For the fall meeting at Libertyville there are the two \$5,000 purses for 2:20 trotters and 2:14 pacers; two of \$2,500 for 2:14 trotters and 2:20 pacers; two of \$1,500 for 2:10 trotters and 2:05 pacers; together with a great number of \$1,000 purses at nearly all of the meets, the entries to which close at the same time.

The West is indeed fortunate in the matter of opportunities for horses to win some money this year, as preceding the Great Western Circuit comes the Illinois Valley Circuit, embracing La Salle, Mendota, Aurora, Ottawa and Streator, commencing July 4 and ending August 3, with a total of \$30,000 in purses and only 110 miles covered in the total shipment for the circuit.

The Cedar Valley circuit in Iowa, with its \$30,000 in stakes and purses, is now in progress, and will continue for twelve successive weeks, and added to this might be mentioned the Illinois Corn Belt circuit, with six good Illinois towns, each of the places having at least three \$1,000 stakes; the Great Northern circuit in the Northwest, with about \$25,000 in purses; the Central Wisconsin Fair circuit, with a like amount; the Mississippi Valley circuit, with some \$15,000 for the five towns, to say nothing of the Kansas and Oklahoma Grand Fair circuit, with its double ten weeks' circuit of twenty meetings, and a total of close to \$200,000 in purses. The real question seems to me will be to have horses enough to go around, rather than an opportunity to race.

DEATH OF CLAUDE.

Claude, M. J. Daly's six-year-old bay horse by imp. Lissak from Lida H., died at Edward Corrigan's farm near Lexington June 20th. During his long and notable turf career Claude gained the title of the "iron horse." In four seasons he won thirty-two races, eight of them stakes, and he is said to have traveled more miles than any other thoroughbred of note that was ever raced in this country. In 1905 he won the California, St. Louis, Tennessee and Canadian Derbies. His two greatest races, however, were when he carried 127 pounds to The Picket's 115 and finished second to the son of Falsetto in the American Derby, run in record time, and again when he carried 132 pounds to place money in the Burns Handicap in California. Claude's total earnings figure up over \$63,000. He started 108 times, finishing first thirty-two times, second twenty-two times and third twelve times and being unplaced forty-two times. He was bred by W. P. Knight of Nicholasville, Ky., and was bought as a yearling by S. C. Wagner of Dayton, O. M. J. Daly purchased him as a two-year-old and owned him throughout his racing career. For his owner he earned a fortune in stakes, purses and wagers. He was sent to Mr. Corrigan's farm for stud service, as it was believed he had a bright career before him as a sire. His death was very sudden. He was sick only a few minutes and it is considered probable that death was due to the rupture of an intestine.

THE ENTERPRISE OF NEW ENGLANDERS.

New England horsemen are pleased that the big \$15,000 match race between Sweet Marie 2:04¼, Tiverton 2:04½, and Wentworth 2:04½ will be decided at Readville, July 4.

The Readville Association has for a number of years past secured the big events of the trotting turf and this year the management is determined to have something entered that gives promise of increasing interest in the sport in this city.

June 1 was the time set for the second installment of \$1000 from each of the parties to the agreement to be paid. The outlook for securing the feature event of the season was so good that Secretary Jewett of the New England Breeders' Association went on to New York and met the representatives of the three great trotters. He found them all on hand, brim full of confidence, and each of them had a certified check for \$1000 which they deposited with the Readville secretary, as final stake holder of the race.

In speaking of the meeting Secretary Jewett said: "If I had any previous doubts as to the genuineness of the contest or the confidence of winning, or the condition of any of the horses in the race, they were soon dispelled. Why, that Philadelphia crowd is cock sure that Wentworth, the Canadian-bred gelding, has the race all won. Alta McDonald appears to have supreme confidence in the prowess of the big daughter of McKinney 2:11¼, and the Tiverton people are so sure of winning that when they let go of that \$1000 one could see that they were almost ashamed to take the other fellow's money."

With the money to be added by the Readville Association the race will be the most valuable that will be decided on a trotting track this year. Considering the early date of the race, the average horseman would be inclined, considering their past performances, to consider that one of the two geldings has rather more than an even chance of beating the mare, though as a proposition to tie to the season through she would doubtless be the choice of most. It is true that Sweet Marie has not shown her best form early in the season in previous years, but the incentive to win this race will be so great that Alta McDonald will hardly take any chances in the way of babying the big bay mare.

The race at present appears to be as open a one as could be desired. All three horses give promise of coming to the wire in prime condition and ready to do battle royal for the big purse. In order that there might not be any fizzle, in case of an accident to one of the horses, or sickness, it was decided at the New York conference that the balance of the \$2500 a side deposit be made on June 25 instead of the day before the race, which will give the Readville management a chance to protect their patrons from a possible fizzle.

Notwithstanding the fact that pool-selling will not be allowed on Massachusetts tracks this year, Secretary C. M. Jewett of the Readville track is going right along to make the season as successful as is possible.

ANSWERS TO CORRESPONDENTS.

J. B. Durand, Santa Rosa—The mare Black Baby by Reavis' Blackbird is not registered, nor is she eligible under the present rules. The stallion Black Hawk by Black Ralph is not registered.

A. Rosa, Morgan Hill.—As we have not yet received the Thoroughbred Stud Book from the East we cannot give you the breeding of the horse in question, but will publish it as soon as the books arrive.

POPULARITY OF HARNESS RACES.

That racing the thoroughbred depends largely on the profit that comes to the owner and the bettor has been shown more than once, yet never more strikingly than in the case of Washington Park, which association abandoned a meeting after it had started because the management realized that without book-making the attendance would be so light that disaster would follow the attempt to continue, writes Andrew Leonard in Kentucky Farmer. On the other hand, trotting meetings will this year be given both at Readville and at Cleveland without pool selling or betting in any form, and yet I venture the prediction that the entry lists will show no appreciable difference from those of former years, that the fields will be as large and the attendance, even if not quite up to the standard, indicative of the popularity of the sport. When the race for the Cleveland Cup was decided a few years ago at Cleveland over 25,000 people journeyed to the track to witness the contest between three great horses, and yet no opportunity was afforded them for wagering a dollar and no intrinsic value was attached to the trophy which went to the winner. The American people, especially that part which lives in agricultural districts, cares little for any form of racing except that which is furnished by the light harness horse, and while running races are more fashionable and attract greater crowds in cities, the number of meetings held in this country is limited in comparison with those given for light harness horses.

Last season over three thousand trotting meetings were held in the United States, with an average programme of \$3,000 to be awarded winners, or a total of \$9,000,000 which was raced for by trotters and pacers. It would be impossible to maintain these meetings if it were not for the fact that owners of light harness horses are to be found in such numbers that racing without profit to themselves can thrive, or if the sport was not immensely popular with the masses.

SALE OF DEMONIO YEARLINGS.

The fourth annual sale of yearlings by Demonio 2:11½, bred and raised by the Suisun Stock Farm, Rush & Haile proprietors, took place near Suisun on Saturday, June 16th. The following account of the sale is from the columns of the Suisun Republican:

Considering the unsettled conditions at the present time, due to the recent disaster to San Francisco, the prices, while being lower than those of the sales of last year, were satisfactory to the owner, as well as to the purchasers.

Auctioneer James P. Martin of Dixon mounted the block on schedule time, 2 o'clock p. m., and after making a few preliminary remarks, began the sale of the Demonio yearlings, owned by Messrs. Rush and Haile. All of the fourteen head were sold, bringing a total of \$1,565, or an average of \$111.78. There was not a poor one in the lot, and the purchasers were therefore fortunate in securing gilt-edge animals at much less than they were worth.

All the yearlings were sired by Demonio 2:11½, the purchasers and prices being as follows:

1. Sorrel colt, dam Mamie Comet, to George Reed of Suisun, \$70.
2. Bay filly, dam Rosebud, to Martin Ennor of Woodland, \$82.50.
3. Brown filly, dam Sable Dew, to Henry Noel of Vacaville, \$152.50.
4. Sorrel filly, dam Mamie Airlie, to Henry Smith of Cordelia, \$135.
5. Bay filly, dam Elorita, to T. H. Wood of Suisun, \$180.
6. Brown colt, dam Nellie T., to H. B. Muzzy of Bird's Landing, \$65.
7. Sorrel colt, dam Eva, to Frank J. Taylor of Bird's Landing, \$150.
8. Sorrel colt, dam Minerva, to Dorecy Cooper of Elmira, \$155.
9. Sorrel colt, dam Sis, to W. S. Killingsworth of Vacaville, \$117.50.
10. Sorrel filly, dam Jessie S., to L. P. Larsen of Rio Vista, \$70.
11. Sorrel filly, dam Hanna, to W. H. Bryan, \$72.50.
12. Sorrel colt, dam Oakwood, to F. S. Gurnette and W. B. Connelly, \$95.
13. Bay colt, dam Laura H., to Henry Smith of Cordelia, \$120.
14. Bay colt (2), dam Laura H., to Grant Chadbourne, \$100.

There were twelve head of geldings, mares and colts of the Lewis Pierce Stock Farm, owned by Lewis Pierce, sold by Auctioneer Martin, bringing a total of \$977.50, or an average of \$81.46. All these colts were sired by Our Captain.

OPENING OF THE NEW SPEEDWAY.

Editor Breeder and Sportsman—The new athletic grounds and speedway in Golden Gate Park are assuming shape and visitors to the busy spot can now form an idea of how the grounds will look when completed. Work on the grade for the three-quarter mile oval track for harness horses is more than half done, and by the last of September should be ready for the horses to speed over. As the road drivers and driving clubs of San Francisco took the initiatory in the scheme which resulted in the building of this beautiful track and grounds, it is eminently proper that its opening should be under their auspices. I suggest therefore that when Superintendent McLaren is prepared to name the date when the work will be completed, that committees from the Golden Gate Driving Club, the San Francisco Driving Club and the Pacific Coast Trotting Horse Breeders' Association meet and arrange a program of matinee racing for the opening day. All the athletic organizations should be invited to take part also, and a program of events could be arranged that will draw the largest crowd ever seen in Golden Gate Park. If the work is completed by that time why would not Admission Day, September 9th, be an excellent date for the opening? These new grounds are unlike anything to be found elsewhere in the world, and will be one of the great attractions of our beautiful park. The opening of the same to the public should be made a gala occasion and no more auspicious day could be selected than the anniversary of the admission of California into the union of States. The horsemen should see to it that a horse show and parade as well as harness racing be given that will be high class in every way and worthy the great State that has produced more world's champions than any other.

Respectfully,

A HORSEMAN.

At Cleveland track last week James Thompson worked Baldy, Mr. A. B. Spreckels' green pacer by Cupid 2:18, out of the dam of Dione 2:07¼, a mile in 2:16¼. William Cecil gave Lady Mowry 2:12¼, a mile in 2:22, with the last quarter in 34½ seconds. Jack Curry, behind Tuna 2:08½, and Gil Curry, driving Brilliant Girl, went a mile in 2:11½, the final quarter in 31½ seconds. All the California horses at Cleveland seem to be doing well.

Ed. Geers is now located at the Libertyville, Ill., track with his large stable of horses. Ardelle, by J. H. C., his C. of C. candidate, is working fine, and the "silent man" thinks that his chances for carrying away the money in that big stake are good. Ardelle, before leaving Memphis, worked in 2:08½, with the last half in 1:02½. His M. and M. entry, Fashoda 2:24¼, by Barondale 2:11½, dam by Wilkes Boy, is also acting good, and although she has not been credited with any sensational miles, she is said to have a great turn of speed and good racing qualities. He will remain at Libertyville until the opening of the Grand Circuit, and undoubtedly will start some of his horses at the meeting there the first week in July.

CHAS. DE RYDER'S STRING.

The Pleasanton trainer, Chas. De Ryder, began his campaign of 1906, at Cedar Rapids, June 12th. His first start was in the 2:15 pace, where he had entered the Welcome mare Babbie. There were nine starters, and Babbie finished 8-3-8-7-8. The fastest heat in the race was in 2:16.

In the 2:20 pace De Ryder started Geo. Perry, the Waldstein gelding, and took third money, the horse being 2-3-4-4 in the field of seven pacers. The fastest heat in this race was the first, in 2:22.

Maud Sears, by Wayland W., was his representative in the 2:20 trot, and fourth money was her portion, there being four starters and the mare finishing in fourth position every heat.

In the 2:05 pace Alpha W. 2:08 got third money, the best time being 2:13.

In the 2:10 trot Sunbeam 2:12½, by Hambletonian Wilkes, was driven by Mr. De Ryder. The horse won the first heat in 2:18¼, and took second money.

Charley Belden, the fast bay gelding by Lynwood W., was the stable's representative in the 2:35 trot. There were seven starters, and five heats were trotted before a decision was reached. Charley Belden was second in every heat but the second, which resulted in a hot fight between the two heat winners, and in that heat he was third. This gave him third money, and he got no record. The heats were in from 2:23¼ to 2:28½.

In the 2:30 pace there were nine starters. De Ryder started Dr. W. L. McDonald's mare Swanhilda, and took second money with her very handily, the gray horse Subscription winning in straight heats, the fastest of which was in 2:18¼.

All the purses at this meeting were \$300 each, the track a half mile ring. The following week Mr. De Ryder moved his horses to Decorah, where the track is also a half mile oval, and the purses were \$300.

In his first race at Decorah he won second money with Geo. Perry in the 2:20 pace, Brown Hal winning in straight heats. The best time was 2:19¼.

First money went to Mr. De Ryder's Alpha W. in the 2:05 pace, after dropping the first heat to Orphan Boy in 2:10¼. Alpha W.'s best heat was the fourth, in 2:12¼.

Charley Belden moved up a peg and took second money in his race, the 2:35 trot, the heats being 2:22, 2:22¼ and 2:22¼. In the 2:25 trot Charley Belden was again a starter, and again took second money, with the best time 2:21.

Swanhilda took second money in her race at Decorah, the fastest heat being 2:21½.

The net winnings of the De Ryder string at these two meetings was \$405, and none of the green horses took records.

FROM VICTORIA.

Breeder and Sportsman.—Captain John, the chestnut stallion by Tennysonian, dam Fanny Putnam 2:13, paced a nice mile on the Victoria half mile track last week for trainer Millington, and was shipped yesterday to Edmonton, N. W. T., where he will make his first start.

Mike Director, by Montana Director, paced a nice easy mile in 2:29 on this track last week. Mike has had just four weeks training and acts like a good sort of a pacer, with Director symptoms.

I enclose program for the July meeting to be held at Victoria, and hope to see a lot of Californians up here.

Irvingheart, bay stallion by Lockheart 2:08½, is a new addition to Victoria's standard bred residents. He is a grandly formed bay stallion, six years old, with good action and a nice turn of speed.

Sophia McKinney's colt by Nutwood Wilkes is a good enough looker to satisfy the most exacting critic. Glad to see that your paper is taking on its old familiar shape, and hope that all your old patrons and lots of new ones are keeping you busy receipting old bills and lots of new ones. Yours,

C. A. HARRISON.

Twenty head of drafters were sold at auction in Chicago last week for \$7,050, an average of \$352.50. This is the record price for that many work horses sold at one sale in the Chicago market.

Sam Gamble writes us that he is at Rocklin for a few days and will stay there until after the 4th of July, as the Rocklin people will have five races on that date, a mixed free for all, a 2:40 mixed race, a gentleman's road race, and two running races. Mr. Gamble says he will assist his good friend Eugene Tuttle, the "McHenry" of that section, to win a race with his handsome pacing mare Hattie T. by Stam B. the great. It looks as if there would be a large attendance, as all within miles of Rocklin, including the fair sex, take a hearty interest in the coming events. Mr. Gamble writes that he has been quite sick, but his good friends took care of him and did him a lot of good.

The Eureka Times of June 10th says: Blooded horses are arriving at the South Park race track to get into condition for the events to take place the first week in July, and there is every evidence that the meet will be a decidedly good one. More fast animals are expected to come. On the steamer Eureka, Thomas McNichol's Tony Girl arrived from Denver, and yesterday morning was driven on the track. Mrs. Dr. Michael's Lela Sen has been sent to South Park from Fortuna and will contest in the three-eighths mile dash. Within a week or ten days more of the valley's fast horseflesh will be coming in. Robert Noble, Robert Patrick and Mat Zahner and others expect to have horses in training before long.

SIDNEY DILLON'S AT INDIANAPOLIS.

While the matinee was in progress on Saturday last, the horsemen were greatly interested in the fast manner in which the Sidney Dillon colts stepped for Millard Sanders, says Western Horseman. He undoubtedly showed more speed than has any other trainer in the country this year. All of the twenty-five colts owned by the Hon. Sterling R. Holt are in splendid condition and the speed Sanders showed was a revelation to the spectators.

The greatest show of speed was with the four-year-old pacing mare, Mary Dillon. She stepped a half in 1:01¼ and a little later a quarter in 29½ seconds. It was the fastest half and quarter shown to date anywhere and the filly was hitched to a cart, making the performance the more remarkable. With a good day and track and hitched to a sulky, this filly can show a half in a minute, for she accomplished her task very impressively.

Kate Dillon, a three-year-old pacing filly, went a full mile in 2:17 and a half in 1:05. The trotters did something in the speed line, too. Lottie Dillon trotted a mile in 2:16. Helen Dillon (Helen Keyes) negotiated a mile at the diagonal gait in 2:17 and showed a quarter in 32 seconds. Carrie Dillon (3), a filly that looks and acts more like Lou Dillon than any in the bunch, was worked a half in 1:11 and a quarter in 35 seconds. She will be given a record close to 2:30 this summer and Sanders thinks she will do to train for a couple of years more. She has more speed now than the champion trotter had at the same age.

A couple of baby trotters showed what the young Sidney Dillons could do within six months of being broke. Harry Dillon (1) trotted a quarter in 42½ seconds and showed an eighth in 20 seconds, while the two-year-old Ruth Dillon trotted a quarter in 35½ seconds. It was a good day's work for Sanders and the Sidney Dillon family. A little later on Sanders promise to show some real speed with the bunch of youngsters he is training. Watch when they come out hitched to sulkies.

CAYUSES AT AUCTION.

There was an interesting horse sale down at the stockyards yesterday afternoon, says the Portland Oregonian of June 20th. The majority of the animals sold were cayuses from the ranges of Eastern Oregon, a wild and shaggy-looking lot. A few draft horses were in the bunch, but most of the interest centered in the unbroken ponies.

They were brought here by John Twaddle, a St. Louis horse trader, who acted as his own auctioneer and who certainly knew his business. About 200 buyers were in attendance at the sale and all the small boys and unemployed men of the neighborhood were perched on the fences as spectators. The bidding was spirited and the auctioneer had no trouble in getting prices up where he wanted them.

The cayuses were brought out four or five at a time, and they went off like hot cakes. Many of the purchasers were express drivers and keepers of small livery stables who will probably have the time of their lives in breaking in the beasts. Twaddle brought down two cars of the horses, all told. The cayuses sold at an average price of \$35. When the horse cannery was running down at Linnton such stock could be bought on the ranges for \$1.50 apiece.

A number of hay buyers have been in the valley during the past week buying for the San Francisco and Oakland markets, says the Hollister Free Lance. Altogether about 5000 tons were bought, the prices ranging from \$6 for volunteer to \$10 and \$11 for good wheat hay. One lot of wheat hay, damaged by the rain, was sold for \$9 per ton.

The New Mexico Territorial Fair will be held at Albuquerque, September 17 to 22, and four stakes of \$1000 are offered 2:20 trotters, 2:18 2:13 and 2:09 pacers, with \$500 stakes for 2:14 trotters and 2:25 pacers. Horses entered at this meeting will be returned free of charge by the Atchison, Topeka & Santa Fe Railroad, to all points of this line of road in California, New Mexico, Arizona, Colorado and Kansas, with stop-over privileges at Las Vegas and Trinidad.

One of the most remarkable and creditable exhibitions which has ever been witnessed on a track was given at old Waverly Park, near Newark, last month by the twenty-year-old mare Bush 2:09½, by Aleyone 2:27, who trotted a mile over that half-mile track in 2:19½, hitched to a bicycle cart. The last eighth was timed in 15 to 15½ seconds and the track was in far from good condition. Mr. George Stengel, who owns Bush, will breed her in July to one of his stallions and in the meantime he will prepare her to go against the track record, 2:14½, held by Rifle.

A J. Welch is giving up a good deal of his time now to the improvements on the track at Charter Oak Park. He estimates that it will be at least two seconds faster than ever before. The belt of clay at the pole now entirely circles the track and it is being broken up with a brush drawn by a pair of horses, with a leveler in front. This breaks the clay up gradually and a better effect is obtained than if a roller was used. Mr. Welch believes that earthworms are necessary for all soils, notwithstanding that greenkeepers try to get rid of them. It is claimed that the cylindrical canal the earthworm bores has aided plant life by opening up the soil. Its food is the humus of the soil. The process of digestion of the earthworm converts the crude vegetable particles in the soil into a soluble food that is absorbed eagerly by grass and plant roots.

LONG CONTINUED MEETINGS A MENACE.

Down in Kentucky, where the love of horses and horse racing is the principal article in nearly every man's creed, a jockey club is asking for dates for a longer meeting than the State Racing Commission is willing to allow. Col. Jack Chinn, a man who knows as much about racing as any man, is chairman of the commission, which protests so strongly against this long continued racing. The Chicago Horseman recently contained the following editorial in regard to this matter:

In the United States Court at Louisville, May 22, the motion, in behalf of the Douglas Park Jockey Club, for a preliminary injunction against the Kentucky Racing Commission, was argued by able counsel. The affidavit filed by the Douglas Park Jockey Club alleged that the racing commission had discriminated against it in the assignment of dates. The racing commission, in praying for a dismissal of the injunction proceedings, adopted the frequently proclaimed views of this journal on the policy of continuous racing with betting in one locality. The commission has no knowledge of the amount of money invested in Douglas Park, but it holds that the enforcement of the statute will result in benefit instead of injury to the property. In order to protect and keep up an interest in running races it is necessary that the races be given sporadically and in periods of a short time in communities like Louisville and other places in Kentucky. "Continuous racing leads to pauperism and crime; the tendency, if not the inevitable result thereof, after the appetites of those who can afford time and money for the amusement is satisfied, is to gather together a concourse of the idle and shiftless and disorderly persons with the trail of evils that ensue." The scandals growing out of such racing threaten the breeding of horses as an art and industry, and the action of the legislature and the approval of the governor were for the protection of the great horse growing interests of Kentucky. This kind of argument from a commission of which Col. Jack Chinn is the chairman, would have found no expression in Kentucky a short time ago, but self-protection is a primal law, and the breeders of the State could not remain silent without committing suicide or inviting assassination. The torch uplifted by this journal is not loved by the forces of evil, but it lights the way to security in breeding and development. Men of character and stability commend, and we accept this as an evidence of the spread of healthy sentiment. If the leading daily journals will now join with us in an effort to curb the growth of the selfish commercial spirit in racing, they will improve the morals of their respective communities and add to the value and permanency of well conducted breeding farms.

When Gen. Jas. F. Robinson was president of the Kentucky Association at Lexington, Col. M. Lewis Clark, president of the Louisville Jockey Club, John M. Harney, president of the St. Louis Jockey Club, and Gen. Phil. Sheridan, president of the Washington Park Jockey Club, racing in the middle West was on high ground, and there was no suggestion of hostile legislation. The culture, the fashion of Chicago, passed through the gates of Washington Park, and the sturdy people from the workshops and the farms mustered by the ten thousand on the well-appointed grounds, and those who witnessed the spectacle will never forget its life and color. But speculative greed grew until it dominated the situation in Chicago, and now Washington Park is a wreck so far as its costly buildings are concerned, and the land will soon be divided into city lots. All the other tracks are deserted, and their silence is eloquent of the power of decent public opinion. The tracks of St. Louis are also closed, and yet daily journals, posing as the organs of intelligence and morality, give space to form sheets of races run on far distant courses, and thus do everything in their power to promote the operations of the handbook men who tempt wage earners into risks which they cannot afford and who create a feeling of discontent and unrest. Circulation is desirable, but those principles which are the bulwark of the municipality, the county and the State should not be sacrificed to obtain it. The greed of running track promoters has placed restrictions upon the clubs which are content to give one week of light harness racing, and it would be strange if the breeders and owners of trotting horses did not vigorously protest. The harness horse breeders are confined to no section of the country; they are found in every State in the union, and they outnumber the running horse breeders twenty to one, and the time has come for them to give earnest and united expression to the wrongs inflicted upon them.

"Did you ever know how these guideless wonders originated?" said Ben Kenney in the presence of a representative of The Horse Review. "Well, I will tell you. Several years ago 'Red' Gerrity was driving a pacer called Happy Jack, and he was about the worst puller ever hooked to a sulky. After driving Happy a heat 'Red's' arms would be almost paralyzed, and he would be ready to drop with exhaustion. One day while teaming the horse he became so disgusted that he threw down the lines and said, 'Go, blame your old hide!' and let the gelding go without driving. Apparently he went just as well without being driven as he did before, and right then and there the first 'guideless wonder' was made. They began using him as one right then, and pretty soon the woods were full of them." "There never was a guideless wonder that I ever heard of," said Captain Boyce, "who was not an awful puller, and nearly all of the most successful ones were horses who were such bad ones that it was impossible to drive them with any degree of comfort."

FOREIGN GOVERNMENTS PROMOTE HORSE BREEDING.

It is a humiliating thought to all progressive and patriotic American citizens that this government stands alone among the enlightened nations in not promoting horse breeding. It is true that within the last year the Agricultural Bureau has made an effort in a small way to produce a new type of the general utility horse, but it is not well grounded, nor is it of sufficient scope or moment to deserve even mention, as a national enterprise. And we are still further humiliated in the thought that this is the only great country around the world where horse racing is under the ban of hostile legislation.

In England, Austria, Russia, Germany and Italy horse racing is the sport of kings. In France where they have no kings, it is under the auspices and patronage of the government.

France has already expended \$1,540,000 in promoting the breeding of horses. The German Empire has expended almost \$1,000,000. Austria has expended \$700,000, and even Italy, with the Roman race all died out, has spent over \$500,000. Russia has spent more than France and Germany combined, and even now when the Czar's dominion is threatened with revolution, Russia has agents in our markets buying the best products of this country for the purpose of improving the quality and speed of the Russian. Even Turkey, supposed by many Christians to be degenerate, is waking up to the importance of the horse breeding industry, and the Sultan has now under government auspices and support four large state studs, mingling the original Arab blood with the stouter Orloff of Russia, and the fleet American trotter.

Even the large South American republics that inherited the brutal bull fight habit from old Spain, are breaking away from blood and brutality and adopting horse racing as a more wholesome and enlightened national pastime. And in order to have horse racing, they must breed the speed to race. The breeders of the Argentine Republic are now in the best horse markets of the world buying the best sires that money can buy.

Not only are all these mentioned foreign countries engaged in the encouragement of horse breeding on moral or ethical considerations, but on economical or commercial considerations as well.

It is the economic feature that has moved Japan, just emerging from the greatest war of modern times, to send skilled students of the breeding problem to the United States to purchase the best products of our stock farms, in order to improve the inferior Japanese breeds.

There are a number of poorly informed persons, of pug nosed persistency, scattered all over the Northern and Eastern States, but not in many west of the Mississippi River, who regard horse racing as immoral, and unfortunately this element has had much to do with the enactment of hostile legislation, in some thirteen States, and this legislation has damaged the breeding industry in untold millions. But in all that great empire west of the Mississippi River, this element has about disappeared, except Missouri.

It takes time to educate, and education in the line of sports and pastimes is so hedged about with inherited prejudice that the evolution to broader and more wholesome views has been slow.

Every country in Europe learned the lesson five hundred years ago, that all people will have their sports and pastimes, and that good bodies and good blood always promote the best moral growth. In this respect England, France and Germany learned the lesson of history to far better purpose than the dominating factors of our country, especially in New England. It is a well established fact with two thousand years of so-called Christian civilization to verify it, that the introduction of the horse in public amusements has always marked the improved moral tone of every people. In that period of brutal rule, so vividly depicted in that great historical novel, "Quo Vadis," when Nero sat above Rome, wild beasts from the forests of Germany were brought to fight gladiators and Christian martyrs in the Roman amphitheater. Later on, when Rome was touched with a more benign civilization, under the Emperor Augustus, the bloody bouts between human beings and wild beasts were supplanted by chariot races, where the horse was the main factor of the pastime.

The horse was made for man's uses and recreations and he is no way responsible for the universal habit of the American people of betting.

Make horse racing a crime by law and kill every horse in the country and the betting habit would still go on just the same.—American Sportsman.

Martin Carter recently sold a 22-months-old colt by Bonnie Direct 2:05¼, dam Georgie B. 2:12¼ (dam of Miss Georgie 2:10¾), by Nutwood Wilkes 2:16¼, to Mr. J. C. Quinn, the well-known horseman of Honolulu. The sale came about through an article in our last Christmas number describing the horses at Nutwood Stock Farm. After reading the article Mr. Quinn opened correspondence with Mr. Carter, with the above result. There is no better bred colt in California, and he will make a very valuable horse and sire.

Dr. Boucher took Robert Niles good mare Derbertha, own sister to Don Derby 2:04½ and Diablo 2:09¼, to Denver with him, and will start her at some of the meetings in the Middle West. She is entered in the 2:12 class pace at the Lexington meeting. Custer by Sidney Dillon, Bystander by Zolock, Rey del Valle by Rey Direct, Sallie Pointer by Sky Pointer, Stiletto by Steinway, Bonnie Steinway by Steinway, and Italia by Zombro are the other California bred horses entered in this race. There are fifty entries all told.

THE SADDLE HORSE.

A writer on saddle horses has this to say in the Breeders Gazette: Riding on horseback has never been so popular as it is now in all the large American cities. Prices have never been so high for finished saddle horses, and it follows of course that the supply of saddle bred animals falls far short of meeting the demand. Horses of all kinds of breeding have been pressed into saddle service and for those which have proved apt pupils very good values have been realized. The history of the world proves that the older a nation becomes the greater is the inclination to take equestrian exercise. In the city the saddle horse is not a necessity. He is a luxury. Therefore he is sought by the men and women who can pay for luxuries, the superfluities of life, and that means that it does not much matter what sort of a price is asked. If the horse is good enough he will bring the money. But unlike most luxuries the horse is of decided benefit. There is no healthier pastime than riding a good horse, and even a very mediocre mount may be made to yield a great degree of pleasure. That this is being recognized generally seems plain. The livery stables where saddle horses are kept for hire can not meet the demands of customers. Riding academies are taxed to their utmost capacity, proving that those who do not know how to ride desire to learn the art. Anyone who really knows how to ride and is willing to impart his knowledge can obtain lucrative employment quickly.

Many wealthy men who have families are having their children taught to ride. Some of these men enjoy riding and some of them—perhaps more of them—do not, yet they want their children to ride well. There is as much of promise in this phase of the popularity of the saddle as in any other. Children brought up with an intimate knowledge of the horse and riding him, beginning with the Sheltie and progressing upward and onward through the cob stage to the full-size horse, always retain a love for the equine subject and delight to be about him and enjoy him. It does not seem that there need be any fear entertained for the future of the American saddler.

We believe that the present popularity of the saddler is one of the most important signs of the times that can be listed. Association with the saddle horse breeds manliness in man. It is a bad horse indeed that has not some good qualities and these good qualities invariably find reciprocation in the rider. It is not recorded which of the American humorists first called attention to the "storm deck of a horse," but the one who first made the phrase did better than probably he knew at the time. It is something of a trick to stay on the back of a good horse. No one likes to be put down ignominiously and the effort of brain and muscle that is required to keep from parting company with one's mount must of sheer necessity be good for the rider. This is getting down to first principles, and we will venture the assertion that there never yet was a good boy who would not have been a better one had he been early on ponyback, and the boy is father to the man. There are black sheep in every flock and there are men on whom the influence of the horse has been only for bad, but such are the exceptions. That the influence of the saddle horse is more for good than that of the other members of the equine family finds abundant proof in the affection displayed by men and women for the horses they ride as compared with those they drive or work. From Alexander to Lord Roberts the men who have made history and builded empires have been horsemen.

BOSTON PARADE BENEFITS HORSES.

A feature of the recent Work Horse Parade in Boston was a gold medal offered by the Massachusetts Society for the Prevention of Cruelty to Animals, which was awarded to Joseph Thompson's Dick, 30 years old, and in service 27 years. Fatty Darling, having for 18 years answered duty's call in the Boston fire department, was given a special medal, although not entered for competition, and also had the honor of leading the parade. C. F. Hovey's Major won the first prize in division 13, having seen a dozen years' work. One of the most remarkable animals in the parade was Ned, winner of the old-horse prize a year ago. He was in the regular ranks, and was given round after round of applause as he carried off a red ribbon. Ned is the property of James F. Wier, of Somerville, who has used him every week-day for 21 years. In his long service the horse has not missed a meal nor had any sort of sickness. He is fat and shows no signs of his 30 years. In fact, it takes a fair sort of a horseman to drive him now. The silver medal for veteran drivers was taken by Cornelius Corcoran, who has been with one firm for 44 years. A noticeable driver in the parade was Charles W. S. Smith, who gave a demonstration of how simple it is to turn a six-in-hand in a narrow street—when one is an accomplished reinsman. Smith handled a magnificent hitch of six grays, and turned them twice in front of the reviewing stand. There were many other noticeable features in this remarkable parade, the only one of the kind held in the United States, each one of which exerted an influence that will work to the good of man's most useful and faithful animal friend, the horse. It would be a grand thing for the owners of horses in every city if a parade based on similar lines could be made a feature of every big town in the country. The influences of such a parade make for the better treatment of horses and the consequent lengthening of the period of their usefulness, something that means much to every owner of work horses.—Horse World.

ROD, GUN AND KENNEL

Conducted by J. X. DeWitt

DOINGS IN DOGDOM.

The outlook for the Stockton bench show in October seems to be particularly good. Needless to say, there will be a healthy entry list from the cinders district. Among the youngsters contemplated for the Bull Terrier benches will be two bitches, one that Ed Attridge thinks a great deal of, and his approval of a Bull Terrier means something; the other is George Flexner's ten months' old bitch. Ch. Meg Merrilies II, if entered for competition, will cut out the running for all the matrons young and old. If Woodlawn Baron is in his Los Angeles form it will take a lot of style and class to wrest the ribbons from a conspicuous place in the cabinet of trophies won by Mr. and Mrs. Thorburn.

The dates for the Stockton Kennel Club show are October 11th, 12th and 13th. It is reported that Mr. James Cole of Kansas City has been invited to judge the show. This selection is one that will be most satisfactory to the majority of the exhibitors. Mr. Cole is a popular Coast judge, and a gentleman who is painstaking, courteous and a dog fancier of authority and experience. Another report is that Mr. George Cranfield may assume the duties of superintendent. This is also assuring for the fancy and exhibitors. No doubt Spratts will bench and feed, so taking it all in all, Stockton show promises well, considering that the big feature of the Coast circuit has been unavoidably postponed.

The officers and committees of the Stockton Kennel Club are the following: Frank Hillman, president; W. H. McKay, vice-president; Charles Heffernan, secretary; A. M. Barnett, treasurer. Directors, Dr. F. P. Clark, C. Leonard, Geo. E. McLeod, C. E. Owens, W. Popplewell, J. Harry Russell and F. N. Vail.

Trophies and prizes—Dr. Fred P. Clark, Charles E. Owen, F. N. Vail and G. E. Cranfield.

Bench show committee—Charles J. Haas, C. Leonard, Frank Hillman, A. Kaiser and E. Harris.

Press—George E. McLeod.

Premium list—W. H. McKay, C. Leonard.

Finance—F. A. Hillman, W. Popplewell and R. H. Groves.

Hall—G. E. Cranfield, C. E. Owen and W. H. McKay.

A large number of handsome silver and gold trophies will be offered and there will be many valuable prizes to stimulate competition. The club has decided to give silver medals to all dogs in winning classes in cases where trophies are not allotted. The show will probably be held in the Pavilion skating rink.

By a unanimous vote the following well-known society women of Stockton, all of whom are owners of blooded canines, have been elected honorary members of the Stockton Kennel Club:

Mrs. A. M. Barnett, Mrs. R. H. Groves, Mrs. W. H. McKay, Mrs. George Cranfield, Mrs. Frank A. Hillman, Mrs. W. Popplewell, Mrs. C. E. Owen, Mrs. F. N. Vail, Mrs. J. P. Sargent, Mrs. Charles Heffernan, Mrs. J. Harry Russell, Miss Effie Shepherd, Mrs. C. W. Logan, Mrs. C. W. Cadle, Mrs. F. P. Clark, Mrs. George E. McLeod, Mrs. F. A. Voorhies, Mrs. G. S. Andrews, Mrs. Harry Masters, Miss Mamie E. Quinn, Mrs. Walter Parrish, Miss Felicitia Levinsky, Mrs. S. P. Elliott, Mrs. H. W. Taggart, Mrs. L. E. Akins, Mrs. J. B. Cory, Mrs. S. B. Huskins, Mrs. Ellis C. Johnson, Mrs. C. W. Yolland, Mrs. J. H. Eddy, Mrs. C. Leonard, Mrs. W. L. Irwin, Mrs. E. L. Castau, Mrs. Ed Mack, Mrs. Francis Cutting, Mrs. P. H. Dontoni, Mrs. Charles Haas, Mrs. J. H. Dougherty, Mrs. George E. Catts, Mrs. Fred C. Rothenbush, Mrs. L. J. Abrams, Mrs. F. D. Cobb, Mrs. Matt Williams, Mrs. C. D. Fontana, Mrs. W. R. Barber, Mrs. S. Bonzi, Mrs. T. S. Brown, Miss Irene Breidenbach, Mrs. T. Castle, Mrs. William Hildreth, Mrs. Harvey Condit, Mrs. W. H. Lyons, Mrs. Lewis Moreing.

James Fennell of Olympia, Wash., recently paid \$115 for the Pointer Mike, a son of Belle of Council Bluffs. Mike is a thoroughly broken dog and so well thought of in that section that his new owner was offered an advance in price shortly after making the purchase.

Richard Harding Davis' famous Bull Terrier, Edgewood Cold Steel, is dead of old age. Edgewood Cold Steel was the canine hero of Mr. Davis' novel, "The Bar Sinister," and claims the distinction, it is said, of being the only American dog about whom a work of fiction was ever written.

At the Seattle bench show a meeting of Collie fanciers resulted in the organization of the Washington State Collie Club. Arthur Murphy was elected president and E. L. Winslow secretary. The jurisdiction of the club will be within the boundary lines of Washington state, and membership will be open to all Collie fanciers of that territory. This is a good move on the part of the northern Collie men and will do much for the best interests of the breed up north, where the Collie, as a breed, is well established and has a strong following.

Fried Liver Jack, a well-known dog handler, is at present located in Los Angeles, where something may soon come off, as he is still identified with mining—undermining, those who have come in contact with him call it.

The chain that holds local dogdom in leash is still in working order, enough so to prompt fanciers, when they meet, to stop and indulge in dog talk. Kennel gossip is as absorbing a topic frequently as the insurance situation has become with the business men who are on the anxious seat.

John M. Gollobeck of Crockett, the owner of Ch. Coto Jr., recently had the bad luck to lose the handsome and good young dog Judge, a son of Cato Jr. Judge was at G. Baracco's residence, 515 Broderick street, a few weeks ago. In some unexplained manner the setter got out on the street and disappeared, nor has he turned up since. A report that Judge was seen in Oakland was a clew that did not develop material results. Judge, besides being a grand specimen of the English Setter, was also thoroughly broken.

We have heard the rumor that a one-day show is contemplated for Los Angeles on September 9th. The show will probably be under the auspices of the Southwestern Kennel Club, or, at all events, should be so, if held.

In this respect we will sound a note of warning to the Los Angeles club to be extremely careful in countenancing the invasion of their jurisdiction by any fake specialty club. A club composed of two or three active members, and possibly a few figureheads, for the purpose of giving the hall mark, is not one conducive to the interests of dogdom, and is decidedly prejudicial to the interests of a show-giving club. Such an organization is only designed as a close corporation for the profit and gain of its promoters.

The Ladies' Kennel Association of Massachusetts, at a special meeting held April 24th, at 521 Washington street, Boston, decided to forward \$50 to the general relief fund for San Francisco.

The meeting was called for the purpose of expressing sympathy and contributing substantial aid for the stricken people of San Francisco. The amount was contributed from the club treasury, and other contributions were to follow.

Among the ladies present were: Mrs. E. H. Seagrave, in the chair; Mrs. Clark, Mrs. Smythe, Mrs. Dennee, Mrs. Parmenter, Miss Brooks, Miss Stinzing and Miss Fisher.

J. I. Sparrow sold his stud dog Croydon Czar recently for a good figure. Czar has been a consistent sire, having produced a number of winning sons and daughters.

At the last meeting of the American Kennel Club the list of recognized breeds of dogs was extended so as to include among the foreign dogs "any breed in the miscellaneous class that is recognized in Count De Bylandt's book," and that work was stated as an authority in this particular extension of the list of breeds.

The action of the Pacific Advisory Board in disqualifying Chas. W. Buttes of Kansas City has been sustained, as will be seen from the following review of the case, which appears in the May issue of the A. K. C. Gazette:

Charles W. Buttes vs. Pacific Advisory Committee.—Re Appeal from Disqualification.—This appeal was presented to the Executive Board at its meeting, December, 1905, and postponed. A request from the appellant for a postponement to enable a representative to appear in his behalf at a future meeting was not granted. The contention was that F. P. Butler of San Francisco, Cal., purchased an English setter from appellant, based upon a description of the dog as advertised in the American Field of June 24, 1905. From testimony in the original case before the Pacific Advisory Committee it would appear that the dog was not as represented in said advertisement, and the appellant was suspended by the Pacific Advisory Committee until he refunded to F. P. Butler the sum of \$50, being the purchase price, and \$11.50 express charges to San Francisco, and a further sum of \$11.50, to be applied to express charges from San Francisco to Kansas City, within thirty days from the date of said meeting. From the evidence before this Board, it is of the opinion that the Pacific Advisory Committee rendered its decision according to the evidence before it, and it is therefore Ordered, That the action of the Pacific Advisory Committee be and hereby is sustained.

The Boston terrier fancy on the Coast has had a rather serious blow recently in the loss of Ascot Kennels' Mystic Spider, who succumbed to an attack of pneumonia. Spider was the pride of his owner, Colonel Jim Brooks of Ascot Park. This grand little Boston was a phenomenal winner at the April Show in Los Angeles, and was, without doubt, the best Boston on the Coast. He was by Ch. Bayside Chauncey, out of Mystic Superba.

Charles Heffernan, the popular secretary of the Stockton Kennel Club, recently purchased Ch. Laura L (Cato-Ch. Maggie F.), the well known prize winning English Setter bitch, and a producer of winning sons and daughters that are not only bench show dogs but consistent workers to the gun.

Coursing, which for two months or more past has had a setback in San Francisco, will be resumed again at Ingleside Park on Sunday, July 1st, with a sixty-four-dog stake. The owners and trainers of Greyhounds have been looking forward to this day with a great deal of interest. A large number of dogs were destroyed since the last meeting, but as they were mostly of the poorer class, the sport should be even keener than before.

The grandstand was uninjured by the earthquake and the field is in perfect condition for coursing. The jacks are very plentiful at this season of the year and are very strong and will surely lead the dogs a merry chase around the field.

Judge Frank O'Shea will be in the saddle and Harry Murray will handle the slips.

The dogs have all had a much needed rest and will be in great shape for the opening day, and it is expected that a record breaking crowd will be on hand to witness the running.

The draw was held on last Wednesday evening at 2030 Seventeenth street, the list including many of the best dogs in America to-day. The sport will continue regularly every week.

The "dovetail" judge is not an individual who is a beneficial factor in promoting the interest of bench shows nor that of general exhibitors. It would be for the mutual interest of all concerned (save the dovetailer) if club secretaries and bench show committees would turn down an offer to judge all classes or just one or two breeds, for instance, for "expenses." The coon in the expense woodpile is a fat and juicy one, when the dovetail genius covers a long distance by rail, to and from the show on a "pass." The "pass" in the expense account hatches out as a full rate fare and is thus deftly turned into coin—a thrifty system of cuckoo financiering that would, if known, meet with the deserved discouragement of the transportation officials.

Other plumage in the "dovetail" raid is a string of dogs garnered here and there along the circuit, etc. The entry fees for these dogs are collected in full from owners, but the dovetail judge does not turn these feathers over to the show club, not if he can induce the club to rebate to him in whole or in part, usually the dovetailer is an adept in the art of keeping the fees in his own pocket. Of course, this is a good thing for the club and would be appreciated by the exhibitors—if they knew it. More feathers for the bullion ornamentation of the "dovetail" are plucked by itinerant handling of dogs, in a good flatcatcher and Au Fait in questionable ring good flat catches and are fast in questionable ring jockeying, the nimble shilling is frequently forthcoming from a stunt called "Why, you know now; I'll win with this one."

Along the line the "dovetail" judge has winners, in every breed, for sale to susceptible buyers who could get the same dogs, less the judge's rake-off, if they would look about for themselves.

Minor dovetailing is worked in on the breeding of bitches. The dovetail man can always get the services of the best dogs—those only which he recommends are the best. Sometimes it happens that a bitch is not served—the stud fee is devoted to a better purpose, however, from the viewpoint of the dovetail man.

So it follows that the "dovetail" judge germ, before it becomes an epidemic colony, might, profitably to kennel clubs, be fumigated from the bench show atmosphere.

Peters Points.

Mr. L. H. Reid, representing The Peters Cartridge Co., is located for the time being in Memphis and adjoining territory. Although very busy he finds time occasionally to do some shooting, and gives the boys of the gun clubs down there some nice exhibitions. At Dyersburg, Tenn., May 10th, he broke 95 out of 100; on May 12th, at Memphis, 96 out of 100; May 15th, at Augusta, Ark., 49 out of 50; May 19th, at Memphis, 98 out of 100; May 24th, at Monticello, Ark., 50 straight; averaging nearly 7 per cent. He, of course, used his favorite Peters Ideal load, No. 167½ chilled.

At the recent two-day tournament at Idaho Falls, Idaho, high general average was won by Mr. C. T. Callison, his score being 386 out of 400, or 96½ per cent. Mr. Callison shot Peters shells, and represents the Peters Cartridge Company in the Rocky Mountain States, and is demonstrating to the boys out there the many reasons why they should use his company's ammunition.

At Louisville, Ky., on May 30th, Mr. Woolfolk Henderson of Lexington, Ky., won the high average, losing 10 out of 260. He also won the handicap trophy for high gun in the team race. Mr. Henderson shoots Peters Premier shells and is enthusiastic over their fine shooting qualities. He won the Kentucky State championship at Owensboro on May 24th, with a score of 98 out of 100, and his work is commented upon wherever he goes.

At the Nebraska State shoot, June 5th, 6th and 7th, some most excellent records were made with Peters' factory loaded shells. Mr. John Sach made one run of 105 straight, and Captain A. H. Hardy made a run of 144 straight. On the first day the squad, consisting of Messrs. Hardy, Veach, Bray, Schroeder and Linderman, in the first 100 targets of the programme broke a total of 484 out of 500 by using Peters shells. This establishes a new squad record.

At the weekly shoot of the Memphis Gun Club, June 9th, Mr. H. E. Poston, who represents the Peters Cartridge Co. in that territory, was high gun, with a score of 98 out of 100, using Peters Ideal shells.

At the shoot given by the Parker Gun Club at Milwaukee, June 10th, high amateur average was won by Mr. J. R. Graham, with a score of 178 out of 185, shooting Peters factory loaded shells.

AT THE TRAPS.

The sport of trap shooting promises to have a healthy local stimulus in the near future, notwithstanding the temporary interruption of the game. Now that our shotgun devotees have dusted off the ashes dividends declared by the Pluto Wrecking Company on April 18th and affairs are getting into normal channels again to a far greater extent, happily, than the outside world realizes or may be prepared to give credit for, there will be regular shoots at Ingleside and very probably at Alameda Junction for the balance of the season.

The Golden Gate Gun Club shoot at Ingleside last Sunday was well attended by club members and visiting shooters. The weather conditions were most favorable and scores averaged very well. A number of the "boys" were up against an unusual handicap, in that they used either a borrowed gun or a newly purchased one, for a number of those present had been cleaned out of their favorite guns during the recent fireworks.

An agreeable feature of the club match at fifty targets was the substantial fact that every man in the shoot drew down a satisfactory bit of the club purse. The Golden Gate Gun Club has a healthy treasury and there was enough in the money prizes hung up to give very shooter a rakeoff. When this is known to the absentees, particularly the fishing fellows, the joke will be a one-sided one.

In the club race at fifty targets Nauman was high gun in the champion class. The "Old Reliabilities," George Sylvester, Prior and "Nothin' Doin'" Iverson, each scored 42 birds in the first-class division. "San Diego" Fano was high gun in the second-class and "Woodpulp" Patrick walked off with the third-class honors on a score of 35 out of 50.

The A. M. Shields trophy race was contested by thirteen shooters. Nauman picked off every blue-rock of the twenty-five and won the trophy. Iverson and Schultz each scored 23 birds.

An eight-man team contest between the "Booze Merchants" and "Banana Dealers" was a lively affair. The wetgoods shooters won by a single target, scoring 145 out of 200. In this race Nauman made another straight score of 25.

A shooting innovation during the day was the "blind shoot," during which the shooter took position in a pit parallel with the traps, and cracked the blue-rocks on the wing, as in flight shooting at ducks, with one or both barrels, as occasion required. This new trapshooting game promises to become a popular one.

The scores in the club race, 50 targets, \$50 added, were:

Champion class—Feudner, 22, 16—38. Forster, 19, 22—41. Nauman, 20, 23—43. First class—G. Sylvester, 21, 21—42. Iverson, 21, 21—42. Prior, 22, 20—42. Murdock, 19, 15—33. "Woods," 10, 7—17. F. Schultz, 20, 17—37. Dr. Pitres, 18, 14—32. Second-class—Knick, 17, 17—34. Fano, 19, 18—37. Hauer, 18, 14—32. Third class—Patrick, 17, 18—35. Johnson, 16, 13—29.

A. M. Shields' trophy race, 25 targets, distance handicap—C. C. Nauman, 18 yards, 25 straight; Iverson, 18-23; F. Schultz, 14-23; Feudner, 14-20; Sylvester, 16-20. Prior, 16-19; Fano, 16-19; Kinck, 14-19; Dr. Pitres, 14-19; Johnson, 14-18; Patrick, 14-16; G. Thomas, 16-16; Lynch, 14-15; Baldwin, 16-16; Hauer, 16 yards, 12.

Team shoot, 25 targets per man, 16 yards, B. P. Team—Nauman 25, Feudner 19, F. Schultz 13, Dr. Pitres 19, Fano 18, Murdock 19, Lynch 16, Johnson 18; total, 147.

B. D. Team—Iverson 21, Sylvester 18, Forster 19, Prior 23, Capt. Shafter 16, Hauer 17, Patrick 16, Knick 18; total, 148.

Besides those participating in the club events, a number of visiting sportsmen took part in the practice shooting and minor events. Captain J. N. Shafter, a crack shot of the Bakersfield Gun Club, made several excellent scores. Among other visitors were Pete McRae, George Thomas, Oscar Fisher, Julius Bruns, Dr. Sylvester, John Potter, Dr. Bodkin and W. Lynch.

The California Wing Club's regular monthly live-bird shoot is the card for Ingleside to-morrow.

The Pacific Coast was represented by one gun out of 268 entries at the Grand American Handicap—Hood Waters of Denver, Colo., was the shooter.

The Northwest tournament at Walla Walla the same week and the additional fact that the Interstate Association and Pacific Coast Handicap is booked for Los Angeles in September possibly accounted for the meager showing of Coast shooters at Indianapolis.

Reports of the G. A. H. were received too late this week for extended notice in this department.

A press dispatch just to hand states that the main event, the Grand American Handicap on June 21st, was won by F. E. Rogers of St. Louis, who broke 94 out of 100 at 17 yards distance. A strong and variable wind prevailed all day which played hob with many scores. The purse amounted to \$2674, divided among fifty high guns. Rogers received \$267, first money. He used an L. C. Smith automatic ejector gun, fitted with the Hunter one-trigger. A western shooter won the Handicap for 1906, which is pleasant news for Coast shooters, and the L. C. Smith win is a jubilant fact for Harvey McMurchy.

E. H. Confarr of Livingstone, Mont., still keeps up his shooting form, for he won the Multnomah medal at Walla Walla last week.

Pete Holohan of Wallace, Idaho, won the Globe trophy and Jack Forbes of Spokane won the Brownlee medal.

The annual shoot for the Peters cup took place at the driving park, Victoria, B. C., under the auspices of the Capital Gun Club. About twenty competitors took part and some good shooting was done. The conditions were forty targets; 20 unknown angles and 20 unknown angles reverse traps, use of both barrels. It was won by C. Pears, with Otto Weiler, W. Adams, F. W. Stevenson and W. N. Lenfesty following closely. The scores shot were: C. Pears 32, O. Weiler 30, W. Adams 28, F. W. Stevenson 27, W. N. Lenfesty 27, C. Banfield 26, T. Dicks 26, H. N. Short 25, H. Catheart 23, W. Peden 23, W. Buckett and J. Wilders 21.

"Mooch" Abraham, at the Irvington traps of the Multnomah Rod and Gun Club, broke 25 straight at the last club shoot, placing him in line for the Lipman trophy cup, which goes to the man who breaks 25 straight on two separate occasions. Some good scores were made by the other shooters. W. E. Carlson did some splendid shooting, with 88 out of 100 birds to his credit. The scores:

Carlson shot at 100, broke 88. "U. M. C." Howe shot at 100, broke 87. Abraham shot at 100, broke 86. Long shot at 50, broke 43. Hillis shot at 200, broke 170. Wagner shot at 50, broke 42. Emil Holling shot at 150, broke 123. Fehheimer shot at 100, broke 80. Guist shot at 125, broke 97. Blazier shot at 50, broke 36. Shanel shot at 25, broke 18. Young shot at 100, broke 70. Border shot at 50, broke 34. Maston shot at 50, broke 30. Brock shot at 50, broke 25. Kilian shot at 50, broke 24. Robers shot at 50, broke 21. "S. M." shot at 50, broke 21.

The San Luis Boat and Gun Club team of shooters won from the Spring City Gun Club team on the 17th inst. by a score of 153 to 147.

The names of the winning team were: C. A. Younglove, P. J. McCaffery, A. B. Van Scoy, J. E. Van Schaick, Charles Maino, J. C. Hill, C. T. Greenfield, J. V. Estudillo, J. A. Renetsky, Ernest Taylor, Fred Soto and R. M. Righetti.

The Helmet Gun Club shoot at Helmet, Cal., on the 13th inst. shows the following scores:

Class A.—Wells 20, Douglas 18, Belton 15, Goodhart 14, J. H. Botterell 13, W. E. Botterell 12. Class B.—Bradford 21, Oloan 16, Holloway 13, Lowe 11, Brown 9, Bowen 2.

Wells, in Class A., won the first prize. Bradford, in Class B., won the second prize.

At the Seattle Gun Club shoot on the 17th inst. in the shoot for the Dupont trophy cup, Ed Ellis made a perfect score of 25, but Fisher, with a handicap of 2, tied him. No ties are shot off for the Dupont cup, so it will not be decided until the next shoot. The scores were:

Ellis 25, Wheeler 18, Hall 18, Fisher 23, A. Taft 19, Stack 20, Clewley 18, Stewart 9.

Captain W. H. Price has fitted up a gunsmithing studio and repair shop at 24 Point Lobos avenue, where he is prepared to "turn out" work immediately. Orders may be sent by mail to that address or can be left at the Napa Soda headquarters, 760 Golden Gate avenue.

Averages Reported.

New Jersey State Shoot, Newark, N. J., June 5-7.—J. A. R. Elliott won first average, 445 out of 480, shooting "New Schultze." J. M. Hawkins won second average, 433 out of 480, shooting Du Pont." W. G. Hearne won third average, 421 out of 480, shooting "Infallible." The Hunter Arms Co. medal was won by I. Castle, shooting "Infallible." The N. J. Target Championship was won by A. Lindley, shooting "New Schultze."

Monongahela Valley League, Fairmount, W. Va., June 5.—W. A. Weidebusch won first average, 184 out of 200, shooting "Du Pont." E. H. Taylor won second average, 176 out of 200, shooting "Du Pont." F. Colpits won third average, 168 out of 200, shooting "Du Pont."

At the Interstate Association's Southern Handicap Tournament, Nashville, Tenn., May 15-17—First general average was won by W. H. Herr, 393 out of 400. Second general average was won by W. R. Crosby, 389 out of 400. Both of the above used "New. E. C." (Imprived.) Third general average was tied for by Mr. C. O. Le Compte, who used Infallible smokeless, and Mr. H. D. Freeman of Atlanta, Ga., who used "Du Pont" smokeless, both breaking 387 out of 400. Mr. Freeman also won first amateur average.

The Southern Handicap was won by C. G. Spencer, 98 out of 100, from the 18-yard mark. Otis Felger of Grand Rapids, Mich., was second with 97 out of 100 from the 18-yard mark.

At Pocatello, Idaho, May 11th and 12th, H. C. Hirschy of Minneapolis and E. F. Confarr of Livingston, Mont., tied for first general average, with 315 out of 335. Mr. Hirschy used "Du Pont" smokeless and Mr. Confarr used "Infallible." Mr. Confarr also won first amateur average. Second amateur and second general average was won by Neel McMillen of Idaho Falls, 311 out of 335, and used "Du Pont" smokeless. Mr. G. L. Becker won third amateur average, 308 out of 335, and also used "Du Pont" smokeless.

At the North Carolina State Shoot, Wilson, N. C., May 25 and 25th—First general average was won by C. G. Spencer, 386 out of 400. First amateur and second general averages were won by Geo. L. Lyon of Durham, N. C., 378 out of 400. William Walls of Wilson, N. C., won second amateur average and third general average with 377 out of 400. All three gentlemen used "Du Pont" smokeless. Third amateur average was won by Mr. J. E. Crayton of Charlotte, N. C., with 373 out of 400. Mr. Crayton used "New Schultze." In addition to winning high average, Mr. Lyon also won the State Championship with 95 out of 100 and the Virginia-Carolina Championship with 96 out of 100.

The Dove Season.

The Court of Appeals in the Los Angeles district declared all county ordinances shortening the close season unconstitutional, holding that the constitution gave control of fish and game to the Legislature alone when the constitutional amendment was adopted authorizing the division of the State into districts for the purpose of passing an equitable fish and game law, and that it could not delegate its power to Boards of Supervisors, nor could they pass such ordinances.

In consequence of this decision the Boards of Supervisors of several counties have repealed various game ordinances that were liable to be construed as at variance with the dictum of the Appellate Court.

The Board of Supervisors last week repealed all ordinances and parts of ordinances of Placer county in relation to game. Last year they passed an ordinance extending the close season on doves from July 1st under the State law to August 15th. This excited much feeling through the county, it being claimed that the doves leave the foothills before that time and go down to the plains, and that the ordinance as passed made the shooters around Lincoln and Roseville the only ones who had any chance for dove shooting.

On June 6th the Supervisors voted to shorten the season for wild doves in Riverside county to one month, from October 15th to November 15th. W. Scott Way, secretary of the Audobon Society of Pasadena, presented the petition. Representatives were also present from the Riverside County Humane Society and the Corona Board of Trade.

The Sacramento Supervisors some time ago extended the close season to July 15th. District Attorney Seymour has advised County Game Warden George Neale that under the recent decision the Supervisors had no right to extend the law. Therefore, Neale will not interfere with the dove shooters.

The dove shooting situation, had it not been changed by the Appellate Court, was as follows:

Sacramento county open on July 15th, Madera and Santa Clara on August 1st and Merced and Placer on August 15th, while the other counties will stand for the regular season, excepting San Bernardino, which was billed to allow shooting for one day only on the 15th of August; Yuba and Sutter on August 1st only, and Ventura, which permits shooting only on the 1st of September. Santa Cruz county has prohibited shooting altogether this year.

"Winchester" Products Carry of the Honors.

As usual, the shooters of "Winchester" goods carried off the premier honors at the Twenty-Second Annual Shooting Tournament of the Sportsmen's Association of the Northwest, which took place at Walla Walla, Wash., on June 21, 22 and 23, under the auspices of the Walla Walla Gun Club. The tournament was held at Agricultural Park, and was well attended, 64 shooters facing the traps. One of the most noticeable things at this tournament was the large number of shooters using the Winchester "pump" guns and the splendid showing they made in the medal and trophy events. Of the 64 contestants 34 shot the Winchester "pump" gun, and when it is taken into consideration that shooters from California, Oregon, Washington, Utah, Idaho and Montana were in attendance, it only goes to prove how universally popular this make of gun is with the sportsmen throughout the country. It may also be said that over 60 per cent of the shooters at this tournament shot the Winchester make of shells. The Aanaconda Cup, shot for on the opening day of the tournament, was captured by Mr. E. E. Garratt of Seattle, Wash., with a Winchester "pump" gun on the splendid score of 25 straight in this event. The Multnomah Medal, also shot for on the same day, was captured by Mr. E. F. Confarr of Livingston, Montana, with a Winchester "pump" gun and Winchester "Leader" shells, on the score of 24 out of a possible 25, reversed pull. The Walla Walla Brownlee Medal, contested for on the second day of the shoot, was captured by Mr. J. A. Forbes of Spokane, Wash., after shooting off a tie with Mr. G. W. Miller and D. J. Dayo. Mr. Forbes as well as Messrs. Miller and Dayo shot the Winchester "Leader" shells. The Globe Trophy, the famous trophy of the Northwest Association, was tied for by Mr. F. A. Dryden and Mr. Holohan. In the shoot-off Mr. Holohan won on the score of 35 to 34. Both gentlemen used Winchester "pump" guns. The Dayton Medal was captured by Mr. E. F. Confarr, shooting a Winchester "pump" gun and the "Leader" shells, after shooting off a tie with Messrs. E. E. Garratt and A. E. Chingreen. The Individual Championship Medal was won by Mr. P. J. Holohan of Twin Falls, Idaho, with a Winchester "pump" gun on the score of 25 straight. The Three Man Team Trophy was captured by the Spokane, Wash., team, composed of F. McBroom, A. E. Chingreen and J. A. Forbes, on the combined score of 55 out of a possible 60, Messrs. Forbes and Chingreen using the "Leader" shells. The first high average of the tournament was made by Mr. P. J. Holohan with a Winchester "pump" gun, while the second high average was made by Mr. E. F. Confarr with a Winchester "pump" gun and the "Leader" shells, Mr. Holohan's average being 92½ per cent and Mr. Confarr's 91¼ per cent.

Black bass fishing in Ballard Lake is excellent.

It is said that the alfalfa fields south of Merced are alive with wild ducks and their young. It is expected that the birds will be very plentiful the coming season.

Striped bass fishing off the Alameda Mole—the south sea wall is excellent at present. Quite a number of bass have also been caught from the Borax wharf.

A fair amount of sport may be found in the straits and also in the Tiburon lagoon.

STATE CHAMPIONSHIPS!

KENTUCKY:

OWENSBORO, MAY 24, 1906

WON BY MR. WOOLFOLK HENDERSON, 98 x 100

ILLINOIS:

BLOOMINGTON, MAY 24, 1906

Won by MR. J. R. GRAHAM, 94 x 100 from 19-yards

—USING—

Peters Factory Loaded Shells

THE CONSOLATION HANDICAP--GRAND AMERICAN, 1905

Won by Mr. James T. Atkinson,—99 x 100 from 18 yard mark. In this event 2 scores of 98, 5 of 97, and 4 of 96. All using the Peters Factory Loaded Shells

THE CHOSEN AMMUNITION OF AMATEUR AND EXPERT.

THE PETERS CARTRIDGE COMPANY, CINCINNATI, OHIO

NEW YORK: 98 CHAMBERS ST., T. H. Keller, Mgr.

FOR BREEDERS.

Good sense and docility as well as lack of sense and treachery are all matters of transmission inheritance. This is true of ailments, habits of action, disposition and all those things which go to make a good or bad horse.

In case where the foal has to be fed on cow's milk owing to death of dam, or other causes, it should be reduced one-third with water and a little sugar added, and the foal should be fed every two hours for the first two weeks.

The great demand for high class horses should not tempt the man who is satisfied with scrub stallions to go into horse breeding. The demand and high prices are only for horses of first-class breeding.

It is highly essential that the colt should be free from nervousness, restlessness and unsteadiness. This greatly depends on the education, and the greater the obstacles the more patience must be observed.

Action is extremely important in light horses. It should be straight and true. At the trot it should be what is known as the straight line trot, no wabbling from side to side to the other, or swinging the feet. The action from behind should be straight, the feet picked up smartly, hocks well flexed and the feet of both fore and hind legs at each step placed immediately in front of the former position.

READY MADE BONDS FOR SPEED MANIACS.

Surely the path of the speed maniac is being cleared of its difficulties! Hitherto, if any contemps, such as the mangling of human flesh and bones under his machine occurred while he was enjoying a cross-country spin he was compelled to leave his course with its glorious allurements in order to accompany an officer of the law to a police station to give bail for his appearance in court. Of course, in such instances, the explanation, a simple one, has always been readily forthcoming—it really is impossible to keep the racing car within the limits of speed laid down by law on account of its make and so, however unfortunate the shedding of blood may be—truly it is not a pleasant experience—the owner of the car cannot be held accountable for the untoward accident. While at the beginning of his career the autoist was willing to observe this little ceremony as a sort of conciliation of the public mind outraged at the thought of murder, it later began to pall upon him and complaints soon followed as to the "embarrassment" and the "humiliation" of a visit to the police station and the irksomeness of waiting for bondsmen. At last, now, his need has been met. The remedy he unconsciously has been seeking has materialized. To-day your speed maniac can buy a book of tickets representing five bail bonds, and if any foolhardy or thoughtless person interrupts the course of his pleasure by becoming entangled with the wheels of his auto he has only to present one of these to the policeman, whom some overzealous and officious bystander is bound to summon to the scene, and go on his way rejoicing. This book of tickets costs only \$20. Issued by a surety company, they are prepared for use in seven different States, and thus affords the motorist full scope for his speeding instincts. Verily the road is his!—Rider & Driver.

REWARD REAPED.

Figures show that the purchase of Flying Fox was an excellent financial speculation for his owner, M. Edmond Blanc, for the produce of the son of Orme and Vampire have already won since 1903 in public money £112,800; Gouvernant was sold for £20,000, Val d'Or for £28,000, Adam for £16,000 and Jardy for £30,000, without mentioning other sales made from time to time by M. Edmond Blanc, who still retains possession of Flying Fox as well as Ajax, who is one of the best among promising sires representing the strains of Dollar and Wellingtonia, so highly prized in France.

There will be a meeting of grand circuit calibre at Windsor, Ont., July 23 to 27, the dates originally claimed by Detroit. Secretary Hanrahan announces that there will be fifteen \$1000 purses, the classification of which will be announced next week. As speculation is not barred in the Canadian town, there will undoubtedly be a big entry and a rousing meeting, and while it is not technically in the grand circuit it will practically be the opener of the big line.

BALANCING TROTTERS.

The following article was written by J. P. Adams for the Horse Shoer's Journal, from which publication it is reproduced:

To balance a trotter by shoeing is a very important part of the successful development of a horse and the shoer has a great deal to contend with. When he has every reason to think that he has been successful, the horse will show signs of being "off" in his way of going. The cause may be from overwork or a slight strain causing a muscle soreness, or perhaps he may by a miss-step have hit himself and become afraid to extend himself. With a young horse things of this kind will occur so often that it will be very discouraging work trying to get him to take his work in a satisfactory manner. It may be that the horse is perfectly balanced, as far as his shoeing is concerned, but he may not be in perfect health. He may have taken a slight cold, or have a touch of indigestion. There are many causes that will work to the disadvantage of the horse and the discouragement of the shoer as well as the trainer.

When a horse is not balanced, the proper thing to do is to find out the cause of his trouble, then proceed to apply the remedy. If some morning while being worked, he develops a pronounced inclination to "hitch," instead of giving him a whipping and making an endeavor to drive it out of him, it would be much more to the point to take him to the barn and make a thorough examination, and discover the cause of the trouble. The horse's back may be hurting him or there may be a sore spot somewhere.

The harness may be chafing him, or another very common trouble may be found, that of his teeth. The ailments that the horse is heir to are almost identical with those of the human family. The men who enjoy perfect health are very scarce; so it is with the horse. It sometimes seems to me that favorable conditions ought to follow careful industry, but this is not always so. Bad luck (and there is such a thing as luck) will break in upon the most expert and scientific shoeing. If it were only a question of how to level the feet and determine the kind and weight of shoe to put on, the proposition would not be so hard to solve.

I have in mind an instance of one of the most prominent trainers, and one that is very prone to use the whip, who started one morning to work out a 2-year-old. The colt commenced to hitch and go sideways a little. He applied his usual remedy, the whip, with the result that ever after the colt was a notorious puller and although possessing great speed and endurance, was ruined in one-half hour because of lack of care and sympathy on the part of the trainer. It was afterwards discovered that the colt had bruised one of its hind ankles while in the stable during the night.

Another instance was that of a horse four years old that had been trained from the spring when he was two, possessing a lot of speed, but although he was shod in every conceivable way, would persist in going uneven; until one day his cheek came unhooked, which allowed him to drop his head, when he immediately went away, trotting at a perfect gait and developed into a very fast and reliable race horse. Another case that I have had experience with was a horse that had been working satisfactorily for some months, when he developed a very strong desire to not only hitch, but to break. Upon examination, it was found that he was troubled with lumbago. After careful treatment, in a short time he recovered entirely, and we had no more trouble.

Another case, a horse that was noted for being ever ready to do all he could, and was ideal in his gait, suddenly commenced to go rough and uneven. After several days his ankle began to swell; then it was found that one morning while being jogged on the road by his caretaker he had stepped upon a stone that rolled under him and nothing was thought of it because he did not show lameness at the time of the accident. With a let-up and proper care the horse recovered to such an extent that he became a good campaigner, but if his hind foot became long or he was shod out of balance his ankle would show the effect of the strain.

Another experience was with a colt that would shift his gait; would go sideways, first outside, then the other. He was shod with rather heavy front shoes that were rolled off at the toe, because he was inclined to dwell in front. While watching him in his work I discovered that he was striking his hind shins with his front feet. I removed the rolling motion shoes and in place of them put on a pair of

lightweight shoes with low, sharp parallel heel calks and a low sharp calk around the toe. The result was entirely satisfactory, because the calks held the foot from slipping back from under him and thus prevented him from striking his hind shins, and he was much more rapid gaited and he immediately began to develop into a valuable horse for either race or road purposes.

Another prolific cause of trouble is to be found in the horse's mouth. The reason for many a bad acting horse is to be readily located sometimes in an aching tooth, or more often the edges are worn sharp and before the result is known the cheeks are cut and have become very sensitive to the touch of the bit. In many an instance I have known the horseshoer to be worried for weeks over some obstinate case of apparent unbalance when the whole trouble was discovered to be in the horse's mouth. The services and skill of the dentist was required and not that of the horseshoer.

Two years ago a very likely winner in the M. & M. at Detroit was so handicapped by a sore mouth as to put her out of the money. Complaint was made to her shoer that she was not balanced, when, as a matter of fact, the whole trouble was caused by the horse being jerked and snatched so severely that the mouth was badly cut and afterward became cankered and was months in healing.

Another cause of horses being unbalanced and beyond remedy by the shoer is overwork. This trouble takes several forms, any one of which is sufficient to make trouble. One form, and perhaps the most common cause, is to drive a colt faster than he can go comfortably or without too much effort. This is a mistake that is made many times by the owners asking more than is reasonable of the trainer and of the trainer being anxious to make rapid progress in the development of his charge.

Another cause is jogging the colt too far; the colt becomes leg-weary and soon gets "off" in his gait or jogging over rough roads or requiring the colt to draw a heavy buggy or road cart at speed. Any of these causes may be prolific of bad results to the gait of a colt. When the colt shows symptoms of going wrong recourse is usually had to the horseshoer, and to him is brought all the trouble of trying to undo the lack of judgment on the part of someone else, and if he begins to make too close inquiry about what the colt has been called upon to either perform or endure, the chances are that the horseshoer will bring the discredit and dislike of the trainer down upon his head, which may result in the loss of a customer. But in order to successfully solve the problem it is necessary to know all the conditions surrounding the case as near as possible. It is only just and for the good of all concerned. It is utterly impossible for a doctor to properly prescribe for a patient unless he can make a correct diagnosis of the case. I have, in taking up this subject, named these few instances to show what the horseshoer must take into consideration when he undertakes to balance a horse's action. With an experience covering a quarter of a century, I have found numerous cases of unbalanced horses from causes other than the shoeing. Scores of times horses have been brought to me with the statement that they were not going right, that they were not shod as they should be, thus placing the blame upon the horseshoers, when the whole trouble was entirely out of the horseshoer's reach, the remedy being other than that of balancing the feet of the horse.

Reports from Monterey state that the salmon fishing is worthy the attention of the most enthusiastic angler. Large catches are made daily.

This argues that the fish will be in San Francisco bay, passably, in from four to six weeks.

Bay fishing should be very good next week. Good catches of smelt and rock cod have been made at various resorts.

At Richmond, Va., on June 4th, Dr. B. L. Hillsman made a most remarkable score, breaking 97 out of 100 with one straight run of 89. He has recently begun to use Peters shells and his score referred to above indicates pretty clearly that they are about perfect.

At the Ohio State tournament, June 6th, 7th and 8th, Mr. C. A. Young won second professional average, with a total of 488 out of 520, using Peters factory loaded shells. Mr. Young was the only man to break 25 straight in the Press Post trophy event, and 30 straight in the State Journal cup event. His shooting was the talk of the crowd.

...GUARANTEED STAKES...

Pacific Coast Trotting Horse Breeders Association

WOODLAND, CAL., AUGUST 15th to 18th, 1906

Entries to close July 2d, 1906

Horses to be named with entry

...PROGRAMME...

WEDNESDAY, AUGUST 15

1. California Stakes, 2:24 Class Trot.....\$1500
2. Julian Hotel Stakes, 2:12 Class Pace..... 500
3. Alex. Brown Stakes, 2:16 Class Pace..... 500

THURSDAY, AUGUST 16

4. Futurity Trot, 2-Year-Old Division (Closed) . \$1450
5. Byrnes Hotel Stakes, 2:13 Class Trot..... 500

THE FARM.

After milk is cooled and bottled it should be kept in the bottle and as cool as conditions will permit. Pouring the milk into an open vessel increases the chances of bacterial infection and consequent souring. The sooner the milk is cooled the better and at the lowest temperature. It should be cooled at least 60 degrees F. before bottling, and the bottle should be packed in crushed ice or put in icy water up to the milk line so that they may be cold as possible before shipping or delivering to customers.

Shrinkage is the one great factor which enters in the buying and selling of wool. If the dealer at the seaboard were unfamiliar with shrinkage he would continually be doing business at a loss for the consumer could and would take advantage of his ignorance in this respect. Suppose a wool grower has a lot of 100,000 pounds of fine medium which he is offering for sale. The wool has an actual shrinkage of 60 per cent and the market price on the clean or scoured basis for that kind of wool is 50 cents. If the seller was not a good judge of shrinkage, and estimated that the wool shrank 64 per cent he would offer it at 18 cents a pound. The buyer would quickly take him up, knowing very well that the wool would shrink only 60 per cent and at 18 cents in the grease, was costing him only 45 clean. The grower who makes it his business to learn little points like this is the one who gets ahead.

Dried beet pulp is comparatively a new article on the market and is the dried residue in beet sugar manufacture. It comes from the sugar factory through an operation briefly as follows: The beets are washed, then shredded into small, round strips and placed in large upright cylinders, through which hot water is forced, dissolving out the sugar. This liquor is drawn off, and the pulp, containing about 92 per cent of moisture and 1 per cent of sugar, is conveyed to large presses, which reduce the moisture to 82 per cent. It is then put into large kilns and thoroughly dried by direct heat. The drying process lasts about thirty-five minutes, and the resulting product is sacked and ready for shipment. After extracting the sugar from the liquor which has been drawn off there is a residuum molasses, containing about 50 per cent of sugar, and a certain amount of this product is mixed with the fresh pulp, then dried and sold under the name of "dried molasses beet pulp."

FAST PACER FOR SALE.

ALFRED D. 2:12½, by Longworth 2:19, son of Sidney (sire Sidney Dillon, sire of Lou Dillon 1:58½). Dam Ferndale Belle by Judge Salisbury, he by Nutwood, etc. ALFRED D. 2:12½ stands 16 hands and weighs 1150 pounds. He is sound and a racehorse that is much faster than his record. Has paced miles close to two minutes. Address, MRS. A. C. DIETZ, 5403 San Pablo Ave., Oakland, Cal.

YOUNG MCKINNEY STALLION FOR SALE

I offer for sale my young stallion
CARLOKIN, record 2:20½, as a three-
year-old. He is by McKinney and out
of the great brood mare Carlotta Wil-
kes (dam of Volita 2:15½, Carlotta
2:21½, and Carlokin 2:20½), by Charley
Wilkes 3:56½, second dam Aspasia, dam
of Faustina 2:19½ by Alcantara 729, etc.
Carlokin is standard and registered, and
can show a mile at the trot now in 2:13
or better. I believe he will trot in 2:10
this year. Will sell him at a reasonable
figure for cash. He is a game race horse
and his first crop of colts foaled this
year are as fine lookers as can be found
anywhere. Correspondence invited. Ad-
dress
C. L. JONES, Modesto.

"SAVE-THE-HORSE" SPAVIN CURE

DO NOT LET SKEPTICISM OR LACK OF FAITH BLIND YOU.

The powerful potency of "Save-the-Horse" cannot be analyzed or comprehended in this small space. We wish to send you evidence—demonstrations, results—from men in every walk of life—cures of cases considered incurable, and in addition we make a guarantee or legal contract absolutely binding to protect purchaser to treat any case for which "Save-the-Horse" is indicated.

THE PALACE PHARMACY

C. H. McKinstry, Proprietor.
J. M. Hurst, Reg. Pharmacist.

Troy Chemical Co.,
Binghamton, N. Y.

Gentlemen—Mr. Burns asked me to apologize for not writing you, he sold the horse before he received your answer and check and thought he was out the \$5.00. I told him you had always made your word and guarantee good and he is convinced of the fact now.

We have sold several dozens "Save-the-Horse." Some of the parties have bought two and three bottles at different times and did not want the guarantee as they knew it would cure what they intended using it on. One man cured two curbs with one bottle and ever since I sold him the first bottle has kept a bottle on hand.

Respectfully,
C. H. MCKINSTRY.

Lexington, Illinois.
Troy Chemical Company,
Binghamton, N. Y.

Dear Sirs—I used one and one-fourth bottles of your "Save-the-Horse" Spavin Cure on a case of sprained tendons. The horse had been lame for over a year. I had him blistered and turned out to pasture for nearly a year, but went lame again, so I concluded to give your medicine a trial with the result that it completely cured the horse. Yours truly,
JAMES E. DONNELLY.

Rochele, Illinois.
Troy Chemical Co., Binghamton, N. Y.

Gentlemen—About two years ago I sent for a bottle of "Save-the-Horse" through my druggist. It completely cured a bone spavin and puffs. Respectfully,
J. M. HOCKENBERRY.

"Save-the-Horse" Permanently Cures
Spavin, Ringbone (except low), Curb,
Thoroughpin, Splint, Shoe Boil, Wind
Puff, Injured Tendons and all lameness
without scar or loss of hair. Horse works
as usual.

\$5.00 per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy, booklet and letters on every kind of lameness. At druggists and Dealers or Express Paid.

RECORD BREAKING FISH

Are Caught Every Year at

Lake Tahoe

JUST as large ones still uncaught. You can get them. Don't you long to feel again that sharp tug at the line, hear the shrill whir of the reel, and, after a blood-stirring fight, experience the joy of landing one of the finest, craftiest old trout you ever saw?

YOU shall do that many times on this beautiful lake and on the mountain streams round about. Also good hunting and mountain climbing. Many hotels; fine camping places; no poison oak.

Buy your ticket and get there in one night. Sleeper leaves San Francisco daily 7 p. m. and you arrive at Tahoe next morning in time for breakfast.

VALLEJO JUNCTION - - - CONTRA COSTA CO., CAL.

All stock grazing on the forest reserves must be salted regularly and at such places as are designated by the forest rangers. Moreover the owners of stock must notify the forest officers when any such order has been fulfilled. Not less than five pounds must be provided for all stock over six months of age.

A co-operative wool company is being organized in Chicago for the purpose of selling the wool of its stockholders direct to consumers. The new company claims to have made several sales and is securing from 3 to 5 cents more for wool than the best prices offered by wool buyers now in the west.

Importations of Shropshire sheep this year will be the heaviest ever known if the present rate is maintained. The increasing demand for high class mutton has strengthened the demand for the good mutton grades of sheep. While the breeders of pure bucks and ewes are stocked well they are taxed to meet all demands upon them and they are bringing in more imported stock than usual.

A feature in horse breeding which frequently hinders a man from achieving success is the temptation to part with promising grade mares. These are just what a buyer wants and his unwillingness to take the inferior animal, together with the tempting offer for the choice one, often sets improvement back to the starting point. The story of Hobson's choice is something like this: Hobson kept a livery stable and in order to ensure uniform use of his horses he arranged them in the stable so that the one longest in was placed near the door and when a customer came in he must take that one. There should be a Hobson's choice when the buyer wants the promising brood mare—if such sale will be detrimental to further improvement on the home farm.

Considerable has been said in the papers lately about beef from tuberculosis put on the market by the large packing houses. The Government inspectors pass all beef as sound where the tubercles are encysted in parts of the body not used as food if they are not so large as to impair the health of the animal. In a case where the disease is generally distributed through the carcass the meat is condemned. An animal may have encysted or dead tubercles in the lungs, the liver and along the alimentary canal and the general health and the meat of the animal not be impaired. Technically speaking, there are few perfectly sound people on earth. Statistics show by autopsies held on people that not far from 90 per cent of them have tubercles in some form in their bodies, and the same holds true to the extent of about 30 per cent of the cattle. Yet only about one in four persons die with tuberculosis who have it and probably not one in twenty cattle in which tubercles could be found would ever die with tuberculosis. The meat of a bovine even well advanced in tuberculosis if cooked would not be likely to infect the person who should eat it, but we do not want to eat it.

We hear of considerable trouble and misunderstanding in finding the value of cream. Two practical methods are in vogue for testing cream for butter fat—the well known Babcock test and the oil test, which was formerly used by the gathered cream operators. The Babcock test is the one generally used at the present time and while simply and easily manipulated it is often improperly used. Anyone selling cream, whether to the factory, cream buyer, ice cream maker or milk depot, turns off a product having much variation, which can only be found by careful test. Cream may be 15 or 45 per cent fat, and only in the per cent of fat can it be measured. The fat is the basis or true value the same as the weight in grains. To get a fair test of separator cream eighteen grams should be weighed out and not measured, for cream varies greatly in the weight. This may be tested by the Babcock method.

For working the butter some form of table worker is best to use. The butter bowl and paddle never give as good results, because the butter will almost invariably be greasy owing to the sliding motion of the paddle over the butter, says a dairy authority. The table workers commonly used are of two kinds, one having a stationary bed and a roller, either corrugated or smooth, arranged so that it can be passed back and forth over the surface of the butter; the other having a movable bed, revolving on a center, usually under two corrugated rollers. Both of these forms will do good work if the operator understands their use.

Missoula October 8-12

TWO WEEKS RACING, with a long list of purses
to close September 1st, are advertised by the Spo-
kane Inter-State Fair for its big meeting opening
September 24th and closing October 6th. At this
meeting \$35,000 in purses and prizes will be dis-
tributed. This fair and race meeting is one of the
best held this side the Mississippi River, and at-
tracts thousands of people every year. The asso-
ciation is offering many new attractions for this
fair and as the early closing stakes filled with long
entry lists, there will be some of the best racing
seen in that section in years. All horsemen who
live in the northwest should enter at the Spokane
meeting. See the advertisement.

The Woodland track is getting livelier every day.
Trainers are moving their strings there to get the
horses ready for the Breeders' meeting, and fast work-
ings are of daily occurrence.

THERE IS TALK of building a half-mile track at
Bakersfield, which will be on the car line. There has
been considerable trouble in making the old mile track
popular, as it is off the car line and the expense of
keeping it up too great. In the warm climate of Bakers-
field water for sprinkling is an important and ex-
pensive item in the summer, as evaporation is rapid
and one team and driver has to be constantly employed
to keep the dust down and make the footing good for
fast time. Consequently many of the horse owners and
trainers there have come to the opinion that a half-
mile track will be better for all. Their reasoning is
good. One of the principal reasons why there is so much
interest in harness horse affairs in the Eastern and
Middle west States is because there are good half-
mile training tracks in nearly every county. A half-
mile track seems to be good enough to give thousands
of very valuable trotters and pacers their training
on in other States, and we do not see why a track
of this sort should not be good enough for California
horses. Dan Patch, the champion of the world, has
started every season for three years on half-mile tracks
and has lowered the record for them every year, yet
he has also been able to reduce the world's record on
mile tracks every season as well. A big majority of
the driving clubs and racing associations in California
cannot afford the expense of keeping up a mile track,
but could maintain the smaller oval. In such cases
half-mile tracks should be constructed. A good track
one half-mile in circumference is greatly to be pre-
ferred to one a full mile in length that is not kept
in good condition. For the benefit of several readers
who have recently sent in the request that we again
publish the directions for building a half-mile track, we
append the following:

To Lay Out a Half-Mile Track.

For a half-mile track draw two parallel lines 600
feet long and 452 feet and 5 inches apart. Half way
between the extreme ends of the two parallel lines
drive a stake; then loop a wire around the stake long
enough to reach to either side; then make a true curve
with the wire, putting down a stake as often as a
fence post is needed. When this operation is finished
at both ends of the 600-foot parallel lines the track
is laid out. The inside fence will rest exactly on the
line of the above driven stakes. The turns should be
thrown up an inch or an inch and an eighth to the
foot. The stretches may be anywhere from forty-five
to sixty feet wide.

AN AGREEABLE SURPRISE is the list of entries
received by the Breeders' Association for its Wood-
land meeting. Owing to the fact that so many horses
were shipped out of the State during May and June
by owners who intend to race them in Colorado, Mon-
tana and Eastern points, there was some fear that the
\$1,500 stakes might not fill, but they have received
the usual large number of entries and it is now very
evident that had there been a good circuit of meetings
arranged for this season in California the programmes
would have all been filled with large lists. California
is one of the principal trotting horse breeding States
in the Union, in spite of the handicap of no district
fairs or race meetings outside of a few each year in
the larger cities. With a good circuit each year (which
could be easily arranged were there some one to take

the initiative), the number of horses in training every
spring and summer would be three or four times the
number now trained.

FRED W. LOEBER, formerly a resident of Napa
county, in this State, during which time he was
an active and energetic member of the Pacific Coast
Trotting Horse Breeders' Association and the Napa
Agricultural Society, died at Baltimore, Maryland,
May 28th, having made that place his home for
several years past. Mr. Loeber came to California
while quite a young man, and became greatly in-
terested in horse breeding. He established the
Vineland Stock Farm, and owned at different times
the stallions Whippleton, Alcona and Grandissimo,
besides a large number of brood mares. Mr. Loeber
left California on the death of his father about ten
years ago for his old home in Baltimore, where
he succeeded to the business conducted in that city
by his parent. The news of his death was not sur-
prising as he was known to be an invalid, but he
left many friends here who will regret to hear that
his life is ended. He was about fifty years of age
and leaves a family.

THE NUMBER OF FAST TROTTERS is increasing
so fast that 2:30 is no longer looked upon as fast trot-
ting. The fact that twenty-five trotters have been
named in the 2:08 trot at the Lexington meeting, and
that twenty of them have records below 2:10 shows
something of the progress made in the development
of fast trotting horses. At the close of 1895, or ten
years ago, there were only thirty-seven all told that
had beaten 2:10 and now we have more than half
that number named in one race, while the total num-
ber of trotters that have records below 2:10 has in-
creased to 229. "De world do move" and so does the
American trotter.

THE OFFICE of the Breeder & Sportsman is now
located at 616 Golden Gate Avenue, a few doors west
from Van Ness Avenue, where we shall be pleased
to see our friends and patrons at all times.

THE STATE FAIR PROGRAMME of harness races
is being arranged and will probably be ready for publi-
cation next week. Good purses will be offered for all
classes of trotters and pacers. An effort is being made
to have the pavilion and live stock exhibits very com-
plete and meritorious this year.

SHORT HORNS AT AUCTION.

The Howard Cattle Company, whose splendid herd
of Shorthorn cattle is located at Quinto Ranch, Merced
county, from whence has been sent many first prize
winners to the show rings, will inaugurate this year
an annual sale of Shorthorns. Forty head of regis-
tered young bulls and twenty-five head of registered
heifers will be the first consignment. The services
of Geo. P. Bellows, a veteran Shorthorn auctioneer
and breeder, have been secured to conduct this sale,
which is to be held on the farm, adjoining the town
of Newman, Cal. Those who want the very best of
this grand breed and at their own prices should not
miss this sale.

NEWS AND NOTES

Los Angeles meeting opens July 18th.

All the Los Angeles purses filled except two.

The Breeders' meeting at Woodland will be a hummer.

The stakes filled well and all the best horses in training will race there.

Friday, the pacer entered by La Siesta Farm at the Woodland meeting in the 2:20 pace, was formerly Mr. Frank H. Burke's saddle horse. He is by Easter Wilkes, out of a mare by Norfolk and was bred by Mr. E. J. Molero. He paced a mile in 2:13½ in his work.

Carlokin 2:20¾, will be seen at the races again this year. As a three-year-old this son of McKinney made a good showing, dividing second and third moneys with Marvin Wilkes in the Occident Stake, winning third money in the Stanford Stake and getting third money in the Breeders' Futurity. He was not raced last year as a four-year-old, but has been in training this spring and shown miles below 2:15 in his work. Carlokin is owned by Claude Jones of Modesto.

Jack Curry worked Edwin S. 2:08, three heats below 2:15 last week at Cleveland, the third being in 2:20 with the last half in 1:03½. Forrest W. trotted a mile in 2:15¾ for Curry the same day, and the McKinney colt Sir John trotted a heat in 2:18.

Coronado 2:12¾, by McKinney, is working well this year for W. G. Durfee, who is entering him in the classes in California to which he is eligible. He will be one of the starters in the 2:13 class trot at Woodland in August.

Four consignments of saddle horses have been sold this year by S. T. Harbison & Co. of Kentucky at the American Horse Exchange, New York. In these four sales a total of 123 horses was disposed of at an average price of \$544.

The trotter Nut Boy by Nutpine reduced his record from 2:15¾ to 2:11¾ at Rochester, N. Y., last week in the first heat of the 2:16 trot. This is the fastest mile in a race for a trotter this season and reduces the track record at Rochester. Nut Boy was driven by Lafferty, and while the accounts do not say so, this is probably our ex-California trainer who has hosts of friends here who will read with pleasure of his success with Nut Boy.

The East View Farm horses will start at Libertyville, Ill., Monroe Salisbury having arrived there with Judge Green 2:09, Consuela S. 2:07¾, Aristo 2:08¾, and others of the Butler string.

Cy Mulkey has a stable of runners in Oregon and raced them this week over the Lakeview half-mile track.

C. O. Stanton of San Jose returned from Arizona last week with twenty-seven head of horses he had purchased there for the California market. While in Arizona, Mr. Stanton sold two fine draft stallions for Singmaster & Sons of Keota, Iowa.

A Cleveland Journal of last week says: The fast pacer, Rey del Valle, by Rey Direct 2:10, an almost sure starter in the Chamber of Commerce Stake, looks good, acts good and is training sound. He has been a mile in 2:13¾ since he arrived. It is no trouble for this fellow to step an eighth any time at a two-minute gait.

The little black pacing stallion by Titus, dam Lady Waldstein, owned by Lee Mayberry of Los Angeles and trained by Walter Maben, is about the best green pacer in California at the present time, but he will not be raced this year in all probability. Last Saturday at Agricultural Park, Los Angeles, Maben drove this horse a mile out in 2:05½, which is the fastest mile we have heard of any green pacer showing in June. His sire, Titus, is a full brother to Direct 2:05½, and is the sire of Stipulator 2:14¾.

At the big horse show held in Los Angeles in May, Zombro 2:11, was given first prize over eight other trotting bred stallions, all shown to halter. The prize was a fine oil painting, 16x20 inches, to be made of the winner, and we hope that it will do justice to Mr. Beekers' great son of McKinney.

The programme of the Spokane Inter-State Fair to be held September 24th to October 6th advertises a big programme of trotting and running events to close September 1st. It will be found in our advertising columns.

W. H. Williams of San Jose, who moved his horses to Hollister when the San Jose track was closed, will soon take them to Salinas, where Chas. Whitehead has the track in splendid condition to train harness horses.

A new grandstand to cost \$20,000 is being constructed at the Helena, Montana, track and will be ready for the Montana State Fair, which opens there in October.

Mr. Ed. R. Guerrado of Whittier, owner of the runner Tizen, is also the owner of Casey, the speediest pacer driven over the roads in that locality.

Peter Saxe & Son have sold to W. V. Rice of Salt Lake City the bay colt St. Julian Bill, foaled 1902, by Daly 2:15, dam by Alexander, second dam by Napa Rattler. This colt is four years old and a very promising trotter. He was shipped to his new owner in the car with Dan Mizner's string that were on their way to Montana.

M. E. McMenry is with the runners at Buffalo, but is said to be anxious to get back with the trotters.

Sonoma Girl, Mr. J. D. Springer's fast trotting mare, has gone lame again. This is indeed unfortunate, as she could trot a mile in 2:10 any time when right, and we believe worked a mile this year in 2:09¾.

It isn't every newspaper editor that can breed and raise a trotter and sell it for \$2,500 before it is raced. Sam Elmore of the Daily Astorian of Astoria, Oregon, bred his mare Altamont Maid to Zombro and got a colt that he named Zomont. A short time ago Mr. Elmore, who was formerly a resident of this city and has many warm friends here, sold Zomont to a Los Angeles gentleman for the sum above mentioned. W. G. Durfee is working the colt.

By the dropping of a type in the account of an auction sale held in the East, the statement was published that a Zombro colt owned by Mr. Geo. Lattimer of Buffalo, sold for \$50. The price paid was \$350.

Lee Mayberry has sold the fast pacer Highball 2:08¼, to some Denver parties. This horse is by Silkwood and will probably be used in the matinees of the Denver Driving Club, where it takes 2:10 speed to win these days. Mr. Mayberry's mare Geraldine, by Zombro, that won second money in the Breeders' Futurity for three-year-olds in 1904, is trotting like a free-for-all candidate for Walter Maben and showed him a mile in 2:14 with the last half in 1:04 last week. Geraldine will not be raced this year, as Mr. Mayberry thinks she is good enough to take on the Grand Circuit next season. Had there been a circuit in California this year, however, she would have been entered in the larger purses, to which she is eligible.

Princess of Monaco, the daughter of Nancy Hanks and imported Meddler, has a colt at her side by Bellini 2:13¾. The Princess is owned at Hillandale Farm along with her three-year-old by Peter The Great, her two-year-old by Bingen and her yearling by the great Bay state sire.

It is thought that Ed Geers will start the green pacing mare, Ardella, by J. H. L. 2:08½, in the Chamber of Commerce Stake at Cleveland. He has driven her a mile in 2:08¾, and a half in 1:02¾, which is fast enough to show that if she remains right, not more than one or two of the field that will start against her will be able to beat her.

Homer Davenport will take his Arabian horse Nejdran from Oregon to New Jersey soon. He will probably send him or some other Arabian stallion to California for the season of 1907.

The records of some of the British cross-country gentlemen riders are amazing to Americans. Take that of Captain Wentworth Hope-Johnston, for example. He has ridden 1,109 races and won 362 of them. He fell 98 times, his horse refused to jump 28 times, and it is estimated that he has jumped approximately 23,000 fences. To use a bit of American slang which is beginning to gain currency there, "that is riding some."

All the events advertised by the Los Angeles Harness Horse Association filled with the exception of the 2:12 trot and the three-year-old trot. The 3:00 mixed event received fourteen entries.

The 2:18 and 2:30 class trots, and the 2:13 class pace, all for purses of \$1000 each, have been reopened by the Northern Montana Fair Association for its Great Falls meeting in September. Entries to these purses will close August 1st.

Contralto, whose American record is 2:10, won the Grand Prize Milano at Milan, Italy, June 3d, defeating Waincoat and Dulce Cor, both American trotters, and reducing his own and the Italian trotting record to 2:09¾.

Billy H., the trotting gelding owned by W. A. Clarke Jr., and which Red Gerrity will race on the Grand Circuit, was bred at Rancho del Paso. He is by Knight and his dam is by Echo. He acts like a trotter that can win a share of the money this year.

John Walker, who for several years has been Ed Geers' assistant trainer, is at Columbia, Tenn., where he has Walter Direct 2:05¾. Geers' sensational pacer of last season and a number of green youngsters, mostly sired by either Walter Direct or The Spy, a son of Chimes that Mr. Geers took south a few years ago, which he is preparing for Mr. Geers' next season's stable. Walter Direct is apparently sound on the leg that bothered him last year and it is expected he will race again in 1907. The Walker string will be turned over to Mr. Geers next fall, and such as stand the test will be taken to Memphis to be prepared for a trip through the Grand Circuit.

Back in 1867 at the first Grand Circuit in Buffalo, Simon James of Hamilton, Ohio, won a great race with the gray trotter Melton. The gelding sold in the pools at the Buffalo track for \$2 in \$200, and, of course, the James family won a barrel of money. Mr. James is still hale and hearty at 81 years of age and seldom misses a weekday that he does not drive over to the racetrack with Almont Wilkes 2:19¾, bred by the late Gen. R. L. Howard of Buffalo.

C. W. Williams, Galesburg, Ill., has not a colt on his place by either Allerton or Expedition that is over a year old, and is receiving daily inquiries as to the price at which he will sell weanlings. It certainly pays to breed to the best stallion possible, as the difference in the value of a colt at weaning time by a high-class sire and one of little reputation is several hundred dollars. A good mare mated with a great stallion means money for the breeder.

There were several fast workouts at the Alameda track last Sunday morning. Dennis Gannon worked the mare Lady Shamrock a mile in 2:13¾, and Worth Ober sent the mare Flora G. a mile in just about the same notch. Both these pacers did their work in good style. Victor Verilhac sent Mayor Schmitz's mare Sister Patty a mile in 2:14¾ and she finished strong and with speed left.

T. A. Wilson of Clare Point Stock Farm, near Ephrata, Pa., owns the stallion Directward 36,338 that has two crosses to old Dolly, one of the greatest brood mares that ever lived. Directward is by Director 2:17, son of Dictator and Dolly, while his dam is by Onward 2:25, son of Geo. Wilkes 2:22 and Dolly.

Saddle Gail and Tumor Cured.

Col. George W. Jordan, prominent horseman at Hawkinsville, Ga., writes: "With QUINN'S OINTMENT I made two cures, one of which removed a saddle gail that I considered removable only by the knife. The other was an application to a small tumor two or three inches above the nostril of a favorite horse, and this also disappeared after a few applications. I consider the remedy invaluable." For curbs, splints, spavins, windpuffs and all blemishes give QUINN'S OINTMENT a trial. Price, one dollar per bottle, delivered. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain from druggist.

AT WOODLAND'S EAST TRACK.

MAY 29 AT LOS ANGELES.

On the 29th of May, the following horses were entered for the 2:15 race:

Money Mac by McKinney, dam Lady Washington; 5-year-old gelding by Diablo, dam Lady B; 5-year-old gelding by Alex Barton, dam by Billy Thornton; 2-year-old gelding, dam by Lucky B, and a colt by McKinney, dam Adelaide Patti.

Charles Spencer is training the following horses and great things are expected from some of them: El Rio Ray (4) by Nushagak, dam Phebe; Princess Mamie, b Prince Ansel, dam Mamie Martin; Red Blossom (3) by Nushagak, dam Red Folwer; Prince Lot (2) by Prince Ansel, dam Lottie; Steinmont (6) by Arthur B, dam Francisco; Prince Gay (5) by Prince Ansel, dam Nosegay; Nisbo (3), by Nushagak, dam Brown Rose; Noraine (4) by Nushagak, dam Loraine; Bonaka (4) by Nushagak, dam Bonnie Derby.

Hi Hogaboom, the veteran driver, is busy preparing the following horses: Toots, aged, by Toots, dam unknown; Red Hot by Dagon, dam by Walstein; Palo King, 5, by Moreingo King, dam by Palo Alto; 5-year-old trotter by McKinney, dam by Lynnont.

C. R. Harrington has a very promising bunch of youngsters which includes the following: Colonel C (4), by Falrose, dam full sister to Don 2:10½; Wessington by Falrose, dam by Vasto; Chaser (4), by Diablo, dam by Tilton Almont; Seymo M by Diawood, dam by John Nelson. Seymo M won the Breeders' Futurity in 1903 and in doing so made a two-year-old record of 2:22½.

J. S. Phippen of San Jose is training the following horses: Milbrae, trotter 2:16½, by Prince Airlie, dam by Fallis; Gray Boy, green pacer, by Knight, dam by Algona. This horse has already paced a mile this season over the local track as good as 2:13 and a half in 1:03¾. Oynes (4), bay stallion, by Owyhee, dam by Sydney; Mollie McKay by Athadon, dam by California Nutwood; Athene by Dexter Prince, dam Athene; Alta McKinney (3), by McKinney, dam by Iran Alto; Uni Mack by McKinney, dam by Director; Billy Boden (2), by Searchlight, dam by Sydney; Little Dick by Dictatus Medium, dam by a son of Gen. Benton.

A. Charvo has four in his string and they are touted as the goods: Advosta by Advertiser, dam by Nutwood; brown gelding by Mendocino, dam by Chas. Derby; Pat Malone by Mickey Free, dam by Don Juan; Renown (3), by Diablo, dam by Falrose; Renown has worked a mile already this season in 2:15. He is the property of H. E. Coil and it is predicted by horsemen that he will be the greatest horse of the season in his class.

William Hashaggin has two horses in his stable that if looks count for anything they will get some of the money. The horses are Kinney Rose by McKinney, dam by Golden Rose; Lita H by Nutwood Wilkes, dam by Electioneer.

Sam Hoy will be here on July 10 with a string of fast ones, and other harness horsemen have sent notice that they will come to the local track in the near future.

Glen Griffin is training two runners: Princess David and Ray Bennett. They are both by that game little race horse David Tenny. The Princess has already been marked as No. 1, and Glen says Ray Bennett will have his picture in the Police Gazette before the season is over.

Will Hunter has six good horses which he is breaking to the saddle. Under Mr. Hunter's skillful handling the horses are all becoming very proficient in the different riding gaits.

Directo won his heats in 2:15 and 2:13. This race was won by the 2-year-old gelding, dam by Lady B, of Sonoma Girl, J. D. Springer's fast mare, which, in 1903, won the 2:15 race.

Gladys M. (Myers)	2	2
Laura G. (Pierce)	3	4
Proctor (Colyear)	3	6
Silk Jim (Snowden)	6	4
Farmer Girl (Denker)	5	5

2:40 mixed; L. A. Driving Club cup.

Barney (Walker)	1	1
Donford (Stewart)	2	2
Starlight (Saddler)	3	3

Time—2:45, 2:43.

RACING AT SAN LORENZO.

There was quite a large crowd at the San Lorenzo half-mile track on July 4th to witness a good programme of harness races that had been provided by Manager Geo. T. Algeo, who recently rented this track.

The principal event was the free-for-all pace, which Victor Verilhac won handily with his mare Kittie D. yb Dictatus, beating Hattie Croner, driven by Hooper, and Clara L., driven by Schwartz. Kittie D. won in straight heats, the time being 2:26, 2:24. The other two divided second and third money.

A race of half-mile heats was then paced, with Clara L., Lady Jeffries and Babe Madison as the starters. Babe Madison won in straight heats, Clara L. being second and Lady Jeffries third.

The races furnished plenty of sport for a good natured crowd, and Manager Algeo promises to give other meetings in the future.

Mrs. Andrew McDowell has returned to Pleasanton for a short business trip. The residence of Mr. and Mrs. McDowell is near Vienna, Austria, where "Andy" is the leading reinsman of the Amsterdam trotting turf. This season he won both the Austrian and Hungarian Trotting Derbies with the Austrian bred horse Levente by E. L. Robinson 2:17¼.

Bill Pagan, blk. h. by Amerigo (Maederid).... 7 7

Best time—2:19¼.

Jess C., ch. g. by Electwood (Gutshall)	3	4

Time—2:55, 3:00.

Andy Welch is figuring on holding a big fair and harness meeting at Charter Oak track next season. Andy knows that a trotting meeting always draws a big crowd to Charter Oak; but he also knows that a big fair adjunct will increase the attendance many fold and he proposes to hold one that will be the talk of the country.

GOOD RACING ASSURED.

the Pacific Coast. Twelve out of this thirteen are colts, the only filly among them being Alex Brown's bay filly Red Blossom by Nashagak. The colts are Mrs. S. V. Barstow's br. c. Nearest McKinney by McKinney, Russell Gray's b. c. Walter G. by Nutwood Wilkes, Ray Dittus' b. c. Our Bells by Moubells, M. G. Gills' br. c. Kinney G. by Kinney Lou, W. C. McCully's blk. c. General Torres by Neernut, William Morgan's b. c. Crisis by Zombro, Thos. Smith's ch. c. Prof. Heald by Nutwood Wilkes, E. H. Todhunter's b. c. Gerald G. by Zombro, Geo. T. Becker's br. c. Silver Hunter by Zombro, Vendome Stock Farm's Alp Kinney by McKinney, Geo. L. Warlow's blk. c. Stanford McKinney by McKinney, and Sutherland & Chalmers' b. c. Sam G. by Stam B.

The fastest mile ever trotted in the Occident Stake was made last year by that fast son of Nutwood Wilkes, Mr. J. B. Iverson's North Star. He was beaten the first heat of the race by Princess Louise in 2:20, and the next two by Belmont in 2:17½ and 2:18½. North Star then settled down and won the fourth, fifth and sixth heats handily in 2:15½, 2:17½ and 2:18½, a remarkable performance for a three-year-old on a track that was only 1,000 yards long. Six days later he won the Stanford Stake in three heats after dropping the first to Athasham in 2:16, the Nutwood Wilkes gelding also setting the record for this stake by trotting the second heat in 2:15 and the next two in 2:16 and 2:17. Two weeks prior to the State Fair he had won the Pacific Breeders' Futurity at Santa Rosa in straight heats, setting the record of that rich stake at 2:13½ the first heat, equalling this time in the second and trotting the third in 2:16. North Star thus holds the record for all three of California's principal three-year-old trotting events.

In 1904 Almaden, Mrs. C. A. Durfee's colt by Direct, dam Rose McKinnon, won the Occident, which was a seven heat race that year. The fastest heat of the race was the first, won by Marvin Wilkes, a son of Don Marvin, in 2:18. Carlokini won the second heat in 2:21½ and the time got slower from that to the seventh, which was in 2:28. Almaden did not have to equal his two year old record of 2:22½ to win. In 1903 the James Madison mare Team was the winner of the Occident, getting the first heat in 2:18½, the fastest of the race. Swift B. by Stam B. won the second heat and second money. Tuna's record is now 2:08½ and Swift B. has trotted to a mark of 2:02½. Both made their records on the Grand Circuit and will be raced there again this year. The winner of the Occident Stake of 1902 was Alex Brown's handsome big bay gelding Aristo by Nashagak. Aristo won in straight heats in 2:21½, 2:17½ and 2:17½. The little McKinney gelding, Cuato, took second money that year. Aristo was afterwards sold for \$10,000 and taken East where he trotted to a record of 2:08½ and was a good winner. Aristo also won the Stanford Stake of 1902. In 1901 the Occident Stake was won by Italia, a daughter of Zombro. Italia's race was a one, two, three affair and her heats were in 2:25, 2:23½ and 2:27½. Commander Muckle by McKinney took second money. Italia was sold East at a big figure, took a trotting record of 2:14½ and this year has been shifted to the pace, at which gait she is showing wonderful speed. In 1900 three McKinneys were among the four starters for the stake, and they were awarded all the money. Eula Mac won first money, Tom Smith second and The Roman third. The filly won the fastest heat of the race in 2:17½, which is still her record. Tom Smith has reduced his mark since to 2:13½, while The Roman now has a record of 2:09½. From the above recapitulation of the results in the Occident during the past five years it will be seen that the stake is often won in slower time than 2:20, but that unless a colt can show faster than that he cannot be said to have anything like a mortgage on first money.

SALE AT OAKWOOD PARK STOCK FARM.

Forty head of carriage, work and road horses were sold by auction at the Oakwood Park Stock Farm, near Danville, Contra Costa county, last Saturday. The sale was conducted by Mr. Edward M. Humphrey, manager of the farm, and Louis Schaffer, the well known liveryman and auctioneer of Oakland, wielded the hammer. The horses sold were mostly by Major Ban, a thoroughbred sire, and out of Cleveland bay and trotting mares. A few by Chas. Derby and Owyhee were offered, but they were generally out of non-standard mares. The horses were not offered as a consignment from the farm's trotting stud.

Good prices were received throughout the sale, the average being close to \$150 for the entire lot. The old chestnut mare Maggie McGregor was one of the animals sold, and as her days of breeding are probably past, she only attracted a bid of \$20. The old mare was foaled in 1879 and is by Robert McGregor. She is the dam of Algoreg 2:11, W. W. Foote 2:15½, Tyana 2:16½, and Abouap 2:20½. She was stired to Chas. Derby this year.

The highest price paid during the afternoon was \$440 for a fine looking, large brown mare, 16½ hands high, by Major Ban, dam by Candidate. Her half sister brought \$175. They met her a week together and made a very fair team.

The sale was not advertised in the San Francisco papers, the only announcement being made through the Contra Costa county papers, consequently but few people from San Francisco were present. The farmers and horsemen residing in Contra Costa county turned out in large numbers however, and were lively bidders.

THE RUNABOUT HORSE.

Some one has described a runabout horse as "a nag with a good head, a bit of size, a bit of action all around, and a bit of speed." This about takes the matter in as well as may be, but it should be added that in this connection a "good head" means a "level head." A runabout horse must have plenty of sense—a quality in which, be it said, the average horse is singularly deficient. A lot of good runabout horses have been butchered by men trying to make real roadsters of them. A roadster needs a lot of speed, a runabout horse does not. The latter is a sort of a cross between a business horse and a pleasure horse. He must be able to jog along between stops and he must have sense enough to stand quietly when hitched. He is a valuable kind of a beast, the runabout horse and the fewer tricks he has about him the better. No frills are required. There is good money in breeding such horses and there is better in breaking them properly. A well broken runabout horse should be so fearless that he will go straight ahead with an automobile going by him, an automobile meeting him and an elevated train thundering over his head. This is trying him pretty high, but it is a situation he is bound to meet and he must be level enough in the head to behave himself in such a situation.—Breeders'

THE OCCIDENT STAKE.

In the classic Occident Stake of 1906, which is to be trotted on Saturday, August 25th, this year, there are a baker's dozen three-year-old trotters still eligible to start for this richest three-year-old stake on the Pacific Coast. Twelve out of this thirteen are colts, the only filly among them being Alex Brown's bay filly Red Blossom by Nashagak. The colts are Mrs. S. V. Barstow's br. c. Nearest McKinney by McKinney, Russell Gray's b. c. Walter G. by Nutwood Wilkes, Ray Dittus' b. c. Our Bells by Moubells, M. G. Gills' br. c. Kinney G. by Kinney Lou, W. C. McCully's blk. c. General Torres by Neernut, William Morgan's b. c. Crisis by Zombro, Thos. Smith's ch. c. Prof. Heald by Nutwood Wilkes, E. H. Todhunter's b. c. Gerald G. by Zombro, Geo. T. Becker's br. c. Silver Hunter by Zombro, Vendome Stock Farm's Alp Kinney by McKinney, Geo. L. Warlow's blk. c. Stanford McKinney by McKinney, and Sutherland & Chalmers' b. c. Sam G. by Stam B.

The fastest mile ever trotted in the Occident Stake was made last year by that fast son of Nutwood Wilkes, Mr. J. B. Iverson's North Star. He was beaten the first heat of the race by Princess Louise in 2:20, and the next two by Belmont in 2:17½ and 2:18½. North Star then settled down and won the fourth, fifth and sixth heats handily in 2:15½, 2:17½ and 2:18½, a remarkable performance for a three-year-old on a track that was only 1,000 yards long. Six days later he won the Stanford Stake in three heats after dropping the first to Athasham in 2:16, the Nutwood Wilkes gelding also setting the record for this stake by trotting the second heat in 2:15 and the next two in 2:16 and 2:17. Two weeks prior to the State Fair he had won the Pacific Breeders' Futurity at Santa Rosa in straight heats, setting the record of that rich stake at 2:13½ the first heat, equalling this time in the second and trotting the third in 2:16. North Star thus holds the record for all three of California's principal three-year-old trotting events.

In 1904 Almaden, Mrs. C. A. Durfee's colt by Direct, dam Rose McKinnon, won the Occident, which was a seven heat race that year. The fastest heat of the race was the first, won by Marvin Wilkes, a son of Don Marvin, in 2:18. Carlokini won the second heat in 2:21½ and the time got slower from that to the seventh, which was in 2:28. Almaden did not have to equal his two year old record of 2:22½ to win.

In 1903 the James Madison mare Team was the winner of the Occident, getting the first heat in 2:18½, the fastest of the race. Swift B. by Stam B. won the second heat and second money. Tuna's record is now 2:08½ and Swift B. has trotted to a mark of 2:02½. Both made their records on the Grand Circuit and will be raced there again this year.

The winner of the Occident Stake of 1902 was Alex Brown's handsome big bay gelding Aristo by Nashagak. Aristo won in straight heats in 2:21½, 2:17½ and 2:17½. The little McKinney gelding, Cuato, took second money that year. Aristo was afterwards sold for \$10,000 and taken East where he trotted to a record of 2:08½ and was a good winner. Aristo also won the Stanford Stake of 1902.

In 1901 the Occident Stake was won by Italia, a daughter of Zombro. Italia's race was a one, two, three affair and her heats were in 2:25, 2:23½ and 2:27½. Commander Muckle by McKinney took second money. Italia was sold East at a big figure, took a trotting record of 2:14½ and this year has been shifted to the pace, at which gait she is showing wonderful speed.

In 1900 three McKinneys were among the four starters for the stake, and they were awarded all the money. Eula Mac won first money, Tom Smith second and The Roman third. The filly won the fastest heat of the race in 2:17½, which is still her record. Tom Smith has reduced his mark since to 2:13½, while The Roman now has a record of 2:09½.

From the above recapitulation of the results in the Occident during the past five years it will be seen that the stake is often won in slower time than 2:20, but that unless a colt can show faster than that he cannot be said to have anything like a mortgage on first money.

A company known as the Idle Hour Stock Farm Company, recently organized, has bought the B. H. Plant Estate, known as the Idle Hour Stock Farm, Macon, Ga., and are going to make extensive improvements on the buildings, etc. It is their intention to make this a great wintering place for the trainer. Fifty thousand dollars will be spent in making the improvements, and everything will be in run-

NEWS OF THE ZOMBROS.

Geo. T. Beckers, owner of the stallion Zombro 2:11, writes us that his old mare Whisper, the dam of Zombro, which was 25 years old last March, foaled a nice large, handsome black stud colt on the 20th of June. The colt has both hind ankles white and a kite shaped star in forehead, with a narrow white strip in face. The sire of the colt is McKenna 2:17½, son of McKinney and Etta Wilkes 2:19½.

The best green trotter in Los Angeles is said to be Zomont by Zombro. He is out an Altamont mare and can trot in 2:12 now. Bellemont, record 2:20½ as a two-year-old and 2:15¾ as a three-year-old, is just as fast as Zomont. Both are in Will Durfee's string. His stallion Coronado 2:12¾, is also working nicely and will be a good horse in his class.

Frank Williams, who has Mr. William Morgan's horses, has two good trotters in Queer Knight 2:14½, that worked a mile in 2:13 last Thursday, and the green trotting mare Era by Zombro that won a matinee race last week in 2:22. This mare worked a mile in 2:16 last year and a half this year in 1:06¼.

Ezra Tilden has a two-year-old pacing filly by Zombro which paced a half in 1:40½ on Thursday of last week, and a pacing filly by Zombro out of an Altamont mare that is three years old and showed him a mile the same week in 2:16. She has stepped the first half on the Los Angeles track in 1:05½ and the last half in 1:04½. Tilden also has Gerald G., a three-year-old trotter, that has worked a mile in 2:23.

Mr. Beckers says he has three Zombros that are stepping to suit him. Helen Dare, trial last year in 2:15, Zombowette 2:16½, and Silver Hunter, the winner of this year's Occident and other stakes. The last named worked a mile in 2:19¼ and he should do, as he is hard to shake off, hanging on just like his sire did when racing.

Will Durfee drove Zomalta by Zombro a mile in 2:15; first half in 1:06, then pulled her up around the upper turn.

THE HORSE MARKET UP NORTH.

The Lewiston, Idaho, Tribune of June 22, says: Yesterday 150 head of horses were driven through Spalding to Genessee, from which point they will be shipped by J. Davis of Walla Walla to the Southern States. The horses comprise largely the cayuse class and were purchased in the Spalding neighborhood at prices ranging from \$6 to \$10 a head. At Genessee Mr. Davis purchased a carload from Frank Williamson and the entire shipment will embrace seven carloads.

The purchase of this class of horses is accepted by stockmen as introducing the final step in clearing the range of the Lewiston region of the surplus stock. Horses are no longer classed as a "drug on the market." About five years ago the horse market revived when buyers entered the field for the Government cavalry service. Later came buyers of the light draught horses and then followed purchasers of saddle horses, this latter in turn to be followed by those seeking to supply the markets of the large cities with heavy horses for teaming. Now buyers have entered the field for what was termed a few years ago "scrub ponies" or cayuses. It is estimated that during the past five years over 8,000 head of horses have been marketed out of the Lewiston region.

Tekoa, Wash., Blade: Charles Woods, whose ranch lies seven miles southeast of Tekoa on Pine creek, held an auction sale June 20, at which horses brought the following fancy prices: Single horses, \$280 and \$250 each, and one team at \$600 and another at \$500. About sixty head of horses were sold and brought from the above figures down to \$200. Of course, these were all good horses but within the past four years very few inferior horses have been raised in the Palouse country, and when this fact is taken into consideration these figures do not surprise us so very much.

North Yakima Republic: Newell & Sargent of Toppenish this week shipped 1,000 head of Indian ponies and draft horses to Miles City, Mont., to be auctioned off to the highest bidders. These horses have practically all been raised on the reservation by the Indians. Usually Indian horses bring low prices, but the demand for any kind of a horse has been so great in the past two years that almost anything will sell.

The building of the new railways in the Northwest and the developments in Alaska has created an unprecedented demand for heavy horses in the last two years. At one time practically every available draft horse had been disposed of, but the Indians, who raise small horses, have had a surplus on hand. It is from

this class of horses that the demand is being supplied at present.

Spokane Chronicle: There is a big demand for mules in Harrington and vicinity at present. J. E. Russell, a large wheat grower, living two miles east of town, buying ten head last week, paying the sum of \$2160, or an average of \$216 each. Mr. Russell will get enough mules to make a team for his combined harvester this year, thirty being necessary.

BUTTE DRIVING CLUB MATINEE.

Despite the unfavorable weather June 20th, five of the six races scheduled by the Butte Driving Club were pulled off, and the attendance was the best so far this season. The program was well arranged and each event was full of interest. The summary:

Mixed event for colts—Won by Mildred G., first and second heats in 3:00 and 3:02 respectively. Other entries, Thomas Morrow's Black Diamond, Dr. George Wells' Matilda, Charles McGarvey's Lena and W. R. Tonkin's Freechie.

Special pace, E. E. Smith's Prince Charlie, Irwin C. and Miss Georgie entered—First heat won by Irwin C., driven by Gus Threlkeld; Miss Georgie second. Time, 2:17. Prince Charlie was third in both.

Three-minute trot for colts—Bill Gemmel's Bess Osborne, W. A. Clark's Tertius and Buck, A. D. Galbraith's Pooka and Fussy B. entered; Fussy B. scratched—First heat won by Bess Osborne, Gus Threlkeld driving; Buck second; Ted Hayes, driver; Pooka, Dr. Garbraith driving, a close third. Time, 2:34. Second heat won by Tertius, Will Clark driver; Buck a close second, Pooka third. Time, 2:36. Third heat won by Tertius, half a length; Buck second, Bess Osborne third. Time, 2:35. Tertius broke badly in the first heat, Bess Osborne in the second and Pooka in the third.

Special mixed race, John Gratz' Idol, W. A. Clark Jr.'s Sallie Lunn, W. B. Orem's Carlsbad entered—Carlsbad was scratched. First and second heats won by Idol in close finishes, Sallie Lunn second both times. Time, 2:22½ and 2:20.

Two-forty trot and pace, Phil Trennery's Kitty, J. Boulet's Prince B., Silas King's Captain P., J. H. Turner's Almax entered—Captain P. scratched. First and second heats won by Kitty, owner driving; Prince B. second. Time, 2:28½ and 2:26.

The sixth event, a 2:35 trot, with five entries, was called off because of rain.

HORSES AT ST. PETERSBURG.

There are 37,000 droskies registered at police headquarters in St. Petersburg this summer, or one to about every thirty-three inhabitants, and during the winter season, when the wheeled vehicles are changed for sledges of similar pattern, large numbers of people come in from the country with horses to earn a little extra money.

The ishvoshtniks lead a nomadic life in the streets of the capital. As in other cities, certain locations are indicated where they may stand and wait for patronage, and when they are not engaged they return to these stations to eat and sleep, and remain there day and night continuously. Regardless of the weather, the horse may not see the inside of a stable, nor his driver the inside of a house for weeks at a time. Like the Bedouins of Arabia, they carry oats and hay constantly with them, and during the intervals of employment feed their horses by means of nosebags. Near every hack stand is a shop where they can buy chopped hay and oats for their horses, and coffee, soup, tea and other rations for themselves. There are also many peddlers wandering about the streets from whom the food and tea may be purchased. The animals are groomed as they are fed, when they are not waiting for fares, and their drivers are always rubbing and petting them. While waiting in front of a house or a shop the ishvoshtnik generally gives his horse a good rubbing down, and talks to him as if he were a human being. He calls him "my brother," "my little father," "my sweetheart," "my little white pigeon," and has other affectionate phrases and terms of endearment which the animal seems to understand.—W. E. Curtis, in Chicago Record.

"Save-the-Horse" Proves Cheap at \$5.00.

Troy Chemical Co., Binghamton, N. Y.
 Dear Sirs—Two years ago a very fine, well bred mare I got what seemed to be a bad sprain of the off fore fetlock which made her very lame. I blistered her. She was still lame and got worse when worked. I then tried another blister with same results.
 Last spring I bought a bottle of your "Save-the-Horse" after treating the mare with this for about two weeks I gave her some slow driving. She improved very much and by the time I had used up the bottle I was able to drive her twenty or thirty miles without any apparent bad effects; she now goes sound; I also with the same bottle removed two wind galls from her hind legs.
 Yours truly,
 MARTIN BURNELL.

ROD, GUN AND KENNEL

Conducted by J. X. DeWitt

GAME ORDINANCE KNOCKED OUT.

The Los Angeles decision has awakened the sportsmen of the State to what eventually will lead up to some radical changes in the present statutes—at present there is confusion in some minds as to just what is the law and what is not the law in regard to the powers of the county authorities. This vexed question emanated from changes made in the dove season, which is applicable to one phase of the law, or game and fish, maybe to another. The Stockton Mail recently took the matter up and in doing so seems to have given some pertinent information to the Chief Deputy of the Fish Commission, who, by the way, has the peculiar custom of interpreting some sections of the game or fish law from his own viewpoint instead of from the plain and mandatory language of the statute.

"It was announced by the Mail a few days ago that the open season for dove shooting would begin on July 1st, as provided for by the State law instead of August 1st as provided for by the ordinance of this county.

"This is true.

"There has been some discussion pro and con, owing to various interpretations put on the decision of the Appellate Court knocking out county game ordinances passed since 1902 (San Joaquin's was passed in 1904 and is therefore a 'dead one') and R. C. McDonald of this city wrote a few days ago to Charles A. Vogel-sang, the chief deputy of the State Game Commission. He has received the following reply, but lawyers say that he is mistaken in his interpretation of the Appellate Court's words:

"Dear Sir—I have yours of the 18th instant, and in reply permit me to say that the decision of the Appellate Court did not knock out county ordinances or decide the question whether or not Supervisors had the right to shorten seasons. It merely decided that the ordinance of Los Angeles county, known as the dove ordinance, was invalid, because it was prohibitive in its terms (being only one day), and so was held to be unreasonable. In other words, if they had allowed a two or three months' season that would have been a reasonable one. The other point regarding the rights of Supervisors to shorten seasons is being considered on appeal by our Supreme Court, that question having been raised by us. In other words, until the Supreme Court should say that the Supervisors have no such rights, we construe all reasonable county ordinances to be valid."

"A copy of the Appellate Court's decision is on file with the Superior Court here, and it seems to be plain enough. The reference to the one-day season of Los Angeles as being unreasonable is only what the lawyers call an 'obiter dictum'—that is, a side remark having no real bearing on the case at bar. Mr. Vogel-sang was evidently misled by this remark, as the lawyers think, into believing that this was the basis of the decision.

"According to the Appellate Court's decision the Los Angeles ordinance was knocked out because it was passed since the adoption of the constitutional amendment No. 25½, which was adopted in 1902. It contains a provision that the Legislature 'may' pass game laws. The Court holds in effect that this gives the State the exclusive right, thus taking authority away from the counties.

"The decision says: 'We are unable to see, however, any significance attaching to the manner in which the word "may" shall be read in this constitutional amendment, inasmuch as its obvious intent was to confer upon the Legislature alone authority to deal with the subject of fish and game, and in such legislation to relieve it from the necessity of enacting general laws applicable alike to the whole State, and the effect of which could only be to remove the necessity heretofore existing for delegation of power to local authorities.

"We are of the opinion, therefore, that any authority reposing in the Legislature to delegate legislative power to counties in reference to this subject was revoked by amendment No. 25½, and the failure and neglect of the Legislature to obey the plain mandate of the Constitution to assume the duty reposing in the State alone. This ordinance, therefore, having been adopted since the adoption of Section 25½, and since authority to delegate power with reference to the

subject has ceased to exist, it must be held to be invalid.

"Were it even a valid exercise of power, the ordinance upon its face is an unreasonable exercise thereof. The delegated power originally was with reference to shortening the season, which can only be held to be a period of time within which persons might exercise a natural right to hunt and kill the game belonging to the public, and not to enact an ordinance in its nature prohibitive."

"It will be noticed that the closing paragraph, which is the 'obiter dictum' referred to, is merely an aside remark. In effect it says that even if counties had the power to pass game laws, the Los Angeles ordinance would be invalid because it was unreasonable."

An instance of the dove season mixup is shown in Santa Clara county. According to Game Warden Koppel the dove season does not open, under the county ordinance, until August 1, notwithstanding the Los Angeles decision and the last regular session of the Legislature which only reduced the bag limit from 50 to 25. Sportsmen are warned to heed this ruling.

A report from Beekwith Pass, Plumas County, on June 15th states that because of so much snow and rain during the spring months the Feather River is higher now for the time of the year than it has been for years. Up till recently it was so high that the citizens could not enjoy the sport of fishing. The sport now is being pursued with vim unexcelled anywhere.

The Feather River and Grizzly creek are being literally swarmed with fishermen.

This year's fishing season opened well in Monterey, and local fishermen—both those who fish for the market and those who fish for sport—have been making big catches of salmon and sea bass.

The salmon run has so far been hardly as great as usual, and the fish taken have all been small or medium sized. Plenty of them are being taken, however, and their capture affords great sport.

Fishermen are complaining of the extreme scarcity of sardine bait, usually plentiful at this season.

More sea bass are being caught in the bay than have been taken for many years past, among them some exceedingly large specimens.

A later report from Santa Cruz, on the opposite shore of the bay, states: Salmon fishing is commencing and there is good sport trolling for those fish. If the sport were advertised to the people of the State there would be many sportsmen come here to enjoy it. There is no class that will spend and leave more money in a town than sportsmen, and we should let all know that Monterey bay is the best place on the coast for fishing. In writing to friends in other towns tell them of the fact.

The San Francisco Fly Casting Club regular trophy contests for this year have been postponed until next season. Instead a small tournament will probably be arranged to take place at Stow Lake.

A number of the members meet at the lakeside, generally about every two weeks on a Saturday or Sunday, when they indulge in impromptu contests in the different events.

A report from the club's preserve in the Truckee states that in a week or two fly fishing should be at its best. Mr. J. Van Allen, who was at that point in the river recently, has had excellent sport. Secretary Tom Kierniff was lately the pleased recipient of a six and one-half pound rainbow, which was caught near Boca.

Smith One-Trigger Gun Won.

Mr. F. E. Rogers of St. Louis, Mo., on the 17-yard mark, won the seventh Grand American Handicap at Indianapolis, Ind., June 21, 1906, with the score of 94 out of 100 targets in a gale of wind that disconcerted amateurs and professionals alike. This capture of the year's banner event in the shooting world was done with an L. G. Smith automatic ejector gun, fitted with the Hunter one-trigger. Mr. Rogers, however, is credited with being an old time shooter, and his work in this particular contest indicates that he is no novice with the shotgun and knows what a good one will do. In the amateur championship of the last day he scored 137 out of 150.

FISH PROTECTION IN SANTA CRUZ.

A lively session marked the proceedings of the last meeting of the Boulder Creek Game and Fish Protective Association, indeed the late meetings have proven hotbeds of discussion over matters relating to fish and game interests, due to the peculiar and significantly lax enforcement of fish and game laws in that end of Santa Cruz county.

That little or no attention has been paid to the needs of the San Lorenzo or its tributaries, beyond the issuance of a couple of reports and the diffusion of a bunch of well-meaning hot air, is a fact that has proven a bone of contention to local sportsmen.

Coals of fire were heaped on an already sweltering association of sportsmen by the discovery of a fish trap on Kings Creek by two members of the club. The trap was so placed as to command the entire stream, being a cleverly constructed affair of willows and osiers, evidently the handiwork of Japanese. It had undoubtedly proven the death of thousands of fish.

It is pressing time that an energetic, impartial enforcement of fish laws was begun here before the splendid results from the fish hatchery, just beginning to be plainly manifested and appreciated by fishermen, were nullified by unchecked slaughter and wholesale extermination.

The county fathers seem, if the history of past county game and fish laws legislation is anything to go by, to have been recklessly careless of the wants or needs of a grand fishing and hunting country.

ANGLERS.

A list of anglers who were out recently has been furnished by the sporting store of F. Schilling & Son as follows: Dr. Gerlach, limit, Smith's creek; Frank Garrison, 25, Arroyo Honda, run from 10 to 15 inches; Wm. Keaton, 28, Arroyo Honda, run from 10 to 15 inches; I. L. Koppel, 35, Smith's creek; Chas. Faser, 30, Smith's creek; C. Saunders, 40, Arroyo Honda; Leslie King, 25, Stevens creek; Eugene Prinsville, 50, Stevens creek; Bert Baker, 50, Stevens creek; Herman Hobson, 40, Arroyo Honda; Grove Desalido, 35, Coyote; Robert Leman, 30, Coyote; Ed Kennedy, 30, Almaden; C. Lovell, 40, Llagas; Chas. Shelbourne, 45, Llagas.

Hommrich's sporting store has given the following list: Ed Draper and J. Chilton, limit, on Las Animas; W. Edwards and Jack Shelton, well filled baskets, on the Packwood; J. Smith, 50, on the Arroyo Honda; T. Barrett, 40, on Almaden; J. H. Freyschlag, 35, on Llagas; G. Pfeiffer, 30, Campbell's creek; V. Hemphill, limit, Stevens creek; Charles Edison, 50, Uvas; T. Daniels, 22, Stevens creek; G. Machado and R. Volgreene, 34 and 25 respectively, on the Arroyo Honda; F. Brundage, 35, Llagas.

Frank Baker and Louis Sawyer also returned with well filled baskets from Smith's creek.

When is a trout not a trout? That is a question that has been agitating the minds of Oakland fishermen, especially amateurs, for the past few days.

The query elicited the fact that very few men know the varieties of fish that are caught in the lakes, rivers and creeks of the county.

L. Ligori, a local fish market man, secured a plain every day chub which was caught in the San Joaquin. All experts on the line of fishology stated emphatically that it was a chub. Mr. Ligori, knowing the variance of opinion on the fish subject, placed a placard exhibited asking the passerby to say what kind of fish it was. Each answer was recorded. The result of one afternoon shows the following diversity of opinion: Five men swore it was a perch, two declared it was a sucker, seven were positive it was a chub, three were willing to bet money it was a young salmon, one man was emphatically sure it was a lake trout, three men were dead sure it was a smelt, and one man said he was willing to bet that it was a river trout.

Expert testimony declares it is a chub, and a chub it is. The matter has created considerable comment among the "fishologists."

Black bass are more plentiful in the streams in the vicinity of Marysville recently than they have ever been, and the sportsmen are enjoying excellent fishing. There are so many "good places" that it is no trouble for anyone wanting to fish to get a string of the bass. The fish range in size from ten pounds down.

GAME AND FISH IN SACRAMENTO COUNTY.

Game Warden George Neale of Sacramento in a recent interview aptly describes fish and game conditions in his bailiwick in the following enthusiastic and intelligent manner:

"The season has been so late this year that the doves have just begun nesting and every mother dove that drops to the gun means two little fledglings that will wait, and call and call for the dead mother and their usual meals, until they die of slow starvation. No true sportsman will go afield until the 15th at least, as a lapse of two weeks after the season opens will allow the little ones to become self-supporting.

"The true kernel of game protection lies in the beginning with the young of the species to be protected. Last year we had an early season and as the shooting did not begin until July 15th, the result is that we have more doves in Sacramento county than we have had in many years. The decision of the Supreme Court rendered in the Los Angeles case has simply raised 'Ned.'

"The blame, if blame there is, must be laid at the doors of the Los Angeles Board of Supervisors, who made a farce of the provisions of the County Government Act, which allowed Supervisors to shorten the open season in their respective localities, by fixing the open season in their county at one day. A man was arrested for shooting during the close season as they marked it. He appealed to the Supreme Court, who declared the State law all powerful, and this decision annulled the power of all supervisors to shorten the close season.

"I had a consultation with the State Game and Fish Commission recently and as they agreed with me that the decision of the Supreme Court applied (strictly speaking) to Los Angeles county, I decided to enforce the provisions of the county government act in this county, this being the instructions of the commission. Now our Superior Judge and one District Attorney have advised me that I have no right to enforce the law after July 1st, and that means that people can go out and shoot the mother bird off the nest, leaving the little ones to starve. Oh, it is bad! and that causes me to say that anyone who shoots a dove before July 15th would murder.

"I just wish I could take a few Eastern lovers of nature out on the Haggin grant, where I planted the Eastern quail last year, and let them hear the musical notes of the little brown fellows. 'Bob White,' 'Bob White' sounds from all sides, for the quail have multiplied wonderfully, and I'll just bet that that musical piping would bring back their boyhood days and their childhood home very vividly. I found lots of the little fellows in my last trip of inspection and ran across one nest secreted among the long grass in a fence corner that had seventeen eggs in it. They are tame and show up around the ranch house at all hours. The campaign instituted against the blue jays last year, when thousands of these pests, who live on quail's eggs, were destroyed, have aided the propagation of the quail materially. I am glad to see that blue jay shoots are becoming popular.

"Young ducks are more than plentiful this year, but the parent birds are nesting far out on the plains, owing to the fact that the water in the overflow is so high this year. Ducks nest away from the water, sometimes a mile away from the nearest pond, and as the water is as high in the overflow basins this summer as it is during the winter (a fact I have not known for sixteen years), no flap-jacks are to be seen on the nearby lakes, where they are usually very plentiful.

"Another effect of this plentitude of water has been to upset all my theories regarding the black bass. I had supposed that the fish spawned about the same date each season, at least such has been the results of years of observation. Being cold-blooded, I did not suppose that the temperature of the water made any particular difference, but this year I find it does. The bass in the slack water in this locality spawned as usual, but the bass in the deep cold water of the big lakes have not spawned yet, a proof that they do heed the temperature of the water. The bass are not biting yet on account of this deep water, and bass fishing will be late this year, but when they get hungry there will be lots of grand sport. If the Eastern anglers knew the class of bass fishing that can be had in the Big Lake country, back of Courtland, in this county, they would come here by the thousands to enjoy the sport. I am of the opinion that this class of sport will get better every year, now that the Sacramento Valley Bass Club has been formed.

"This club will have over a thousand members,

all of them the very best people in the country, including the Governor and most of the State officials and they mean business. The next lot of Greek and Italian fishermen who decide to make a foray into the Big Lake country, which is the natural home of the bass in California, will discover that they are not running up against a game warden or two, but they will find themselves confronted by all the residents of this rich valley, who will see that they are prosecuted to the utmost extent of the law and who will spare no expense to put them behind the bars if they insist in murdering bass. We have the best natural bass waters in the world. All we have to do is to insist on lawful protection, and the waters from San Francisco to Red Bluff will soon be alive with these grand game fish."

The Oregon Fish and Game Association met at Portland recently for the purpose of considering important items of interest to sportsmen.

A. E. Gebhart, as chairman of the committee appointed to draft a bill to be presented to the Oregon Legislature at the next session, submitted his report on the work of the committee, together with a draft of the bill, which was adopted by the association.

The bill, upon which the association hopes to secure favorable action, provides licensing of all trout fishermen over the age of 16 in the State of Oregon. The license is to be issued by the Secretary of State through the County Clerks of each county, and each applicant is to be taxed the sum of \$1, which will give the bearer of a license the privilege to fish for trout during the open season in any river, stream, brook or lake in the State of Oregon for a period of one year.

The revenue derived from this taxation is to be devoted by the State towards the establishment and maintenance of trout hatcheries at different points to be selected by a commission to be appointed by the Governor for the purpose of looking after this propagation enterprise.

Provisions are also made in the bill for the punishment of any one violating the regulations provided therein by a fine of not less than \$10 nor more than \$50 for each offense.

By this means the game association hopes to secure the propagation of trout in Oregon streams in the most improved manner, and thereby insure good fishing for all sportsmen.

Game Warden Reed and Superintendent Shelby have finished their labors of planting trout fry from the Brookdale hatchery at the lower end of Santa Cruz County.

They have placed 200,000 in the creeks, which include the following: McGrath, Corralitos, Hazel Dell, Upper Soquel and Brown.

They will now pay their attention to the streams in the Boulder end of the county, and expect to place in the county about 1,000,000 fish.

Before the season is ended Mr. Reed expects to have stocked the streams of that county with 1,000,000 young trout.

Averages Reported.

Sioux City, Ia., June 12-14, C. G. Spencer won first general average 524 out of 540, shooting "DuPont." H. G. Taylor won second general average 523 out of 540 shooting "New E. C." (Improved.)

Buffalo, N. Y., June 12-14, J. A. R. Elliott won first general average, 430 out of 480 shooting "New Schultze." John W. Hendrickson won second amateur and third general average 425 out of 480, shooting "DuPont."

The New York City Cup, emblematic of the Championship of the State of New York, was won by J. A. R. Elliott, shooting "New Schultze."

The Infallible Handicap was won by Windsor Morris, shooting "DuPont."

Fairmont, W. Va., June 12-14, W. R. Crosby won first general average 580 out of 600, shooting "New E. C." (Improved.) J. R. Taylor won third general average, 574 out of 600, shooting "New E. C." (Improved.) Second amateur average was won by an amateur shooting "New E. C." (Improved) with 572 out of 600. L. S. German won third amateur average, 562 out of 600, shooting "DuPont."

The fishing season is now at its height and hundreds of San Joseans are making weekly excursions into the adjacent mountains in quest of trout. The streams of Santa Clara County are productive of many fish, but many local anglers have gone into Santa Cruz and Monterey Counties on sundry trips of several days or a week.

FOR THE PROTECTION OF BLACK AND STRIPED BASS.

The black and striped bass in Sacramento waters are to have absolute protection in the future, as every lover of the fish is to be enlisted in an organization to be known as the Sacramento Valley Bass Club, and each member is to officiate as an officer to protect this much-hunted fish. The organization will include in its ranks all lovers of the rod and reel from Rio Vista to Redding, and each member will donate \$1 per year to be used in prosecuting those who persist in netting these game fish.

The new bass club will be as firmly bound together in its aims as any fraternal society, and its spies will be in every locality, so that any attempt in the future to take this valuable food fish in nets will be punished to the full extent of the law.

This movement has been on foot for some time and the members already have the goods on certain parties who have been seining nearby lakes, and plans are being laid to make an example of these lawbreakers as soon as the club gets in full swing.

At the meeting held June 16th M. J. Dillman was selected as president and Prentiss Maslin secretary. It was decided to make a decided stand against the encroachment of the Greek fishermen from Black Diamond, who raid the Big Lake county with seines and take tons of this valuable food product.

An executive committee, to consist of the president, secretary, George Neale, R. R. Flint and Frank Newbert, were chosen, who will oversee the prosecution of all law violators and attend to all other important matters that may be brought to the attention of the club.
